Policy Narrative

[Page 1 of 1]

All college employees will have access to a standard method of processing a dispute regarding a perceived violation of written college policies or procedures. A grievance is defined as any substantial unresolved dispute regarding the implementation of written college policies or procedures. This policy and procedure does not apply to any disputes regarding a policy and its associated procedures, which contain its own grievance procedure.

The process developed to ensure this right shall be known as the Grievance Procedure.
