

Survey of 1999 Graduates

Overview Report

**North Idaho College
Office of Planning, Assessment & Research
Fall 2002**

**NIC Alumni Survey
Overview Report, Fall 2002
1999 Graduates**

As part of the College's outcomes assessment activities, an alumni survey was given to all NIC graduates from the fall 1998, spring 1999 and summer 1999 semesters. Of the 491 surveys that were mailed, 57 student responses were returned. The mailing was done July 1st to August 15th, 2002 with the results sent back to NIC in the fall of 2002.

The survey instrument used is a nationally recognized instrument published by the American College Testing (ACT) Service. It is designed to help 2-year institutions evaluate the impact of their programs, services and experiences on students by assessing the perceptions of its graduates along with providing a detailed employment and education history. Students were able to complete the 4-page survey in about 25 minutes.

ACT includes five different reports along with the original source data. These reports were based on the NIC data and included a Graphics Report, a Summary Report, a Statistical Comparison Report, a Normative Data Report, and a report which isolated the responses of several subgroups of NIC students (such as full-time and part-time students, male and female students, older and younger students, etc.)

College Impressions

MAJOR REASON FOR SELECTING NIC – Of the 57 students responding to the survey, the top three major reasons for selecting NIC were “convenient location”, “offered the courses I wanted” and “availability of scholarship or financial aid.”

WOULD STUDENTS CHOOSE NIC AGAIN - Of the 57 students responding to the survey, 89.3% indicated they would choose NIC again (64.3% definitely and 25.0% probably).

PREPARE FOR CONTINUING EDUCATION - Of the 57 students responding to the survey, 100% indicated that NIC prepared them adequately or better. (42.9% exceptionally well, 37.1% more than adequately and 20.0% adequately)

COMPARISON OF QUALITY OF EDUCATION AT NIC WITH OTHER COLLEGES - Of the 57 students responding to the survey, 75.0% indicated that NIC provided better or about the same quality of education with that of other colleges. (37.5% better and 37.5% about the same)

College Experiences

Out of 15 areas for personal growth, the top five areas of highest growth due to educational experiences are NIC are shown below in order of greatest contribution.

Personal Growth Areas	Level of Satisfaction (3=very much, 2=somewhat, 1=very little)
1. Persisting at difficult tasks	2.31
2. Organizing your time effectively	2.30
3. Writing effectively	2.24
4. Speaking effectively	2.23
5. Working cooperatively in a group	2.22

Student Comments

Of the 57 students who completed the survey, 20 students or 35.1% of the respondents took time to add written comments to the survey form. The highest number of comments made by students was about the supportive and caring environment at NIC.

The wealth of information in the survey reports is extensive. All survey data will be placed on reserve in the Molstead Library. If you have questions about the survey or its results, please contact Kathy Christie, Assistant Vice President for Planning and Assessment, at 769-3403.
