Dear Students,

Let me be the first to welcome you to North Idaho College! As the College President, I can assure you that you have made an excellent decision by selecting North Idaho College as your college of choice.

You will soon discover that NIC’s faculty and staff are committed to academic excellence, instructional innovation, lifelong learning, and student success. You will also find a supportive, nurturing environment where you can develop new skills, explore new career opportunities, and gain new perspectives on the world around you.

Be assured that your time at North Idaho College will be spent in enriching, engaging, and inspiring intellectual pursuits. You will also be gaining new friends and developing new relationships that may well last a lifetime.

I wish you the best and encourage you to take full advantage of this exemplary institution. I am very proud to be a part of your educational experience and I know you will be glad you chose North Idaho College.

Sincerely,

Michael L. Burke, Ph.D.
President

---

NIC MISSION STATEMENT

North Idaho College is committed to student success, teaching excellence, and lifelong learning.

As a comprehensive community college, North Idaho College provides quality educational opportunities that expand human potential and enhance the quality of life for the students and the communities it serves.
## College Calendar

### August 2006

1. Summer Sessions I and III grades due from faculty.
2. Payment due for students registered for Fall Semester by July 15. If registering after July 15, payment due Sept. 15.
3. Summer Session I and III GPAs posted to NICOnline by Registrar’s Office.
4. Textbooks available for Fall Semester.
5. Carpentry and Landscape Technology summer blocks end.
6. Faculty return to campus.
7. Financial Aid charges begin at the Mica Peak Exchange Bookstore.
8. New Student Welcome.
11. Financial Aid Bookstore charges continue (through noon on the 31st) at the Mica Peak Exchange Bookstore.
12. Fall Semester course add/drops.

### September 2006

1. Fall Semester course add/drops continue until 2:30 p.m.
2. Labor Day Holiday - campus closed.
3. Financial Aid checks disbursed in the Lake Coeur d’Alene Room of the Student Union Building.
4. Payment due for Fall Semester. Last day for 100 percent refund.

### October 2006

1. Campus Visitation Program “First Friday.”
2. Incomplete grades due for Spring Semester and Summer Sessions.
3. Midterm week.
4. Midterm grades due from faculty
5. Advising Day. Classes that meet at 4 p.m. or later are in session.

### November 2006

1. Campus Visitation Program “First Friday.”
2. NICOnline registration begins for current students for Spring Semester. Payment due on or before Dec. 15.
3. Last day to withdraw from regular-length Fall Semester courses or college. No refunds.
4. Thanksgiving Holiday - campus closed.
5. Registration begins for new and former students for Spring Semester.

### December 2006

1. Campus Visitation Program “First Friday.”
2. Spring Semester payment due for students registered by Nov. 30. If registering after Nov. 30, payment is due Feb. 5.
3. Curriculum Day. No classes in session.
5. Final exams week.
6. Fall Semester ends.
7. Christmas Day Holiday.
8. Fall Semester grades due from faculty.
January 2007

1 New Year’s Day Holiday - campus closed.
4 Fall Semester GPAs posted to NICOnline by Registrar’s Office.
8 Textbooks available for Spring Semester.
9 Faculty return to campus.
9-12 Financial Aid Bookstore charges begin at the Mica Peak Exchange Bookstore.
15 Martin Luther King, Jr. Holiday - campus closed.
16 Spring Semester begins.
16-18 Financial Aid Bookstore charges continue through noon on the 18th at the Mica Peak Exchange Bookstore.
16-22 Spring Semester course add/drops through 5 p.m on Jan. 22.
25 Financial Aid checks disbursed in Lake Coeur d’Alene Room of the Student Union Building.

February 2007

2 Campus Visitation Program “First Friday.”
5 Payment due for Spring Semester. Last day for 100 percent refund.
19 Presidents’ Day Holiday - campus closed.
26 Incomplete grades due for Fall Semester 2006.

March 2007

1 Summer Session Financial Aid Applications available from Financial Aid Office.
2 Campus Visitation Program “First Friday.”
5-9 Midterm week.
13 Midterm grades due from faculty.

April 2007

2-6 Spring Break - no classes scheduled.
9 Last day to withdraw from regular-length Spring Semester courses or college.
12 Advising Day. Classes that meet at 4 p.m. or later are in session.
16 NICOnline registration begins for current students for Summer Session and Fall Semester by appointment. Payment due on May 21 for students that register for Summer Session by May 4. Payment for Fall Semester due on or before August 1.

May 2007

4 Campus Visitation Program “First Friday.”
7 Registration begins for new students for Summer Session by appointment in Advising Services.
11 Curriculum Day. Classes that meet at 4 p.m. or later are in session.
14-17 Final exams.
14-18 Book Buy Back at Mica Peak Exchange Bookstore.
17 Spring Semester ends.
18 Commencement 10 a.m. Christianson Gymnasium.
21 4-week and 8-week technical program blocks begin.
21 Payment due for students registered for Summer Session by May 4. If registered after May 4, payment is due June 11.
22 Spring Semester grades due from faculty.
23 Registration begins for new and former students for Fall Semester. Payment is due August 1.
25 Memorial Day Holiday - campus closed.
30 Summer Session textbooks available.
As a student, there are many different types of information that you have a “Right to Know.”

**STUDENT RECORDS (CONFIDENTIALITY)**

The Family Educational Rights Privacy Act of 1974 (FERPA) requires that North Idaho College adopt guidelines concerning the right of a student to inspect his or her educational record. The information on these pages is designed to assist students in knowing the guidelines and protecting their confidentiality.

**Release of Personally Identifiable Records**

The college does not permit access to or the release of educational records, or personally identifiable information other than “directory information” listed below without the written consent of the student, to any other party other than the following:

- Administrative/support staff and college faculty when information is required for a legitimate educational interest within the performance of their responsibilities to the college, with the understanding that its use will be strictly limited to those responsibilities.
- Federal and state officials requiring access to educational records in connection with the audit and evaluation of a federally- or state-supported educational program or in connection with the enforcement of the federal or state legal requirements which will not permit the personal identification of students and their parents to other than those officials. Such personally identifiable data shall be destroyed when no longer needed for such audit, evaluation, or enforcement of legal requirements.
- Agencies or individuals requesting information in connection with the student’s application for, or receipt of, financial aid.
- Organizations conducting studies for, or on behalf of, the college for purposes of developing, validating, or administering predictive tests; administering student aid programs; and improving instruction. Such studies shall be conducted in such a manner that will not permit the personal identification of students by persons other than representatives of such organizations, and such information shall be destroyed when no longer needed for the purposes for which it was provided.
- Accrediting organizations in order to carry out their accrediting functions.
- Any person or entity designated by judicial order or lawfully issued subpoena, upon condition that the college makes a reasonable effort to notify the student of all such orders or subpoenas in advance of the compliance therewith.
- Information from educational records may be released to appropriate persons in connection with an emergency if the knowledge of such information is necessary to protect the health or safety of a student or other person(s).

**Directory Information**

The term “directory information” at North Idaho College is defined as including:

1. Student’s name
2. Student’s address
3. Student’s phone number
4. E-mail address
5. Dates of attendance
6. Freshman/sophomore classification
7. Previous institutions attended
8. Major field of study
9. Awards/honors (including Dean's List)
10. Degree conferred (including dates)
11. Past and present participation in officially recognized sports and activities
12. Weight and height of members of athletic teams.

Verification of enrollment is given.

Students may request through the Registrar’s Office that the college not release directory information.

The Registrar’s Office will assist students who want to inspect their records. Records covered by FERPA will be made available within 45 days and the college may charge reasonable fees for preparing copies for students. This includes records that are kept in the following offices:

1. Admissions
2. Registrar
3. Financial Aid
4. Veteran’s Services
5. Student Activities
6. Intercollegiate Athletics
7. Vice President for Student Services

The college reserves the right to have a college representative present during the review of the student’s record and the representative may offer interpretation of the data within the record.

Some records may be withheld by the college. For example, academic transcripts are routinely withheld if the student has a financial obligation to the college. Medical records may be released to the student’s physician rather than to the student. Students may not inspect financial information submitted by their parents, confidential letters associated with admissions, and records to which they have waived their inspection rights. In the event a record contains information about other persons, the college will release only the portion of the record that pertains to the student.

Finally, the college will not release records that are not owned by the college.
FAMILY EDUCATIONAL RIGHTS & PRIVACY ACT OF 1974 (FERPA) HEARING PROCESS

Upon examination of records, a student who believes that his or her record is inaccurate or misleading can request a formal hearing. Requests for a hearing should be directed in writing to the Registrar’s Office. When a date, time, and place for the hearing has been established, a student may present evidence at the hearing and be represented by an attorney, at the student’s expense. The hearing panel will include the Vice President for Student Services or other appointed designee and the student’s advisor/instructor. The hearing process does not replace other processes for student grievances.

The decision of the hearing panel will be based solely on the evidence presented at the hearing. A written summary of the hearing will be prepared and distributed to all parties. The summary will include the reasons behind any decisions made by the hearing panel. The student’s records may be amended in accordance with the ruling of the hearing panel.

A student may add comments to his or her record if the student is not satisfied with the ruling of the hearing panel. Such comments will be released whenever the records in question are disclosed.

Students who believe the hearing panel results are in error may contact the United States Department of Education, Room 4074, Switzer Building, Washington, D.C. 20202.

DRUG FREE SCHOOLS AND CAMPUSES ACT

NIC is committed to maintaining an environment of teaching and learning that is free of illicit drugs and alcohol. The college prohibits illegal possession, consumption, manufacture, and distribution of alcohol and drugs by students in college-owned, -leased, or -operated facilities and on campus grounds. Individuals who violate college policies, city ordinances, state, or federal laws may be subject to disciplinary action and/or criminal prosecution. Student sanctions, as detailed in the Student Code of Conduct, may include warning, censure, fines, disqualification, suspension, expulsion, restitution, as well as required attendance at educational programs. More information is available at www.nic.edu/ferpa/drugpolicy.

CAMPUS SECURITY POLICY AND CAMPUS CRIMES STATISTICS ACT

Higher education institutions are required to publish and provide campus security information to students and staff. For complete information on NIC’s campus safety policies, programs, and campus crime statistics stop by the Campus Safety Office in the River Building, #15, at 905 River Avenue, Coeur d’Alene, ID 83814. Phone 208.769.3310.

DISRUPTIVE, HOSTILE, AND VIOLENT BEHAVIOR POLICY

NIC’s policy against disruptive, hostile, or violent behavior applies to all NIC employees, students, and visitors to campus. The prohibition against disruptive, hostile, or violent behavior applies to conduct which occurs in classrooms, in instructional environments, on NIC controlled sites, or during NIC sponsored activities.

Disruptive, hostile, or violent behavior includes, but is not limited to, behavior that is intended to and/or has the effect of threatening, intimidating, and/or harassing NIC employees, students, and/or visitors, or otherwise detracting attention from instructional or other college activities.

FINANCIAL AID REFUND/ WITHDRAW POLICY

Federal law requires that when you withdraw during a payment period or period of enrollment, the amount of federal financial aid that you have “earned” up to that point is determined by a specific formula. If you received (or NIC received on your behalf) less assistance than the amount that you earned, you will be able to receive those additional funds. If you received more assistance than you earned, the excess funds must be returned.

SERVICES FOR STUDENTS WITH DISABILITIES

NIC offers assistance to all students who have a documented disability. Services include, but are not limited to classroom accommodations, readers, scribes, extended time and/or alternate testing and learning formats, large print text, Brailled text and materials, tactile materials, note-takers, taped texts and materials, interpreters, assistive technology, information and referral service, as well as support through the process of enrollment, registration, and advising.

For more information, contact NIC’s Center for Educational Access, at 769.5947.

STUDENT CODE OF CONDUCT

This document is a codification of disciplinary regulations enacted to govern the conduct of students on campus, or at authorized NIC activities on or off campus. Acts in violation of federal, state, or municipal statutes come under violation of this code. The Code of Conduct contains descriptions of prohibited behaviors such as academic dishonesty, physical abuse, sexual abuse, hazing and harassment, campus disorders, physical safety, misuse of weapons and firearms, and drug and alcohol use.

The code also includes the process by which determination of guilt or innocence is made and how penalties are assessed.
College Terminology

North Idaho College acknowledges Pueblo Community College, Oklahoma State University, and Mr. Bill Etheredge for their contributions to this glossary of college terminology.

Ability to Benefit: Students who have not graduated from an accredited high school and have not successfully completed a GED can be accepted as matriculating (degree-seeking) students by meeting or exceeding the minimum required scores on all three sections (math, writing, and reading) of the COMPASS placement exam. Students who do not meet the Ability to Benefit testing requirements have several options: 1) retake the entire COMPASS test (once) and meet score requirements; 2) complete the GED; 3) attend as a non-matriculating (non-degree) student. Only matriculating (degree-seeking) students may apply for Financial Aid.

Academic Advisor: An academic advisor is a full-time faculty member or advising staff person who is trained to assist students with educational planning and to promote a successful college experience.

Academic Load: An academic load is the number of credit hours taken in one semester.

Academic Probation: All colleges require students to maintain a minimum cumulative grade point average (GPA) to remain in school. At NIC, students who enroll in 6 or more credits will be placed on academic probation when their cumulative GPA falls below 1.75. Students on probation must either earn at least a 2.0 during the next semester or raise the cumulative GPA to 1.75 or above. Students who fail to meet the GPA requirements will be suspended from college for one semester.

Academic Suspension: A student on academic probation will be suspended for one semester at the end of a probationary semester if he/she does not maintain an NIC cumulative GPA of at least 1.75 or a semester GPA of at least 2.0. A student suspended after Fall Semester may not enroll in courses the following Spring Semester. Anyone suspended after Fall Semester may not enroll in courses the following Fall Semester. In extraordinary cases, students can petition the Admissions and Academic Standards Committee to grant exemption from suspension.

Address: Permanent - The student's home address. Residency is determined by this address. Mailing - The address used by a student while he/she is attending NIC if different from permanent address. Temporary - The address used for a short time if the local and permanent addresses are not being used.

Alumni: People who have graduated from the institution. A male is called an alumnus, while a female is called an alumna.

ACT and SAT: These are acronyms for the American College Test and the Scholastic Aptitude Test. Both tests are designed to measure a student's level of knowledge in basic areas such as math, science, English, and reading. Colleges may require the results of either the ACT or SAT before granting admission. NIC does not require ACT or SAT scores, but these scores may be used to satisfy assessment requirements.

Associate Degree: The associate degree is granted upon completion of a program. Associate of arts and associate of science degrees are awarded to students who successfully complete programs designed for transfer to a baccalaureate-granting institution. The associate degree requires completion of a minimum of 60 semester credit hours with a cumulative GPA of 2.0. Associate of Applied Science Degree: This degree is awarded to students who successfully complete a program designed to lead directly into employment in a specific career. The associate of applied science degree requires completion of a minimum of 64 semester credits of 100 level or above courses with a cumulative GPA of 2.0 (a “C” average).

Audit: A student who does not want to receive credit or a grade in a course may audit the course. Audited courses will not fulfill graduation requirements and do not affect a student's grade point average. The application process and fees for auditing a course are the same as if a student were enrolling for credit. Course enrollment may be changed from credit to audit only during the drop/add period. With the instructor's permission, course enrollment may be changed from audit to credit during the first four weeks of the semester or the first two weeks of Summer Session.

Bachelor's Degree (or Baccalaureate Degree): This is the undergraduate degree offered by four-year colleges and universities. The bachelor of arts degree requires that a portion of the student's studies be dedicated to the arts - literature, language, music, etc. The bachelor of science degree requires that a portion of the studies be in the sciences - chemistry, biology, math, etc. The minimum credit hour requirement for a bachelor's degree is 120 hours.

Bookstore: All colleges have bookstores. Bookstores generally stock the books and materials required in all the courses offered at the institution. Bookstores also provide basic items and clothing items.

Business Office: The office responsible for all financial transactions of the institution. It may also be called the Bursar's Office or the Cashier's Office on some campuses.

Catalog: College catalogs provide all types of information parents and students need to know about a school. It typically includes the institution's history and philosophy, policies and procedures, accreditation status, courses of study, degrees and certificates offered, physical facilities, admission and enrollment procedures, financial aid, student life activities, etc. They are considered the student's contract with the institution.

Certificate Programs: Certificate programs are designed to provide specific job skills.

The College Level Examination Program (CLEP): This program can be administered to students who desire to obtain college credit by taking proficiency tests in selected courses. If the student scores high enough on the test, college credit can be awarded. There is a charge for each test taken. Information concerning an institution's CLEP test policies can be found in the institution's catalog.

COMPASS: An English, reading, and math assessment that determines the most appropriate entry for student enrollment.

Core courses: These are general education courses within various disciplines that require a C- or better to satisfy the distribution requirements for an associate degree.

Counselor: A counselor is a professional who is trained to assist students in overcoming personal barriers to success.

Credit Hours: Courses taken in college are measured in terms of credit hours. Typical college courses are 3 credit hours. One credit is approximately one hour of instruction a week for a semester.

Curriculum: A curriculum is composed of those courses outlined by an institution for completion of a program of study leading to a degree or certificate.

Degree Requirements: An institution's requirements for completion of a program of study. Requirements may include a minimum number of hours, required GPA, and prerequisite and elective courses within the specified major and/or minor areas of study.

Degrees: Degrees are rewards for the successful completion of a program.

Department: A department is the basic organizational unit in a higher education institution and is responsible for the academic functions in a field of study. It may also be used in the broader sense to indicate an administrative or service unit of an institution.

Distance Education: Distance Education courses are taught at off-campus locations, such as Sandpoint, Kellogg, and Bonners Ferry, or by Internet or interactive video.

District/Non-District Tuition: See page
Division: A division represents a number of different units of a college or university: (1) an administrative division of an institution usually consisting of more than one department; (2) an academic division of an institution based on the year-level of students; and (3) a service division of an institution that is composed of a number of service departments, such as the Student Services Division.

Drop and Add: Students are generally permitted to drop courses from their class schedules and/or add other courses. Courses that are dropped do not appear on a student’s transcript and the student generally does not have to pay for the course. Colleges allow varying lengths of time for students to add and drop courses. The college catalog or class schedule should note the correct procedures. Some institutions charge a fee for adding and dropping. NIC does not charge a fee.

Dual Credit: Dual credit allows eligible high school juniors and seniors to enroll in NIC courses on campus or at their high school. Credit for both high school and college may be awarded. Students enrolled in NIC courses will receive an NIC transcript. These credits transfer to many regionally accredited colleges and universities across the nation.

Elective: An elective is a course that is not specifically required and may be selected by the student based on personal preference.

Extra-Curricular Activities: These are non-classroom activities that can contribute to a well-rounded education. They can include such activities as athletics, clubs, student government, recreational and social organizations, and events.

Faculty: The faculty are the individuals who teach classes.

Fees: Fees are additional charges not included in the tuition. Fees may be charged to cover the cost of materials and equipment needed in certain courses and they may be assessed for student events, programs and publications.

Final Exams (Finals): These end-of-the-semester exams are either given during the last week of courses each semester or during a specific week called “Finals Week.” The type of final administered in a course is left to the discretion of the instructor. Final exams given during Finals Week are given on specified dates that may be different than the regular course time and are usually two hours in length. Finals schedules are usually listed in each semester’s printed Class Schedule.

Financial Aid (FAFSA): Aid for paying college expenses is made available from grants, scholarships, loans, and part-time employment from federal, state, institutional, and private sources. Financial aid from these programs may be combined in an “award package” to meet or defy from the cost of college. The types and amounts of aid awarded are based on financial need, available funds, student classification, academic performance, and sometimes the timeliness of application.

Free Application for Federal Student Aid (FAFSA): This is a qualifying form used for all federal and government guaranteed commercial lenders’ programs – as well as many state, regional, and private student aid programs. By filling out the online or paper FAFSA, applicants start the process of qualifying for financial aid.

Fulltime Enrollment/Part-Time Enrollment: A full-time student is enrolled in 12 or more credit hours a semester (full-time status for a summer term may be less). A three-quarter-time student is enrolled in 9-11 credit hours per semester. A part-time student is enrolled in 6-8 credit hours a semester.

 Honor Roll: Students are placed on honor rolls for GPAs above certain specified levels. Criteria for President’s, Dean’s, or other honor rolls vary at different institutions. In most cases, students must be enrolled full-time to be eligible.

Humanities Courses: Humanities courses cover subjects such as literature, philosophy, foreign languages, and the fine arts. Most undergraduates degrees require a certain number of humanities credit hours.

Hybrid Course: These courses provide multiple learning environments for interactions among students and instructors. They include required hybrid and face-to-face components. The face-to-face components are reduced, but not eliminated. Note: The hybrid component is technology-based and often consists of web-based instruction requiring the students to have computer skills.

Interactive Video Conference (IVC): These courses are delivered to off-campus sites by technology that allows interaction between students and faculty through two-way audio and video.

Internet Course: Internet courses are delivered through a website.

Junior/Community College: A Junior/Community College is often called a two-year institution of higher education. Course offerings generally include a transfer curriculum with credits transferable toward a bachelor’s degree at a four-year college, and an occupational or technical curriculum with courses of study designed to prepare students for employment in two years.

Lecture/Laboratory/Discussion Classes: In lecture courses, students attend class on a regular basis and the instructor lectures on course material. Laboratory courses require students to perform certain functions in controlled situations that help them test and understand what is being taught in the lecture. Discussion courses, sometimes called seminar courses, offer students the opportunity to talk about material being taught, ask questions, and discuss material with their classmates. Discussion courses are often taught by master’s or doctoral students, and are becoming more common on college campuses.

Letter Grades/Grade Point Averages (GPAs): Most colleges use both letter grades and GPAs in determining students’ grades. Most colleges figure GPAs using the following method: A’s are worth 4 points; B’s are worth 3 points; C’s are worth 2 points; D’s are worth 1 point; and F’s are worth 0 points. To figure a GPA, multiply the number of credit hours a course is worth by the number of points for the letter grade, then add up the totals for each course and divide by the number of attempted credit hours.

Major/Minor: A major is a student’s chosen field of study that usually requires the successful completion of a specified number of credit hours. A minor is designated as a specific number of credit hours in a secondary field of study.

Matriculated/Non-Matriculated (Degree Seeking/Non-Degree Seeking): Students who are matriculated are working toward a degree or certificate and have completed the admissions process, which includes application, payment of application fee, and provision of high school and/or college transcripts. Matriculated students are eligible to apply for financial aid. Non-matriculated students are not working toward a degree from North Idaho College and are not eligible for financial aid or participation in varsity athletics.

Mid-Term Exams (Midterms): During the middle of each semester, instructors may give mid-term exams that test students on the material covered during the first half of the semester. Some courses have only two tests, a midterm and a final.

Non-Credit Courses: Some courses have 0 credit hours and do not meet the requirements for a certificate or a degree at a given institution. Non-credit courses may serve one of several purposes: to explore new fields of study, increase proficiency in a particular skill area or profession, develop potential, or enrich life experiences.

Open-Door Institution: Open-door institutions are usually public junior/community colleges. The term “open-door” refers to an admission policy that states that anyone who meets certain age requirements can be admitted. Open-door admissions policies do not mean that students can take any courses that they choose. Students must meet course prerequisites in order to enroll in specific courses.

Orientation Advising Registration Session (OARS): This session, which includes orientation and advising, is the process by which new degree-seeking students register for courses.

Prerequisites Courses: A prerequisite is a condition that must be met before a student can enroll in a course. This may include, but is not limited to, completion of other courses with a C- or better, acceptance in other programs, sophomore standing, instructor permission, and prescribed test scores. For example, Accounting I is a prerequisite for Accounting II.

Private/Public Institutions: Private and public institutions differ primarily in terms of their source of financial support. Public institutions receive funding from the state or other governmental entities and are administered by public boards. Private institutions rely on income from private donations, or from religious or other organizations and student tuition.

Registrar: The Registrar’s Office serves the students, faculty and staff of the college. The office maintains student transcripts and files, processes grade reports, issues diplomas, and verifies enrollment for student loan guarantors and the Veterans Administration.
Resident/Non-Resident Status: The amount of tuition a student pays to a public (state supported) college is determined by the student's state residence status. If a student is a resident of the state, then the student pays a lower tuition rate. A non-resident will pay a higher tuition rate. Residency requirements vary from state to state, but are determined by the student's place of residence or his/her parents' place of residence if the student is younger than a certain age. Tuition rates for private colleges are not based on residency.

Schedule of Classes: Colleges publish and distribute a Class Schedule booklet that includes the courses offered. With the help of academic advisors or faculty advisors, students make up their own individual class schedules for each semester they are enrolled. Courses are designated in the Class Schedule by course department, course number, time and days the course meets, the room number and building name, and the instructor's name.

Service Learning: Service Learning combines academic studies with community service by linking the theory and content of a course with the practical application of the course's concepts in a community setting. The Service Learning assignment, which is optional, requires 15-20 hours outside the classroom during the semester (in lieu of other course assignments comparable to 15-20 hours). Career exploration may be an added benefit to this type of class.

Student Identification Card (I.D.): A student ID card is usually required in college. A student ID card generally includes a photograph of the student, a student number, the student's name, the name of the college, and the semester enrolled. The ID requires validation each semester. Student ID cards provide access to numerous areas on campus and to a variety of events at a discount. Students must present their ID cards to check out library books, use the computer labs, check out gym equipment, or rent equipment in the Student Union entertainment center, and Outdoor Pursuits.

Syllabus: A course syllabus is a summary of the course. It usually contains specific information about the course; information on how to contact the instructor, including the instructors office location and office hours; an outline of what will be covered in the course, with a schedule of test dates and due dates for assignments; the grading policy for the course; and specific classroom rules. It is usually given to each student during the first class session.

Transcript: The transcript is a student's permanent academic record. It may show courses attempted, grades received, academic status, and honors received. Colleges do not release transcripts if a student owes any money to the college. Transcripts are maintained and sent from the Registrars Office.

Transfer of Credits: Some students attend more than one institution during their college careers and will wish for accumulated credit hours from the former institution to transfer to the new one. To transfer credits, a student must have an official transcript sent to the new institution, which will determine which courses will apply toward graduation requirements.

Tuition: Tuition is the amount paid for each credit hour of enrollment. Tuition does not include the cost of books, fees, or room and board. Tuition charges vary from college to college and are dependent on such factors as resident or out-of-state status, level of classes enrolled in (lower, upper, or graduate division), and whether the institution is publicly or privately financed.

Tutors: A tutor is a person, generally another student, who has completed and/or demonstrated proficiency in a course or subject, and is able to provide instruction to another student. Tutors usually help students better understand course material and make better grades. At NIC, students may receive two free hours of tutoring per class, per week.

Undergraduate: An undergraduate is a student who is pursuing either a certificate or an associate or baccalaureate degree.

University: A university is composed of undergraduate, graduate, and professional colleges and offers degrees in each.

Washington Reciprocity: An agreement between the states of Idaho and Washington that allows North Idaho College to offer a reduced out-of-state tuition rate for Washington residents.

Withdrawal: Students may withdraw from courses during a semester, but there are established procedures for doing so. The college catalog and/or Class Schedule generally specifies the procedures. Classes from which a student withdraws are listed on the student's transcript and the student is responsible for paying the tuition and fees for the class.

Western Undergraduate Exchange (WUE): An agreement between 15 states that allows a reduced out-of-state tuition rate for students attending North Idaho College. Participating states are Alaska, Arizona, California, Colorado, Hawaii, Idaho, Montana, Nevada, New Mexico, North Dakota, Oregon, South Dakota, Utah, Washington, and Wyoming.
NORTH IDAHO COLLEGE

Founded in 1933, North Idaho College is a comprehensive community college located on the spectacular shores of Lake Coeur d’Alene and the Spokane River. Quality instruction, small classes, and a caring, talented faculty and staff are the driving forces behind NIC’s success.

NIC offers associate degrees in more than 35 transferable academic majors and certificates or associate of applied science degrees in 33 professional-technical programs. Credit courses are offered during Fall and Spring Semesters and during an eight-week Summer Session. Courses are offered days, evenings, on the NIC campus, at the Post Falls Workforce Training Center, and at outreach sites throughout the five northern counties.

Approximately 4,500 students are enrolled in credit courses with classes averaging approximately 20 students. NIC also operates centers in Sandpoint, Kellogg, and Bonners Ferry. The college’s Workforce Training Center, located near the Idaho-Washington border in Post Falls, offers non-credit classes and workforce training programs to approximately 10,500 students each year.

NIC’s main campus is located in Coeur d’Alene, a destination resort town, which lies in the four-season beauty of North Idaho’s famous recreation area. An abundance of outdoor activities are available including mountain biking, boating, fishing, hunting, backpacking, hiking, camping, swimming, snowboarding, and skiing. The campus lies in the city limits of Coeur d’Alene, with a growing population of 35,000 residents with approximately 130,000 residents in Kootenai County. Cultural and social activities are abundant in the lakeside city that is near Spokane, Washington, a metropolitan area of 406,000.

ACCREDITATION

North Idaho College is accredited by the Northwest Association of Schools and Colleges. The Nursing program is accredited by the National League for Nursing Accrediting Commission.

HISTORY

North Idaho College was first known as Coeur d’Alene Junior College, a private school that was started in 1933 and operated for six years. The state legislature passed the Junior College Act in January 1939, which permitted the establishment of junior college districts by a vote of eligible electors. Coeur d’Alene Junior College became North Idaho Junior College in June of 1939. On July 31, 1971, the college changed its name to North Idaho College.

OPEN-DOOR POLICY

NIC subscribes to the philosophy of the comprehensive community college, including an “open-door” admissions policy. To truly reflect its role as a community college, NIC accepts the fundamental responsibility to meet the varying needs of individuals with widely divergent interests and abilities. At the same time, NIC seeks to respond to the needs of area businesses, industries, and governmental agencies by preparing competent, trained employees.

The commitment to an open-door admissions policy is defined as providing all eligible students with access to appropriate educational offerings at the college. NIC enrolls students seeking a post-secondary education, but reserves the right to guide students into the courses and programs that will enhance their opportunities for success.

Certain designated courses of study have special requirements for admission. The college tests and evaluates entering students to place them in the appropriate level courses.

WEBSITE

Individuals are encouraged to visit the college website to get current information about events, admissions, and news. The address for the North Idaho College website is:

www.nic.edu

COMMUNITY SERVICES

As a community college, North Idaho College strives to provide a quality educational environment and serve area residents through involvement in the community. Both goals are vitally important to NIC and have resulted in a wide variety of educational offerings, programs, and services designed for the college community at large.

Concerts, theatrical productions, athletic competitions, convocation programs, “Popcorn Forums,” the NIC public television series, and other events are offered to encourage community participation and involvement. Special courses, programs, and workshops are offered to meet the varied interests of individuals and community groups.

A Senior Citizen’s Gold Card allows individuals 60 years of age and older to attend NIC-sponsored athletic and arts events free of charge. Gold Cards are available through the NIC College Relations Office or the Admissions Office.

NIC’s College for Your Lifetime program allows anyone 60 or older to enroll in courses specifically designed for seniors for a flat $20 fee. Seniors may enroll in all other NIC courses at a significantly reduced rate. For more information, call 208.769.7764.

NIC FOUNDATION

The North Idaho College Foundation was founded in 1977 to encourage private support for the academic mission of North Idaho College. The NIC Foundation is an independent, non-profit charitable organization governed by a volunteer board of directors comprised of civic-minded community leaders.

The NIC Foundation works closely with the NIC trustees, the president, and staff to secure support for various needs of the college. The foundation solicits, accepts, and
manages both cash and non-cash gifts on behalf of NIC and invests and administers those funds to provide a source of financial support for the college.

With the support of the community, the NIC Foundation is helping to changes lives. Annually, the foundation provides more than $350,000 in student scholarships and approximately $50,000 in support of faculty and staff grants to enhance instruction and support services. Since the 1990’s, the NIC Foundation has been able to provide several million dollars to help with campus building projects, including the Meyer Health and Sciences Building which opened in the fall of 2005.

The Foundation raises funds through its annual and planned giving programs, scholarship drive, and community events. The Foundation’s Really Big Raffle offers a grand prize of a $250,000 custom home built by the NIC Carpentry program and more than $35,000 worth of additional prizes each year.

To make a tax-deductible gift, request additional information, or inquire about charitable giving, contact the NIC Foundation at 1000 West Garden Avenue, Coeur d’Alene, ID 83814; 208.769.5978; www.nic.edu/foundation.

Nic Alumni Association

The North Idaho College Alumni Association encourages a lifelong interest in the college by its alumni and friends. The Alumni Association provides opportunities for alumni to serve NIC and its students. The association has found that many individuals cherish their experiences and memories of NIC classmates, instructors, and friends and that these remain with them throughout their lifetimes. Membership in the association unites individuals in an organization of thousands of alumni who have chosen to express their active support for North Idaho College.

Membership is free, but requires completion of 12 credits of NIC courses. You need not be a graduate to become a member. Members are invited to special events and reunions. Benefits include Molstead Library privileges, personalized ID cards, and discounts at the NIC bookstore and home athletic contests. To join, visit the website at www.nic.edu/alumni or call 208.769.7806.

The Alumni Office is located in the Sherman Administration Building. Stop by to visit us if you come to campus.

Nic Booster Club

The North Idaho College Booster Club is a non-profit organization, committed to providing financial support to all recognized intercollegiate athletic programs at NIC through various fund-raising and endowment activities for student athlete grant-in-aid and team benefits. Organized in the 1960s, the Booster Club supports all NIC recognized intercollegiate athletics as a lifelong learning experience that will enhance the value of sportsmanship and provide a positive experience for student athletes, students, and fans. The club also recognizes the commitment our athletes make to the young people of our community through our Cardinal Kids outreach program and the wrestling team’s Shirley Parker Reading Program.

The Booster Club holds fund-raising events throughout the year including an annual auction, awards banquet, 3-on-3 basketball tournament, the Idaho State High School All Star Basketball Game, and golf tournament. It also sponsors a booth each year at the North Idaho Fair and operates a concession stand in Christianson Gym. For more information or to become a member, contact the Booster Club Coordinator at 208.769.3348. Meetings are held weekly.

Use of Nic Facilities

Campus facilities are available for use by qualified off-campus organizations, agencies, or groups when use does not interfere with either curricular or extracurricular programs sponsored by the college or conflict with the mission of the college. Charges for use of facilities vary.

Requests for facility use should be directed to the Office of Conferencing and Campus Events at 208.769.3361 or in the Student Union main office on the first floor of Edminster Student Union.

Nic Publications

Official North Idaho College publications, such as catalogs, brochures, course and fee schedules, etc., are not to be considered as binding contracts between NIC and its students. NIC and its divisions reserve the right to: (a) withdraw or cancel classes, courses, and programs; (b) change fee schedules; (c) change the academic calendar; (d) change admission and registration requirements governing instruction in, and graduation from, the college and its various divisions; and, (f) change any other regulations affecting students. Changes shall be enacted for both prospective and presently-enrolled students whenever deemed appropriate. Advance notice of changes will be provided when possible.

Affirmative Action/Equal Opportunity

North Idaho College is committed to its policy of nondiscrimination on the basis of race, color, religion, national origin, sex, age, disability, or status as a Vietnam-era veteran. This policy applies to all programs, services and facilities, and includes, but is not limited to, applications, admissions, access to programs and services, and employment. Such discrimination is prohibited by Titles VI and VII of the Civil Rights Act of 1964, Title IX of the Education Amendments of 1972, Sections 503 and 504 of the Rehabilitation Act of 1973, the Vietnam Era Veterans Readjustment Assistance Act of 1974, the Age Discrimination Act of 1974, the Age Discrimination in Employment Act Amendments of 1978, the Americans with Disabilities Act of 1990, the Civil Rights Act of 1991, and other pertinent state and federal laws and regulations.
ADMISSIONS
North Idaho College’s open door admissions policy reflects a commitment to access to higher education for all individuals who can benefit from college coursework. NIC admits all applicants who have earned a high school diploma from an accredited high school or who have earned a General Education Diploma (GED). Applicants who have not graduated from high school or who have not earned a GED must demonstrate the ability to benefit from college coursework before being admitted as a degree-seeking student. Please read the non-high school graduate section below. Individuals under the age of 16 may contact the Admissions Office for special admissions consideration.

Admission to NIC does not guarantee admission to limited or selective enrollment programs.

GENERAL ADMISSIONS
Students who are pursuing a degree or certificate, or who are applying for financial aid, must submit an admissions application. The application steps are:

- Complete an application for admission and submit a $25 one-time application fee.
- First time students should submit a final high school transcript or GED scores to the Admissions Office.
- Transfer students should submit an official copy of all previous college transcripts to the Admissions Office. Transcripts must be received in the Admissions Office in an officially sealed envelope.
- Meet the assessment requirement by submitting ACT or SAT test scores or by taking the COMPASS placement test. Test scores are valid for two years.

FORMER STUDENTS
Students who have previously attended NIC do not need to reapply for admission, but need to reactivate their files by completing a Student Record Update form and submitting it to the Admissions Office.

NON-DEGREE SEEKING STUDENTS
Students not intending to earn a degree or certificate from NIC, but who are interested in taking classes to further their education, to improve job skills, or for personal enrichment, are not required to apply for admission. Students may enroll by mail, on the web, or in person at the Registrar’s Office in Lee-Kildow Hall.

NON-HIGH SCHOOL GRADUATES
Non-high school graduates or students who have graduated from non-accredited high schools, may enroll as a non-matriculated student. All credits completed will appear on an NIC transcript.

Students under this classification who want to be admit-
ed as a degree-seeking student may do so after passing the high school level General Educational Development (GED) tests.

If a student has not completed the GED, he or she must complete the Placement Assessment (COMPASS) and receive a minimum score before being accepted for admission. Students using the COMPASS as an option must complete specific sections as outlined by the U.S. Department of Education to determine ability-to-benefit and admissions status.

COMPASS minimum scores for admission as an ability-to-benefit student are:

- Pre-Algebra/Numerical Placement 25
- Reading Placement 62
- Writing Placement 32

ASSET minimum scores for admission as an ability-to-benefit student are:

- Numerical Skills 33
- Reading Placement 35
- Writing Placement 35

INTERNATIONAL STUDENTS
North Idaho College welcomes the enrollment of qualified international students. In addition, the college encourages currently-enrolled international students to participate in the educational, social, and cultural activities of the local community.

International students must meet the same admissions requirements as domestic students. Students must have graduated from a secondary school and have the minimum English abilities to succeed in college. International students who are transferring from a college or university must have a minimum 2.00 grade point average.

All application materials from students living abroad should be sent to the Admissions Office at least six months prior to registration in order to allow time for evaluation and notice of acceptance. International students applying from within the United States need to submit all materials no less than one month prior to registration. The college will issue an I-20 to accepted students who provide the appropriate admissions and financial documentation.

The following items are required for all international applicants:

1. International Student Application for Admission
2. The $25 application fee in U.S. funds (non-refundable, one-time fee).
3. Official secondary (high school) transcript and confirmation of graduation (an original, certified English translation must accompany those documents that are not in English).
4. Official transcripts from all colleges attended (an original, certified English translation must accompany those documents that are not in English).
5. Official Test of English as a Foreign Language
(TOEFL) Scores. Minimum scores are 500 (paper-based), 173 (computer-based), and 61 (Internet-based).

Information about the TOEFL is available on the Internet at www.ets.org.

6. Proof of Health Insurance

7. Financial Declaration:
International students must submit proof from a financial institution demonstrating sufficient financial resources to fully cover the costs of tuition, books, fees, room and board, and all personal expenses for one academic year. North Idaho College will not bear responsibility for an international student’s finances. Estimated costs for the 2006-07 school year are listed below.

Office of Admissions
North Idaho College
1000 West Garden Avenue
Coeur d’Alene, ID 83814 USA

PROGRAMS WITH SPECIAL ADMISSION REQUIREMENTS
The following programs have additional admissions requirements.

Limited Enrollment Professional-Technical Programs
Certain professional-technical programs have limited capacity and additional admission requirements. Since these programs often fill quickly, prospective students are encouraged to begin the application process as early as possible. The following programs have limited space available:

- Automotive Technology
- Carpentry
- Carpentry Management Technology
- Collision Repair Technology
- Computer Information Technology
- Culinary Arts
- Diesel Technology
- Drafting and Design Technology
- Heating, Ventilation, Air Conditioning and Refrigeration
- Landscape Technology
- Machine Technology
- Maintenance Mechanic/Millwright
- Outdoor Power/Recreational Vehicle Technology
- Welding Technology

Applicants should submit admissions materials 6-12 months prior to enrollment. Decisions on acceptance are made on an eligibility/space available basis and only after the Admissions Office has received the following items:

- An application for admission to NIC and the specific program.
- The $25 application fee (non-refundable one time fee).
- Provide assessment materials in the form of the COMPASS, SAT, ACT test scores or transcripts of previous college coursework in math and English.

Students accepted into a limited enrollment program are required to pay a $100 non-refundable deposit within two weeks of acceptance. The deposit will be applied toward tuition and fees. See the program descriptions in this catalog for specific requirements for each program.

For more information contact the Admissions Office at 208.769.3311 or the Professional-Technical Student Support Services Office at 208.769.3468.

Selective Enrollment Programs
The following programs have a selective and/or competitive entry and have additional admissions requirements. Application packets for all programs, except Law Enforcement, are available from the Admissions Office. Please see the program descriptions in the catalog for the specific admissions requirements for each program.

- Law Enforcement/Administration of Justice See page 89
- Pharmacy Technology See page 103
- Practical Nursing See page 99
- Radiography Technology See page 108
- Registered Nursing See page 100

Dual Credit for High School Students
Dual credit allows eligible high school juniors and seniors to enroll in NIC courses on campus or at their high school. Credit for both high school and college may be awarded. Students enrolled in NIC courses will receive an NIC transcript. These credits transfer to other colleges and universities across the nation that are regionally accredited.

Dual credit students are not eligible for financial aid or scholarships. Complete details about Dual Enrollment are available from high school counselors.

To be eligible students must be at least 16 years old or have successfully completed at least half of their graduation requirements.

Dual Credit Application and Registration Process:
1. Meet with a high school counselor to determine eligibility.
2. Submit an NIC Application for Admission.
3. Complete the Dual Enrollment Registration Form, with high school counselor and parent signatures.
Tech Prep for High School Students
Tech Prep is a statewide Professional-Technical program that coordinates high school curriculum with a two-year program. Students enrolled in approved high school programs can receive post-secondary credit from NIC toward a Professional-Technical certificate or degree. This process allows students to begin working on an associate of applied science degree or certificate of completion while still in high school. Tech Prep students can either earn a degree in a shorter amount of time or go into greater depth of study.

For more information about Tech Prep, contact the regional office at 208.769.5964.

Placement Assessment

The placement assessment (COMPASS) is an important part of enrollment because it measures each student’s entry skills in reading, writing, and math. Scores are used to identify courses needed to ensure student success. Students are required to complete the placement assessment if they will be entering their first college English or college math course. Enrollment in other courses with an English or math prerequisite (or equivalent placement scores) may also require completion of the placement assessment.

ACT, SAT, or ASSET scores can substitute for COMPASS scores in fulfilling the placement assessment requirement.

COMPASS appointments can be arranged following acceptance to the college by calling 208.676.7203. Information about the COMPASS is available online at www.nic.edu/testingcenter. Placement scores previously earned within two years from the date of course registration may satisfy the assessment requirement by having official copies of the ACT, SAT, COMPASS, or ASSET score report sent to the NIC Admissions Office, 1000 W. Garden Avenue, Coeur d’Alene, ID 83814. If you have questions about placement assessments, contact Advising Services at 208.769.7821.

Distance Education Classes

Distance Education classes provide students an opportunity to take NIC classes without traveling to the Coeur d’Alene campus. These courses are delivered by interactive video-conferencing (IVC), a two-way audio and video network from NIC’s main campus to locations in the five northern counties; and/or the Internet with most of the instruction delivered via a website; and/or at off-campus sites with face-to-face instruction.

NIC has outreach centers in Sandpoint, Bonners Ferry, and Kellogg to better serve the citizens in those counties.

Services include academic classes, non-credit classes, adult basic education, GED instruction and testing, and class registration, as well as other services.

NIC’s outreach centers are:
NIC Ponderay Center
300 Bonner Mall Way, Ponderay
208.263.4594

NIC Silver Valley Center
323 Main Street, Kellogg
208.783.1254

NIC Bonners Ferry Center
6791 Main Street, Suite B, Bonners Ferry
208.267.3878

Distance Education students apply and register using the same application forms as on-campus students and pay the same tuition. Students may order and pay for their textbooks online at www.bookstore.nic.edu with a credit card. Tuition can be paid online at www.nic.edu by accessing NICOnline or through the NIC Business Office.

For information about NIC’s online or off-campus courses, call 208.769.3436 or toll-free 877.404.4536. The Distance Education Office can also be reached by e-mail at distance@nic.edu.

Residency Status

Residency for tuition purposes is governed by Idaho State Code 33-2110A. Residency status is determined when a student applies for admission and remains unchanged until the student supplies evidence to the contrary. Please call the Admissions Office at 208.769.3311 for residency questions.

Kootenai County Residents (In-district)
Since North Idaho College receives a substantial portion of funding from Kootenai County, residency at NIC is determined at the county level. To be classified as an in-district resident the student, or the parents or legal guardians of a dependent student, must have established a domicile in Kootenai County for 12 months prior to the beginning of the semester of enrollment.

Idaho Resident Outside Kootenai County (Non-district)
Idaho residents outside of Kootenai County will be charged the non-district tuition rate. The student may be eligible for monetary support for the non-district portion of the tuition from their county of residence if the student files a Certificate of Residency with the home county and the certification is received by NIC.

Depending on the county, a certificate is required each academic year or each semester. It is the student’s responsibility to determine how often the certificate must be filed.
Certificates of Residency may be obtained at the Admissions or Business Offices at North Idaho College or on the web at http://www.nic.edu/costs/forms/residency.pdf.

**Out-of-State/International Students**

Students who are not considered residents of Idaho for tuition paying purposes are charged the out-of-state tuition rate. Tuition reductions of the out-of-state tuition rate are available for residents of Washington and the Western Undergraduate Exchange states. (see below)

---

**TUITION REDUCTION PROGRAMS**

**Washington State Residents**

Washington residents qualify for a reduction of a portion of the out-of-state tuition rate. Residency status is determined at the time of application to the college. (See page 24 for tuition rate tables).

**Western Undergraduate Exchange**

The Western Undergraduate Exchange Program (WUE) was established to financially assist individuals interested in attending college out of their home states. The tuition rate is 150% of the non-district tuition rate. Residents from the following states are eligible for the reduced tuition rates: (see page xxx for tuition rate tables).

- Alaska
- Arizona
- Colorado
- Montana
- Nevada
- North Dakota
- Oregon
- South Dakota
- Utah
- Wyoming
- New Mexico

**Senior Citizen’s Rate**

North Idaho College offers a special rate to individuals who are 60 years or older. The senior citizen rate for credit classes is $25 per class plus $5 per credit. Fees for non-credit courses, materials, books, or special fees are full price.

NIC also offers some courses specifically designed for senior citizens. These courses almost always have the word “senior” in the course name and are offered at a flat rate of $20 per course.
Financial aid funding assists students in offsetting the cost of a college education including tuition and fees, room and board, books, supplies, transportation, and miscellaneous expenses. The most familiar type of funding is gift aid or grants and scholarships. This type of aid does not have to be repaid. Self-help funding is aid that does need to be repaid in the form of student loans or the funding may be earned through the college work study programs.

</table>
ELIGIBILITY for FINANCIAL AID

North Idaho College awards financial aid on the basis of merit and financial need. Merit-based awards consider the student’s skills and abilities to determine eligibility. Examples of criteria for merit-based scholarships or grants may include academic excellence, athletic ability, or interest in a particular college major.

Eligibility for need-based financial aid is determined by the student’s computed financial need. Financial need represents the difference between the total cost of attendance and the amount the student and his/her family can afford to pay toward that cost—the Estimated Family Contribution. The total cost of attendance includes allowances for the cost of tuition and fees, books, supplies and tools, room and board (or rent and food), living expenses, and transportation from home. The Estimated Family Contribution is calculated by using information the student and his/her parents (if dependent on parents) or spouse (if married) provide on the Free Application for Federal Student Aid (FAFSA) and other documents.

There is NO income cutoff for need-based financial aid. A needs analysis formula established by the federal government is used and takes into consideration family size, number in college, unusual medical or dental expenses, as well as income and assets.

To be eligible for need-based financial aid, in addition to demonstrating financial need, the student must:

1. Have a high school diploma, GED certificate, or pass the COMPASS assessment with appropriate ability-to-benefit scores (see page 12).
2. Be accepted for admission into North Idaho College as a matriculated (degree-seeking) student.
3. Not be in default on a Federal Perkins Loan, Federal Stafford Loan (formerly Guaranteed Student Loan), Federal Supplemental Loan for Students, Federal Parent’s Loan for Undergraduate Students made for attendance at North Idaho College, or any other educational institution.
4. Not owe a refund on a Federal Pell Grant, Federal Supplemental Educational Opportunity Grant, Leveraging Educational Assistance Partnership Program, or Federal Family Education Loan previously used for attendance at North Idaho College or any other educational institution.
5. Be an American citizen, national, or resident alien.
6. Certify that, if required, the student has registered with Selective Service.
7. Maintain satisfactory academic progress toward his/her North Idaho College degree or certificate as defined by the North Idaho College Satisfactory Academic Progress Policy.

SATISFACTORY ACADEMIC PROGRESS POLICY

The U.S. Department of Education requires students to maintain satisfactory progress toward their degree or certificate in order to be eligible for financial aid. This applies to students who apply for financial aid for the first time, as well as to those who are currently receiving aid. All semesters of attendance at North Idaho College, including periods when no financial aid was received, are reviewed. To meet the Satisfactory Academic Progress requirements at North Idaho College, students must:

1. Achieve a minimum 1.75 grade point average during the first semester of enrollment. A cumulative GPA of 2.00 or better must be earned after the first semester. If the cumulative is below 2.00, but the semester GPA is 2.00 or higher, students will be allowed to receive aid.
2. Complete a specified number of credits per semester based on the number of credits enrolled in during that semester.
3. Receive a degree or certificate from North Idaho College within the maximum number of semesters allowed based upon enrollment status.

FINANCIAL AID ELIGIBILITY SUSPENSION

Students will not be eligible for financial aid at North Idaho College and any current financial aid award will be cancelled if they:

1. Are on financial aid probation and do not earn a 2.00 GPA and complete the required number of credits during the semester.
2. Have not completed their degree or certificate within the maximum number of semesters.
3. Have not completed a degree/certificate or transfer requirements within the maximum number of semesters.

FINANCIAL AID PROBATION

Students will be placed on financial aid probation if they do not meet the GPA requirements OR do not complete the required number of credits per semester.

REMOVAL from FINANCIAL AID PROBATION

Students placed on financial aid probation must achieve a 2.00 GPA and make up any deficit credits to be in good standing for the semester that they are on probation.
MAKING UP DEFICIT CREDITS

The Financial Aid Satisfactory Academic Progress (FASAP) Policy states that students must complete a minimum number of credits per semester based on their enrollment status after registration. For financial aid, enrollment status is defined as either full-time (12 or credits), three-quarter time (9-11 credits), or halftime (6-8 credits).

The Enrollment Status table on page 19 breaks out the number of credits students are expected to complete for each status. Full-time students are expected to complete 11 credits, and half-time students are expected to complete 5 credits. For example, if a student registers for 11 credits, he/she is expected to complete at least 8 credits by the end of the semester. Grades of F, W, or I on a transcript are three indicators of not completing expected credits.

Once a student has deficit credits, the only way to make them up is to complete more than the expected credits for a semester, complete classes during the summer, or enroll in 5 credits or less. For example, if a student registers three-quarter-time and completes 11 credits, 3 deficit credits will be made up during that semester (11 Enrolled Credits - 8 Expected Credits = 3 Deficit Credits Completed). This is because the student is expected to complete at least 8 credits based on his/her enrollment status. If a student registers full-time and completes 16 credits during a semester, he/she can make up 5 deficit credits.

It is important to be realistic when making up deficit credits. Students are encouraged to choose a course load that is appropriate to their situation. Factors to consider when deciding a credit load within a semester include time with family, job requirements, study time for classes, and difficulty level of each class.

APPEAL

If the student’s financial aid award has been cancelled due to failure to maintain satisfactory academic progress, he/she may submit an appeal to the Scholarship and Financial Aid Committee to request reinstatement of aid eligibility. If the appeal is approved by the Scholarship and Financial Aid Committee, he/she will be placed on probation and asked to sign a Financial Aid Contract. The contract outlines the specific requirements the student must meet in order to maintain Satisfactory Academic Progress. Students who fail to meet the conditions of the Financial Aid Contract will not be eligible for financial aid from North Idaho College. Students will not be eligible to appeal until they complete 6 credits of core courses at their own expense.

APPLYING for SCHOLARSHIPS

By applying for admission to NIC, all students are considered for scholarships offered through the NIC Foundation.

APPLYING for FINANCIAL AID

To apply for all other types of financial aid, the student and his/her parent(s) (if dependent) need to complete the Free Application for Federal Student Aid (FAFSA). In addition to the FAFSA, the student may need to submit a copy of his/her U.S. Income Tax return and, in some cases, copies of his/her parents’ U.S. Income Tax return.

The financial aid application process takes approximately two months from the time the student applies to the time he/she receives a check. The earlier the student applies the better the chances are for receiving full financial aid funding. Students who complete the financial aid application process prior to the March 15 priority deadline will be considered for all types of financial aid. Those who apply after that date will be considered for the Federal Pell Grant, the Federal Stafford Loan, and any other funds that are available.

FINANCIAL AID INFORMATION

A Financial Aid brochure that outlines in greater detail the types of financial aid, eligibility requirements, and application procedures is available from the Financial Aid Office.

BOOKSTORE CHARGES and FINANCIAL AID

Students who have been approved to receive financial aid through the NIC Financial Aid Office will be allowed to charge books and supplies at the NIC Bookstore beginning the week prior to the start of classes through the first week of classes, provided that he/she is matriculated (degree-seeking), enrolled in the correct number of credits, and has completed the admissions process.

OTHER FINANCIAL ASSISTANCE PROGRAMS

Financial aid through programs sponsored by the Workforce Investment Act (WIA), the Training Rehabilitation Act (TRA), Social Security, State Board of Vocational Rehabilitation, and Veterans Administration is available from those agencies for qualified students attending NIC.

TITLE IV FEDERAL FINANCIAL AID REFUND and REPAYMENT POLICY

The Federal refund/repayment policy for students receiving Title IV Federal Financial Aid is different than the established North Idaho College refund policy. Anyone wishing to obtain a copy of the Federal policy and/or calculation examples may stop by the Financial Aid Office located in Lee Hall or access the information from the College website at www.nic.edu.
Many students enroll for classes at North Idaho College and Lewis-Clark State College or the University of Idaho Coeur d’Alene. Students who enroll at NIC and one of the other two institutions and are receiving financial aid from that institution must clear their financial aid with the NIC Business Office prior to registration. Those who do not clear their aid will be expected to make full payment for their classes at NIC.
North Idaho College 2006-2007

Tuition & Fees
## TUITION and FEES for 2006-07

Tuition and fees at NIC are among the lowest in Idaho and the Inland Northwest. All rates quoted below are subject to change without notice. Idaho residents not living in Kootenai County must submit a Certificate of Residency to receive county support. For details on tuition rates for Washington residents or the Western Undergraduate Exchange program, see page 15 or call the Admissions Office at 208.769.3311. The figures below do not include personal expenses or transportation. Books and supplies for academic transfer programs are estimated at $500 per year.

### PROFESSIONAL-TECHNICAL PROGRAMS

Tuition and fees vary by length of program. Depending on the program (which may vary from 9-11 months), students will make payment for each semester and for any additional terms that may be included in the program. The cost for tools, supplies, and books also varies with each program.

| Transcript Fee ................................... $5 |
| Rush Transcript Fee ......................... $10 |
| Residence Hall Room and Board .... $5,160 - $6,580 |

TUITION and FEES
PAYMENT PROCEDURES

Tuition, fees, and any special fees must be paid on or before the due date printed on the Statement of Account/Class Schedule statement when you register in person. Payment must be made on or before the due date noted on the payment screen when registering online, unless financial aid has been approved. Students failing to pay amounts due NIC could be cancelled from classes and have their credits withheld. No student will be given a transcript of his/her record or allowed to register for classes until all accounts are settled in full. This includes any funds received through the Financial Aid Office involving overpayments, refunds, or delinquent loans.

Payment of regular student fees entitles the student to the services maintained by NIC for the benefit of students. No reduction in fees can be made for students who may not desire to use any part of these services. Extra charges are made for special services and specific courses.

Students eligible for financial aid, but who have not completed the process prior to registration, will be expected to pay all required charges on or before the due date.

Veterans and other eligible persons receiving Veterans Administration educational benefits must pay all required charges at the time of registration. Those who are depending on veterans educational benefit checks to pay fees must apply for advance pay at least one month prior to registration.

Tuition and fees are established annually by the Board of Trustees. Interested persons may inquire at the Admissions Office for applicable rates and payment information. NIC reserves the right at any time to change its charges. In the unlikely event that such changes become necessary, NIC will endeavor to give advance notice.

SENIOR CITIZENS’ RATE

NIC’s College for Your Lifetime program allows anyone 60 or older to enroll in courses that are specifically designed for seniors for a flat $20 fee. Seniors may also choose to enroll in all other NIC courses at a significantly reduced rate. For more information, call 208.769.7764. This dis-
count is not Title IV Federal Financial Aid. Fees for non-
credit courses, materials, books, or special fees are full price.
A Senior Citizen’s Gold Card allows individuals 60 years of 
age and older to attend NIC-sponsored athletic and arts 
events free of charge. Gold Cards are available through the 
NIC College Relations Office or the Admissions Office.

NORTH IDAHO COLLEGE REFUND POLICY

Refund
Students who officially withdraw from all classes at North 
Idaho College may be entitled to a refund of a portion of 
their tuition and fees. If financial aid paid a portion of those 
charges, then a portion of the refund must be returned to 
the federal financial aid funds.

Note: Federal financial aid regulations require a pro rata 
refund of tuition and fee charges for students who enroll at 
North Idaho College for the first time and are receiving 
financial aid funds. For more information, see page 26.

Repayment
Students who officially withdraw from all classes at North 
Idaho College and who have received financial aid in ex-
cess of the calculated costs of living expenses and other 
non-billed costs for the period they actually enrolled may 
be required to repay a portion of the financial aid they 
received to the federal financial aid funds.

REFUNDS for WITHDRAWAL from 
SEMESTER-LENGTH COURSES

Full-time or part-time students who withdraw from sem-
ster-length credit courses (day, evening, or Internet) will, 
on written notification to the NIC Registrar at the time 
of withdrawal, receive refunds as follows:

Fall Semester 2006
1. If withdrawal is made on or before Sept. 15, 100% will be 
refunded.
3. No refunds will be given after Sept. 15.

Spring Semester 2007
1. If withdrawal is made on or before Feb. 5, 100% will be 
refunded.
3. No refunds will be given after Feb. 5.

Summer Session 2007
Check the NIC website at www.nic.edu/costs for refund dates 
and policies.

Should a class be cancelled, students will receive a full re-
fund for the class, provided the student’s enrollment drops 
below eight credits.

REFUNDS for WITHDRAWAL from 
SHORT-TERM COURSES

Students who withdraw from short-term courses (less than 
15 weeks in length) will, on written notification to the NIC Registrar at the time of withdrawal, receive refunds as follows:

1. If withdrawal is made prior to the second class meeting, 100% will be refunded.
3. No refund will be allowed after the second class meeting.

Should a class be cancelled, students will receive a full re-
fund for the class, provided the student’s enrollment drops 
below eight credits.

REFUNDS for STUDENTS CALLED 
to ACTIVE MILITARY SERVICE

Members of the Idaho National Guard and Reserve serve a 
vital function for our country. In the event that members 
of the National Guard or Reserve are called to active duty, 
they will be administratively withdrawn from classes and 
any tuition and fees paid will be refunded in full. Copies 
of orders calling a student to active duty must be provided 
to the Vice President for Student Services who will initiate 
the administrative withdrawal from classes and the refund 
process.

TUITION PAYMENT PLAN

North Idaho College provides payment options that help 
students afford education. The Interest-Free Monthly Pay-
ment Option allows for tuition and other expenses to be 
divided into four smaller monthly payments, spread over 
the semester.

There is a $50 semester enrollment fee (only available dur-
ing the Fall and Spring semesters). There is no interest or 
other costs. The payment plan option is not a loan, so any-
one is eligible to participate.

Forms are available from the NIC Business Office or online 
at www.afford.com/nic. The $50 semester enrollment fee 
may be charged to a credit card.

Participants will be billed monthly, in accordance with the 
Monthly Payment Schedule. Automatic monthly deduc-
tions from checking or savings are available at no addi-
tional cost.

North Idaho College provides this option with Tuition 
Management Systems, the a nationally-recognized provider 
of education payment services for over 20 years. For more 
information call 1-800-356-8329.
Registration

Registration is the official process of enrolling in classes and is accomplished by meeting with an advisor, registering for classes, and paying tuition and fees. NIC is on a Fall/Spring Semester system which are 16 weeks each, followed by an eight-week Summer Session. The student calendar on pages 2 and 3 of this catalog has information regarding application and registration dates. Registration information is available at www.nic.edu or in the printed Class Schedule.

After applying for admission, students will receive an acceptance letter from the Admissions Office which will include instructions about how to register for classes.

Continuing students register by assigned start times through NICOnline, a web-based registration system. Appointment times for continuing students are determined by the number of credits completed.

Students with a financial hold such as parking fines, library fines, delinquent loan payments cannot register until the hold has been cleared.

NICOnline:

STUDENT INFORMATION on the WEB

NICOnline is NIC’s web-based, online student information network. By logging onto NICOnline, students can access their class schedules, unofficial transcripts, admissions and financial aid information, the name of their advisor, and assessment scores. NICOnline is used by students to determine class availability, register for classes, and pay tuition and fees.

After being admitted, students will receive NICOnline access information.

To log onto NICOnline:

1. Enter www.nic.edu and click on NICOnline.
2. Enter your user ID.
3. Enter your password.
4. Click the submit button.

NICOnline is available from 6 a.m. to 11:50 p.m. (Pacific time) seven days a week. Questions about access IDs, access codes, or NICOnline should be directed to the Registrar's Office at 208.769.3320.

Payment of Tuition and Fees

Tuition and fees are set annually by the Board of Trustees, usually in March. Students enrolled for seven credits or less pay on a per-credit hour basis, plus any special class fees. Students registering for 19 credits or more will be assessed a nonrefundable overload fee at the regular per-credit rate.

New and former students from Idaho who reside outside of Kootenai County are required to provide a Certificate of Residency to the Business Office or will be charged out-of-district rates.

Course Schedule Changes (Add/Drop)

The add/drop period allows students to add classes on a space-available basis or drop classes without transcript notation. The add/drop period is the first five days of Fall and Spring semesters and the first two days of Summer Session. Students can make schedule changes on the web through NICOnline or through Advising Services.

Withdrawal from Individual Courses

To withdraw from a course, a student must complete a Course Withdrawal Form and return it to the Registrar's Office. Forms are available in the Registrar's Office or Advising Services. Final withdrawal dates are published on the college calendar located on pages 2 and 3. After the final withdrawal date, students may not withdraw from a class regardless of their academic status. A student who withdraws officially from a course by 5 p.m. of the last day for withdrawal will receive a grade of “W,” which will be recorded on the student’s transcript.

Withdrawal from short-term classes (classes less than 15 weeks in length) must be completed within the first half of the total class sessions; i.e., the deadline for withdrawal from a course that consists of eight sessions would be at 4 p.m. on the date of the fourth session. Withdrawals from Summer Session are permitted through the first day of the sixth week.

Students who stop attending a class for which they have registered and from which they have not officially withdrawn may receive a grade of “F.”

Complete Withdrawal from NIC

To withdraw from all courses, a student must obtain a College Withdrawal Form from the Registrar's Office, secure the signature of those persons indicated on the form, and return the form to the Registrar's Office. Students may not withdraw from classes or the college after the published withdrawal dates for that semester except for compelling and extraordinary reasons. In such circumstances a student must petition the Admissions and Academic Standards Committee for late withdrawal from the college using the form available in the Registrar's Office. Information on refunds of tuition and fees following a complete withdrawal is on page 26.

Instructor-Initiated Withdrawals

An instructor may initiate the withdrawal of any student in his/her class if he/she deems that the student's absences have been excessive and it is before the final withdrawal date. Withdrawal will be initiated by the instructor through the Registrar's Office. Faculty members are requested to
make an effort to personally contact the student prior to initiating the withdrawal.

Note: All withdrawals, whether for individual classes, total withdrawal from school, or instructor-initiated, are not considered to be satisfactory progress for financial aid. All students who withdraw from classes should be aware of the Financial Aid Satisfactory Progress Policy. See page 19.

**INDEPENDENT STUDIES**

Independent study classes are available in most academic disciplines and are designated by the class number 299. These classes are open to students with a 3.0 GPA and who have completed 26 semester credits. They cannot be used to fulfill associate degree core requirements.

Independent studies may include a reading or a project and must be approved by the instructor, appropriate Division Chair, and Vice President for Instruction. Students may take no more than three credits per semester of independent study or six credits per year. Students may register for independent study classes during the first four weeks of the semester or the first two weeks of Summer Session. Forms and information are available in the Registrar’s Office.

**ADDRESS/NAME CHANGES**

Students’ correct names, home and/or local addresses are vital for college records since students often receive material from the college through the mail. Students who change their name should notify the Admissions Office. Address changes may be completed through NICOnline or the Registrar’s Office.

**GRADING POLICIES**

**GRADING PROCEDURES**

Letter grades are used to indicate a student’s quality of achievement in a given course. Each of the grades are also assigned an equivalency number, which is used to compute grade point averages:

<table>
<thead>
<tr>
<th>Grade</th>
<th>Equivalency</th>
</tr>
</thead>
<tbody>
<tr>
<td>A</td>
<td>4.0</td>
</tr>
<tr>
<td>A-</td>
<td>3.7</td>
</tr>
<tr>
<td>B+</td>
<td>3.3</td>
</tr>
<tr>
<td>B</td>
<td>3.0</td>
</tr>
<tr>
<td>B-</td>
<td>2.7</td>
</tr>
<tr>
<td>C+</td>
<td>2.3</td>
</tr>
<tr>
<td>C</td>
<td>2.0</td>
</tr>
<tr>
<td>C-</td>
<td>1.7</td>
</tr>
<tr>
<td>D+</td>
<td>1.3</td>
</tr>
<tr>
<td>D</td>
<td>1.0</td>
</tr>
<tr>
<td>D-</td>
<td>0.7</td>
</tr>
<tr>
<td>F</td>
<td>0.0</td>
</tr>
<tr>
<td>NR</td>
<td>No Report</td>
</tr>
<tr>
<td>NG</td>
<td>No Grade</td>
</tr>
</tbody>
</table>

Other grades awarded are W (withdrawal according to proper procedure); I (incomplete work of passing grade); S (satisfactory – requires at least C or 2.0 work; used for designated courses only and for midterm grades); U (unsatisfactory – for courses in which S is given). Courses in which W, S, U or I grades have been earned are not included in the grade point calculation.

Students wishing to check their grade point averages should use the following formula: Per credit grade equivalency x number of credits per class ÷ grade points = GPA. For example, a student receives a grade of B- in English 101 and a grade of C in Math 108:

- English 101: (B-) 2.7 x 3 credits = 8.1 grade points
- Math 108: (C) 2.0 x 4 credits = 8.0 grade points

8.1 + 8.0 = 16.1 grade points ÷ 7 credits = 2.3 GPA

**GRADE CHANGES**

Students requesting a change of any grade earned at North Idaho College, including the change of any grade to a “W,” must request that the instructor of the course initiate a grade change through the Registrar’s Office. If the correctness of a grade is not satisfactorily addressed, students must consult with the Division Chair of the division that offers the course and make an appeal for a grade change. If the student is still not satisfied with the correctness of the grade, then an appointment must be made with the Vice President for Instruction to make an appeal. The decision of the Vice President for Instruction is final.

**ACADEMIC APPEALS**

Exceptions to academic policies may be requested through the Admissions and Academic Standards Committee. The committee will consider clearly stated and well documented petitions for: late withdrawal from college (all courses), reinstatement to college following disqualification or suspension, waiver of the 3.0 GPA requirement for admission to the dual enrollment program, and transfer and/or substitution of course credits that NIC transcript evaluators have not accepted as satisfying graduation requirements. Appeal forms are available at the Registrar’s Office located in Lee-Kildow Hall. The committee does not review requests for late withdrawal from individual courses; this is a grade change. Students must follow the grade change procedures as stated above.

**AUDIT**

A student may enroll in any lecture class on an audit basis. Students are encouraged to attend classes on a regular basis even though they will not receive credit or a grade for the class. Audited courses will not fulfill graduation requirements and do not affect a student’s grade point average. The application process and fees for auditing a course are the same as if a student were enrolling for credit. Course enrollment may be changed from credit to audit during the drop/add period. With the instructor’s permission, course enrollment may be changed from audit to credit during the first four weeks of fall or spring semester or the first two weeks of a Summer Session.
INCOMPLETES
An incomplete is assigned only if the student has been in attendance and has done satisfactory work to within three weeks of the end of the semester (or proportional length of time for a course of less than a semester in length). Incompletes are issued only in cases of extenuating circumstances, such as severe illness or injury. Incompletes are not issued in cases in which the student is simply unable to complete his/her work within the specified semester or session. If a final grade of "I" is recorded, the instructor will indicate in writing to the Registrar what the student must do to make up the deficiency. The instructor will indicate in the written statement what permanent grade should be entered if the Incomplete is not removed by the deadline.

All incomplete grades must be removed within six weeks after the first class day of the following term, excluding the summer session. If the Incomplete is not removed by that date, the grade reverts to the grade indicated by the instructor's written statement authorizing the incomplete. In the event of extraordinary circumstances, the student may appeal to the Admissions and Academic Standards Committee for an extension of the deadline. This appeal must be made within the aforesaid six weeks.

REPEATING A COURSE
Students may repeat any course to raise a grade, provided they have not completed a more advanced course for which the first is a prerequisite. While all grades received remain on the record, only the grade received for the most recent enrollment in the course is counted in computing grade point average. Note: Repeating a course may affect financial aid funding.

DEAN’S LIST (HONOR ROLL)
To qualify for the Dean’s List, students must complete at least 12 credits in courses numbered 100 or higher in a semester, earn a semester GPA of 3.75 or higher, and receive grades of A, B, C, D, or F in 80% of their classes.

ACADEMIC RENEWAL
In conformity with the principle of encouraging and rewarding determination, self-discipline, and achievement, North Idaho College will allow a student to petition the Registrar, under certain circumstances, for academic renewal. This means previous poor academic work at NIC would be eliminated from the computation of credits and grade points in the student’s academic record as well as for academic standing and eligibility for graduation.

Eligibility for academic renewal will be subject to the following conditions:

1. At the time the petition is filed, a minimum of five years will have elapsed since the most recent course work to be disregarded was completed.
2. Before the petition may be filed, the student must complete at least 30 semester hours of course work at North Idaho College with a minimum cumulative grade point average of 2.50.

These courses must be completed following the disregarded semester(s).

The student may have a maximum of two consecutive semesters (Summer Session excluded, unless it is one of the two deleted semesters) of course work disregarded in all calculations regarding the computations of credits and grade points, academic standing, and eligibility for graduation. The petition to be filed by the student will specify the semester(s) or term(s) to be disregarded.

If the petition qualifies under this policy, the student’s permanent academic record will be suitably annotated to indicate that no work taken during the disregarded semester(s), even if satisfactory, may apply toward the computation of credits and grade points, academic standing, and graduation requirements. However, all work will remain on the records, ensuring a true and accurate academic history.

This policy will not be used for individual courses, or for students already holding associate or baccalaureate degrees. Since this is already a policy of exception, no exceptions will be made to the aforesaid conditions. Students should be aware that this policy **might not be accepted** at transfer institutions.

ACADEMIC PROBATION, SUSPENSION
and DISQUALIFICATION

This policy applies to any student carrying six or more credit hours at the end of the add/drop period of an applicable semester.

PROBATION
Students will be placed on academic probation when their NIC cumulative grade point average falls below 1.75. Any student who wishes to transfer to NIC who has attended another college or university and whose cumulative grade point average is below 1.75 will be admitted on probation.

A student on academic probation who attains a grade point average of 2.00 or higher during a semester, but whose cumulative NIC grade point average falls below 1.75. Any student on academic probation who attains a grade point average of 2.00 or higher during a semester, but whose cumulative NIC grade point average is still below 1.75, remains on probation. A student on academic probation will be allowed to participate in registration for both Fall and Spring Semesters. If, however, the student fails to meet minimum grade requirements and is placed on academic suspension or disqualification, his/her registration will be cancelled. The student will be notified by mail prior to the beginning of the new semester if such a change in academic status is determined.

SUSPENSION
A student on academic probation will be suspended for one semester at the end of a probationary semester if he/she does not attain an NIC cumulative grade point average of at least 1.75 or a semester grade point average of at least 2.00. A student suspended after Fall Semester may not enroll in classes the following Spring Semester. Anyone suspended after Spring Semester may not enroll in
classes the following Fall Semester. In extraordinary cases, students can petition the Admissions and Academic Standards Committee to grant exemption from suspension.

**DISQUALIFICATION**
A student who has been suspended and returns is on probation. During the semester of the student’s return, he/she must attain an NIC cumulative grade point average of 1.75 or better or a semester grade point average of 2.00 or better. Failure to do so will result in disqualification, which means the student will not be permitted to re-enroll. The Admissions and Academic Standards Committee may reinstate a student who has been disqualified only after written petition and approval.

**CREDIT INFORMATION**
A credit, sometimes referred to as semester credit or semester hour, is related to time spent in class, study, preparation, laboratory, or field experience. One semester credit hour normally requires 45 hours of student work, or:

1. 50 minutes in class each week for one semester (which assumes twice this amount of time in study and preparation outside the classroom), or
2. Two to three hours in laborator each week for a semester, or
3. The equivalent combinations of 1 and 2.

Credit for workshops and short courses is granted on the basis of one semester credit for 45 hours of scholarly activity.

**CREDIT ENROLLMENT LIMITS**
The normal credit enrollment limit for students is 15 to 18 credit hours, provided the student is not engaged in outside employment. Registering for an excessive number of credits may result in marginal performance. Students enrolling for more than 18 credits will be assessed a non-refundable, per-credit overload fee and are required to get authorization from Advising Services. Summer Session students taking more than 7 credits are required to get authorization from Advising Services.

**STUDENT CLASSIFICATION**
A student must register for a minimum of 12 credits each semester to be classified as a full-time student; however, in most programs a student must earn at least 16 credits per semester to graduate in four semesters. This should not be confused with the fact that for purposes of calculating tuition and fees, students enrolled for 8 credits or more are charged a flat fee.

**FRESHMAN/SOPHOMORE CLASSIFICATION**
Students with 0-25 semester credits are classified as freshmen, those with 26-64 semester credits are classified as sophomores, and those with 65 or more are unclassified.

**COURSE NUMBERING SYSTEM**

<table>
<thead>
<tr>
<th>Class Number</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>001 – 099</td>
<td>Courses are nontransferable and do not apply toward academic degrees. They may be required for some A.A.S. degrees.</td>
</tr>
<tr>
<td>100 – 199</td>
<td>Primarily for freshmen</td>
</tr>
<tr>
<td>200 – 299</td>
<td>Primarily for sophomores</td>
</tr>
</tbody>
</table>

**CHALLENGE FOR CREDIT**
A student enrolled at NIC may petition to challenge courses based on work done through private study and/or employment or to validate courses taken at non-accredited institutions. Students are not permitted to challenge a prerequisite course after having completed an advanced course. Credit by examination will not be granted for a course that a student has previously taken for credit or audited. Credit will be granted provided the student earns a grade of C or better. Neither grades nor credit earned through the challenge process will be counted in any given semester to determine credit load or grade point average, nor will they be included in computing cumulative grade point averages. Students may challenge a course prior to or during enrollment in a course through the second week of Fall or Spring Semester, or through the first two days of a short course or Summer Session. Only students enrolled at NIC may qualify to challenge courses. Contact the Registrar’s Office for specific regulations.

**FOREIGN LANGUAGE PLACEMENT**
One full year of high school study in a foreign language is generally considered equivalent to one semester’s work in college. To receive college credit for high school or independent work, a student must take an advanced placement examination in the target language and complete the next semester advanced level with a grade of “C” or better. Placement in and completion of the second elementary level or first intermediate level will enable a student to get credit for the first elementary level; placement in and completion of the second semester intermediate level will enable a student to get credit for the first three semesters of the target language.

**CLEP EXAMINATION**
North Idaho College accepts a limited number of CLEP (College Level Exam Program) general and subject area exams. For information, contact the Admissions Office.

**ADVANCED PLACEMENT EXAMINATIONS**
In recognition of the Advanced Placement Program sponsored by the College Entrance Examination Board, NIC will grant college credit for examinations based on the student’s score. For specific information, contact the Admissions Office.

**GRADUATION**
Students may graduate at the end of Fall Semester, Spring Semester, Summer Session, or either technical summer...
block. The commencement ceremony is held once each year in May. Students eligible to participate in commencement are articulating (degree-seeking) graduates from the previous fall, the current spring, and the following summer.

All students expecting to graduate must complete an Application for Graduation with the Registrar’s Office whether or not they plan to participate in commencement. Suggested application dates for graduation are November 1 for Spring Semester, April 1 for Summer Session, or May 1 for Fall Semester. Applications filed after the suggested dates will be accepted. However, early filing enables the Registrar’s Office to evaluate a student’s transcript and determine any course deficiencies in the program of study prior to the student’s final semester of enrollment. A diploma will not be issued if a student has not fulfilled all financial obligations to the college. Only one Associate of Arts or Associate of Science degree will be granted to each student.

FINAL CREDITS EARNED AND EXCEPTIONS
Candidates for an associate degree or certificate of completion must earn their final 12 credits while enrolled at NIC. A student may petition the Admissions and Academic Standards Committee for a waiver in exceptional cases involving specific course or residence requirements for graduation.

CATALOG ISSUE
Catalogs are available free of charge from the Admissions Office, the Registrar’s Office, or the Student Services Office. North Idaho College students completing either an associate degree or certificate of completion may apply for graduation using any catalog in effect within the last four years. This policy is in effect only if the student has been continuously enrolled at the college at the time of graduation.

CREDIT LIMITATIONS
No more than 24 credits earned by examination and 32 credits earned by correspondence or examination may count toward an associate degree.

PHYSICAL EDUCATION REQUIREMENT
All A.A. and A.S. degrees require two credits of physical education unless excused for cause. These requirements are met by completing two semesters of any P.E. activity or dance class. Participants in intercollegiate athletics receive one credit per semester per sport.

Disabled students may be exempt from physical education activity course requirements upon the recommendation of a physician and the approval of the Division Chairperson, if alternative activity courses cannot be arranged. All students, regardless of age, must meet physical education requirements. Students enrolling in designated physical education activity courses may be charged extra fees payable at registration.

TRANSCRIPTS
A transcript is a record of all courses for which a student was enrolled at the end of the fall and spring period each semester and Summer Session. It includes credit hours for which the student is enrolled, final grades in each subject, record of withdrawal, courses repeated, grade point average for each semester, and a cumulative grade point average.

REQUESTS FOR TRANSCRIPTS
NIC academic transcripts are permanent records and are maintained forever. Transcript requests must be made in writing and can be submitted by mail, fax (208.769.5976), or in person to the Registrar’s Office. Request forms and additional information are available online at www.nic.edu. Federal regulations require that the request be signed by the student to authorize release of the transcript. The request should include the student’s full name, maiden name if applicable, approximate last date of attendance, student identification number, student’s current address and phone number, address(es) where the transcript(s) should be mailed, and the student’s signature. Payment must accompany each request. Official copies are $5 each or $10 if requested 24 hours or less. Transcripts will not be released if the student has not fulfilled all financial obligations to the college. Transcript production time is usually 3-5 working days during term. Please allow up to 10 working days at the completion of each term.

TRANSCRIPTS FROM OTHER SCHOOLS
NIC does not issue certified copies of transcripts from other institutions. Transcripts reflecting a student’s previous college education that have been submitted to the college as a requirement for admission become part of the official file. Any student desiring official transcripts of credits earned elsewhere must request transcripts from the institution where the credits were taken.

STUDENT RIGHTS and RESPONSIBILITIES

ATTENDANCE
Students are responsible for attending the courses in which they are enrolled. Regular class attendance is expected. In the case of recipients of veterans educational benefits, excessive absences may mean a reduction in subsistence payments. Instructors may initiate the withdrawal of any student in their class if they deem that the student’s absences have been excessive and if it is before the last day one may withdraw from a course.

CONDUCT
Students are expected to read and comply with the NIC Student Conduct and Discipline Code, which may be found in the Student Handbook or on the Internet at
www.nic.edu/ferpa/studentcode.htm. Student handbooks are distributed at student orientations and are also available at Student Services or the Associated Students of North Idaho College offices on the 2nd floor of the Student Union.
**Support Services**

**Accident Insurance**  
769-7818

All fee-paying students enrolled in one or more credits are automatically covered by a student accident insurance plan. This plan covers accidents occurring only on the North Idaho College campus or at activities officially sponsored by the college. The cost is $10 per semester and is charged at the time of registration. The student insurance program is managed by Student Health Services. For policy coverage information, claim forms, or questions call the insurance coordinator at 769-7818.

**Adult Basic Education/GED**  
501 Lakeside Avenue, Coeur d’Alene  
676.8005

Adult Basic Education (ABE) is a program for individuals 16 years of age or older who have withdrawn from public school. It also serves adults who have graduated, but who still have a desire to upgrade their basic skills. There is no tuition and learning materials are provided.

The ABE program is designed to be “open entry, open exit.” This allows students to progress at their own pace and receive individual help. The program offers individualized instruction in classes and computer software, in addition to a lab setting. Instruction is available in reading, writing, spelling, mathematics, computer literacy, citizenship, and English as a Second Language.

Students may also attain a GED Certificate or High School Equivalency Certificate. The GED battery of tests consist of five separate subject exams. There is a $315 fee for each test. There is also a $10 fee for the government test. Call your local learning center for more information.

ABE services are available at the following sites:
- Bonners Ferry 208.267.3878
- Silver Valley 208.783.1254
- Sandpoint 208.263.4594
- St. Maries 208.582.1907
- Post Falls 208.769.5997

**Advising**  
769.7821

www.nic.edu/advising

Advising provides students with the necessary information to make good decisions and sound educational plans. Advisors help students clearly understand admission and graduation requirements, course placement and selection, transcript evaluation, transfer institution information, registration, and course and college withdrawals. Through advising, students can connect their educational and life interests to degree requirements and career opportunities.

Students are strongly encouraged to meet with their assigned advisor on a regular basis to ensure their own success. This is particularly important prior to registration each semester.

All full-time faculty and Student Services advisors provide advising for students. During the first four weeks of the semester, new students are assigned an advisor based upon their educational goals. Students can find out who their assigned advisor is through NICOnline at www.nic.edu. Students may request a change of advisor at any time through Advising Services on the 2nd floor of the Edminster Student Union Building.

**American Indian and Minority Student Support**  
769.3365

Specialized support is available to students from diverse backgrounds through the American Indian and Minority Student Advisor at an office located in the lower level of the Student Union Building. A qualified advisor is available to identify individual needs and sources of support. Support may include assistance with scholarships, enrollment, academic advising, tribal support, cultural resources, and campus clubs.

**Bookstore**  
769.3364

www.bookstore.nic.edu

The bookstore, which is called the Mica Peak Exchange, is located in the Student Union Building. It is open weekdays with extended hours during the first few days of each semester. Textbooks and supplies are available, as well as learning and self-study aids, research paper handbooks, dictionaries, books for reference and pleasure reading, software, computer supplies and accessories, snacks, personal health items, backpacks, briefcases, imprinted caps, apparel, and gift items. The Mica Peak Exchange also offers textbooks and logo items for the University of Idaho. Textbooks can be purchased online through the bookstore’s website at www.bookstore.nic.edu

**Business Office**  
769.3344

The Business Office is located in Lee-Kildow Hall and is open weekdays. Payments may be made in person at the cashier’s window or online with a Visa, MasterCard, or debit card through NICOnline which requires an access ID and access code. All checks to students may also be picked up from the Business Office with photo ID (advanced V.A. checks, however, are available through the Registrar’s Office).

**Campus Safety and Security**  
769.3310

All matters concerning security, parking, emergency response, room openings, lost and found, custodial, mail, and copy center services, should be directed to this office. Campus safety officers patrol the grounds, buildings, and
parking lots 24 hours a day and will respond to any emergency or problem. Issues concerning enforcement of applicable federal, state, city, or county laws or ordinances on college property should be directed to this office.

The Campus Safety and Security Office, located in the River Building at 905 River Avenue, is open 7:30 a.m. to 4 p.m. Monday through Friday. Parking permits are required for the year beginning each Fall Semester and may be purchased in the Student Union foyer during the beginning of the year or at the Campus Safety Office. All motor-driven vehicles operated on campus are required to be registered and display a permit. Visitor and courtesy day passes are also available.

**Career Center**
769.3297
www.nic.edu/career

The Career Center is located on the upper level of the Edminster Student Union Building and offers career counseling, resources, and education to help students and prospective students with all aspects of choosing and achieving meaningful career and life goals. Students can discover which career choices are best for them, what career options are available, and information about how to achieve their career goals. Career counseling appointments and group workshops are available to assist students with the career development process, to help make informed career decisions, to help ensure that their education is purposeful, and to increase their opportunities for success.

Personalized assistance can help students discover and move toward the career of their dreams. Seven different assessments are designed to help students learn more about their interests, skills, abilities, values, and personality, and to generate ideas about which career options might be most fulfilling. The Center also provides current information on career planning and job hunting, including information on careers related to every NIC major. Information is available on occupation descriptions, employment outlook, wages, training requirements, and scholarships. The Career Reference Library contains nearly 500 volumes, 58 videos, and 12 periodicals, as well as 52 free handouts.

Community contacts are available to provide students an opportunity to ask questions of someone working in a specific occupation. Assistance is also available to help students discover the hidden job market, write a resume, and interview successfully. Students may explore full-time and part-time job listings, Idaho Works and other job listing web sites, summer jobs, volunteer opportunities, and internships. Information is available on all U.S. colleges. Computers with Internet access are available for students to explore career information, conduct scholarship searches, access college catalogs, and conduct job searches. The Center’s website is www.nic.edu/career.

---

**Center for Educational Access (Disability Support)**
769.5947 or 769.3323 TTY

The Center for Educational Access provides accommodations to students with documented disabilities who, as a result of their disability, experience physical, emotional, or learning issues that create significant barriers to success in the educational setting. Any information disclosed regarding the nature of a student’s disability is confidential, kept in a separate file from general college files, and will not adversely affect admission to the college.

Eligible students may receive accommodations, such as interpreters, notetakers, peer tutors, readers, scribes, materials in alternative formats, testing accommodations, assistive technology, and other reasonable provisions.

In order to ensure that accommodations can be made in a timely manner, students who require taped texts should make their requests a minimum of four weeks prior to the beginning of each semester. Students who will require Braille should make their requests at least six months in advance of each semester. Students not requesting taped texts or Braille should request accommodations at least two weeks prior to the beginning of each semester. Documentation must be on file at the time that the accommodation request is made. For more information, contact the Center for Educational Access at 208.769.5947 or TTY 769.3323.

**Center for New Directions**
769.3445

The Center for New Directions, located on the first floor of the Siebert Building, provides free services for both students and members of the community. Services include career, personal, and educational counseling. Information is available about choosing a career that is suited to your interests or personality. Career assessments and interpretations are available, as well as assistance from a certified master’s level counselor. The Center also offers ongoing counseling support for those entering school, assistance with applying for financial aid, applying to school, and arranging meetings to view and learn more about NIC’s professional-technical programs. Computers are available for clients to access the Idaho Career Information System, apply online for Federal Financial Aid, and to work on individual job search skills, such as resumes. Counselors are also available to assist those who are having personal barriers to success, such as self-confidence, motivation, stress, and juggling life and school. Services are designated primarily for professional-technical students and adults in transition, such as displaced homemakers and single parents who are seeking financial and personal self-sufficiency, but assistance is also available for all students and individuals from Idaho’s five northern counties.
Support Services

Children’s Center Child Care  
769.3471
The NIC Children’s Center is located on the Coeur d’Alene campus in the Fort Sherman Park area and is a service available to NIC students enrolled in at least seven credits, contracted faculty, and staff to provide children with quality care and education services while their parents either attend class or work on campus. In addition, the center is an Early Head Start facility and also serves as the lab site for students in the NIC Child Development Program. The center is accredited by the National Academy of Early Childhood Programs and is staffed with degreed and dedicated teachers. The center operates from 6:45 a.m. to 5 p.m. Monday through Thursday and 6:45 a.m. to 3:15 p.m. on Fridays. The center is equipped with five classrooms and can accommodate up to 66 children at a time. Enrollment is open to children ages 8 weeks to 5 years (pre-kindergarten) with fees varying by age. It is recommended that students, faculty, and staff place their children on the wait list as soon as possible as the wait can be a year or longer. Enrolled families are strongly encouraged to apply to the Idaho Child Care Program (ICCP) at 769.1456 for assistance in paying childcare costs.

College Skills Center  
769.3206
The College Skills Center supports the mission of the community college by providing a variety of class offerings and services to enhance learning opportunities for North Idaho College students. A variety of academic classes are offered such as Basic Mathematics, College Study Skills, College Transition, Writer’s Workshop, College Internet Skills, and various levels of Reading Skills instruction.

The Peer Tutoring Program in the College Skills Center provides small group tutoring for any student attending an NIC class. Students may receive two hours of free tutoring per subject, per week. The Math Study Center is staffed by NIC math instructors. Students may obtain drop-in help with any NIC math course.

Computer Lab  
Molstead Library 2nd Floor 769.3251  
www.nic.edu/students/lab.html
The Student Computer Lab is located on the second floor of the Molstead Library. The lab consists of three bays of virus-protected Windows XP PCs, and one bay of OSX-G4 Macintosh computers. Three network printers are available (two black and white, and 1 color). Printers are available on a pay-for-print system. Students needing to print should obtain a copy card from the Library or from the consultant’s desk in the lab. Color scanners are available for both PC and Macintosh computers. A disability workstation is available with a color scanner and other resources to accommodate impaired students.

The lab also has a designated family-collaboration area. Students can work at a computer station while their children play quietly in a parent-supervised area. In the other portion of the bay, students will have wireless access and comfortable laptop friendly furnishings available for group and individual use.

Hours are posted at the lab entrance. All instructional classes scheduled are posted within the lab. Users must present their student ID card at the check-in desk to enter the lab. Only those students who have purchased lab use fees will be admitted. This fee is part of a student’s tuition. If there are any questions concerning any of these policies, please contact the lab supervisor.

Lab policy manuals and current hours are available at www.nic.edu/students/labs.html. Student lab consultants are available to assist students with the computers if needed.

General lab hours for Fall and Spring Semesters are:

- Monday–Thursday .... 7:30 a.m. - 10 p.m.
- Friday ...................... 7:30 a.m. - 5 p.m.
- Saturday .................. 12 p.m. - 4 p.m.
- Sunday ..................... 1 p.m. - 8 p.m.

Lab hours for Summer Session are:

- Monday–Thursday ........ 8 a.m. - 5 p.m.
- Friday ...................... 8 a.m. - 3 p.m.
- Saturday ................ Closed
- Sunday ..................... Closed

Counseling  
769.7818  
www.nic.edu/counseling
Therapeutic counselors can be reached through the above number or at Counseling Services on the second floor of the Edminster Student Union Building. Counseling can provide direction and support for enrolled students who want help managing the demands of college and personal life. This confidential assistance could include easy access to helpful information, support groups, personal counseling, or referral to appropriate community resources. A friendly staff of counselors is available to help with any concern that might interfere with student success or well-being.

Emergency Phones
Seven emergency phones are located throughout the campus grounds. These phones are mounted on freestanding poles and are identified with a flashing blue light. Each phone dials direct to the Campus Safety Office. These phones are for the use of students, staff, or visitors in case of an emergency or the need for assistance, such as an escort or vehicle jump start. Emergency phone location maps are available at the Campus Safety Office.

Head Start  
666.6755
North Idaho College Head Start is a comprehensive child development program for families and children between the ages of three and five. Families must meet eligibility requirements. Head Start’s mission is “to provide high qual-
ity, comprehensive services that foster each family’s growth, empowering them to nurture and support their children's social, emotional, cognitive, and physical development.”

Head Start is located throughout Idaho’s five northern counties with sites in Bonners Ferry, Sandpoint, St. Maries, Kellogg, Post Falls, Rathdrum, and Coeur d’Alene.

North Idaho College Head Start:
- provides nutritious meals and snacks during the school day and at parent meetings
- ensures medical and dental care
- creates a variety of educational opportunities for children and families
- establishes individualized plans for children
- recognizes parents as the child’s primary educator and teaching team partner
- encourages and supports active parent involvement
- includes children with special needs
- provides community outreach, referrals, education, and information about community resources.

**Health Services**

769.7818

Health Services offers a holistic approach to help students maintain their optimum health to support their well-being and academic success. A nurse practitioner is available weekdays for health consultations. Services are available by appointment (unless for an emergency) by calling the above number. Evaluation and treatment of minor injuries and acute health problems such as colds, flu, bladder infections, sexually transmitted diseases, etc., is provided. Reproductive health exams including birth control and emergency contraception, as well as allergy shots and immunizations are also available.

Health education information, counseling, and referrals about nutrition, stress management, relationships, sexuality, sexual orientation, rape, exercise, HIV/AIDS, and other topics are also available.

Visits are free to all students and are not related to your health insurance. Students are responsible for all laboratory charges that are not covered by insurance. Health care services that extend beyond the scope of the nurse practitioner will be appropriately referred to a physician. After-hours or emergency services can be obtained from a private physician, minor emergency clinic, or hospital emergency room. The expense of off-campus health care is the responsibility of the student and/or their health insurance carrier.

Health Services is located on the second floor of the Edminster Student Union Building. Appointments can be scheduled by calling 769-7818.

**International Student Advising**

769.7713

The International Student Advisor (ISA) is the official advisor for all international students. The ISA helps students with academic advising, class scheduling, class adds and drops, information regarding visa renewal, transfers to other colleges and universities, on-campus work, information, interpretation, and explanation of government laws and college regulations. Upon arrival on campus, all international students must meet with the ISA in order to have their I-20-ID validated.

**Job Location and Development**

769.3368

The Job Location and Development program assists students with full-time and part-time employment in the community. Current opportunities are posted in a display case in Lee-Kildow Hall next to the Financial Aid Office. For information, contact the Financial Aid Office at 208.769.3368.

**Learning Resources**

Molstead Library 769.3355
Instructional Media Services 769.3429
Website  www.nic.edu/library

Recognizing North Idaho College’s commitment to educational excellence as well as today’s increasing reliance on a vast array of information resources and technologies, the Learning Resources Department seeks to enhance the educational process by teaching critical thinking and information literacy skills which promote and encourage independent, lifelong learning. Striving for high-quality services through its dedicated staff, diverse materials, and cutting-edge technologies, Learning Resources supports the college’s educational mission.

Learning Resources includes Molstead Library and Instructional Media Services. Its services are designed to foster a comprehensive and meaningful experience for NIC students and staff.

To meet faculty media needs, Instructional Media Services (IMS) offers faculty creative instructional design services, materials, and technologies such as video and television programming and computer-enhanced instruction that includes web design assistance and digital productions. IMS supports faculty by making satellite and off-air programs available. In addition, IMS oversees and maintains the campus audiovisual equipment and media duplication services.

Molstead Library staff organizes and disseminates information in a variety of formats in support of the college’s educational mission, its varied curricula, extension programs, and administrative initiatives. Further, the library supports the information needs of the larger NIC community. The library provides quality services and materials that enrich classroom instruction and help develop skills that encourage students to become independent, self-directed, lifelong learners.

Molstead Library houses approximately 74,000 volumes and approximately 370 periodical titles in addition to a broad selection of videos, DVDs, and CDs. Enhanced computer and telecommunications capabilities make it possible for the library to offer the campus community access to a
web catalog and web full-text periodical and newspaper indexes, Internet access, CD-ROM resources, fax service, and a DVD theater studio in Todd Lecture Hall. The library also houses a self-service copy center. Color copy and transparency services are available in the library’s administrative assistant’s office.

A variety of services for students and staff such as bibliographic instructional, library tours, Internet use instruction, information research assistance, interlibrary loan, reserves, and online assistance for distance education students are available from the library’s public services staff.

Legal Advice 769.7761

The Associated Students of North Idaho College (ASNIC) retains a lawyer to provide advice to students. The advice is free, but legal counsel or official representation is the financial responsibility of the student. For information, contact the Associated Students of North Idaho College or the Vice President for Student Services located on the second floor of the Student Union Building.

Lost and Found 769.3310

Lost and found items should be turned in or claimed at the Campus Safety Office located in the River Building at 905 River Avenue.

Professional-Technical Student Support Services 769.3451

The Coordinator of Professional-Technical Student Support Services is available to provide services and resources for professional-technical students prior to and during enrollment in a technical program. The coordinator also serves as a liaison between faculty, students and other on-campus departments on issues relating to advising, registration, transcript assessment, curriculum and counseling.

The Placement Office for Professional-Technical programs coordinates activities to assist students in finding employment in their field of study upon graduation. Some of the activities provided include on-campus employer recruiting and current listings of employment opportunities.

Individual assistance is available in preparing for and accomplishing an effective job search. This includes resume preparation, cover letter writing, interview skill development, and job search strategy design. Appointments for assistance can be made by calling the Placement Office or by visiting the Placement Office in Hedlund 145.

Registrar’s Office 769.3320

The Registrar’s Office, located in Lee-Kildow Hall, serves the students, faculty and staff of the college. The office maintains student transcripts and files; processes grade reports; issues diplomas; and verifies enrollment for student loan guarantors and the Veterans Administration.

Student Support Services (SSS) 769.5979

Student Support Services (SSS) is a federally-funded TRIO educational assistance program designed to help eligible students to:

- stay in school and successfully graduate from NIC and transfer to a four-year institution,
- improve academic performance and maintain a healthy grade point average,
- work through the challenges of college life while gaining autonomy and a sense of confidence.

Services available free to eligible students include one-on-one tutoring; educational planning; individualized academic advising; study skills strategies; transfer information and assistance; and financial aid, scholarship, and four-year admissions application assistance.

To qualify for the SSS program, students must:

- be a citizen or legal resident of the United States,
- be at least a half-time student working toward a degree at NIC and planning to transfer to a four-year college or university,
- have an academic need and be either financially limited (according to federal criteria), a first-generation college student (meaning neither parent has earned a baccalaureate degree), or a student with a documented physical or learning disability.

For more information, call 208.769.5979, or stop by the Student Support Services Office in Lee-Kildow Hall, Room 123.

Veterans Benefits 769-3281

Students eligible to receive VA benefits should contact the Veterans Coordinator in the Registrar’s Office prior to registration to assure timely submission of their claim. New students who are enrolling for the first time should contact the Veterans Coordinator for forms and help in the application process approximately 8-12 weeks prior to their first term. Advanced payment of VA benefits must be requested no later than one month before a term begins for returning students. New students must allow the one month, plus the 8-12 weeks for the application process.

To be eligible for benefits, students must be matriculated (working toward a degree) and must follow the curriculum for their declared major as outlined in the college catalog. The VA will not pay for any class that is not required for obtaining a degree.

To be considered full time, a student must carry 12 credits for the entire term. It is the responsibility of the student receiving benefits to report to the Veterans Coordinator all changes (drop/add, withdrawals, etc.) that may affect eligibility for educational benefits. Failure to report such changes may result in delayed or improper benefit
payments. Students whose enrollment status changes to below the level for which they have been certified or who are failing to achieve satisfactory progress in a course, must promptly notify the Veterans Coordinator.

As with all students, regular class attendance is expected of recipients of VA benefits. An instructor may cancel the enrollment of a student who attends only sporadically or who has been absent for a period of three or more consecutive weeks. The termination will be effective the last day of attendance as reported by the instructor.

VA benefit counselors are available to each veteran by phone through the Veterans Administration Regional Office in Boise. That toll-free number is 1.800.827.1000.

### STUDENT LIFE

#### Athletics 769.3348

The North Idaho College athletics department provides intercollegiate programs in seven sports—men's and women's basketball, men's and women's soccer, wrestling, women's softball, and women's volleyball. It also supports a cheerleading program and the athletic training staff.

All sports compete in the Scenic West Athletic Conference (SWAC), which is affiliated with the National Junior College Athletic Association (NJCAA). NIC athletic programs have a rich tradition of excellence, led by the perennial power wrestling program which has won 13 national championships since its inception in 1973. Both the men's and women's basketball program have earned multiple trips to the NJCAA national tournament, qualifying from one of the toughest basketball conferences in the country.

NIC's teams have experienced monumental success in recent years. During the 2005-2006 season, NIC's men's soccer, wrestling, women's basketball, and softball teams captured their conference championship. The men's basketball team and the volleyball team were named conference co-champions.

NIC is also extremely proud of the academic achievement of several of its teams. In 2005-2006 NIC's women's basketball and softball teams were named NJCAA Academic All American teams for meeting the national standard for team grade point average.

Throughout the year, NIC athletes and coaches have won numerous national and conference honors.

NIC student-athletes compete at the highest level against some of the best competition on a regular basis. The athletic program is committed to promoting, supporting, and contributing to the academic success of each student-athlete. Scholarships are provided in all sports.

Attendance at all home intercollegiate regular-season games and athletic events are free to NIC students with current student identification. Athletics play a large role in providing students an arena for exciting entertainment throughout the year.

#### Convocations 769.3325

NIC Convocations presents various programs and events throughout the academic year as a co-sponsor with the NIC Popcorn Forum. The Convocations Committee also co-sponsors a week-long symposium each spring in conjunction with the NIC Popcorn Forum.

#### Identification Cards

All students will be issued a Student Identification Card. This card is one of the most important items you will receive during the registration process. ID cards provide access to numerous areas on campus and to a variety of events at a discount or free. You must present your ID card to check out library books, use the computer labs, check out gym equipment, or rent equipment in the Student Union Entertainment Center and Outdoor Pursuits.

Your card will be updated each semester with a validation sticker. If your card is lost or damaged, contact the Molstead Computer Lab, located on the second floor of the Molstead Library Building.

There is a $10 replacement fee for lost or stolen ID cards. A $5 fee will be charged for any updated ID card with the student's old card. This card should be kept with you throughout your duration at North Idaho College. Student identification cards are the property of NIC, and the use of this card is governed by college rules and regulations. This card is nontransferable and must be presented to college officials upon request.

#### Recreational Sports 769.3354

The Recreational Sports program is open to all students, faculty, and staff. The goal of the program is to enhance the quality of student life by providing a wide array of activities designed to meet the varied needs of the campus community. Regardless of one's skill level, individuals are encouraged to get involved “For The Fun Of It!”

Recreational Sports is an integral part of NIC's extracurricular activities. Over 1,600 students participated in the program during the 2005-2006 school year. The program offers a wide variety of team activities, such as co-ed flag football, co-ed 6-on-6 volleyball, co-ed 4-on-4 volleyball, 3-on-3 basketball, 5-on-5 basketball, floor hockey, soccer, dodgeball, and co-ed softball. Special events such as “Natural High,” broomball, ultimate frisbee, disc golf, golf, miniature golf, fun runs, lazer tag, bowling, tennis, croquet, 2-on-2 grass volleyball, and whiffleball are also offered. Recreational Sports also organizes tournaments for table tennis, pool, turkey bowling, and nerf hoops.

**To get started:**

1. Select an activity and form a team. If you are new to...
campus and would like to participate, drop by the office and leave your name and phone number, and the staff will try to place you on a team.

2. Obtain an information packet with starting dates, entry deadlines, rules and regulations, release forms, and team roster.

3. If a team forfeit fee is required, payment must be made in the Business Office prior to competing. If your team forfeits one contest during the regular season or playoffs, this fee will be lost. Teams that do not forfeit may pick up the forfeit bond from the Recreational Sports Coordinator. Team managers must pay their deposit in the Business Office before the season starts and file the receipt with the Recreational Sports Coordinator.

4. All championship teams and individual champions receive intramural t-shirts.

Recreational Sports seeks to provide new and exciting activities. If you would like to introduce a competition in a leisure activity that is not offered, submit a list comprising a minimum of four teams willing to participate and the department will strive to organize a competition schedule and provide officials. No awards will be given the first year an activity is introduced. The group organizing the activity will be expected to provide most of the leadership under the supervision of the Recreational Sport Coordinator.

Recreational Sports hires students each year to work as intramural supervisors, scorekeepers, officials and Activity Center attendants. Stop by the Recreational Sports Office on the lower level of the Edminster Student Union Building to apply.

All Recreational Sports participants must be aware of the natural risks involved in various activities. Individuals are encouraged to obtain health insurance prior to participation in any event. NIC and the Recreational Sports Department are not responsible for any injuries that may occur. Individuals who choose to participate in the program, do so at their own risk.

Outdoor Pursuits
769.7809

Outdoor Pursuits is a non-profit, student-funded program that provides fun, safe, educational outdoor activities for students, faculty, and staff. Offerings include rafting, hiking, canoeing, rock climbing, skiing, snowboarding, and kayaking, just to name a few. Most outings are geared for beginners, but individuals of all skill levels are encouraged to participate. Outdoor Pursuits also offers outdoor equipment for rent and maintains a thorough resource library of books, videos, magazines, catalogs, maps, and handouts. During the summer months, Outdoor Pursuits operates the “Sunspot” on the NIC beach which includes sailing, kayaking, sand volleyball, and a snack bar. Outdoor Pursuits is located in the lower level of the Edminster Student Union Building.

Phi Theta Kappa
769.3303

Phi Theta Kappa is the only internationally-acclaimed honor society serving two-year institutions. It is a non-profit organization which recognizes and encourages scholarship among two-year college students. Phi Theta Kappa provides opportunities for the development of leadership and service; and for an intellectual climate to exchange ideas and ideals, for fellowship among its members, and for the stimulation of interest in continuing academic excellence.

Phi Theta Kappa is based primarily on academic achievement. Candidates for membership must have completed 12 semester hours of associate degree coursework at NIC, have a cumulative grade point average of 3.5 or above, and adhere to the school code of conduct. A cumulative grade point average of 3.0 must be maintained to remain a member.

Phi Theta Kappa provides numerous opportunities. Several universities offer scholarships exclusively to Phi Theta Kappa members. For more information about NIC’s chapter, call the Phi Theta Kappa office at 769.3303.

Popcorn Forum
769.3325

The North Idaho College Popcorn Forum, sponsored by the Department of Political Science with funding from the Associated Students, was created during the 1970-71 academic year and has presented more than 539 lectures by national and international speakers over the past 36 years. The campus lecture series deal with a variety of topics such as politics, Big Foot, theology, the Bill of Rights, mysteries, women’s issues, nuclear war, world travel, evolution/creation, civil rights, psychology, DNA, human sexuality, arts, humanities, journey through time, sciences and wildlife photography.

Student Clubs
769.7761

Student clubs are another important part of the ASNIC system. The Intra-Club Council oversees more than 30 established clubs. Some of these organizations include the Engineering Club, Publications Club, Sailing Club, Human Equality Club, Drafting Club, International Students Club, and many more.

Student Events
769.5933

Student Events sponsors special events and activities which students can enjoy during breaks away from studies. Lecture series, concerts, comedy nights, dances and other special events are scheduled throughout the year by Student Events. Student input is welcome regarding what events should be offered.
The Associated Students of North Idaho College (ASNIC) functions as the governing body and voice of the students. The student government is made up of an eight-member Senate, which is presided over by the ASNIC president. Four senators are elected in the spring and four senators are elected in the fall. The Senate of the Associated Students of North Idaho College plans, directs, promotes, and distributes student funding for extracurricular activities, publications, Popcorn Forum, convocations, social events, and campus organizations. In addition, board members serve on various policy-making committees of the NIC College Senate.

ASNIC board meetings, which are open to all students and staff, are held twice a month in the Edminster Student Union Building. The ASNIC offices are located on the upper level of the Edminster Student Union Building.

Student Handbook
769.7761

A student handbook and day planner is provided to all students registering at NIC. If a copy of this handbook is not received during the registration process, a student should obtain a copy from the office of the Associated Students of North Idaho College (ASNIC). The handbook contains information about student services, student organizations, and clubs.

TV Public Forum
769.3325

Produced by the Instructional Media Services Department, the NIC-TV Public Forum is the longest running college produced PBS TV program in America. The Public Forum has aired since September, 1972. Public Forum is broadcast weekly and has produced more than 1,695 programs. It can be seen on PBS stations KSPS (Spokane), KUID (Moscow), KCDT (Coeur d’Alene), KAID (Boise), KIPT (Twin Falls) and KISU (Pocatello). The program can be received by viewers in portions of seven Northwest states, as well as British Columbia and Alberta, Canada.

The Sentinel
769.3388

Students, with NIC’s sponsorship, publish The Sentinel, which is a bi-weekly student newspaper. Interested students are encouraged to join the staff by registering for Journalism 100, Sentinel Staff. The Sentinel has earned numerous national first-place awards: the Robert F. Kennedy Journalism Award for outstanding coverage of disadvantaged people, the “Story of the Year” from the Los Angeles Times, and the “Newspaper of the Year” and “Best Photo” from the Associated Collegiate Press. In 2001 and 2003s, The Sentinel won first place in the nation for its website, which can be accessed at www.nic.edu/sentinel.

Trestle Creek Review

A literary magazine of prose and poetry is published under the sponsorship of the NIC English Division. Interested students are encouraged to enroll in English 203-A, Workshop: Trestle Creek Review, offered each Spring Semester.

Crime Statistics

The personal safety and security of students, staff, and visitors, and the protection of property are a high priority at North Idaho College. By law, the college is required to report crimes that occur on its campus. This information is provided as part of NIC’s commitment to safety and security on campus.

</table>
The NIC Residence Hall is centrally located on campus near the Edminster Student Union, the Molstead Library, tennis courts, Christianson Gym, and most campus classrooms. It is also close to the NIC beach, and not far from downtown Coeur d'Alene’s shopping, restaurants, parks, and beaches. In addition to its stunning location, the Resident Hall provides many desirable amenities such as:

- Single and double rooms
- Semi-private bathrooms
- In-room hookups for cable TV, and highspeed Internet connection
- Meals provided in the spacious Student Union Building
- Trained residence life staff
- Indoor bicycle storage
- Social lounge with fireplace
- Big-screen-TV theater lounge
- Frequent social activities and educational programs
- Laundry facilities
- Disability access
- Dedicated parking
- Group study lounge
- On-campus security
- Safe (access to residents and guests only)

**Residence Hall Application**

Students interested in living in the residence hall should send in an application packet as soon as possible. Information is available by calling the NIC Auxiliary Services department at 208.769.7787.

Applicants are required to contract for the academic year. A room deposit of $150 is required to reserve a room. This will be refunded, less a processing fee:

1. If requested by July 20 (prior to Fall Semester), or
2. At the end of the contracted residence period, except for damage charges as assessed by Housing and Residential Life. Students will be charged for abnormal damage if it occurs.

**Residence and Food Costs**

As with tuition and fees, the costs for the Residence Hall and food service are set on an annual basis by the NIC Board of Trustees. Costs for a year are estimated at $5,400 for a double room space.

**Off-Campus Housing**

Students who need assistance finding available off-campus housing are urged to contact the NIC Auxiliary Services office, which maintains a list of available housing opportunities. Students are encouraged to begin their housing search early for the best selection. The Auxiliary Services staff may be reached at 208.769.7787 or may be accessed on the Internet at www.nic.edu/sub/services/rentals.asp
NIC’s Workforce Training and Community Education Center is located in the Riverbend Commerce Park in Post Falls and offers courses designed with “something for everyone.” More than 9,000 enrollments occur annually in a wide variety of courses that offer personal and professional development opportunities. Workforce Training and Community Education courses and programs are open to anyone over the age of 16. Courses are credit-free and do not require diploma or residency restrictions. Instructors are experts in their fields with hands-on, practical information.

Workforce Training and Community Education publishes a Fall, Winter/Spring, and Summer Class Catalog that is mailed to Kootenai County residents and is available online at workforcetraining.nic.edu. The catalog is also available at libraries and other locations throughout the community. For information, call the Workforce Training Center at 208.769.3444.

Community Education 208.769.3444

The Office of Community Education offers special interest, credit-free courses to residents of the community. Class participants may cultivate a hobby, develop a skill, learn about an interesting subject, or simply enjoy a new activity. The wide range of courses is a result of requests from the community and are specially designed to be practical, enjoyable learning activities.

Community Education classes are offered year-round in the categories of Arts, Creative Writing, Creativity, Decorating with Paint, Fun with Fibers, Music, Cooking, Healthy Living, Home Enhancement, Kid’s College, Language Skills, Money Management, Recreation, and Special Interest.

The Community Education Office coordinates Elderhostel programs and sponsors a variety of events and classes designed at the request of students and instructors.

Customized Training 208.769.3268

We listen. We deliver. We make it easy.

Unlock the potential of your workforce!

- Increase your business profitability.
- Strengthen the productivity of your workforce.
- Improve the performance of your managers, supervisors, employees, and teams.
- Maintain intellectual property – reduce employee turnover.
- Gain the competitive edge.
- Successfully implement innovation.

- Make change work in your favor.

Practical solutions for positive results:

- You choose the duration, schedule, and location.
- Each training solution is tailored to meet your specific needs.
- Expect a return on your investment.

Training opportunities are endless...Lean, Project Management, Computer, Flagging, Safety, Communications, Leadership/Supervisory, Customer Service, Industry Specific Technical Skills, Sales, Accounting, Engineering Law, Blueprint Reading, Management, Structured On the Job...

Idaho Small Business Development Center (ISBDC) 208.666.8009

The Idaho Small Business Development Center exists to help businesses in Idaho thrive and grow. The ISBDC serves the entrepreneurs and business managers by providing:

- No cost one-on-one business coaching
- Affordable business workshops and seminars
- Critical market and industry research
- Wealth of valuable resources for businesses

The ISBDC works as the focal point for linking together the resources of the private business community; federal, state, and local governments; and higher education to serve the businesses in our community.

The ISBDC assists manufacturing, distribution, service, and retail businesses up to 500 employees, covering every aspect of business including expansion, operational improvement, marketing, import/export, finance/bookkeeping, management, customer service, and leadership. The consultants help equip entrepreneurs by coaching them on business skills and strategies, and by providing tools and resources enabling entrepreneurs to lead their businesses to greater growth and profitability.

The ISBDC also develops and presents seminars, conferences, and short courses tailored to meet the needs of the business community. For more information call 208.666.8009

Qualified Worker Retraining Program 208.666.8013

The Qualified Worker Retraining Program provides financial assistance to eligible low-income individuals and is designed to help participants obtain training and employment, and to increase their lifelong earnings potential. This program is funded by a federal grant from the U.S. Department of Labor, and each year seeks to help people living in north Idaho travel the road to self-sufficiency along their chosen career pathways.

The staff works with each person to develop individual employment and training plans aligned with occupations that support key sectors of our economy. Low income
area residents who are just beginning their career exploration or eligible students who are already enrolled in training may qualify for these services. For more information or to see if this program can assist you in reaching your goals, call 208.666.8013.

Workforce Development

208.769.3444

Workforce Development promotes economic progress in Idaho by meeting employer needs for trained workers; by providing students with skills and personal capabilities required for occupational success in technical and skilled occupations; by meeting specific technical training needs in selected occupations; and by providing access to training for all participant groups and individuals.

Workforce Development delivers credit-free, open-enrollment classes in many subject areas. Programs vary in both intensity and length, ranging from 3 hours to 160 hours. Classes may be held at the Workforce Training Center in Post Falls or at other sites in the five northern counties. Most classes are held in the evenings, but also during the day and on Saturdays. Course fees are the same, no matter where students reside. Operational expenses are supported by course fees and not by tax dollars.

Some of the areas of instruction include nursing assistant, real estate, electrical, plumbing, sheet metal and HVAC apprentice related instruction; log scaling; OSHA; lean management practices; first aid/CPR; and many computer software applications.

Workforce Training

208.769.3444

The goals of Workforce Training are to promote economic progress in Idaho by meeting employer needs for trained workers, by providing students with skills and personal capabilities required for occupational success in technical and skilled occupations, by meeting specific technical training needs in selected occupations, and by providing access to training for all participant groups and individuals.

Workforce Training includes pre-employment training, entrepreneurship training, upgrade training for employed persons, retraining for alternative employment opportunities and displaced workers, related instruction for apprentices in carpentry, electrical, sheet metal and plumbing, and skill development for personal enrichment.

Examples of recent credit-free, open enrollment course offerings include training for nurse assistants, dental assistants, occupational-physical therapist aides, real estate professionals, as well as courses in welding, drafting, small engine repair, machining, and many computer software programs.

CONTINUING EDUCATION UNIT

Learning activities for which regular college-level credits are not awarded may be evaluated by a system of uniform continuing education units (CEU). Such units are granted in accordance with the following guidelines set forth by the National Task Force on the Continuing Unit.

Each CEU represents 10 contact hours of participation in an organized community education experience under responsible sponsorship, capable direction, and qualified instructors. Community education, as used in this definition, includes all learning experiences in organized formats that impart noncredit education to individuals who meet participation requirements. These properties of community education may be applied equally under the system regardless of the teaching-learning format, program duration, source of sponsorship, subject matter, level, audience, or purpose.

The number of units to be awarded is determined by considering the number of contact hours of instruction, or the equivalent, included in the educational activity. Reasonable allowance may be made for activities such as required reports, laboratory assignments, field trips, and supervised study.
North Idaho College 2006-2007

Program Offerings
The following transfer program guidelines will provide some help in selecting the courses needed to fulfill the first half (lower division or 100 and 200 level courses) of many different bachelor degree programs (the traditional four-year college degree).

Completing the second half of the degree (upper division or 300 and 400 level courses) involves transferring to an appropriate college or university where the desired degree is offered. These program guidelines, however, are intended only as suggestions. Actual course selection should include a review and understanding by the student of the requirements at the intended institution.

Most of the listed program guidelines are structured around the North Idaho College Associate of Arts degree or Associate of Science degree (see the "Degree Requirements" section of this catalog for full degree description). The following may help in determining which associate degree to use as the foundation for a transfer preparation.

The Associate of Arts (A.A.) degree is designed to automatically satisfy general university requirements (GUR’s) at Eastern Washington University, Central Washington University, Whitworth College, and Gonzaga University. It will also satisfy core requirements at all public colleges and universities in Idaho. It lacks some of the flexibility of the A.S. degree (due to fewer non-core electives allowed), but offers a sometimes stronger transfer preparation to unidentified transfer institutions because of its many core areas and its use of more traditional, widely-accepted course options.

The Associate of Science degree (A.S.) is designed to automatically satisfy general core requirements at all Idaho public colleges and universities. It offers a wide range of options in many of the core areas and a generous number of elective credits for meeting course requirements specific to your major. This makes it very versatile in adapting to specific requirements at other institutions. With some planning, it can make receiving an associate's degree appropriate for almost all transfer situations.

Advisors can assist in planning an efficient transfer program by fine tuning a selected program guideline or by designing a program for majors that may not be listed. Consulting the North Idaho Catalog, the transfer institution's catalog, and advising assistance from both institutions should be part of successfully completing any transfer program.
PROFESSIONAL-TECHNICAL and OCCUPATIONAL PROGRAMS

Students enrolled in a professional-technical program receive comprehensive training and may also receive on-the-job experiences through a practicum or co-op opportunity. These programs provide educational training for entry-level job skills. Reinforcing basic skills and developing job-related skills are integral components of all programs. Programs vary in length depending on whether students choose a technical certificate or associate of applied science degree.

TECHNICAL CERTIFICATE
A student may qualify for a technical certificate by completing a professional-technical program with an overall grade point average of at least 2.00 (C) in all required courses. A grade of C- or better is also required for each specific course listed within the program outline. Practical Nursing, however, requires a 3.00 (B) cumulative GPA.

ASSOCIATE OF APPLIED SCIENCE DEGREE
Students seeking an A.A.S. degree must have an overall grade point average of 2.00 (C) in all courses required in the program. A grade of C- or better is also required for each course listed in the program outline. Some courses may not be transferable to other institutions and some programs may require electives that fulfill general education requirements. Electives are listed on page 54. Students should consult with an advisor when in setting up their program of study.

An associate of applied science degree for apprenticeship may be available through NIC for students who successfully complete four years (8,000 hours) of U.S. Bureau of Apprenticeship and Training (BAT) related instruction requirements. For information, call the NIC Admissions Office at 208.769.3311.

THE BRIDGE PROGRAM
Students who do not meet the initial prerequisite requirements to enter a limited enrollment Professional-Technical program will be classified as "pre-technical" and may wish to take advantage of the Bridge Program. By taking selected courses, students in the Bridge Program receive necessary skill-building, learn more about the field they wish to enter, and/or take courses that apply directly toward a technical certificate or an A.A.S. degree within their chosen field prior to entering the technical program.

Because of the variety of options and course requirements within each professional-technical program, prospective students classified as "pre-technical" should consult with an advisor to formulate a customized "bridging" plan prior to registration. Students who are placed on a waitlist for a limited enrollment program may also wish to pursue this option. Contact the Professional-Technical Coordinator or Student Services for additional information.

HANDS-ON TRAINING
Professional-technical and occupational programs provide hands-on training in specialized skills that are designed to connect with immediate employment opportunities. This training is accomplished through experiential learning in labs and shops, and often through additional supervised internships at selected job sites or co-op opportunities. Each program has its own curricula for ensuring that students receive ample hands-on training and work-related experience in order to be employable in their field of study. Refer to the program and course descriptions for more information about the type of hands-on training provided for each professional-technical program. Those wishing additional information or to tour the facilities may contact the Professional-Technical Counselor at 769.3371 or Professional-Technical Coordinator at 769.3468.

1 Selective Program: Admission process and requirements are explained on the appropriate page number.
2 Limited Enrollment Program: Early application is encouraged. See admissions requirements on page 13.
General Education is defined at North Idaho College as a series of learning experiences that provide the knowledge, skills, and attitudes necessary for individuals to function well in society. These learning experiences are designed for all students, but for degree-seeking students in particular.

In pursuing a degree at NIC, the expected general education learning outcomes of the degree programs are expressed through a framework of nine “abilities.” NIC believes these abilities will contribute to the development of individuals who are active, productive, and personally-fulfilled members of a highly diverse, ever-changing society.

The expected student learning outcomes for each ability are described below and are listed under each degree requirement heading on the following pages.

1. **Critical/Creative Thinking and Problem Solving:**
   The student will demonstrate the ability to analyze and evaluate information and arguments, and construct a well-supported argument. The student will select or design appropriate frameworks and strategies to solve problems in multiple contexts individually and collaboratively.

2. **Communication:**
   The student will recognize, send, and respond to communications for varied audiences and purposes by the use of reading, writing, speaking, and listening.

3. **Mathematical, Scientific and Symbolic Reasoning:**
   The student will demonstrate the ability to apply mathematical and scientific reasoning to investigate and solve problems.

4. **Historical, Cultural, Environmental and Global Awareness:**
   The student will demonstrate the ability to think globally and inclusively with a basic understanding of key ideas, achievements, issues, diverse cultural views, and events as they pertain locally, nationally, and globally.

5. **Aesthetic Response:**
   The student will demonstrate the ability to recognize the elements of design, the unifying element, context, purpose, and effect of craftsmanship and artistic creations.

6. **Social Responsibility/Citizenship:**
   The student will demonstrate awareness of the relationships that exist between an individual and social groups, private/public institutions, and/or the environment, the nature of these relationships, the rights and responsi-

7. **Information Literacy:**
   The student will develop the ability to access information for a given need, develop an integrated set of skills (research strategy and evaluation), and have knowledge of information tools and resources.

8. **Valuing/Ethical Reasoning:**
   The student will demonstrate the ability to apply what one knows, believes, and understands toward developing an empathetic and analytical understanding of others’ value perspectives. The student will incorporate valuing in decision-making in multiple contexts.

9. **Wellness:**
   The student will demonstrate an understanding of the factors that contribute to physical, emotional, psychological, occupational, social, and spiritual well-being, life-long learning, and success.
To qualify for an Associate of Arts degree, a candidate must:
1. Complete a minimum of 64 semester credits of 100- and 200-level courses with a grade point average of 2.00 (C) or better in all work attempted; and,
2. Satisfy distribution requirements listed below with a grade of C- or better in each course.

* Courses that are listed in more than one area may be used to fulfill only one requirement.

### ARTS AND HUMANITIES

**Expected General Education Learning Outcomes:** Aesthetic Response; Critical Thinking; and Valuing/Ethical Reasoning.

**Complete one course in each group: (6 credits)**

**Group 1**

**LABORATORY SCIENCE**
Expected General Education Learning Outcomes: Mathematical, Scientific, and Symbolic Reasoning; and Critical Thinking

Complete two courses from the following: (8 credits)

- BIOL 100 Fundamentals of Biology * 4
- BIOL 115 Introduction to Life Sciences * 4
- BIOL 175 Human Biology * 4
- BIOL 202 General Zoology 4
- BIOL 203 General Botany 4
- BIOL 205 General Soils 4
- BIOL 221 Forest Ecology 4
- BIOL 227 Human Anatomy & Physiology I 4
- BIOL 228 Human Anatomy & Physiology II 4
- BIOL 231 General Ecology & Lab 4
- BIOL 241 Systematic Botany 4
- BIOL 250 General Microbiology/Bacteriology 4
- CHEM 100 Concepts of Chemistry I 4
- CHEM 101 Intro. to Essentials of Gen. Chemistry I 4
- CHEM 111 Principles of Gen. College Chemistry I 4
- CHEM 112 Principles of Gen. College Chemistry II 4
- ENSI 119 Intro to Environmental Science & Lab 4
- GEOG 100 Physical Geography 4
- GEOL 101 Physical Geology 4
- GEOL 102 Historical Geology 4
- GEOL 123 Geology of Idaho & the Pacific NW 4
- PHYS 101 Fundamentals of Physical Science 4
- PHYS 103 Elementary Astronomy & Lab 4
- PHYS 111 General Physics I 4
- PHYS 112 General Physics II 4
- PHYS 211 Engineering Physics I 5
- PHYS 212 Engineering Physics II 5

* NOTE: BIOL 100, 175, and 204 cannot be used in combination to meet the Lab Science requirements. See the course descriptions.

**MATHEMATICS**
Expected General Education Learning Outcome: Mathematical, Scientific, and Symbolic Reasoning

Complete one of the following: (3-5 credits)

- BUSA 271 Statistical Inference & Decision Analysis 4
- MATH 123 Contemporary Mathematics 3
- MATH 130 Finite Mathematics 4
- MATH 143 College Algebra 3
- MATH 144 Analytic Trigonometry 2
- MATH 147 Pre-Calculus ** 5
- MATH 160 Survey of Calculus 4
- MATH 170 Analytic Geometry and Calculus I 4
- MATH 187 Discrete Math 4
- MATH 253 Principles of Applied Statistics 3

**NOTE:** Must be taken concurrently with MATH 148

**PHYSICAL EDUCATION**
Expected General Education Learning Outcome: Wellness

Complete 2 courses from any P.E. activity or dance class:

**SOCIAL SCIENCE**
Expected General Education Learning Outcomes: Historical, Cultural, Environmental, and Global Awareness; and/or Social Responsibility/Citizenship, Critical Thinking, Valuing/Ethical Reasoning, Information Literacy

Complete one course in each group, except Business Majors who may take the Economics 201-202 sequence. (12 credits).

**Group 1**

- ANTH 102 Social and Cultural Anthropology 3
- PSYC 101 Introduction to Psychology 3
- SOC 101 Introduction to Sociology 3

**Group 2**

- ECON 201 Principles of Economics (Macro) 3
- ECON 202 Principles of Economics (Micro) 3
- POLS 101 American National Government 3
- POLS 105 Intro to Political Science 3

**Group 3**

- HIST 101 History of Civilization to 1500 3
- HIST 102 History of Civilization since 1500 3
- HIST 111 U.S. History: Discovery-Reconstruction 3
- HIST 112 U.S. History: Gilded Age-Present 3

**Group 4**

- ANTH 101 Intro to Physical Anthropology 3
- ANTH 230 Intro to Arch & World Prehistory 3
- CHD 134 Infancy through Middle Childhood 3
- HIST 210 Modern Latin American History 3
- HIST 240 American Indian History 3
- PHIL 131 Introduction to Religion 3
- POLS 102 State & Local Government 3
- PSYC 205 Developmental Psychology 3
- SOC 102 Social Problems 3
- SOC 103 Cultural Diversity * 3
- SOC 220 Marriage and Family 3
- SOC 251 Race and Ethnic Relations * 3

**NON-CORE ELECTIVES**

Complete 13-16 credits (these should be selected to meet major requirements at an intended transfer institution).

- etc.
- etc.
- etc.
- etc.
- etc.
THE ASSOCIATE OF SCIENCE (A.S.) DEGREE

To qualify for an Associate of Science Degree, a candidate must:

1. Complete a minimum of 64 semester credits of 100- and 200-level courses with a grade point average of 2.00 (C) or better in all work attempted: **and**.

2. Satisfy distribution requirements listed below, with a grade of C- or better in each course.

* Courses that are listed in more than one area may be used to fulfill only one requirement.

### ENGLISH COMPOSITION

**Expected General Education Learning Outcomes:** Communication; Critical Thinking; and Information Literacy

Complete these two courses: (6 credits)

- ENGL 101 English Composition 3
- ENGL 102 English Composition 3

### LABORATORY SCIENCE

**Expected General Education Learning Outcomes:** Mathematical, Scientific, and Symbolic Reasoning; and Critical Thinking

Complete two courses from the following: (8 credits)

- BIOL 100 Fundamentals of Biology * 4
- BIOL 115 Introduction to Life Sciences * 4
- BIOL 175 Human Biology * 4
- BIOL 202 General Zoology 4
- BIOL 203 General Botany 4
- BIOL 205 General Soils 4
- BIOL 221 Forest Ecology 4
- BIOL 227 Human Anatomy & Physiology I 4
- BIOL 228 Human Anatomy & Physiology II 4
- BIOL 231 General Ecology & Lab 4
- BIOL 241 Systematic Botany 4
- BIOL 250 General Microbiology/Bacteriology 4
- CHEM 100 Concepts of Chemistry I 4
- CHEM 101 Introduction to Essentials of Gen. Chemistry I 4
- CHEM 111 Principles of Gen. College Chemistry I 4
- CHEM 112 Principles of Gen. College Chemistry II 4
- ENSI 119 Intro to Environmental Science & Lab 4
- GEOG 100 Physical Geography 4
- GEOL 101 Physical Geology 4
- GEOL 102 Historical Geology 4
- GEOL 123 Geology of Idaho & the Pacific NW 4
- PHYS 101 Fundamentals of Physical Science 4
- PHYS 103 Elementary Astronomy & Lab 4
- PHYS 111 General Physics I 4
- PHYS 112 General Physics II 4
- PHYS 211 Engineering Physics I 5
- PHYS 212 Engineering Physics II 5

* NOTE: BIOL 100, 175, and 204 cannot be used in combination to meet the Lab Science requirements. See the course descriptions.

### COMMUNICATION

**Expected General Education Learning Outcomes:** Communication; Critical Thinking; and Information Literacy

Complete this course: (3 credits)

- COMM 101 Intro to Speech Communication 3

### MATHEMATICS

**Expected General Education Learning Outcome:** Mathematical, Scientific, and Symbolic Reasoning

Complete one of the following: (3-5 credits)

- BUSA 271 Statistical Inference & Decision Analysis 4
- MATH 123 Contemporary Mathematics 3
- MATH 130 Finite Mathematics 4
- MATH 143 College Algebra 3
- MATH 144 Analytic Trigonometry 2
- MATH 147 Pre-Calculus ** 5
- MATH 160 Survey of Calculus 4
- MATH 170 Analytic Geometry & Calculus I 4
- MATH 187 Discrete Mathematics 4
- MATH 253 Principles of Applied Statistics 3

** Must be taken concurrently with MATH 148

### PHYSICAL EDUCATION

**Expected General Education Learning Outcome:** Wellness

Complete 2 courses from any P.E. activity or dance class:

### SOCIAL SCIENCE & ARTS AND HUMANITIES

**Expected General Education Learning Outcomes:** Historical, Cultural, Environmental and Global Awareness; and/or Social Responsibility/Citizenship, Critical Thinking, Aesthetic Response, Valuing/Ethical Reasoning, Information Literacy, Communication

Complete 15 credits from the following two lists of courses.

#### Social Science

Complete at least 6 credits, including courses from 2 different disciplines:

- AIST 101 Intro to American Indian Studies 3
- ANTH 101 Intro to Physical Anthropology 3
- ANTH 102 Social & Cultural Anthropology 3

**NON-CORE ELECTIVES**

Complete 24-27 credits (these should be selected to meet major requirements at an intended transfer institution).
THE ASSOCIATE OF APPLIED SCIENCE (A.A.S.) DEGREE

The A.A.S. degree is designed to provide training in specialized skills that can connect with immediate employment opportunities. It is not intended as a preparation for transfer to bachelor degree programs, although many credits may transfer to other institutions. To qualify for an A.A.S. degree a candidate must:

1. Complete a minimum of 60 semester credits of 100- and 200-level courses with a grade point average of 2.00 (C) or better in all work attempted in an identified Professional-Technical Program; and

2. Complete a minimum of 16 credits of general education coursework selected from the general education core listed below; and

3. Satisfy the distribution requirements listed below, with a grade of C- or better in each course.

NOTE: Individual programs may require specific courses listed under the headings below.

---

**ENGLISH COMPOSITION**

Expected General Education Learning Outcomes: Communication; Critical Thinking; and Information Literacy

Complete the following for a minimum of 6 credits:

Complete this course (required for an A.A.S. degree):

- ___ ENGL 101 English Composition 3

Complete one of the following courses:

- ___ ENGL 102 English Composition 3
- ___ ENGL 202 Technical Writing 3
- ___ COMM 101 Intro to Speech Communication 3

---

**MATHEMATICS**

Expected General Education Learning Outcome: Mathematical, Scientific, and Symbolic Reasoning

Complete one or more of the following courses for a minimum of 3 credits:

- ___ BUSA 271 Statistical Inference & Decision Analysis 4
- ___ MATH 123 Contemporary Mathematics 3
- ___ MATH 130 Finite Mathematics 4
- ___ MATH 143 College Algebra 3
- ___ MATH 144 Analytic Trigonometry 2
- ___ MATH 147 Pre-Calculus ** 5
- ___ MATH 160 Survey of Calculus 4
- ___ MATH 170 Analytic Geometry & Calculus I 4
- ___ MATH 187 Discrete Math 4
- ___ MATH 253 Principles of Applied Statistics 3

** Must be taken concurrently with MATH 148

---

**SOCIAL SCIENCE/HUMAN RELATIONS/ INTERPERSONAL COMMUNICATIONS**

Expected General Education Learning Outcomes: Historical, Cultural, Environmental and Global Awareness; or Valuing/Ethical Reasoning; or Social Responsibility/Citizenship; or Communication; or Critical Thinking; or Aesthetic Response; or Information Literacy

Complete one or more of the following courses for a minimum of 3 credits:

- ___ AIST 101 Intro to American Indian Studies 3
- ___ ANTH 101 Intro to Physical Anthropology 3
- ___ ANTH 225 Native People of North America 3
- ___ ANTH 230 Intro to Arch & World Prehistory 3
- ___ ART 100 Survey of Art 3
- ___ ART 101 History of Western Art I 3
- ___ ART 102 History of Western Art II 3
- ___ CDA 201 Interm. Coeur d'Alene Language 4
- ___ COMM 233 Interpersonal Communication 3
- ___ ECON 201 Principles of Economics (Macro) 3
- ___ ECON 202 Principles of Economics (Micro) 3

- ___ POLS 102 State and Local Government 3
- ___ POLS 105 Introduction to Political Science 3
- ___ PSYC 101 Introduction to Psychology 3
2006-2007

Degree Requirements

___ PSYC 205 Developmental Psychology 3
___ SOC 101 Introduction to Sociology 3
___ SOC 102 Social Problems 3
___ SOC 103 Cultural Diversity 3
___ SOC 220 Marriage and Family 3
___ SOC 251 Race & Ethnic Relations 3
___ SPAN 201 Intermediate Spanish I 4
___ SPAN 202 Intermediate Spanish II 4
___ THEA 101 Introduction to the Theatre 3

PROFESSIONAL-TECHNICAL REQUIREMENTS

In addition to the general education requirements listed above, candidates for an A.A.S. Degree must complete 44 credits or more in their specific Professional-Technical program.

NATURAL SCIENCE OPTION

Expected General Education Learning Outcomes: Mathematical, Scientific, and Symbolic Reasoning; and Critical Thinking

In addition to the above requirements, a candidate may complete either one of the following courses, or additional courses from any category above, to satisfy the 16 credit hours of general education coursework.

___ BIOL 100 Fundamentals of Biology 4
___ BIOL 175 Human Biology 4
___ BIOL 202 General Zoology 4
___ BIOL 203 General Botany 4
___ BIOL 204 Introduction to Life Sciences 4
___ BIOL 205 General Soils 4
___ BIOL 221 Forest Ecology 4
___ BIOL 227 Human Anatomy & Physiology I 4
___ BIOL 228 Human Anatomy & Physiology II 4
___ BIOL 231 General Ecology & Lab 4
___ BIOL 241 Systematic Botany 4
___ BIOL 250 General Microbiology/Bacteriology 4
___ CHEM 100 Concepts of Chemistry I 4
___ CHEM 101 Intro to Essentials of Gen. Chemistry I 4
___ CHEM 111 Principles of Gen. College Chemistry I 4
___ CHEM 112 Principles of Gen. College Chemistry II 4
___ ENSI 119 Intro to Envir Science & Lab 4
___ GEOL 100 Physical Geography 4
___ GEOL 101 Physical Geology 4
___ GEOL 102 Historical Geology 4
___ GEOL 123 Geology of Idaho & the Pacific NW 4
___ PHYS 101 Fundamentals of Physical Science 4
___ PHYS 103 Elementary Astronomy & Lab 4
___ PHYS 111 General Physics I & Lab 4
___ PHYS 112 General Physics II & Lab 4
___ PHYS 211 Engineering Physics I & Lab 5
___ PHYS 212 Engineering Physics II & Lab 5
### ACCOUNTING ASSISTANT

#### Professional-Technical Program

The Accounting Assistant program prepares students for occupational opportunities in the field of bookkeeping including payroll clerk, accounts receivable clerk, accounts payable clerk, and full-charge bookkeeper. Bookkeeping and related fields involve the day-to-day analyzing and recording of business transactions, preparing payroll, preparing financial reports, filing state and federal forms, and analysis and decision making. Students will complete general education, general business, and accounting specific courses that will lead to a technical certificate, an advanced technical certificate, or an associate of applied science degree. Emphasis is placed on manual and computerized accounting applications, current business taxes, credit, collection, and payroll. During the final semester of the A.A.S. degree students will participate in an accounting internship which is the capstone course for this program. The internship will include tips on job hunting, 135 hours of an off-campus internship, resume writing, interviewing skills, and occupational relations.

ADMINISTRATIVE ASSISTANT
Professional-Technical Program

The Administrative Assistant program combines a well-balanced academic program with expert administrative and computer instruction to give students a diversified educational training and background needed to hold a position of responsibility and importance in many areas of the business world. This program helps raise administrative skills to a professional level, gives the student a technical background through completion of technical skill courses, and includes an academic component that provides a mature understanding of professional responsibilities in our global economy. The administrative assistant has a variety of options in offices of their interest. These might be in travel, sports, or entertainment; banking, insurance, or real estate; technical, government, or foreign service; and public, private, or temporary agencies.

ASSOCIATE OF APPLIED SCIENCE DEGREE

In addition to the specific Administrative Assistant courses, students must take a minimum of 16 credits of A.A.S. general education courses as specified in the program below.

3. Students intending to obtain a four-year degree should take ACCT 201.
4. Mathematics requirement includes any math course that is MATH 123 or higher and meets the A.A.S. degree requirements listed on page 58. If a 3-credit math course is taken, an additional A.A.S. degree general education course will be required to meet the 16-credit general education core requirement for the A.A.S. degree.

AMERICAN INDIAN STUDIES

Transfer Program

The American Indian Studies program was designed in collaboration with the Coeur d’Alene Tribe and examines the contemporary and ancient experiences and ways of life of the first Americans from their perspective. The curriculum is designed to provide a study of American Indians from a holistic and humanistic viewpoint by focusing on their cultural, historical, and contemporary life. It is an interdisciplinary program drawing on the arts, humanities, social sciences, natural resources, science, and professional studies.

This program satisfies the requirements for an Associate of Arts or Science academic transfer degree and is intended to serve both Indian and non-Indian students. The program is designed to provide a solid general education for American Indian students and to prepare them for most majors at transfer institutions, while at the same time maintaining relevant connections with their Indian heritage, culture, language, and contemporary issues. The program also provides this same general education for non-Indian students, while promoting truer understanding and appreciation of American Indian people. In addition to the courses specifically focusing on Indian subject matter, most of the general education requirement courses have substantial American Indian studies content so that all students increase their knowledge of Indian people, history, traditions, and ways of life.

Themes and topics of the program include the integrity, richness, and complexity of traditional American Indian cultures;
the reciprocal impact of traditions and interests that occurred with colonization; modes and processes of cultural change; cultural disintegration, survival, and revitalization; and an understanding of the variety of methodological and theoretical approaches to American Indian Studies.

Students enrolling in the program are encouraged to study the Coeur d’Alene language. Although American Indian tribal nations are as different from each other as one European nation is from another, learning the language of the local Indian people provides a gateway into and a foundation for truly understanding a particular set of American Indian values, a world view, and sense of place.

North Idaho College recognizes that the Coeur d’Alene and neighboring tribal elders represent the wisdom of the past. Their knowledge of the tribal traditions should nurture the Indian student who seeks not only education, but wholeness through preparation for the future and respect for the past. The program is a tool for that preparation and an affirmation of that respect. Therefore, wherever and whenever possible and appropriate, the program will employ tribal elders as resources for classroom instruction.

American Indian Studies is excellent preparation for a professional career in community development such as teaching; law and security; health and human services (student services counselor, mental health worker, and cultural resource specialist); tribal administration, (department manager, tribal museum curator, and natural resource management); social work; and inter-ethnic relations.

ANTHROPOLOGY Transfer Program

Anthropology is the study of the physical, mental, and cultural characteristics of human kind. Generally, a 2.50 grade point average from a community college will allow students into upper division anthropology work. Completion of the following courses results in an associate degree and meets the general core requirements at all Idaho public universities. The suggested courses normally fulfill the first half of baccalaureate requirements in anthropology. Course selection should match requirements defined by intended transfer institutions.

- ANTH 225 Native People of North America is recommended.
- ENGL 285 American Indian Literature is recommended.

Program Total 64-66

Notes:

- These courses can also be used to satisfy degree requirements as appropriate.

ART Transfer Program

The Art Department’s transfer programs are structured as a broad introduction to the nature, vocabulary, media, styles and themes of the visual arts. Students pursuing a Fine Arts or Graphics Design major (the Graphic Design program is described on page 84) and transferring credits may complete all basic art requirements while at NIC. Students may pursue an A.A.S. degree in Graphic Design as an occupational program.

The Art Department’s curriculum emphasizes four major goals: developing the highest levels of individual artistic awareness and expression; providing coursework for students as part of their general education experience; combining rigorous training in technical and formal skills in graphic design; and maintaining a gallery as a visual arts resource in the region.

Completion of the following courses results in an associate degree and meets the general core requirements at all Idaho public institutions. The suggested coursework below normally fulfills the first half of baccalaureate degree requirements for Graphic Design or Fine Art. Course selection should be tailored to match requirements defined by intended transfer institutions.

Students pursuing an art major have several options. Students transferring to a baccalaureate program after graduation to complete a B.A. or B.S. degree may choose “emphasis electives” from either the Fine Arts or the Graphic Design area. Students interested in applying their art training immediately after graduation will want to consider the Graphic Design occupational degree option. Each area is outlined below.

FINE ARTS EMPHASIS

Courses in this area provide instruction in the creative process through studio art classes and art survey. This foundational coursework explores the aesthetic principles that lead to individual expression.

GRAPHIC DESIGN EMPHASIS

Graphic artists are visual specialists who convert ideas into symbols and devise print advertising, corporate identity systems, and electronic media. As the communications link between supplier and consumer, the commercial artist conceives and executes ideas that inform, motivate, educate, or sell. Students selecting a Graphic Design emphasis will be exposed to basic technical and conceptional skills using computers and other resources necessary to produce sophisticated and effective presentations. The Graphic Design Associate of Applied Science degree option is described on page 86.

AUTOMOTIVE TECHNOLOGY
Professional–Technical Program

This two-year A.A.S. degree or Advanced Technical Certificate program is designed to prepare students for employment as entry-level technicians in the automotive repair industry. All ASE (Automotive Service Excellence) areas will be taught through the use of lecture, mock-ups, and customer vehicles. Successful completion of each semester and/or permission of the instructor is required for admission to the next semester. Due to the complexity of today's cars, the industry requires a high degree of reading and comprehension skills. Placement in specific English and math is determined by the college assessment test. Students who desire to upgrade skills in those areas may do so through the Bridge Program (see page 51). Current industry professionals may enroll in individual courses on a space-available basis and with the instructor’s permission.

Semester Total 21
Program Total 72-73

Notes:
1 Mathematics requirement includes any math course that is MATH 123 or higher and meets the A.A.S. degree requirements listed on page 58. If a 3-credit math course is taken, an additional A.A.S. degree general education course will be required to meet the 16-credit general education core.
2 Satisfies the A.A.S. degree general education requirement.
3 Select from A.A.S. degree general education requirements listed on page 58.

BACTERIOLOGY-MEDICAL

Transfer Program

The Bacteriology-Medical Technology program is designed for students who desire professional careers in applications of control and diagnosis of diseases, agriculture, food technology, genetic engineering, environmental/pollution control, clinical lab work in hospitals, public health and research labs, and in industrial and pharmaceutical laboratories.

Recommended electives are BIOL 231 (General Ecology) and BIOL 227-228 (Human Anatomy and Physiology). Students planning to attend Eastern Washington University should follow the A.A. degree requirements. Students planning to transfer to another university may coordinate their program to meet that institution’s requirements.

A cumulative grade point average of 2.00 or better for most baccalaureate degrees is required. Completion of the following courses results in an associate degree and meets the general core requirements at all Idaho public universities. The suggested coursework normally fulfills the first half of baccalaureate degree requirements in Bacteriology-Medical Technology. Course selection should be tailored to match requirements defined by intended transfer institutions.

BIOLOGY, BOTANY, OR ZOOLOGY

Transfer Program

The biological sciences deal with the basic principles of all living things: structure, function, and ecological associations. An A.S. degree is needed to continue in a variety of fields such as allied health professions, education, medical school, agriculture, forestry, Environmental Protection Agency, as well as state and national agencies dealing with biology, various industries, and consulting agencies.

Recommended electives for this degree are CHEM 277 and 278 (Organic Chemistry I and Lab); CHEM 287 and 288 (Organic Chemistry II and Lab); MATH 160 (Survey of Calculus) or MATH 170 (Analytical Geometry and Calculus I); and PHYS 111 or PHYS 112.

Completion of the following courses results in an associate degree and meets the general core requirements at all Idaho public universities. The suggested coursework normally fulfills the first half of baccalaureate degree requirements in Biology, Botany, or Zoology. Course selection should be tailored to match requirements defined by intended transfer institutions.

BUSINESS ADMINISTRATION

Transfer Program

The study of Business Administration leads to career opportunities in accounting, economics, information systems, finance, human resources management, marketing, production management, and other business-related fields. This program provides the first two years of study leading to a bachelor’s degree in these business fields.

For admission to a College of Business and enrollment in 300-level business courses, the typical requirement is completion of a “business core.” This usually includes the following five courses: ACCT 201 and 202 (Principles of Accounting), ECON 201 and 202 (Principles of Economics), and BUSA 271 (Statistical Inference and Decision Analysis).

Students who intend to transfer to the College of Business at the University of Idaho, Lewis-Clark State College, and most other business schools should complete CAPS 130 (Introduction to Spreadsheets) or possess equivalent knowledge. Accounting students are usually required to take additional courses beyond other business majors. Students should see their advisor for these requirements.

Students who intend to transfer to Lewis-Clark State College should take BUSA 265 (Legal Environment of Business) and BUSA 271 (Statistical Inference and Decision Analysis); ENGL 272 (Business Writing); and BUSA 240 (Computer Systems and Business Applications).

Completion of the following courses results in an associate degree. The associate degrees meet the general core requirements at all Idaho public universities. The suggested coursework normally fulfills the first half of baccalaureate degree requirements in Business Administration. Course selection should be tailored to match requirements defined by intended transfer institutions.

CARPENTRY

Professional–Technical Program

The 10-month Carpentry program is intended to provide the skills and training for entry into the field of residential carpentry. Various aspects of carpentry connected with residential house construction will be taught. Site preparation, forming and placing concrete, trade math, framing, rafter and truss installation, stair layout, insulation, exterior finish, and interior finish are all areas which will be thoroughly covered in class and in the field. Students will use many hand, portable electric, and stationary power tools and must acquire good skills in the area, as well as understand all safety aspects of the tools used.

The Carpentry program creates actual work situations emphasizing teamwork, work ethics, safety, and oral communication. A general education component consisting of communications, occupational relations, and math is integrated into the program. Successful completion of the first semester and permission of the instructor is required for admission into the second semester.

Placement in specific English and math classes is determined by the college assessment test. Students who desire to upgrade skills in those areas may do so through the Bridge Program (see page 51).

Summer Session
Course No.  Title  Credit Hrs
Carpenter No  Carpentry Theory I  4

Carpentry Management Technology

Professional–Technical Program

The second year of the Carpentry program leads to an A.A.S. degree in Carpentry Management Technology and is intended to advance the skills learned in the one-year certificate program. Successful students will demonstrate advanced materials and cost estimation, blueprint reading, job scheduling, and will receive a more in-depth view of what the construction industry requires of those who are in supervisory positions or intend to operate their own contracting business.

The Carpentry program’s second year creates “real world” construction management experience through student participation in the construction of the North Idaho College Foundation Really Big Raffle house project as well as planning and management of other construction projects that are part of the program’s laboratory curriculum each year. Second-year students are challenged at a higher level as they meet with subcontractors and obtain materials and special supplies throughout work on the project house. Interpersonal and supervisory skills are honed as students act as on-site foremen for groups of first-year students.

Advanced specialty carpentry skills are emphasized during the second year which allow students to improve their own technical skills. All students are required to take courses in drafting, communications, business, and computer applications. Cabinet making, commercial construction, architecture, welding, and masonry may also be addressed according to student’s individual preferences.

Successful completion of the first-year certificate program and permission of the instructor is required in order to enroll in the Carpentry Management Technology program.
In addition to the specific Carpentry Management Technology courses, students must take a minimum of 16 credits of A.A.S. general education courses as specified in the program below.

4. Select from A.A.S. degree general education social science/human relations/interpersonal communication requirements listed on page 58.

CHEMISTRY

Transfer Program

This program is for students interested in pursuing a baccalaureate degree in chemistry. Chemistry is a science that deals with the composition, structure, and properties of substances and their transformations. NIC’s small class size facilitates student interaction with qualified faculty and excellent laboratories. A solid math and science background is important preparation for a college chemistry program.

Completion of the following courses results in an associate degree and meets the general core requirements at all Idaho public universities. The suggested coursework normally fulfills the first half of baccalaureate degree requirements. Course selection should be tailored to match requirements defined by intended transfer institutions.

NOTES:

1. Select electives from A.S. degree requirements on page 56.
**CHILD DEVELOPMENT**

The Child Development program provides two options for students wishing to pursue a career working with young children from birth to age eight. Students can complete courses for an associate's degree, which prepares for transfer to a four-year college or university and entry-level career opportunities. Students who do not intend to transfer may opt to pursue courses that prepare them to apply for a Child Development Associate Credential, a non-degree national credential.

**Transfer Program**

The Child Development associate degree program is designed to meet requirements for students transferring to four-year institutions in Child Development or Early Childhood Education. Students who earn an associate's degree in Child Development are qualified to seek entry-level career opportunities in early care and education, preschool, Head Start, and teaching in some private education programs serving children and families from birth to age 8, both typically and atypically developing.

Further study leading to a baccalaureate degree, especially those programs offering the Blended Early Childhood/Early Childhood Special Education component, affords career options in elementary education (K-3), special education, and other child-related fields. An associate's degree meets the general core requirements at all Idaho public universities.

Course selection should be tailored to match requirements as defined by transfer institutions. To ensure appropriate courses are taken, those students intending to pursue the Blended Early Childhood/Early Childhood Special Education component at Idaho transfer institutions should meet with an NIC Child Development advisor upon acceptance into the college.

**NOTES:**

1. Suggested ART 100 or MUS 101 and ENGL 257
2. Select electives from A.A. degree requirements on page 54.

**CREDENTIAL PREPARATION PROGRAM**

This program is intended for individuals preparing to work in early care and education settings and for those individuals already working in family child care or early childhood centers who wish to gain further knowledge and expertise in the field. The nationally recognized Child Development Associate (CDA) Credential is the minimum education standard required for employment in Head Start and accredited early childhood programs. Eighteen credits of coursework provide the theoretical and practical framework for establishing appropriate program practices for young children and families. After completing the courses and accompanying requirements, and with at least 480 documented hours of direct work with young children in an early childhood program, students will be ready to apply for the Child Development Associate Credential from the Council for Early Childhood Recognition.

A CDA candidate must be at least 18 years of age and have a high school diploma or equivalent and complete documentation requirements set by the Council for Early Childhood Recognition. These include a professional resource file, statements of competence for each of the six CDA Competency Goals, parent questionnaires, and the CDA Observation Instrument, which is completed by a trained advisor from the college.

The CDA credential is a recognized professional level on the
The Collision Repair Technology program is a 10-month program designed to prepare students for entry-level employment as a collision repair technician and/or painter. All phases of refinishing are covered including basecoat and clear coat applications. MIG welding, plastic and fiberglass repair, sheet metal repair and replacement, estimating, glass replacement, damage analysis including unibody and full frame alignment, electrical and mechanical diagnosing, and other related topics are covered.

A general education component of communications, occupational relations, and computational skills is also integrated into the program. Successful completion of the first semester and/or permission of the instructor is required to continue to the next semester. Strong basic math and good reading skills are recommended. Placement in specific math and English classes is determined by the college assessment test.

### COMMUNICATIONS

**Transfer Program**

Communication is a discipline that teaches vital skills for success in today's society and provides professional preparation in communication fields. Communication provides the link for using all other technical skills and knowledge acquired in one's lifetime. Few assets are more valuable to career or community as a basic understanding of the dynamics of communication.

NIC offers program options or emphasis areas in Speech/General Communication, Public Relations, Visual Communication, and Journalism. Each program option includes a common core of courses required of all communication majors. Completion of the following courses results in an associate degree and meets the general core requirements at all Idaho public universities. The suggested coursework normally fulfills the first half of baccalaureate degree requirements in Communications.

### SPEECH/GENERAL COMMUNICATION

Speech is a communication area that is not limited to public speaking. Speech includes the study of how people interact in relationships and groups, as well as public presentation situations. The course of study offered at NIC gives students the opportunity to explore all these areas of communication.

### ASSOCIATE OF ARTS DEGREE

In addition to the core courses required for the A.A. degree (see page 52), students should select a minimum of 13-16 elective credits from the following. A minimum total of 64 credits is required for the A.A. degree. Course selection should be tailored to match requirements defined by intended transfer institutions.

Notes:

1. Also meets A.A. Cultural Diversity requirement.
The A.A.S. degree in Computer Information Technology is a two-year program that will prepare students for working with sophisticated networking hardware and operating system software and will lead to industry-recognized certifications. It also includes all related coursework to complete A.A.S. degree requirements. North Idaho College operates a Cisco Regional Academy providing training and support for area Local Academies and a Local Academy that delivers training directly to students and professionals. NIC is a Microsoft IT Academy and a Microsoft Developer Network Academic Alliance Partner. Official curriculum materials are used in all classes.

The Computer Information Technology program is designed to provide students with essential skills to plan, implement, administer, support, and secure networked computer systems and associated users, as well as install and configure routers and switches in multiprotocol internetworks using LAN and WAN interfaces.
Continued advances in network technology have created an increased need for professionals trained in the information technology field. Students will gain essential technical instruction that enables them to perform tasks such as network design, installation, maintenance, and management as well as implementation and operation of computer and network systems.

This is a limited enrollment program.

1 Satisfies A.A.S. degree general education requirement.
2 See CITE 295 course description on page 139.
COMPUTER SCIENCE

Transfer Program

This program leads to career opportunities in a wide variety of computer science areas such as operating systems, expert systems, graphics, databases, software engineering, compilers, numerical analysis, etc. This program requires a good math background. Students should complete MATH 147.

Completion of the following courses results in an associate degree and meets the general core requirements at all Idaho public universities. The suggested coursework normally fulfills the first half of baccalaureate degree requirements in Computer Science. Course selection should be tailored to match requirements defined by intended transfer institutions.

CRIMINAL JUSTICE

Transfer Program

This program is recommended for students interested in pursuing a career in the criminal justice field. Positions available to graduates may be found in the areas of local law enforcement agencies, correctional institutions, public and private security agencies, insurance companies (adjustor, investigator, etc.), or with a state’s Department of Motor Vehicles.

Completion of the following courses results in an associate degree and meets the general core requirements at all Idaho public universities. The suggested coursework normally fulfills the first half of baccalaureate degree requirements in Criminal Justice. Course selection should be tailored to match requirements defined by intended transfer institutions.

CULINARY ARTS
Professional-Technical Program

The Culinary Arts program provides students with entry-level skills in the food service industry. Students receive instruction in cooking and baking, as well as theoretical knowledge that underlines competency in the field. Additional training involves table service, menus, cost controls, storeroom, and stewarding. Students will have the opportunity to:

- Learn and effectively practice basic and advanced technical skills in food preparation and service.
- Understand the principles of food identification, nutrition, and food and beverage composition.
- Gain experience in the proper use and maintenance of professional food service equipment.
- Become familiar with the layout and workflow of professional kitchens and bakeshops.
- Gain an appreciation for the history, evolution, and international diversity of the culinary arts.
- Develop a sense of professionalism necessary for working successfully in the food service industry.

Students spend approximately 10 hours a week in theory and 20 hours a week in the kitchen and dining room operating Emery's Restaurant to learn the front and back of the restaurant operation. Successful completion of each semester is required for admission into the next semester. This is a limited enrollment program.

Notes:
¹ Students may substitute a higher course with instructor permission.
The Diesel Technology program is designed to prepare students for employment as entry-level truck/heavy equipment technicians. The program emphasizes extensive shop work using actual customer projects, as well as mock-up units and assemblies similar to those found in industry.

Instruction includes theory and troubleshooting of problems involved in the repair and maintenance of engines, transmissions, differentials, brakes, steering, suspension, cooling, as well as hydraulics, undercarriages, fuel and air systems, and Class B Commercial Drivers License (CDL) training. Integrated in the program is a course in welding and cutting using both oxy-acetylene and electric arc. Successful completion of each semester and/or permission of the instructor is required to continue into the next semester.

Placement in specific English and math classes is determined by the college assessment test. Students who desire to upgrade skills in those areas may do so through the Bridge Program (See page 51).

Current industry professionals may enroll in individual courses on a space-available basis and with the instructor’s permission.

Notes:

1 Students may substitute a higher course with instructor permission.

2 Students may substitute another course with instructor permission.
The Drafting and Design Technology program offers students the opportunity to learn skills required by today's industries. The program offers several options: a two-semester technical certificate, a four-semester advanced technical certificate, and a four-semester a choice of three two-year A.A.S. degree options. The first year focuses extensively on manual drafting using both pencil and ink, and computer-aided drafting software. Students in the second year of the A.A.S. degree programs focus on design principles using specialized software in one of the following areas: architectural design, civil design, or mechanical design.

A student could return for a third year to study the remaining two areas of specialty. Successful completion of each semester and/or permission of the instructor is required to continue into the next semester.

Portions of the A.A.S. degree options may transfer to various four-year institutions. Contact your advisor or the Coordinator of Professional-Technical Student Support Services at (208) 769-3468 for details.

Students entering the A.A.S. degree program should be prepared to complete Math 143 and English 101 during the first year of the program before they may continue. Placement in specific English and math courses is determined by the college assessment test. Students who desire to upgrade skills in those areas prior to beginning the Drafting and Design Technology program may do so through the Bridge Program (see page 51).

Current industry professionals may enroll in a single course on a space available basis and with instructor permission.

Notes:

1. Mathematics requirement includes any math course that is MATH 123 or higher and meets the A.A.S. degree requirements listed on page 56. If a 3-credit math course is taken, an additional A.A.S. degree general education course will be required to meet the 16-credit general education core.

2. Satisfies A.A.S. degree requirement.

3. Students may substitute another course with instructor permission.
### Second Semester
- **DRFT 102** Intro to Theory of Drafting 4
- **DRFT 106** Fund. of 3-D Descriptive Geometry 2
- **DRFT 112** Industrial CAD Graphics 6
- **ENGL 099** Fundamentals for Writing 3

*Semester Total 15*

Students will choose an emphasis in Architectural, Civil, or Mechanical Design:

#### ARCHITECTURAL DESIGN OPTION

**Third Semester**
- **DRFT 231** Architectural Design and its History 5
- **DRFT 234** Blueprint Reading, Building Codes, and Estimating 5
- **ATEC 120** Occupational Relations 3

*Semester Total 13*

**Fourth Semester**
- **DRFT 233** Arch Design and Construction Practice 5
- **DRFT 239** Structural Design & Modeling 4

*Semester Total 9*

#### CIVIL DESIGN OPTION

**Third Semester**
- **DRFT 241** Introduction to Civil Design 4
- **DRFT 247** Advanced Blueprint Reading-Civil 2
- **DRFT 249** Land Planning 2
- **ENGR 214** Surveying 4
- **ENGR 214L** Surveying Lab 0

*Semester Total 12*

**Fourth Semester**
- **DRFT 243** Advanced Civil Design 4
- **DRFT 245** GIS/Cartography 3
- **ATEC 120** Occupational Relations 3

*Semester Total 10*

#### MECHANICAL DESIGN OPTION

**Third Semester**
- **DRFT 251** Introduction to Mechanical Design 4
- **DRFT 255** Machine Control Processes 3
- **DRFT 257** Dimensioning and Tolerancing 3
- **ATEC 120** Occupational Relations 3

*Semester Total 13*

**Fourth Semester**
- **DRFT 253** Advanced Mechanical Design 4
- **DRFT 254** Power Transmission 2
- **DRFT 258** Statics and Strengths of Materials 3

*Semester Total 9*

- **DRFT 253** Advanced Mechanical Design 4
- **DRFT 254** Power Transmission 2
- **DRFT 258** Statics and Strengths of Materials 3

*Semester Total 13*
ENGINEERING Transfer Program

A full range of engineering and related courses are offered to satisfy freshman and sophomore requirements for students planning to transfer to institutions offering baccalaureate degrees in engineering or engineering technology. A solid foundation is laid for further studies in civil, mechanical, chemical, and electrical engineering. This program provides the flexibility needed by students interested in emerging fields like computer science, robotics, bioengineering, geological engineering, environmental engineering, and many others.

The advantages of small class size, individual attention, a knowledgeable professional staff, and state-of-the-art instructional equipment incorporating modern CAD (computer aided design) are well suited to meeting the lower division requirements for degrees in engineering. A solid math and science background is important preparation for a college engineering program.

These curricula are designed to allow students transferring to the University of Idaho to enter their junior year with close to the same coursework as students who completed their first two years at that school. Curricula can be adjusted to meet similar requirements for other institutions.

EDUCATION Transfer Program

Students who plan to teach in elementary school, middle school, or high school should contact the university they are planning to transfer to as soon as they know they want to complete a teacher certification program. Delaying could result in spending extra time and money on classes that are not needed for the transfer institution's core curriculum, college of education requirements, and/or state certification requirements.

While deciding which transfer university to attend, students may enroll in courses which have a high probability for transfer such as English 101 and 102, Communication 101, Psychology 101, History 111 and 112, and Political Science 101.

Students who are uncertain about whether to become a teacher or not, may enroll in Education 201 as a sophomore. This course is designed to assist students in making an educated decision about teaching as a career choice.

Students pursuing an A.A. or A.S. degree through NIC should follow the general core requirements listed on pages 54-57 and tailor their elective courses identified by their intended transfer institution catalog.

ELECTRICAL ENGINEERING

In addition to the following Engineering coursework, students seeking an Associate of Science degree from NIC need to complete degree core requirements as listed on page 56 for the A.S. degree.

MECHANICAL ENGINEERING

In addition to the following Engineering coursework, students seeking an Associate of Science degree from NIC need to complete degree core requirements as listed on page 56 for the A.S. degree.

CIVIL ENGINEERING

In addition to the following Engineering coursework, students seeking an Associate of Science degree from NIC need to complete degree core requirements as listed on page 56 for the A.S. degree.
Program Guidelines

ENVIRONMENTAL HEALTH

Transfer Program

This program is designed for students planning to transfer to an environmental health program at Boise State University. Refer to the BSU catalog, Department of Community and Environmental Health Programs, for guidance during the first two years. Students must spend 20 hours with environmental health agencies prior to beginning upper division (junior) courses. An internship with public health agencies is also required as part of upper division level students.

</tbody>
</table>

Notes:

1 Satisfies A.S. Lab Science core requirement.

ENGLISH

Transfer Program

Through the study of literature and training in composition, students studying English learn to think logically, to analyze and organize a wide variety of data, and to write and speak clearly, accurately, and convincingly - in a word, to communicate. Mastery of the skills of communication gives students their greatest advantage in continuing their education or in entering the job market. In addition, because students who study literature must deal with writing in a number of genres from various periods, and containing various ideas, they learn how to become reasonably knowledgeable in areas in which they have had no previous training. In other words, they learn how to keep on learning throughout their lives. Students learn how to access specialized materials and how to evaluate and interpret data of various kinds by writing well-documented and convincing analyses. All of these are skills that do not become obsolete with advances in science and technology.

Completion of the following courses results in an associate degree and meets the general core requirements at all Idaho public universities. The suggested coursework normally fulfills the first half of baccalaureate requirements in English. Course selection should be tailored to match requirements defined by intended transfer institutions. Students who plan to earn a bachelor of science degree at a four-year institution may wish to take courses which would lead to an A.S. degree rather than an A.A. degree. Curriculum requirements should be coordinated with the catalog of the transfer institution.

FORESTRY / WILDLIFE / RANGE / RECREATION MANAGEMENT
Transfer Program

This program provides suggested coursework for the first half of baccalaureate degree requirements in natural resource management disciplines such as forestry, wildlife, range, or wildland recreation management. The program acquaints students with physical, biological, and social sciences, as well as the humanities. This will provide a basis of general education and scientific-professional courses addressing the use of forest, range lands, and related resources.

Completion of the following courses results in an associate degree and meets the general core requirements at all Idaho public universities. The suggested coursework normally fulfills the first half of baccalaureate degree requirements in Forestry, Wildlife, Fisheries, Range, and Recreation Management. Course selection should be tailored to match requirements defined by intended transfer institutions.

This occupational program prepares graduates to meet the challenges of graphic design and related professions. The curriculum aims to equip students with the skills, knowledge, and abilities necessary to enter the job market. The broad range of media used to implement creative and aesthetic solutions include work in print advertising, packaging, and a variety of electronic media including computer graphics and the Internet. This program fulfills the requirements for an Associate of Applied Science degree.

Notes:
1. Select electives from A.S. degree requirements on page 54.
Completion of the nine-month certificate program in Heating, Ventilation, Air Conditioning and Refrigeration prepares students for entry-level positions in this challenging occupation. Entry-level HVAC/R technicians typically work on residential/light commercial HVAC/R systems performing equipment installations, preventative maintenance and service, and repair tasks. Additional opportunities are also available in system design and sales occupations.

Students will study basic HVAC/R systems, electricity, heating systems, local fuel codes, applied thermodynamics, refrigeration cycle, psychometrics, duct system design, and system diagnosis. These skills are taught in classroom theory and learned in hands-on lab exercises and cooperative work experiences. A general education component consisting of communications, occupational relations and math is integrated into the program. Successful completion of the first semester and permission of the instructor is required to continue into the second semester.

Placement in specific English and math classes is determined by the college assessment test. Students who desire to upgrade skills in those areas may do so through the Bridge Program (see page 51).

Current industry professionals may enroll in a single course on a space available basis and with the instructor’s permission.

### HISTORY

Transfer Program

The history major is designed for students desiring a broad liberal arts background either as preparation for a profession or for personal enrichment. Careers in history include teaching (primary, secondary, or college level), museum work, historical research and writing, and preserving and interpreting history for the general public through a variety of local, state, and federal agencies. The history major is also highly recommended preparation for law, politics, the ministry, and public service. Because it develops breadth of knowledge as well as critical thinking and problem-solving skills, a history degree is widely considered an excellent foundation for many managerial and executive careers. For this reason, it is a fine choice for the general studies student.

Completion of the following courses results in an associate degree and meets the general core requirements at most Idaho public universities. The suggested coursework normally fulfills the first half of baccalaureate degree requirements in history. Course selection should be tailored to match requirements defined by intended transfer institutions.

1 Satisfies the A.A.S. degree general education requirements listed on page 58.
HUMAN SERVICES
Professional–Technical Program

This program is designed to prepare students for a variety of entry-level positions in institutions and community-based agencies which provide psychosocial, community support, and educational services. Students may focus in the fields of chemical dependency, developmental disabilities, criminal justice, mental health, adult/child health, aging, social work, or residential care. Class and field experience combine to develop skills in assistance with individual and group rehabilitation or treatment, problem solving, life-skill training, assessment, and behavioral intervention.

This program offers a Technical Certificate, attained in two semesters and a summer session (for a total of 11 months), or a two-year Associate of Applied Science degree.

Human services classes begin each fall and are scheduled in sequence, consequently, they must be taken in the order established. The program offers open enrollment — any student interested in a human services course is eligible to enroll as long as course prerequisites (see catalog descriptions) are met. Students proceeding into the field experience courses — starting with HSS 111 must obtain approval from the Program Coordinator prior to enrolling. Additional requirements include the following:

Prior to Spring Semester:
1. Completion of criminal background check for the states of Washington and Idaho (see Program Coordinator if you have concerns about this).
2. Completion of PSB Health Aptitude Exam or equivalent.
3. Completion of one of the following:
   • PSYC 101 (Introduction to Psychology)
   • SOC 101 (Introduction to Sociology)
   • SOC 102 (Social Problems)
4. Completion of medical history (immunizations may be necessary).
5. Purchase of student liability insurance.

Prior to Summer Session:
1. Completion of Certified Nursing Assistant (C.N.A.) Training. It is recommended that C.N.A. training be completed prior to beginning the Fall Semester.

### JOURNALISM

**Transfer Program**

This program prepares students for careers in journalism or communications. The focus is on knowledge and skills essential in those areas. Theoretical training and laboratory workshop methods are combined with special practical experience on the NIC newspaper, *The Sentinel*.

Completion of the following courses results in an associate degree and meets the general core requirements at all Idaho public universities. The suggested coursework normally fulfills the first half of baccalaureate degree requirements in Journalism. Course selection should be tailored to match requirements defined by intended transfer institutions.

LAW ENFORCEMENT
Professional-Technical Program

This program prepares students for entry-level positions as city, county, or state law enforcement officers. Students may select to complete either the technical certificate requirements or an A.A.S. degree requirements and are eligible to challenge for peace officer certification in Idaho.

Applications for the technical certificate program may be picked up from Room 200, Hedlund Building, at the end of Spring Semester.

LAW ENFORCEMENT
Professional-Technical Program

Applications for the sophomore Law Enforcement block may be picked up from Room 200, Hedlund Building, three weeks before the midterm week of Spring Semester. Application and acceptance into the sophomore Law Enforcement block is required before enrolling in courses numbered 200 and above. Applicants for the sophomore Law Enforcement block must undergo a polygraph examination, fingerprinting, and a background check. A Hepatitis B vaccination is available at the sophomore Law Enforcement level for a fee.

This program consists of two semesters of academic courses, followed by one block of technical LAWE courses, and one semester of internship. LAWE 219-228 courses are only offered in the Fall Semester and LAWE 290 and 293 are offered in the Spring Semester. This is a selective admissions program.

Certified Law Enforcement Professionals

Students who successfully complete or challenge the POST Academy will be given credit for LAWE 219-228. Credit may also be granted for LAWE 290 and 293, the internship sequence, for individuals who have successfully completed the POST Academy and have been continuously employed as full-time law enforcement officers for more than six consecutive months. Contact the Law Enforcement program instructor or coordinator for more information.

Admissions Procedures

1. When applying for admission to the college, students will be accepted as Pre-Law Enforcement (PLAWE).
2. Applications for the technical certificate program may be picked up from Room 200, Hedlund Building, at the end of Spring Semester.
3. Applicants will complete an Idaho POST (Peace Officers Standards Training) Personal History Statement and Health Questionnaire, and sign an Authority to Release Personal Information form.
4. Applicants will provide three letters of reference and military discharge papers (if applicable).
5. All Idaho POST standards and NIC academic requirements must be met at the time of application or by the start of the Vocational Block. (Summer school can be attended to complete coursework prior to the Fall Semester).
6. Applicants are required to pass a written exercise, oral board interview, and a background investigation, which includes a polygraph test and fingerprinting.
7. Any questions regarding physical, medical, or mental condition to participate in the program may result in referral to the NIC Health Services and/or personal physician for examination and/or release to participate.
ADMISSIONS REQUIREMENTS

1. High school diploma or GED.
2. Minimum age of 20 by the first day of school.
3. Minimum grade of “C” (2.00) in prerequisite courses. If currently enrolled, midterm grades will be considered until final grades are available.
4. No course may be repeated more than once to achieve a 2.00 grade point average.

ADMINISTRATION OF JUSTICE

Professional-Technical Program

The Administration of Justice program is an option designed for working law enforcement professionals who aspire to have, or are entering, supervisory or administrative positions. Credit will be awarded for POST coursework. This program has a selective admissions process. Contact the law enforcement instructor in the Hedlund Building for more information.

ASSOCIATE OF APPLIED SCIENCE

In addition to the specific Law Enforcement courses, students must take a minimum of 16 credits of A.A.S. general education courses as specified in the program below.

Semester Total 17
The Legal Administrative Assistant program is a rich mix of specific coursework in the legal area combining a blend of academic schooling and technical expertise. A legal administrative assistant is a skilled professional who performs all general office work in addition to specialized legal assignments. Employment opportunities include working in public defender's offices, prosecuting attorney's offices, private law firms, government agencies, and legal departments of large manufacturing, banking, insurance, or real estate firms. This specialized assistant uses transcribing machines, creates and modifies legal instruments and documents utilizing computer technology, and adheres to court procedures such as calendaring, scheduling, and docketing. In addition, the legal administrative assistant files legal documents, maintains clients' fees, and performs law office public relations.

  A.A.S. Math Requirement ³ ³

Semester Total 15-16

Program Total 67-68

Notes:

1. Individuals with skills/knowledge of keyboarding may opt to challenge BUSO 101A and/or BUSO 101B.

2. Satisfies A.A.S. general education requirement.

3. Choose from A.A.S. general education requirements on page 58.

4. Students intending to obtain a four-year degree should take ACCT 201.

5. Mathematics requirement includes any math course that is MATH 123 or higher and meets the A.A.S. degree requirements listed on page 58. If a 3-credit math course is taken, an additional A.A.S. degree general education course will be required to meet the 16-credit general education core requirement for the A.A.S. degree.

MACHINE TECHNOLOGY

Professional–Technical Program

The Machine Technology program prepares students for entry-level employment in the machining and manufacturing industries. The curriculum features basic to advanced machining concepts involving various machine tools such as conventional lathes, mills, grinders and their Computer Numerical Control (CNC) counterparts. Coursework also involves blueprint reading, geometric dimensioning and tolerancing, shop math, and statistical and mechanical measurements. The second year of the program places emphasis in CNC and CAD/CAM systems in preparation for employment in computerized manufacturing processes. Opportunity to certify in MasterCAM Mill is available to students who successfully complete the program.

Successful completion of each semester and/or permission of the instructor is required to continue into the next semester. Prospective students should have solid math skills and demonstrate mechanical aptitude. Computer and keyboarding skills are recommended. Placement in specific English and math classes is determined by the college assessment test. Students who desire to upgrade skills in those areas may do so through the Bridge Program (see page 51).

Current industry professionals may enroll in individual courses on a space-available basis and with the instructor's permission.

3 Satisfies A.A.S. degree general education requirement.

MAINTENANCE MECHANIC/MILLWRIGHT

Professional–Technical Program

This 11-month program prepares students for employment as industrial plant maintenance mechanics or millwrights. Students learn the basics of maintenance, fabrication, installation and alignment of equipment used in modern industrial and manufacturing plants.

Theory classes provide technical information pertaining to welding, hydraulics, electricity, rigging, pipe fitting, mechanical drive/transmission systems, pumps, and equipment installation and alignment.

Laboratory classes teach students to skillfully perform welding and fabrication tasks as well as the maintenance of hydraulic, electro/mechanical systems. The well-equipped lab includes the latest technology in laser alignment of rotating equipment. Blueprint reading and shop math are taught and used in all areas of training. A general education component of English, occupational relations, and math is integrated into the program. Successful completion of the first semester and/or instructor permission is required to continue into the second semester and summer session.
Interested students should possess basic math skills (knowledge of basic algebra and geometry), reading skills, and have a keen interest in mechanics. Placement in specific English and math classes is determined by the college assessment test. Students who desire to upgrade skills in those areas may do so through the Bridge Program (see page 51).

### PROGRAM GUIDELINES

#### MATHEMATICS

**Transfer Program**

This program leads to careers in teaching, industry, government, actuarial work, or as support for many science disciplines. The mathematics background assumed for entry is four years of high school mathematics through pre-calculus and trigonometry. These entry-level courses, if needed, are also available through the college.

Completion of the following courses results in an associate degree and meets the general core requirements at all Idaho public universities. The suggested coursework normally fulfills the first half of baccalaureate degree requirements in mathematics. Course selection should be tailored to match requirements defined by intended transfer institutions.

**Notes:**

¹ Students may substitute a higher course with instructor permission.

² Students may substitute another course with instructor permission.

#### MEDICAL ADMINISTRATIVE ASSISTANT

**Professional-Technical Program**

For those who have always been interested in the medical field but find their strengths lie in clerical administration, a career as a medical administrative assistant could be the perfect choice. Medical administrative assistants combine clerical skills and word processing with specialization in medical terminology, anatomy, medical transcription, and medical coding.

Physicians rely on well-trained medical administrative assistants to help them in the documentation of patient care. The medical administrative assistant’s job, using the latest technology, may include transcribing reports, composing and processing correspondence, coding of diagnoses and procedures, completing insurance forms, maintaining financial records, greeting and scheduling patients, and other related duties. Strong human relation skills are a must in this field.

Students will be provided opportunities to develop skills to gain employment in clinics, private medical practices, hospitals, nursing homes, medical insurance and billing companies, and a variety of other health care facilities. With experience, the graduate may advance to office manager or department supervisor.

#### ASSOCIATE OF APPLIED SCIENCE DEGREE

In addition to the specific Medical Administrative Assistant courses, students must take a minimum of 16 credits of A.A.S. general education courses as specified in the program below.

MEDICAL BILLING SPECIALIST

Professional-Technical Program

Trained, qualified medical billing specialists are in demand, particularly if they possess ICD and CPT coding skills. The medical billing specialist program is designed to prepare individuals for entry-level positions processing and managing third-party reimbursement and managing patient accounts receivables in non-hospital health care settings. Physician practices, clinics, health maintenance organizations, and other health care entities including private billing services are all employment options. The Medical Billing Specialist Associate of Applied Science degree includes both theoretical and practical laboratory instruction.

Students will complete general education courses and courses in medical terminology, coding, insurance reimbursement, medicolegal issues, manual and computerized accounting, and credit and collections. With a variety of career experiences, a professional medical billing specialist may pursue a Certified Coding Specialist – Physician Office Based (CCS-P) credential by passing the national certification examination administered by the American Health Information Management Association (AHIMA) or the Certified Professional Coder (CPC) credential by passing the national certification examination administered by the American Academy of Professional Coders (AAPC). The medical billing specialist pursues a lifelong program of continuing education.

ASSOCIATE OF APPLIED SCIENCE DEGREE

In addition to the specific Medical Billing Specialist courses, students must take a minimum of 16 credits of A.A.S. general education courses as specified in the program below.

Notes:

1 Individuals with skills/knowledge of keyboarding may opt to challenge BUSO 101A and BUSO 101B.
2 Satisfies A.A.S. general education requirement.
3 Students intending to obtain a four-year degree should take ACCT 201.
4 Mathematics requirement includes any math course that is MATH 123 or higher and meets the A.A.S. degree requirements listed on page 58.
Graduates of the Medical Office Transcriptionist/Pre-Health Information Technician certificate program may begin employment as a medical office transcriptionist or may continue their education with Idaho State University (ISU) and earn an associate of applied science degree in Health Information Technology. ISU courses required to complete the A.A.S. degree are offered through distance education so students can complete the degree without moving to ISU’s campus. Upon completion of ISU’s Health Information Technology A.A.S. degree, graduates are eligible to take the national certification examination through the American Health Information Management Association (AHIMA). Successful completion of the examination results in earning the Registered Health Information Technician (RHIT) credential.

### MEDICAL RECESSIONIST

### Technical-Program

A medical receptionist holds a key position in the medical office in greeting patients, scheduling appointments, processing patient information, managing the reception desk, and assisting with other administrative responsibilities.

In today’s modern medical office environment, the medical receptionist requires skills in human relations, data and word processing, records management, release of information, and respect for the confidential nature of patient information.

Job opportunities are found in physician offices, hospitals, clinics, and medical facilities. Characteristics for success as a medical receptionist include an interest in medicine; a desire to work with physicians and health care professionals; the ability to multi-task and prioritize work; a positive, caring personality; high energy; and a desire to help people.

Notes:
1. BUSO 101A and BUSO 101B may be challenged for credit.
2. Satisfies A.A.S. general education requirement.
3. ISU requirement for A.A.S. degree.
A nationwide shortage currently exists for well-trained medical transcriptionists. These specialists type physician-dictated reports describing a patient’s medical care and condition. These reports include office chart notes, history and physical examinations, consultations, operative reports, discharge summaries, laboratory/pathology reports, and diagnostic studies. Medical transcriptionists may work in either general or specialized fields of medicine. Medical clinics, hospitals, doctors’ offices, private transcription agencies, and home offices offer various employment settings. The variety of each day’s work presents unique challenges and opportunities for continuing medical knowledge.

The professional transcriptionist enjoys learning about the medical field; possesses mastery skills in medical terminology, spelling, grammar, punctuation, and keyboarding; works independently; and strives for quality and excellence. With a variety of career experiences, a professional transcriptionist may pursue a Certified Medical Transcriptionist (CMT) credential by passing the national certification examination administered by the American Association for Medical Transcription (AAMT). The medical transcriptionist pursues a lifelong program of continuing education.
MODERN LANGUAGES

Transfer Program

The study of world cultures is an integral part of a well-rounded education. Learning a modern language provides a sense of shared humanity and offers insight into the human mind, thus helping international understanding. It improves intellectual skills, helps the learner understand the customs, culture, and literature of other countries, and provides a wealth of material in other languages. The knowledge of modern languages is in demand in business and commerce, civil service, law, media, applied sciences, service occupations, tourism, social sciences, and engineering among others. Students wanting to major in a modern language are urged to complete an Associate of Arts degree. Completion of the following courses results in an associate degree and meets the general core requirements at all Idaho public universities. The suggested coursework normally fulfills the first half of baccalaureate degree requirements in modern language. Course selection should be tailored to match requirements defined by your intended transfer institution.

It is strongly suggested that students majoring in modern language take courses in at least two modern languages since many universities require such before issuing a bachelor of arts in modern languages.

MUSIC

Transfer Program

This program is designed for students who wish to pursue a professional career in music by providing the necessary background in music theory, history, and performance. Students also may pursue their musical interests as an avocation through the program. Music courses promote skills which prepare students for fields outside of music, emphasizing communication, literary, physical, technical, and business skills. There are no program prerequisites. Previous experience in high school or community music programs would be helpful. Students interested in scholarships must audition and selection is based on performance, grades, and letters of recommendation.

ADMISSIONS PROCEDURES

In addition to the regular college admissions requirements, students applying for the Practical Nursing program need to complete a Nursing Application, which consists of:

1. Application for Admission (if not already complete). New and former students must complete the formal admissions process as listed for Degree Seeking (Matriculating) students.

2. NIC Admission application fee (if not previously paid).

3. Practical Nursing Program Application.

4. Results from the PSB Aptitude Exam (see application packet for information on scheduling the entrance exam).

5. High school and college transcripts.

6. Applicants who have attended any other nursing program must submit a recommendation from an instructor or administrator of that program.

Currently enrolled students should already have an application fee and transcripts on file. Application Packets for the Practical Nursing program may be picked up at the Admissions Office after Oct. 20, 2006. Letters informing students of their application status will be mailed no later than March 30, 2007.

ADMISSIONS REQUIREMENTS

1. High school diploma or GED.

2. A minimum grade point average of 2.50 calculated on English 099 or 101, Math 102, Psychology 101, and Chemistry 101.

3. Prerequisite Courses: The following courses must be successfully completed by June 30 of the year application for admission is made:
   a. CHEM 101 (Intro to Essentials of General Chemistry I), or one year of high school chemistry with lab, with a grade of C or higher each grading period.
   b. MATH 102 (Computational Skills for Allied Health)
   c. PSYC 101 (Introduction to Psychology)
   d. ENGL 099 (Fundamentals for Writing) or NIC assessment scores, taken within the past two years prior to application for admission to the program, indicating placement above ENGL 099.

4. Minimum grades of C or 2.00 must be earned in each of the courses required for the program.

5. The NIC Admissions Office will determine if previous college prerequisites will be acceptable for transfer.

6. Upon acceptance into the practical nursing program, a criminal background check may be required for participation in clinical rotations.

NURSING:

PRACTICAL NURSING (PN)

Professional–Technical Program

This 11-month program prepares students for entry-level employment as practical nurses in hospitals, home health care, convalescent homes, and related health service professions. A Technical Certificate is awarded. Students who wish to continue to the R.N. level should consult with their advisor for those program requirements.

This program has a selective admission process. Applications are due by Feb. 9, 2007. See below for details regarding specific requirements.

Graduates are eligible to take the National Council Licensure Examination (NCLEX-PN). Students who pass the exam are qualified to practice as licensed practical nurses in Idaho and may apply for licensure in other states by endorsement.

The curriculum includes basic and clinical foundations of nursing, medical and surgical nursing, maternal and infant care, nursing of children, psychiatric nursing, pharmacology, and geriatrics. The program is offered in cooperation with Kootenai Medical Center, local extended care facilities, physician offices, and the Idaho Division of Professional–Technical Education.
NURSING:  
REGISTERED NURSING (RN)  
Transfer Program

The faculty of the Associate Degree Nursing Program upholds the mission of North Idaho College in supporting student success, teaching excellence, and responding to the needs of the community.

The mission of the nursing program is to provide the opportunity for eligible individuals to acquire the education necessary for entry into the profession of nursing as a registered nurse. In collaboration with the healthcare community, the program strives to provide competent, caring registered nurses who are committed to lifelong learning. The curriculum includes general education courses in the arts and sciences and nursing courses, which provide nursing theory in the classroom and clinical experiences in health care agencies.

Upon completion of the program, graduates will have demonstrated the ability to:

1. Act in accordance with professional values, ethics, legalities and standards.
2. Collaborate effectively with others in planning, providing, and evaluating care within the health care system.
3. Apply the nursing process in practice using scientific and nursing knowledge and critical thinking in problem-solving, decision-making, and clinical judgment.
4. Practice nursing in a safe, competent, and caring manner which meets the multidimensional health care needs of individuals, families, and communities.

Graduates are eligible to take the National Council Licensure Examination (NCLEX-RN). Passing the examination qualifies the individual to apply for licensure as a registered nurse in any state. The program prepares the graduate for employment in entry level positions in a variety of health care settings and areas of nursing practice. The program is designed as a transfer degree and will satisfy core requirements at Idaho public colleges and universities which offer RN to BSN programs.

The Associate Degree Nursing Program is approved by the Idaho Board of Nursing and is accredited by the National League for Nursing Accrediting Commission. Inquiries can be made by contacting the above agencies at:

Idaho Board of Nursing, P.O. Box 83702, Boise, ID 83720-0061, 208.334.3110, www2.state.id.us/ibn/ibnhome.htm, and/or National League for Nursing Accrediting Commission, 61 Broadway, 33rd Floor, New York, NY 10006, 800.669.1656 Ext. 153, www.nlnac.org

The Associate Degree Nursing Program has a selective admission process requiring specific prerequisite courses. See below for details regarding specific requirements. It is highly recommended that potential applicants meet with a nursing advisor as they begin planning their pre-nursing coursework.

Licensed Practical Nurses (LPNs) are eligible to apply for advanced placement. LPNs must meet the same admission criteria as other program applicants. Applicants desiring advanced placement should meet with the chair of the Nursing Advanced Placement Committee for advisement.

ADMISSIONS PROCEDURES

In addition to the regular college admissions requirements, students applying for the Registered Nursing (RN) program need to complete a Nursing Program Application, which consists of:

1. Associate Degree Nursing Program application form.
2. Official high school and college transcripts.
3. Applicants who have attended any other nursing program must submit a recommendation from an instructor or administrator of that program.

Application forms may be obtained from the Admissions Office after Oct. 20, 2006. Applications must be completed by Feb. 9, 2007 to be considered for fall admission.

ADMISSIONS REQUIREMENTS

1. High school diploma or GED.

2. **Prerequisite Courses:** The following courses must be successfully completed by June 30 of the year application for admission is made:

   a. **Algebra:** Demonstrate competency in algebra above the MATH 025 level. Competency can be demonstrated through ACT, SAT, or Compass scores from testing within the two years prior to application; or completion of MATH 025 with a C or better.

Notes:

1 Satisfies A.S. general education core requirement.
2 Select from courses which meet the A.S. degree requirements on page 56.
3 Elective course – not part of the required curriculum.

A grade of C or 2.00 GPA or better is required in each nursing course and general education course that is part of the nursing curriculum. General education courses must be completed with the required grade in the sequence listed to meet prerequisites and progress to the next nursing course.

Achievement of a designated score on a standardized NCLEX-RN Predictor Exam is required for graduation from the program.

For students who wish to continue their education in nursing, BSN completion programs are available through colleges in Idaho, Eastern Washington, and throughout the country.
OFFICE TECHNOLOGY

Professional–Technical Program

The Office Technology program allows students to design an Office Technology technical certificate by completing courses from the Accounting, Business Administration, Business and Office Technology, Computer Applications, Human Resources Assistant, and Paralegal programs. It is designed for students seeking entry-level employment or who want to upgrade their office technology skills as required for an office-related position. The certificate can be completed in two to four semesters with a minimum of 30 credits required.

TECHNICAL CERTIFICATE

Choose a minimum of 18 credits from any of the following disciplines (excluding any internship courses and CAPS 110).

- Accounting: ACCT
- Business Administration: BUSA
- Business and Office Technology: BUSO
- Computer Applications: CAPS
- Human Resources Assistant: HRA
- Paralegal: PLEG

Add one of the following internship courses. (Internship prerequisites must be met prior to enrolling).

Program Total 30-31

OUTDOOR POWER/RECREATIONAL VEHICLE TECHNOLOGY

Professional - Technical Program

This 10-month program is designed to prepare students for entry-level employment in the small engine/power equipment industry. Graduates of this program will be ready to work as outdoor power equipment, motorcycle, and recreational vehicle technicians.

This program begins with the basics of power theory and progresses through aspects of engine, drivetrain, and ancillary systems that make up modern small engine powered equipment. Students will learn theory, application, and troubleshooting of 2- and 4-stroke engines, electrical systems, fuel systems, powertrain systems, and many other related systems pertaining to these and other topics.

Successful completion of each course and/or permission of the instructor is required to continue into the next course. Placement in specific English and math classes is determined by the college assessment test. Students who wish to upgrade skills in those areas may do so through the Bridge Program. (See page 51 for details).

Current industry professionals may enroll in individual courses on a space-available basis and with the instructor’s permission.

PARALEGAL

Professional–Technical Program

This program provides coursework required for an Associate of Applied Science degree that leads to positions in legal environments. A paralegal, under the supervision of an attorney, applies knowledge of law and legal procedures in rendering direct assistance to attorneys, clients, and courts. They may conduct initial client interviews and follow up on investigation of factual information. Paralegals design, develop and
modify procedures, techniques, services, and processes; prepare and interpret legal documents; and detail procedures for practicing in certain fields of law. Paralegals research, select, assess, compile, and use information from the law library and other references, and analyze and handle procedures and problems that involve independent decisions.

ASSOCIATE OF APPLIED SCIENCE DEGREE

In addition to the specific Paralegal courses, students must take a minimum of 18 credits of A.A.S. general education courses as specified in the program below.

Notes:

1. Individuals with skills/knowledge of keyboarding may opt to challenge BUSO 101A and/or BUSO 101B.
2. Satisfies A.A.S. general education requirement.
4. The math requirement must be a math course that is MATH 123 or higher.
5. Select from A.A.S. general education requirements on page 58.

PHARMACY TECHNOLOGY

Professional–Technical Program

The Pharmacy Technology program, an Allied Health program, prepares graduates for positions working under the supervision of a licensed and registered pharmacist in retail and institutional pharmacy practice settings. Students completing the program will have a basic understanding of anatomy, physiology, medical terminology, pharmacy law, and the therapeutic classification and use of the top 200 prescription drugs. Students will develop skills in pharmaceutical preparation, maintaining patient profiles or records, sterile products preparation, performing stock procedures, communication and presentation, and computer use to enter, store, and recall patient information.

The Pharmacy Technology program is a selective admissions program, which is explained below. Approximately 12-16 students are admitted to the program each Fall Semester. Course requirements prior to the technical pharmacy courses are open to all students who meet specific course prerequisites. The Technical Certificate can be obtained in an 11-month course of study.

Contact the Health Professions Division at 208.676.7132 for further information.

ADMISSIONS PROCEDURES

Application Deadline: June 1, 2007 for acceptance into Fall 2007.

In addition to the regular college admissions requirements, students applying to the Pharmacy Technology program need to complete an application form. Current students should already have paid their application fee and have transcripts on file, but still need to submit an Application for Admission to the Pharmacy Technology program. An Application Packet for the Pharmacy Technology program may be picked up at the Admissions Office after May 1, 2007.

1. Submit a Pharmacy Technology Program Application by June 1, 2007.
2. New, returning and transfer students must submit an NIC Application for Admission by June 1, 2007.
3. Complete an entrance exam by June 1, 2007. Testing will be scheduled during the month of May 2007. Call 208.676.7203 for an appointment. There is a $20 testing fee.
4. Submit official high school transcripts or GED scores to the NIC Admissions Office no later than June 1, 2007.
5. Submit official college transcripts to the Admissions Office no later than June 1, 2007. Only courses that appear on the official transcript will be used to determine points for admission.
6. Submit documentation for health occupation credential. This documentation must be a transcript indicating completion of a program and the certificate, license, or degree awarded. No points will be awarded without this documentation.
7. Submit a copy of your Summer 2007 class schedule. Students who are enrolled in prerequisite courses in the Summer Session in a school other than North Idaho College must submit a copy of their current schedule. This will validate eligibility to meet all prerequisites.

The application packet for the Pharmacy Technology program may be obtained from the Admissions Office or the Health Professions Office.

**ADMISSIONS REQUIREMENTS**

1. High school diploma or GED.
2. Completion of the NIC COMPASS test (or equivalent) with an algebra score of 41 or higher or completion of MATH 025 with a grade of C or better and an English score of 68 or the completion of ENGL 099 with a grade of C or better.
3. Transfer applicants must submit official transcripts of work-in-progress from current college. Final transcripts are required when available.
4. Completion of entrance examination. (Testing will be scheduled in May 2007. Phone 208.676.7203 for an appointment. There is a $20 testing fee.)
5. No course may be repeated more than once to achieve a 2.00 grade point average.
6. Completion of a criminal record background check prior to enrolling in PHAR 180.
7. Prerequisites: A minimum grade of “C” (2.00) must be achieved in prerequisite courses:
   a. ALTH 101, ALTH 102 (Introduction to Allied Health and Lab)
   b. BIOL 175 (Human Biology)
   c. BUSO 101A * (Basic Keyboarding)
   d. BUSO 101B * (Keyboarding Skill Development)

* Students may challenge these courses. Check with the Registrar’s Office.

**PHILOSOPHY**

**Transfer Program**

The Philosophy program provides excellent preparation for most professions or fields of graduate study, especially business, law, medicine, public administration, and education. Completion of the following courses results in an associate degree and meets the general core requirements at all Idaho public universities. The suggested coursework normally fulfills the first half of baccalaureate degree requirements in Philosophy. Course selection should be tailored to match the requirements by intended transfer institutions.

PHYSICS / ASTRONOMY

Transfer Program

This program is for students interested in pursuing a baccalaureate degree in physics. Physics is the science that deals with matter and energy and their interactions in selected fields such as mechanics, acoustics, and electricity. NIC's small class size facilitates student interaction with qualified faculty and excellent laboratories offer state-of-the-art instrumentation. A strong background in science and mathematics is important preparation for a college physics program.

Completion of the following courses results in an associate degree and meets the general core requirements at all Idaho public universities. The suggested coursework normally fulfills the first half of baccalaureate degree requirements in Physics. Course selection should be tailored to match requirements defined by intended transfer institutions.

POLITICAL SCIENCE AND PRE-LAW

Transfer Program

The Associate of Arts degree program leads to career opportunities in government, teaching, and law (law school), while the Associate of Science degree program should be pursued by those students who wish to seek a secondary teaching degree to become a social studies teacher. Completion of the following courses results in an associate degree and meets the general core requirements at all Idaho public universities. The suggested coursework normally fulfills the first half of baccalaureate degree requirements in Political Science and Pre-Law. Course selection should be tailored to match requirements defined by intended transfer institutions.

PRE-AGRICULTURE

Transfer Program

This program is designed for students interested in a broad education with an emphasis on agriculture. Career opportunities may be found in the areas of farm and ranch management, marketing, soil and water management, farm equipment design and manufacturing, food processing, extension program services, and governmental agencies. Completion of the following courses results in an associate degree and meets the general core requirements at all Idaho public universities. The suggested coursework normally fulfills the first half of baccalaureate degree requirements in Pre-Agriculture. Course selection should be tailored to match requirements defined by intended transfer institutions.

Options within the pre-medical field are available for students completing this general program such as Pre-Dental Hygiene, Pre-Medical/Pre-Dental Studies, Pre-Optometry, Pre-Radiologic Technology, Respiratory Therapy, Radiographic Science, Speech Pathology and Audiology, and Sports Medicine. Most professional school admission requirements will be satisfied with a baccalaureate degree in biology or chemistry with substantial coursework in other disciplines. Professional schools are extremely competitive. It is important to contact an advisor at your transfer institution.

Completion of the following courses results in an associate degree and meets the general core requirements at all Idaho public universities. The suggested coursework normally fulfills the first half of baccalaureate degree requirements in Pre-Medical Related Field options. Course selection should be tailored to match requirements defined by intended transfer institutions.

PRE-VETERINARY MEDICINE

Transfer Program

The states of Idaho and Washington have an agreement which guarantees a certain number of places in the Washington State University School of Veterinary Medicine to qualified Idaho residents. Normally, students must maintain a 3.20 overall grade point average in their studies prior to admission to the program. Candidates with greater depth and breadth of academic background are given preference by WSU.

Either the Graduate Record Examination (GRE) or the Veterinary Aptitude Test (VAT) should be taken in October prior to the year in which the student hopes to enter the WSU School of Veterinary Medicine. While students may enter the program following completion of an associate degree program, acceptance is normally not gained until a baccalaureate program is completed.

Students are to acquire and record at least 300 hours of significant exposure to veterinary medicine while employed or by working on a voluntary basis for a graduate veterinarian. The 300 hours must be completed by November 1 of the application year.

Completion of the following courses results in an associate degree and meets the general core requirements at all Idaho public universities. The suggested coursework normally fulfills the first half of baccalaureate degree requirements in Pre-Veterinary Medicine. Course selection should be tailored to match requirements defined by intended transfer institutions.

It is recommended that students also complete MATH 253 Principles of Applied Statistics.

PSYCHOLOGY

Transfer Program

A baccalaureate degree with a major in psychology provides a solid foundation for many careers that require knowledge of human behavior in areas such as business, industry, government, or the helping professions. Completion of a graduate degree (master’s or doctorate) is generally necessary, however, for careers specific to psychology. Therefore, students seriously considering such a career option should maintain a grade point average of 3.00 or higher.

Completion of the following courses results in an associate degree and meets the general core requirements at all Idaho public universities. The suggested coursework normally fulfills the first half of baccalaureate degree requirements in psychology. Course selection should be tailored to match requirements defined by intended transfer institutions.

RADIOGRAPHY TECHNOLOGY

Professional–Technical Program

The Radiography Technology program prepares students to become a technologist and member of a healthcare team. A radiography technologist performs diagnostic and therapeutic radiography procedures on clients in a variety of health care settings. The program integrates knowledge from the biological sciences, social sciences, and math with the theory and practice of radiography technology to prepare students as entry-level technologists. Upon successful completion of this program students will graduate with an associate of applied science degree and be eligible to become certified by taking the registry examination of the American Registry of Radiologic Technologists (AART).
The Radiography Technology program has a selective admission process. The application and selection processes were not available at the time this catalogue was printed. Students interested in this program are encouraged to contact the Health Professions Office at 208.676.7132 or their academic advisor to get the necessary information.

RECEPTIONIST/OFFICE SPECIALIST

Professional–Technical Program

The Receptionist/Office Specialist program provides coursework required for a technical certificate that prepares students for entry-level career positions in today’s offices. Students who complete this program earn a technical certificate and will have the foundation to earn an advanced certificate or an associate of applied science degree in any of NIC’s Business and Office Technology programs. Students develop skills to enhance their opportunities for employment, including interpersonal skills, telephone skills, and customer relations skills. Students also become proficient using up-to-date computer applications, including word processing, spreadsheets, database, and presentation software.

Notes:

1 Individuals with skills/knowledge of keyboarding may opt to challenge BUSO 101A and/or BUSO 101B.
2 Students intending to obtain an A.A.S. degree or a four-year degree should take COMM 101.
3 Students intending to obtain an A.A.S. degree or a four-year degree should take ENGL 101.

RESORT/RECREATION MANAGEMENT

Professional–Technical Program

This program leads to opportunities in recreationally based organizations. Students will complete a core of classes and choose an area(s) of interest in the industry i.e. hotel and restaurant hospitality, resort management, outdoor recreation to include topics of wilderness/whitewater training, skiing, golfing, etc., Students will receive classroom instruction and field experience. The Resort and Recreation industry is the fastest growing industry in the nation. Job demand will be high in this exciting field.

This program is for students planning to transfer to a bachelor's degree program in Social Work (BSW). Among the career opportunities in social work are social services at federal, state, and local levels; health care social work in such agencies as nursing homes, hospitals, and outpatient care facilities; mental health facilities; children and youth services; aging service casework; rehabilitation counseling; juvenile detention; family services; pre-adoption investigation; drug and alcohol counseling; group home casework and counseling; and employee assistance counseling.

Completion of the following courses results in an associate degree and meets the general core requirements at all Idaho public universities. The suggested coursework normally fulfills the first half of baccalaureate degree requirements in Social Work. Course selection should be tailored to match requirements defined by intended transfer institutions. Students planning to attend Lewis-Clark State College should pursue the Associate of Science degree program.

## THEATRE

### Transfer Program

This program is designed for students who want to emphasize the theatre arts in the planning of their undergraduate degree. Emphasis is placed on the theatre arts as a valuable study for a wide range of career choices. Theatre arts at NIC is not restricted to those who would like to make theatre a profession. Rather, through the study of communication, literary, physical, technical and psychological/emotional skills, theatre prepares students for success in many different professions. There are no program prerequisites. Previous experience is helpful. Scholarships are available. Participation in theatre requires some evenings and weekends.

WELDING TECHNOLOGY

Professional-Technical Program

The Welding Technology program is designed to prepare students for entry-level employment as welders through a one-year technical certificate program.

The program complies with national standards established by the American Welding Society (AWS). It combines theory and applied shop practice designed to develop welding skills. Students receive instruction on welding processes including OAC (oxy-acetylene cutting), SMAW (shielded metal arc welding), GMAW (gas metal arc welding), and GTAW (gas tungsten arc welding), as well as blueprint reading, layout procedures, and safety.

Successful completion of each semester and/or permission of the instructor is required for acceptance into the next semester. Placement in specific English and math classes is determined by the college assessment test. Students who wish to upgrade skills in those areas are encouraged to do so through the Bridge Program. (See page 47).

Note: Current industry professionals may enroll in individual courses on a space-available basis and with the instructor’s permission.
DEFINITIONS

Corequisite
A corequisite in the course description means there is a requirement to enroll concurrently in another course or courses unless the corequisite has been previously completed with at least a “C-” grade.

Prerequisite
A prerequisite in the course description means there is a requirement that must be met prior to enrolling in the course. This may include, but is not limited to: completion of other courses, acceptance in certain programs, sophomore standing, instructor permission, and prescribed test scores. If the prerequisite is another course, then that course must have been completed with a minimum grade of “C-” in order to satisfy the pre-enrollment requirement.

Recommendation
A recommendation in the course description identifies previously established skill levels or completed courses that are important in assuring a successful enrollment. Recommendations should be carefully considered, but are not required.

COLLEGE-WIDE COURSE NUMBERS

203 Workshop
Credits arranged
Certain courses that are of a short duration are typically called workshops. They can be conducted by qualified NIC faculty members or other authorities in a particular field. Six credits maximum may be applied toward graduation.
Prerequisite: Permission of the instructor.

204 Special Topic
Credits arranged
Special topic courses are semester-length courses dealing with unique subjects or timely topics conducted by qualified faculty or authorities in a particular field.

290 Internship
An internship is an off-campus experience directed by an on-site supervisor, but overseen by a faculty member designated to provide the student with an opportunity to observe and/or participate in a job-related activity that falls within the student’s field of study. Six credits maximum may be applied toward graduation.
Prerequisite: Permission of the instructor

298 Practicum
A practicum is an out-of-classroom experience designed to give the student an opportunity to apply principles learned in academic course work to specific community-related or employment-related situations. Practicums are overseen by a faculty member. Eight credits maximum can be applied toward graduation.
Prerequisite: Permission of the instructor

299 Independent Study
Credits arranged
Independent study includes individual study involving reading or a project and is offered on demand only. Six credits maximum may be applied toward graduation. Contact the Registrar’s Office for Independent Study Guidelines. Enrollment is accepted the first four weeks of each semester or the first two weeks of Summer Session.
Prerequisite: Sophomore standing (26 credits completed); 3.00 GPA and permission of the instructor.

ACCOUNTING

ACCT 110 Small Business Accounting
3 Credits Offered Each Semester
ACCT 110 is an introduction to accounting procedures for individual proprietorship businesses. Emphasis is on the accounting cycle, double-entry accounting system, special journals, payroll, and systems and procedures for handling accounting problems associated with small businesses. Accounting for both service and merchandising businesses will be included in this course. Students will practice proper accounting procedures manually, on spreadsheet software, and accounting software. This course is required for students in all Business and Office Technology programs and the Accounting Assistant program. It is also helpful to those who want to upgrade business skills for improved employability. Students may not receive duplicate credit for ACCT 110 and 201.
Lecture/Lab: 3 hours per week
Corequisite: CAPS 135

ACCT 111 Small Business Accounting II
3 Credits Offered Spring Semester
ACCT 111 is a continuation of ACCT 110 with an introduction to accounting procedures for partnerships and corporations. Emphasis will include asset valuation, inventory valuation, and financial statement analysis for small businesses. This course is required for students in the Accounting Assistant Program and others who want to upgrade business skills for improved employability.
Lecture/Lab: 3 hours per week
Prerequisite: ACCT 110

ACCT 113 Payroll Accounting
3 Credits Offered Spring Semester
ACCT 113 provides an in-depth study of payroll procedures. Included are a discussion of employees and independent contractors, how to calculate gross wages for hourly and salaried employees, mandatory and voluntary withholdings, employer taxes, recording payroll, and state and federal record keeping requirements. Current tax rates and current tax forms will be used. Some emphasis will be placed on computerized payroll accounting. Completion of a payroll practice set is required.
Lecture/Lab: 3 hours per week
Prerequisite: ACCT 110

ACCT 138 Accounting for Managers
3 Credits Offered Fall Semester
This course is an introduction to accounting from a user’s perspective. Students will explore accounting information’s
Course Descriptions

ACCT 140  QuickBooks Pro  
3 Credits  
Offered Fall Semester

ACCT 140 is an introduction to accounting and computers using QuickBooks. The course will focus on accounting for service and merchandising businesses with emphasis on sales and receivables, purchases and payables, general accounting, payroll accounting, and end-of-period procedures. Computerizing a manual accounting system will also be discussed.  
Lecture/Lab: 4 hours per week  
Prerequisite: ACCT 110

ACCT 150  10-Key Skill Building  
1 Credit  
Offered Each Semester

This course is a self-paced course provided by online delivery. It is intended to introduce the methods used for 10-key data entry and calculators using a computer program and number key pad. Students must master the correct keystrokes and a minimum speed of 9,000 keystrokes per hour with no mistakes for minimum successful completion (a passing grade of C). Students must be in the Accounting Assistant program.  
Lab: Online delivery  
Recommended: BUSO programs and some keyboarding proficiency.

ACCT 201  Principles of Accounting  
3 Credits  
Offered Each Semester

ACCT 201 is an introduction to contemporary financial accounting. It emphasizes basic terminology and concepts, the theoretical framework of double entry accounting, and descriptions and derivation of the primary financial statements prepared by accountants. This course is included in the Business Education and Business Administration curricula. It fulfills the accounting course requirement for all Business and Office Technology programs. Upon completion of ACCT 201 students may not receive credit for ACCT 110 and/or 111.  
Lecture/Lab: 3 hours per week

ACCT 202  Managerial Accounting  
3 Credits  
Offered Each Semester

ACCT 202 is a continuation of ACCT 201 with emphasis on accounting theory and procedures relating to corporations. Manufacturing accounting and accounting for managerial decision making, including analysis and interpretations of financial statements and introduction to cost behavior is emphasized. This course is included in the Business Education and Business Administration curricula.  
Lecture/Lab: 3 hours per week  
Prerequisite: ACCT 201

ACCT 244  Credit and Collections  
3 Credits  
Offered Fall Semester

ACCT 244 is an introduction to credit and its role in the economy. The topics to be covered will include understanding consumer and business credit, management and analysis of consumer and business credit, international trade credit, and collection management and control. Focus will be on decision making in granting credit and collection policies and procedures including current laws affecting collections.  
Lecture: 3 hours per week  
Prerequisite: ACCT 111

ACCT 246  Current Business Taxes  
3 Credits  
Offered Fall Semester

ACCT 246 provides necessary information to bookkeepers and business owners about local, state, and federal taxes that are currently paid by area businesses. The course will examine business licenses, property tax, sales and use tax, income tax on corporations and payroll related taxes. Other federal compliance reports will also be discussed. Current tax rates and current tax forms will be used. Guest speakers will explain the history, current taxing environment, and benefits related to particular taxes.  
Lecture: 3 hours per week  
Prerequisite: ACCT 111

ACCT 248  Accounting Internship  
4 Credits  
Offered Spring Semester

ACCT 248 is the capstone course for the Accounting Assistant Program and should be taken after the completion of all required accounting courses. This course consists of on-campus meetings, as well as 135 hours of an off-campus internship which allows for the practical application of concepts learned throughout the program. Emphasis will be on accounting records of an existing business, records management, efficient telephone use, employee/employer relations, customer service, resumes, cover letters, interview techniques, and stress/time management.  
Prerequisite: ACCT 113, 140, 244. 246  
Lecture: 15 hours  
Internship: 135 hours of site work

ALTH 101  Introduction to Allied Health  
1 Credit  
Offered Each Semester

This course provides an overview of traditional health care delivery systems and current social, economic, and political influences. It introduces students to health occupation roles and addresses consumer health needs, trends, and issues. This course is required for students planning to enroll in the Pharmacy Technology program.  
Lecture: 1 hour per week

ALTH 102  Introduction to Allied Health Lab  
1 Credit  
Offered Each Semester

This lab includes 16 hours of job shadowing and interviewing in addition to meeting weekly. It provides opportunities to explore one or more health careers. Students will complete several self-awareness/self-interest surveys. By analyzing self
and career interests, students refine and clarify their career goals. It also assists students to develop beginning observation, recording, and reporting skills based on their selected field exploration areas. This is a required course for Pharmacy Technology students.

**Lab:** Approximately 2 hours per week

**Corequisite:** ALTH 101

**ALTH 105 Infection Prevention**

2 Credits  
*Offered Each Semester*

This course is an introduction to concepts regarding infection/prevention and control with major emphasis on the blood-born pathogens HIV and Hepatitis B. Modes of transmission, prevention and OSHA standards for blood-born pathogens, basic pathophysiology of HIV and Hepatitis B, and current treatments will be defined. Psychosocial, legal, and ethical issues about these diseases will also be discussed.

**Lecture:** 2 hours per week

**ATH 107 Communication Skills**

1 Credit  
*Offered Fall Semester*

This seminar provides allied health students the opportunity to develop communication skills necessary for effective helping and teamwork relationships. This course is required for Practical Nursing program completion.

**Seminar:** 2 hours per week

**ALTH 110 Over the Counter & Herbal Medications**

2 Credits  
*Offered Fall Session*

This course provides an overview of the significance of over-the-counter (OTC) and herbal drug therapy in our society. The role of the pharmacy technician in selling and providing information about OTC and herbal therapy will be reviewed. Therapeutic drug classifications, indications, dosage forms, major ingredients, common side effects, and significant drug interactions will be covered for OTC drugs. For herbal medications, students will learn to associate the names of herbal medications with common uses, recognize potential adverse effects, and be aware of potential drug interactions between herbs and conventional medication. Federal regulation of OTC and herbal medications will be reviewed.

**Lecture:** 2 hours per week

**ALTH 115 Human Body Structure & Function**

(Previously PN 104)

3 Credits

This course is a presentation of the essential anatomy and physiology of the human body. All body organ systems are discussed in a format of lectures, diagrams, and audiovisual materials. The course will introduce some aspects of chemistry and microbiology as it relates to health care. Knowledge of the anatomy and physiology of the human body as a basis for later study of disease processes is an essential part of the curriculum for students in the nursing profession. This course is limited to Practical Nursing students only.

**ANTHROPOLOGY**

**ANTH 101 Introduction to Physical Anthropology**

3 Credits  
*Offered Fall Semester*

This course offers instruction in how the human species has developed over the past five million years. Information includes the African fossil finds, possible ancestors of the first humans, how human populations may differ from each other biologically, and the development of human abilities to live in all of earth’s environments. This class satisfies a social science course requirement for the A.A. and A.S. degrees.

**Lecture:** 3 hour per week

**ANTH 102 Introduction to Social and Cultural Anthropology**

3 Credits  
*Offered Each Semester*

ANTH 120 is a study of human culture which involves the information and techniques people use to survive and get along with each other. Included are examples from exotic peoples around the world in the areas of religion, magic, kinship, coming of age ceremonies, marriage rituals, economic activities, hunting techniques, etc. The course is desirable for students seeking a broad understanding of how human beings live, and how human customs vary throughout the world. This class satisfies a social science course requirement for the A.A. and A.S. degrees.

**Lecture:** 3 hours per week

**ANTH 204A Expressive Culture**

3 Credits  
*Offered Spring Semester*

This course explores the creative avenues through which humans express their experiences, beliefs, ideas, and emotions. Drawing on a wide range of cultures both past and present, the course will examine why humans create and the many means by which they express their creativity. The goal of the course is to instill an understanding of how culture shapes the creative process, the message, and the medium of expression. The format is specifically interdisciplinary in scope and is designed to appeal to social science majors, communication majors, individuals in therapeutic professions, and artists.

**Lecture:** 3 hours per week

**ANTH 204B Introduction to Osteology/Forensics**

3 Credits  
*Offered Spring Semester*

This course provides the student with a complete knowledge
of the names and major processes of all the bones of the human body, a general overview of faunal skeletons, and an introduction to forensics. This course satisfies an elective in anthropology and covers material needed to, in part, pursue a degree in physical anthropology or archaeology. In addition to anthropology, this course is helpful to students pursuing degrees in nursing, physical education, physical therapy, pre-medical, wildlife and range management, biology, zoology, pre-veterinary medicine, criminal justice or law enforcement.

Lecture: 3 hours per week

ANTH 225 Native People of North America
3 Credits Offered Each Semester

This course offers an examination of who the North American Indians are and who they were. Various facets of Indian culture are explored, including hunting, religion, art, living styles, foods, and relationships between the Native American tribes, both now and in the past. ANTH 225 is an interesting course for students curious about Native Americans and their relationship with the environment. This course satisfies the Cultural Diversity requirement for the A.A. degree or three social science credits toward an A.S. degree.

Lecture: 3 hours per week

ANTH 230 Introduction to Archaeology and World Prehistory
3 Credits Offered Spring Semester

This course offers classroom instruction in the ways archaeologists unearth the remains of ancient peoples. Included is a brief look at what those archaeologists have discovered in various places throughout the world from the earliest stone tools to the invention of agriculture. ANTH 230 is an interesting course for those students curious about the human past in both the Old and New Worlds, as well as students wishing to satisfy the Group 4 Social Science requirement for the A.A. degree or three social science credits toward an A.S. degree.

Seminar: 3 hours per week

ANTH 299 Independent Study: Readings in the History of Anthropology
3 Credits Offered Each Semester

This course is an individual study in which the student completes reading from a list of books relating to the development of modern anthropological thinking. The student will prepare a document based on those readings. This course is intended for anthropology majors wishing to transfer to B.A. granting institutions.

Instructor Contact: 3 hours per week

Prerequisite: ANTH 101, ANTH 102, ANTH 230, and ENGL 102

ART 100 Survey of Art
3 Credits Offered Each Semester

ART 100 is designed to create a greater aesthetic understanding and appreciation of the various visual arts. Emphasis will be on painting, sculpture, architecture, and related art forms. When appropriate, gallery tours, films, and visiting artists will be included. A basic understanding of visual art coordinates with the principles emphasized in studio art classes. This course is appropriate for both non-art students and art majors who wish to view art with greater awareness and respond to and evaluate art, with approaches that are both objective and critically subjective. It satisfies an arts and humanities course requirement for A.A. and A.S. degrees.

Lecture: 3 hours per week

ART 101 History of Western Art I
3 Credits Offered Fall Semester

This course offers an historical overview of the development of Western visual art in its principal phases from prehistoric societies to the 12th century AD. The arts of these cultures will be examined through the analysis of major monuments of architecture, sculpture, and painting with specific attention to the communicative function of the work of art in relation to its society. ART 101 expands an understanding in the visual arts and the societies that produced them, enables the student to make connections to contemporary society and culture, and increases individual aesthetic concepts. It satisfies an arts and humanities course requirement for the A.A. and A.S. degrees.

Lecture: 3 hours per week

ART 102 History of Western Art II
3 Credits Offered Spring Semester

Survey of Art II offers an historical overview of the development of Western painting, sculpture, and architecture from the Renaissance to the present with emphasis on the struggle to find a universal and unified visual language for a world of changing values, new institutions, and unprecedented diversity. This course creates a higher understanding of the parallels and interconnections of visual art and the societies that made them. It enables students to thoughtfully view creative expression in its communicative function in relation to contemporary society and culture. This course satisfies an arts and humanities course requirement for A.A. and A.S. degrees.

Lecture: 3 hours per week

ART 111 Drawing I
2 Credits Offered Each Semester

Drawing I offers beginning experiences in the concepts of composition, line, value, form, perspective and texture, introduced through the use of still life, nature, and dry pastels. This course is also fundamental for the Graphic Design program and for transfer programs in fine arts and architecture. The concepts covered in this course will help students develop a visual vocabulary as well as a heightened ability to “see” and respond creatively.

Lecture/Lab: 4 hours per week

ART 112 Drawing II
2 Credits Offered Spring Semester

ART 112 is a continuation of ART 111 with an emphasis on personal artistic expression and imagery. Students will be exposed to a variety of drawing mediums and approaches to the picture plane. Traditional, as well as contemporary trends in drawing, will be explored. The course is fundamental for the Graphic Design program, for transfer programs in fine arts and architecture, and for personal enjoyment.

Lecture/Lab: 4 hours per week

**Course Descriptions**

**ART 121 2D/Design Foundations**

This course offers instruction in the design process with consideration of abstract/concrete and intangible/tangible elements. These design elements are explored through various media in two-dimensional problems. ART 121 helps students to channel conceptual thinking and to organize and master skills of the basic elements of art. The course is necessary for the artist/designer in all fields. It is a required course in the Graphic Design program and for some transfer programs.

Lecture/Lab: 5 hours per week

**ART 122 3D/Design Foundations**

ART 122 offers instruction in the use of basic art fundamentals as applied to three-dimensional art work and the creative concepts evolved from these properties. This course helps students to channel conceptual thinking and organize and master skills of the basic elements of art in art as they relate to three-dimensional expression. Design II is important for artists and designers in all fields and is a required course in the Graphic Design program and for some transfer programs.

Lecture/Lab: 5 hours per week

**ART 217 Life Drawing I**

Life Drawing I offers an exploration of various media to develop an artistic understanding of the human form. Emphasis will include both an anatomical analysis and an interpretive drawing of the undraped and draped model. ART 217 helps to develop eye/hand coordination that is important for careers in applied arts and fine arts. ART 217 or 218 are required courses in the Graphic Design program.

Lecture/Lab: 5 hours per week

Prerequisite: ART 111 and 112

**ART 218 Life Drawing II**

Life Drawing II is an exploration in the artistic expression of the draped and undraped human form. Included will be drawing in various media from the model with an emphasis on personal interpretation. ART 218 offers a basis for development in any of the visual arts. The course equally accommodates the gestural artist and the technical illustrator. ART 218 or 217 are required courses in the Graphic Design program.

Lecture/Lab: 5 hours per week

Prerequisite: ART 111 and 112

**ART 231 Beginning Painting I**

Beginning Painting I develops competence with oil paint medium through specific assignments designed to emphasize composition and the fundamentals of painting and color. Attention is given to visual thinking, exploration, exposure to materials, and technical procedures. The course is structured around individual instruction and group critiques. ART 231 helps develop ideas and competence with a creative medium. It promotes the articulation of feelings and objectives through a descriptive visual vocabulary. ART 231 or 232 are required courses in the Graphic Design program. Class supplies are to be purchased by the student.

Lecture/Lab: 5 hours per week

**ART 232 Beginning Painting II**

ART 232 offers additional instruction in the knowledge and understanding of the paint medium with special emphasis on personal development. The course is structured around personal instruction and group critiques. Beginning Painting II encourages divergent thinking and different approaches with the medium through the presentation of abstract concepts. ART 232 or 231 are required courses in the Graphic Design program. Class supplies are to be purchased by the student.

Lecture/Lab: 5 hours per week

**ART 241 Sculpture I**

Sculpture I provides an introduction to ideas and materials designed to facilitate the student’s response to three-dimensional forms. Emphasis is on concepts of modeling, carving, and constructing. This course promotes confidence for the three-dimensional artist through technical fundamentals. It is a recommended elective for the Graphic Design program.

Lecture/Lab: 5 hours per week

**ART 242 Sculpture II**

ART 242 is a continuation of Sculpture I. The course explores problems of greater complexity through both technical and personal involvement. The course further develops the necessary skills for three-dimensional work. It is a recommended elective for the Graphic Design program.

Lecture/Lab: 5 hours per week

**ART 245 Intermediate Painting I**

This course is structured to meet students’ needs and interests with an emphasis on creative expression and exploration beyond the visual image. The course includes individual instruction and group critiques. It promotes an appreciation for the complexity of the medium and the range of possibilities associated with it. It is intended for the intermediate student who has a firm understanding of the properties and fundamentals of this studio discipline and is a recommended elective for the Graphic Design program. Class supplies are to be purchased by the student.

Lecture/Lab: 5 hours per week

Prerequisite: ART 231, 232

**ART 246 Intermediate Painting II**

Intermediate Painting II is a continuation of ART 245. The course focuses on developing students’ greater understanding of personal intent, continuing creative expression, and exploration beyond the visual image. The course offers individual instruction and group critiques. Class supplies are to be purchased by the student. It is a recommended elective for the Graphic Design program.

Lecture/Lab: 5 hours per week

Prerequisite: ART 231, ART 232

**ART 251 Printmaking I**

Printmaking I explores the relief printmaking processes of woodcut, linocut, wood engraving, and collagraph. Empha-
sis is on developing compositional and design skills using the various methods, techniques, and exploration of materials. Additional focus will be placed on the historical influence of each medium and its relationship to other artistic expressions. The course is structured around individual instruction, group critiques, lectures/slides, and studio time. ART 251 is a recommended elective for the Graphic Design program.

Lecture/Lab: 5 hours per week

ART 252  Printmaking II
3 Credits  Offered Spring Semester
Printmaking II provides additional exploration of the relief printmaking process. While concentrating on linocuts and one other medium of choice, the class explores various techniques and methods of printmaking. Focus is on developing compositional and design skills, using color, and developing personal expression. The course is structured around individual instruction, group critiques, lectures/slides, and studio time. ART 252 is a recommended elective for the Graphic Design program.

Lecture/Lab: 5 hours per week

ART 253  Letterform Design
2 Credits  Offered Fall Semester
ART 253 offers instruction in basic type styles and design. The course includes characteristics of letters in relationship to technical, free style, and creative letter rendering as they apply within the graphic design and illustration fields. Letterform Design provides a fundamental knowledge of hand lettering.

Lecture/Lab: 4 hours per week

ART 261  Ceramics I
3 Credits  Offered Both Semesters
Ceramics I introduces the student to wheel-thrown and handbuilt clay forming techniques, ceramic design concepts, and glaze experimentation. Emphasis is on the development of fundamental skills and understanding the creative potential of clay. This course helps develop sensitivity of design and aesthetics for the clay objects we use daily. The course enhances an appreciation for the creative process and establishes the student as a designer/craftsperson. It is a recommended elective for the Graphic Design program and a fundamental course for transfer art majors or minors.

Lecture/Lab: 5 hours per week

ART 262  Ceramics II
3 Credits  Offered Both Semesters
ART 262 is a continuation of Ceramics I and is structured to develop the creative potential of the student using the medium of clay as a vehicle of communication. The course focuses on continued development of fundamental skills and expressive use of materials. Additional emphasis is placed on establishing individual design criteria and expanding awareness of aesthetic qualities of ceramics as art forms or as utilitarian vessels. This is a recommended elective for the Graphic Design program and may be repeated for a total of 12 credits.

Lecture/Lab: 5 hours per week
Prerequisite: ART 261

ART 281  Watercolor I
3 Credits  Offered Fall Semester
Watercolor I introduces the student to a water-based medium that includes the application of visual and tactile elements and the functions of design. Emphasis will be on visual thinking, exploration, exposure to materials, and technical approaches. Individual instruction and group critiques are utilized. ART 281 helps to develop an appreciation for complexities and the potential for creative expression. Class supplies are to be purchased by the student.

Lecture/Lab: 5 hours per week

ART 282  Watercolor II
3 Credits  Offered Spring Semester
ART 282 offers additional instruction in watercolor design to increase student awareness, knowledge, and understanding of the medium’s potential. This course introduces mixed media for the purpose of combining with the watercolor medium. Individual approaches are encouraged and personal development is emphasized. This course helps to develop different approaches and divergent thinking through the presentation of abstract concepts. Class supplies are to be purchased by the student.

Lecture/Lab: 5 hours per week

AUTOMOTIVE TECHNOLOGY

NOTE: Course enrollment requires prior acceptance into the Automotive Technology Program. Successful completion of each semester and/or permission of the instructor is required for enrollment in the next semester.

AUTO 105  Orientation, Safety, General Shop Practices
1 Credit  Offered Fall Semester
This course will introduce students to on-campus services including the library and College Skills Center. It will teach students about the industry, including wages, job opportunities, and the nature of the work. This course will also give instruction about safety equipment and procedures. Instruction will be given in a variety of general shop practices such as drilling and tapping holes and drilling out broken bolts. Students will also work on Heli-coils, double flares, soldering, and the care of equipment and floors.

AUTO 115  Auto Lab
4 Credits  Offered Fall Semester
This course gives students hands-on exposure in a shop setting to those subjects covered in AUTO 105, 123 and 130 theory classes. Instruction utilizes a variety of mock-ups, training aids, components and live work. Students will be able to explain and demonstrate proper safety precautions when lifting and supporting a vehicle, using tools and equipment, or handling asbestos-containing materials.

AUTO 116  Auto Lab
5 Credits  Offered Spring Semester
This course will give the students hands-on exposure in a shop setting to those subjects covered in AUTO 126 and AUTO 141 theory classes. The instruction will utilize a variety of mock-ups, training aids, components, and live work. The stu-
dent will be able to explain and demonstrate proper safety precautions when lifting and supporting a vehicle, using tools and equipment, or handling asbestos-containing materials.

**AUTO 123**
**Brakes/Powdertrain**
5 Credits  
Offered Fall Semester

This course will teach students the principles of hydraulic brakes and friction, as well as the operation and construction of drum and disc brake systems. Students will also learn the operation, construction and repair of clutch systems, drivelines, and constant velocity joints.

**AUTO 126**
**Steering, Suspension, and Alignment**
3 Credits  
Offered Spring Semester

This course will teach the various steering and suspension systems used on today's cars and light trucks. The construction, service and repair of components will be taught along with their relation to the steering geometry of the vehicle. In-depth instruction will be given to four-wheel alignment principles using the Hunter D-111 Computerized Alignment machine.

**AUTO 130**
**Gas Engine Fundamentals**
4 Credits  
Offered Fall Semester

This course will teach the student how to identify, repair, or replace components as necessary on gasoline engines. The four-stroke cycle and accompanying valve action will be taught, as well as the construction, operation, and servicing of cooling and lubrication systems. The student will learn proper engine disassembly, measuring, machining, and assembly procedures.

**AUTO 141**
**Electrical System Fundamentals**
6 Credits  
Offered Spring Semester

This course will cover basic electrical theory, including types of circuits and components, as well as batteries, starter, and charging systems. Students will also learn about wiring schematics and diagrams, along with the 25 most common car wiring systems.

**AUTO 210**
**Advanced Electrical**
2 Credits  
Offered Fall Semester

Students will explore a variety of accessory electrical circuits. Some of these include windshield wipers, power windows, door locks, seats, and cruise control systems, as well as in-depth instruction on troubleshooting procedures and theories.

**AUTO 215L**
**Advanced Auto Lab**
5 Credits  
Offered Fall Semester

Students will perform troubleshooting on computerized engine controls on live vehicles that have been “bugged” by the instructor. Students will use various scanners and electronic test equipment typically used in the industry to diagnose the “bugs.”

**AUTO 216L**
**Advanced Auto Lab**
5 Credits  
Offered Spring Semester

This course will give students hands-on exposure in a shop setting to those subjects covered in AUTO 260, 270, and 280 theory classes. Instruction will utilize a variety of mock-ups, training aids, components, and live work.

**AUTO 222**
**Engine Performance**
5 Credits  
Offered Fall Semester

This course will teach basic combustion theory, general tune-up procedures, as well as the various ignition systems used on today's cars. The use of electronic engine analyzers and the reading of scope patterns will also be taught. Instruction will include emission control systems and related regulations, as well as the use of the four-gas analyzer. Students will learn about “drivability” and how each of the systems work together to produce it.

**AUTO 250**
**Computer Controls**
2 Credits  
Offered Fall Semester

The theory and systems of automotive computer controls will be covered including the various sensors and output devices. The use of scanners, computerized engine analyzers, and a multitude of special tools will also be taught.

**AUTO 260**
**Computer Controlled Systems**
4 Credits  
Offered Spring Semester

Students will receive instruction on various automobile systems that are computer controlled such as fuel injection, anti-lock brakes, supplemental inflatable restraints, On-Board Diagnostics (OBD) II and III, and current industry trends.

**AUTO 270**
**Trans/Transaxle**
4 Credits  
Offered Spring Semester

This course will cover the general theory of manual and automatic transmission and transaxle operation, as well as differential and four-wheel drive systems. Students will learn appropriate testing, disassembly, and repair procedures.

**AUTO 280**
**Heating, Ventilation, Air Conditioning**
2 Credits  
Offered Spring Semester

Students will receive instruction in heating and air conditioning theory, as well as the use of equipment related to the evacuating, recycling, and recharging of air conditioning systems. The course will cover both R-12 and R-134A refrigerant handling.

**BIOL 100**
**Fundamentals of Biology**
4 Credits  
Offered Each Semester

This introductory course provides a general overview of evolution, the five kingdoms, DNA, cell structure, genetics, and human systems. BIOL 100 is designed to give non-biology majors a better understanding and appreciation of the living world. It is not intended as a preparation for BIOL 115 or BIOL 175.

Upon completion of BIOL 175 or BIOL 115, BIOL 100 will count as elective science credits only and will not satisfy core lab science credits. This course may not be accepted as fulfilling biology course requirements for biology majors or some medical programs. Students should get clearance from their prospective transfer institution prior to taking this course. This course satisfies a laboratory science course requirement for the A.S., A.A., and A.A.S. degrees except after completing BIOL 175 or BIOL 115.

Lecture: 3 hours per week  
Corequisite Lab: 2 hours per week (BIOL 100L)
Biology Descriptions

**BIOL 101**  
Forestry Orientation  
1 Credit  
Offered Fall Semester

Biology 101 is an introduction to forestry and related natural resources management professions. Students will explore various career opportunities in natural resource management. This course does not fulfill a lab science requirement for an associate degree.

Lecture: 1 hour per week

**BIOL 111**  
Living with the Environment  
3 Credits  
Offered Each Semester

This course is a study of the environment that includes population dynamics, ecological principles, use and misuse of resources, worldwide environmental problems, and man in relation to land, air, and water resources. Living with the Environment helps enhance an understanding of current environmental issues and the application of environmental principles to everyday decisions. This course does not fulfill a lab science requirement for an associate degree.

Lecture: 3 hours per week

**BIOL 115**  
Introduction to Life Sciences  
4 Credits  
Offered Each Semester

Biology 115 is an introduction to the fundamental principles that govern living organisms, including molecular biology, cell biology, homeostasis, reproduction, genetics, and evolution. Upon completion of BIOL 100 or BIOL 175, BIOL 115 will count as elective science credits only and will not satisfy core lab science credits. It satisfies a laboratory science course requirement for the A.S., A.A., and A.A.S. degrees.

Lecture: 4 hours per week

Corequisite Lab: 3 hours per week (BIOL 115L)

Recommended: One year high school biology or chemistry

**BIOL 175**  
Human Biology  
4 Credits  
Offered Each Semester

This introductory course provides a general overview of the structure, function, healthy maintenance, and common diseases of the human body. BIOL 175 is designed to give the non-biology major a better understanding and appreciation of the human body.

Upon completion of BIOL 100 or BIOL 115, BIOL 175 will count as elective science credits only and will not satisfy core lab science credits. This course may not be accepted as fulfilling the course requirements for some medical programs. Students should get clearance from their prospective transfer institution prior to taking this course to assure that it is a requirement. This course fulfills a laboratory science requirement for the A.S., A.A., and A.A.S. degrees.

Lecture: 3 hours per week

Corequisite Lab: 3 hours per week (BIOL 175L)

**BIOL 202**  
General Zoology  
4 Credits  
Offered Spring Semester

This course presents a survey of the animal kingdom from invertebrates through the vertebrates. It includes classification, structure, physiology, histology, reproduction, embryology, and life histories of representative forms of the major animal groups and their relationship, application, and economic importance to man. This course is often required for students in medicine, dentistry, optometry, pharmacy, veterinary medicine, certain forestry options, medical technicians, and biology majors. Students should get clearance from their prospective transfer institution prior to taking this course to assure that it is a requirement. This course fulfills a laboratory science requirement for the A.S., A.A., and A.A.S. degrees.

Lecture: 3 hours per week

Corequisite Lab: Two 2-hour labs per week (BIOL 202L)

Recommended: BIOL 100 or 115

**BIOL 203**  
General Botany  
4 Credits  
Offered Fall Semester

Biology 203 is an introduction to the plant kingdom starting with the bluegreen algae or cyanobacteria and progressing in an evolutionary fashion through gymnosperms and angiosperms. When possible, each group is related to the higher plants. The course is designed for individuals pursuing a degree in biology, botany, agriculture, or forestry, and for others interested in a survey of the plant kingdom. BIOL 203 satisfies a lab science course requirement for the A.S., A.A., and A.A.S. degrees.

Lecture: 3 hours per week

Corequisite Lab: Two 2-hour labs per week (BIOL 203L)

Recommended: BIOL 100 or 115

**BIOL 205**  
General Soils  
4 Credits  
Offered Spring Semester Alternate Years

This course is an introduction to the basic physical, chemical, and biological properties of soils and land resources. BIOL 205 emphasizes on the fundamental principles of soil processes and soil formation with examples drawn from numerous disciplines. This course is designed for a variety of majors such as crop sciences, forestry, landscape architecture, wildlife and fisheries, agribusiness, biosystems engineering, or agricultural education. This course satisfies the laboratory science requirement for the A.S., A.A., and A.A.S. degrees.

Lecture: 3 hours per week

Corequisite Lab: 3 hours per week (BIOL 205L)

Prerequisite: CHEM 101 or 111

**BIOL 207**  
Concepts in Human Nutrition  
3 Credits  
Offered Each Semester

Biology 207 offers instruction in basic nutrition concepts, current nutritional controversies, and food selection for individual needs. Topics covered include carbohydrates, fats, proteins, vitamins, minerals, energy balance, vegetarian diets, product labels and additives, life cycle needs, and diets for athletes. Individual dietary habits will be closely examined through a self-evaluation of personal diet studies. BIOL 207 provides important basic knowledge in making personal dietary decisions. This course does not fulfill a lab science requirement for an associate degree.

Lecture: 3 hours per week

**BIOL 221**  
Forest Ecology (Same as BIOL 231)  
4 Credits  
Offered Spring Semester

Forest Ecology is an introduction to the relationships among living and non-living components in the environment, including an examination of the processes which influence the distribution of plant and animal communities. This course exposes students to fundamental principles of ecology used in careers in natural resource management. It fulfills a science requirement for the A.A., A.S., and A.A.S. degree.

Lecture: 3 hours per week
is designed for forestry and biology majors with applications for pre-agriculture, zoology, environmental science, and botany disciplines.  
Lecture: 3 hours per week  
Corequisite Lab: 3 hours per week (BIOL 221L)  
Prerequisite: BIOL 115

**BIOL 227  Human Anatomy and Physiology I**  
4 Credits  
Offered Fall Semester  
This course offers a homeostatic approach to the study of the human body from the level of the cell to organ systems with emphasis on normal structure and function, as well as selected physiological imbalances. Systems covered include integument, skeletal, muscular, and nervous. It is designed primarily for students enrolled in health-related fields. Human Anatomy and Physiology will give students a strong background in the fundamentals of structure and function of the body. All aspects of life processes will be covered in a manner that should interest students wishing to take a science elective, as well as those in the health-related areas. This course fulfills a laboratory science requirement for the A.S., A.A., and A.A.S. degrees.  
Lecture: 3 hours per week  
Corequisite Lab: 3 hours per week (BIOL 227L)  
Recommended: CHEM 101

**BIOL 228  Human Anatomy and Physiology II**  
4 Credits  
Offered Spring Semester  
This course is a continuation of BIOL 227. Systems covered include cardiovascular, digestive, urinary, respiratory, and reproductive, as well as the sense organs and metabolism. It is designed for students enrolled in health-related fields. This course will give students a strong background in the fundamentals of the structure and function of the body. All aspects of life processes will be covered in a manner that should interest students wishing to take a science elective, as well as those in the health-related areas. It fulfills a laboratory science requirement for the A.A., A.S., and A.A.S. degrees.  
Lecture: 3 hours per week  
Corequisite Lab: 3 hours per week (BIOL 228L)

**BIOL 231  General Ecology (Same as BIOL 221)**  
4 Credits  
Offered Spring Semester  
This introductory course shows relationships between living and non-living components of the environment. It examines the processes which influence the distribution of plant and animal communities. It provides an exposure to the fundamental principles of ecology in natural resource management. This course is designed for forestry and biology majors with applications for pre-agriculture, zoology, environmental science, and botany disciplines. This course fulfills a laboratory science requirement for the A.S., A.A., and A.A.S. degrees.  
Lecture: 3 hours per week  
Corequisite Lab: 3 hours per week (BIOL 231L)  
Prerequisite: BIOL 100 or 115

**BIOL 241  Systematic Botany**  
4 Credits  
Offered Spring Semester  
BIOL 241 offers instruction in plant identification focusing on local gymnosperms and spring angiosperms using a recognized botanical key. The course includes field trips and a plant collection. It is designed for students pursuing a degree in biology, botany, or forestry and for those interested in the identification of local plants. BIOL 241 fulfills a laboratory science requirement for the A.S., A.A., and A.A.S. degrees.  
Lecture: 2 hours per week  
Corequisite Lab: Two 2-hour labs per week (BIOL 241L)  
Recommended: BIOL 100 or 115

**BIOL 250  General Microbiology/Bacteriology**  
4 Credits  
Offered Each Semester  
This course is an introductory survey of microorganisms emphasizing bacteria as examples of all microorganisms and as models for all living organisms/cells in regard to structure, physiology, and reproduction. This is a fairly rigorous lab course requiring attendance to cover various lab skills of media use, culturing, slide-staining, use of lab materials, and processes relating to microorganisms. This course has applications to programs in life sciences, the medical health field, health sciences, agriculture, food industries, pharmaceutical industries, environmental science, and laboratory research. BIOL 250 satisfies a laboratory science course requirement for the A.S., A.A., and A.A.S. degrees.  
Lecture: 3 hours per week  
Corequisite Lab: 3 hours per week (BIOL 250L)  
Recommended: BIOL 100 or 115; CHEM 101

**BUSINESS ADMINISTRATION**

**BUSA 100  Introduction to Computers**  
3 Credits  
Offered Each Semester  
BUSA 100 is the study of computer systems and applications. This course includes computer terminology, an introduction to computer hardware, application and system software, and Internet concepts. It also includes societal issues and concerns of security, privacy, computer crime, and viruses. This course is required for the Business Administration, Business Education, and Accounting Assistant programs. It meets the computer science requirement for the A.A. degree.  
Lecture: 3 hours per week
BUSA 101  Introduction to Business  
3 Credits  Offered Each Semester

BUSA 101 is an introductory overview of the organization, functions, and activities of business in contemporary society. Emphasis is placed on the terminology necessary to understanding business principles and practices. The course also includes an exploration of business environments, human resources, management, marketing management, finance, management information tools, and international marketing. Focus is on critical factors essential to understanding the interdependence between different facets of business operations. This course is useful for those who are considering a career in business or who want an overview of what the study of business encompasses. This is a required course in the Administrative Assistant, Business Education, Office Information Specialist, and Accounting Assistant programs.

Lecture: 3 hours per week  
Recommended: MATH 025

BUSA 180  Personal Finance  
1 credit  Offered Upon Demand

Personal Finance is designed to empower students to analyze and develop their own personal financial plan. Students will be challenged to develop solid financial management skills through effective tax and savings strategies. Various financing options for large purchases such as automobiles and housing will also be discussed, along with developing techniques for controlling consumer credit. Students will learn how to evaluate different insurance options including life, health, and disability insurance. This course will also include some basic stock market strategies, including the choice to invest in stocks, mutual funds, or bonds.

Lecture: 15 hours

BUSA 185  Business Mathematics  
3 Credits  Offered Each Semester

BUSA 185 provides instruction in the basic operations necessary to solve business problems including the areas of decimals, fractions, percentages, interest, discount, markup, installment buying, stocks and bonds, insurance, and taxes. The touch method of operating an electronic calculator to solve business work examples is developed. This course is required in the Business Education curriculum and in the Accounting Assistant, Administrative Assistant, Legal Administrative Assistant, Medical Billing Specialist, and Medical Administrative Assistant.

Lecture: 3 hours per week  
Prerequisite: MATH 025 or placement score for entry into MATH 108

BUSA 211  Principles of Management  
3 credits  Offered Upon Demand

BUSA 211 provides an overview of theories and practices of management. Topic areas include the evolution and scope of management and the universal functions of management including planning, organizing, directing, staffing, controlling, coordinating, and delegating. Emphasis is also placed on the art of negotiating, leadership skills, team performance and productivity, and creative problem solving. This course fosters an awareness of the operational skills and administrative activities of managers, and it also helps in upgrading management skills. Prior completion of other courses is not required.

Lecture: 3 hours per week

BUSA 221  Principles of Marketing  
3 credits  Offered Upon Demand

This is an introductory course designed to provide an overview of marketing segments and environments, and marketing mixes. Issues relating to product, promotion, pricing, and distribution are discussed. This course promotes an awareness of the operational and administrative activities of marketing managers; it also helps in upgrading marketing skills. This is a required course in the Resort/Recreation Management program. Prior completion of other courses is not required.

Lecture: 3 hours per week

BUSA 240  Computer Systems & Business Applications  
3 Credits  Offered Each Semester

This course provides applied instruction using computer systems, networks, and an Office suite of application software within the business environment. The course includes a lecture and hands-on learning and emphasizes practical concepts of file management; using communications and network systems; exploring methods to secure a computer system against unauthorized intrusion and destruction of data; the creation of documents using word processing, spreadsheets, databases, and presentation software; use of the Internet to access and retrieve data; and the creation and use of Web pages within the business environment. This is a highly recommended course for students majoring in the Business Administration and Business Education associate of science degree programs and meets the computer science requirements for the A.A. degree.

Lecture: 3 hours per week  
Prerequisite: Keyboarding skills (BUSO 101A) and math skills (MATH 025 or higher).  
Recommended: Basic computer literacy skills (BUSA 100 or CS 100 or equivalent).

BUSA 250  International Business  
3 credits  Offered Upon Demand

This course provides an overview of the international business environment and conditions affecting firms that do business overseas. The course explores the economic and cultural context for global business, cross-border trade and investment, the global monetary system, and competition in the global environment. The course addresses issues of international marketing, research and development, production and operations management, and human resource management. This course is useful for those who are considering a career in business or who want an overview of what the study of international business encompasses.

Lecture: 3 hours per week  
Prerequisite: BUSA 101

BUSA 255  E-Commerce  
3 credits  Offered Upon Demand

This is a principles course in e-commerce covering the business strategies used in e-commerce and the technology needs. The course focuses on entry strategies, emerging web-based
Prerequisite:

Lecture:

Investment and Retirement Planning will assist students in taking an active role in the planning process for their retirement. This course evaluates the problems associated with accumulating assets for retirement and managing assets to create and sustain retirement income. The course takes an in-depth look at the various investment products available as well as the associated risks. Students will have the opportunity to prepare a retirement plan “road map” designed to maximize assets, and maintain a predetermined standard of living.

Lecture: 30 hours
BMGT 266  Small Business and Entrepreneurial Management  
Offered Upon Demand  
3 credits  
This is an intensive course that applies management and marketing concepts to planning, owning, and operating a small business. Topics covered include entrepreneurial opportunities, developing a business plan, marketing and management, financial management, and the social and legal environment of business. A major emphasis is on the business plan. Some knowledge of accounting, management, and marketing are recommended.  
Lecture: 3 hours per week

BUSO 101A  Basic Keyboarding  
Offered Each Semester  
1 Credit  
BUSO 101A provides introductory development of basic keyboarding skills. It proceeds from basic alphabetic keyboarding through numeric and symbolic keyboarding. Emphasis is placed on developing touch control of the keyboard using proper keyboarding techniques and building speed and accuracy. This is a required course in the Accounting Assistant, Pharmacy Technology, Computer Information Technology programs and all Business and Office Technology programs. This is an important course for those who want to learn to type and is especially useful for microcomputer word processing. Prior completion of other courses is not required.  
Lecture/Lab: This is an open-entry/open-exit course. Students may enroll through the 10th week of the semester. For information call 769-3409.

BUSO 101B  Keyboarding Speed Development  
Offered Each Semester  
1 Credit  
BUSO 101B is a continuation of BUSO 101A. Emphasis is placed on improving keystroking efficiency and on reinforcing and building keying speed and accuracy. This is a required course in the Accounting Assistant, Administrative Assistant, Legal Administrative Assistant, Medical Administrative Assistant, Medical Claims Assistant, Medical Transcriptionist, and Receptionist/Office Specialist programs.  
Lecture/Lab: This is an open-entry/open-exit course. Students may enroll through the 10th week of the semester. For information call 769-3409.  
Prerequisite: BUSO 101A or successful challenge of BUSO 101A

BUSO 109  Medical Terminology  
Offered Each Semester  
3 Credits  
This course is a comprehensive introduction to terminology used in the medical field. Taking a body systems approach, strong emphasis is placed on anatomy and physiology; abnormal conditions; diagnostic and surgical procedures; as well as medical roots, prefixes, and suffixes. Skill emphasis is placed on defining medical terms and abbreviations; usage of medical reference materials; and spelling of medical terms. This is a required course in the Medical Administrative Assistant, Medical Billing Specialist, Medical Receptionist, Medical Transcriptionist, and Pharmacy Technology programs and is helpful for any medical or legal paraprofessional. This is an elective course in the Human Services Certificate program.  
Lecture/Lab: 3 hours per week

BUSO 110  Medical Transcription  
Offered Each Semester  
2 Credits  
This course is an introduction to transcribing taped medical dictation and covers basic reports used in the medical field, related medical terminology, use of reference material, and specialized rules of grammar and punctuation peculiar to dictated medical reports. Emphasis is on the importance of correct usage of medical terms with an introduction to proofreading and editing of medical reports. Application testing is completed under timed conditions. This is a required course for students in the Medical Administrative Assistant, Medical Receptionist, and Medical Transcriptionist programs.  
Lecture/Lab: 4 hours per week  
Prerequisite: BUSO 109 and BUSO 176

BUSO 115  Records Systems Management  
Offered Each Semester  
3 Credits  
This course provides instruction in the management of manual and electronic records. The life cycle of records from creation

**Course Descriptions**

- **BUSO 156 Medical Software Applications**
  1 Credit, Offered Fall Semester
  This course prepares students for administrative tasks in health care practices. Using a medical administrative software package designed for Windows, students will learn to input patient information, schedule appointments, and handle billing. In addition, students will produce various lists and reports and learn to handle insurance claims both on paper forms and electronically. The concepts learned in this course are general enough to cover most medical administrative software packages, and students who complete this course should be able to use other brands of software with minimum training. This is a required course in the Medical Administrative Assistant, Medical Billing Specialist, Medical Receptionist, and Pharmacy Technology programs.
  Lecture/Lab: 2 hours per week
  Prerequisite: BUSO 101B

- **BUSO 173 Word Processing**
  3 Credits, Offered Each Semester
  This course provides an introduction to word processing fundamentals. It includes instruction in creating, storing, retrieving, editing, proofreading, and printing documents. It utilizes word processing functions such as spell check, grammar check, and formatting features. Emphasis is placed on formatting letters, memos, tables, reports, and other business documents. Application testing is completed under timed conditions. This is a required course in all Business and Office Technology programs.
  Lecture/Lab: 3 hours per week
  Prerequisite: BUSO 101B
  Pre- or Corequisite: CAPS 100

- **BUSO 174 Word Processing Applications**
  3 Credits, Offered Each Semester
  BUSO 174 is a continuation of BUSO 173. It emphasizes advanced word processing and beginning desktop publishing skills. Application testing is completed under timed conditions. This is a required course in the Administrative Assistant, Legal Administrative Assistant, Medical Administrative Assistant, and Medical Transcriptionist programs.
  Lecture/Lab: 3 hours per week
  Prerequisite: BUSO 173

- **BUSO 175 Grammar Skill Building**
  3 Credits, Offered Each Semester
  BUSO 175 reviews and develops language skills by emphasizing the study of grammar usage, sentence structure, spelling, punctuation, and proofreading of business communications. This is a required course in the Administrative Assistant, Legal Administrative Assistant, Medical Administrative Assistant, Medical Transcriptionist, Medical Receptionist, and Receptionist/Office Specialist programs.
  Lecture/Lab: 3 hours per week
  Prerequisite: BUSO 173 or concurrent enrollment in BUSO 173
  Recommended Corequisite: CAPS 140

- **BUSO 176 Machine Transcription and Document Formatting**
  2 Credits, Offered Each Semester
  This course provides students with an introduction to document formatting, including formatting letters, memos, reports, and itineraries. Students prepare business documents by listening to recorded dictation and transcribing the dictation using word processing software. Development of good listening skills is stressed. Emphasis is placed on developing proofreading and editing skills to produce mailable documents. Application testing is completed under timed conditions. This is a required course in the Administrative Assistant, Legal Administrative Assistant, Medical Administrative Assistant, Medical Transcriptionist, Medical Receptionist, and Receptionist/Office Specialist programs.
  Lecture: 1 hour per week
  Prerequisite: BUSO 173 and BUSO 175 or concurrent enrollment in BUSO 173 and BUSO 175

- **BUSO 186 Receptionist/Office Specialist Internship**
  1 Credit, Offered Each Semester
  This course provides supervised training in office skills through on-the-job experience. It provides a practical application of office skills learned in the Receptionist/Office Specialist program. Students work in an office environment six hours per week for eight weeks. It is a required course in the Receptionist/Office Specialist program and is graded on a satisfactory/unsatisfactory basis. Instructor permission is required.
  On-the-job Activities: 6 hours per week for eight weeks
  Prerequisites: Prior completion of the first semester of the Receptionist/Office Specialist program.
  Corequisite: BUSO 115, 173, and 295

- **BUSO 194 Legal Issues in Health Care**
  1 Credit, Offered Fall Semester
  This course provides an overview of the laws and ethical issues relevant to medical careers. Topics include medical practice acts and boards, risk management, basic elements of contract law, professional liability and medical malpractice, privacy, confidentiality and privileged communication, medical records and informed consent, and workplace legalities. This is a required course in the Medical Administrative Assistant, Medical Billing Specialist, Medical Receptionist, and Medical Transcriptionist programs.
  Lecture/Lab: 1 hour per week
  Prerequisite: BUSO 109

**BUSO 205 Legal Terminology/Transcription I**

This course provides an introduction to the pronunciation and usage of legal terminology. It includes the transcription of recorded dictation using wordprocessing software. Dictation tapes reinforce the knowledge of legal terminology and procedures. Application testing is completed under timed conditions. BUSO 205 is a required course in the Legal Administrative Assistant and Paralegal programs.

Lecture/Lab: 3 hours per week  
Prerequisites: BUSO 176

**BUSO 206 Legal Terminology/Transcription II**

This course is a continuation of BUSO 205. Emphasis is placed on usage of legal terminology in legal documents, formatting legal documents, and transcribing documents from recorded dictation. This course reinforces knowledge of legal procedures. Application testing is completed under timed conditions. It is a required course for the Legal Administrative Assistant and Paralegal programs.

Lecture/Lab: 3 hours per week  
Prerequisite: BUSO 205

**BUSO 210 Advanced Medical Transcription**

This course builds on the foundation laid in the beginning medical transcription course and to bridge the gap between the typically easy-to-understand dictation in the beginning transcription course and the difficult, often indistinct dictation heard in the work environment of a medical transcriptionist. Emphasis is on proofreading and editing of medical reports, knowledge of abbreviations used in a variety of medical specialties, and speed and accuracy of transcription. Application testing is completed under timed conditions.

This is a required course for students in the Medical Administrative Assistant and Medical Transcriptionist programs.

Lecture/Lab: 4 hours per week  
Prerequisite: BUSO 110

**BUSO 257 Medical Coding**

This course is designed to help learners master the complexity of medical coding. Using the Current Procedural Terminology (CPT) and the International Classification of Diseases - Clinical Modification (ICD-9-CM) coding books, students will transform written descriptions of diseases, injuries, and procedures into numeric designations. This course provides an overview of all aspects of coding, including billing, reimbursement, audit, and appeals. Exercises will cover all medical specialties including dermatology, cardiology, primary care, and orthopedics, and addresses the common coding problems encountered in the real world. Skill emphasis is placed on knowledge of coding theories and practical coding applications.

This is a required course in the Medical Administrative Assistant and Medical Billing Specialist programs.

Lecture/Lab: 3 hours per week  
Prerequisite: Sophomore standing and BUSO 109

**BUSO 281 Medical Billing Specialist Internship I**

This course provides supervised training in medical accounts receivables/insurance billing through on-the-job experience in a medical facility. It provides practical application of medical accounts receivables/insurance billing as a part of the learning process and involves approximately 11 hours per week of on-site work. This is a required course in the Medical Billing Specialist program and is graded on a satisfactory/unsatisfactory basis. Instructor permission is required.

On-Site Work: 11 hours per week  
Prerequisites: Sophomore standing; prior completion of ACCT 110; BUSA 185; CAPS 135; BUSO 109, 115, 257; and ENGL 101; and prior completion or concurrent enrollment in ACCT 111; BUSO 156, 194; and ENGL 272

**BUSO 282 Medical Claims Billing Specialist Internship II**

The Medical Claims Billing Specialist Internship II is a continuation of BUSO 281. It is a required course in the Medical Billing Specialist program and is graded on a satisfactory/unsatisfactory basis. Instructor permission is required.

On-Site Work: 11 hours per week  
Prerequisite: BUSO 281

**BUSO 283 Medical Transcriptionist Internship I**

The Medical Transcriptionist Internship I provides supervised training in medical transcription skills through on-the-job experience in a medical facility. This course provides practical application of medical transcription as a part of the learning process. It involves approximately 9 hours per week of on-site work. This is a required course in the Medical Transcriptionist program and is graded on a satisfactory/unsatisfactory basis. Instructor permission is required.

On-Site Work: 9 hours per week  
Prerequisites: Sophomore standing and prior completion of BUSO 110, 115, 176, and ENGL 101; and prior completion or concurrent enrollment in BIOL 227; BUSO 174, 194, 210, 295; ENGL 272; and PHAR 151

**BUSO 284 Medical Transcriptionist Internship II**

The Medical Transcriptionist Internship II is a continuation of BUSO 283. It is a required course in the Medical Transcriptionist program and is graded on a satisfactory/unsatisfactory basis. Instructor permission is required.

On-Site Work: 9 hours per week  
Prerequisites: BUSO 283

**BUSO 287 Medical Receptionist Internship**

This course provides supervised training in medical receptionist skills through on-the-job experience in a medical-related office. It provides a practical application of medical receptionist skills as part of the learning process and involves approximately 9 hours per week of in-office work. This is a required course in the Medical Receptionist program and is graded on a satisfactory/unsatisfactory basis. Instructor permission is required.
In-Office Work: 9 hours per week
Prerequisites: Prior completion of BUSO 109, 173 and 175, and prior completion or concurrent enrollment in BUSO 110, 115, 156, 194, and 295

BUSO 288 Medical Administrative Assistant Internship
3 Credits Offered Each Semester
This course provides supervised training in administrative medical office skills through on-the-job experience in a medical-related office. It provides a practical application of administrative medical office skills as part of the learning process and involves approximately 9 hours per week of in-office work. This is a required course in the Medical Administrative Assistant program and is graded on a satisfactory/unsatisfactory basis. Instructor permission is required.
In-Office Work: 9 hours per week
Prerequisites: BUSO 110
Pre-Corequisites: BUSO 115 and 257
Corequisites: BUSO 295

BUSO 289 Administrative Assistant Internship I
3 Credits Offered Each Semester
This course provides supervised training in administrative skills through on-the-job experience in a business office. It provides practical application of administrative office skills as a part of the learning process and involves approximately 9 hours per week of in-office work. This is a required course in the Administrative Assistant program and is graded on a satisfactory/unsatisfactory basis. Instructor permission is required.
In-Office Work: 9 hours per week
Prerequisites: Sophomore standing, BUSO 176; ENGL 101
Corequisites: ACCT 110 or 201; BUSA 185; BUSO 115, 174, 295; and ENGL 272

BUSO 290 Administrative Assistant Internship II
3 Credits Offered Each Semester
BUSO 290 is a continuation of BUSO 289. It is a required course in the Administrative Assistant program and is graded on a satisfactory/unsatisfactory basis. Instructor permission is required.
In-Office Work: 9 hours per week
Prerequisites: BUSO 289

BUSO 291 Legal Administrative Assistant Internship I
3 Credits Offered Each Semester
This course provides supervised training in administrative skills through on-the-job experience in a legal-related office. It provides a practical application of legal administrative office skills as part of the learning process and involves approximately 9 hours per week of in-office work. This is a required course in the Legal Administrative Assistant program for the A.A.S. degree and advanced technical certificate and is graded on a satisfactory/unsatisfactory basis. Instructor permission is required.
In-Office Work: 9 hours per week
Prerequisites: Sophomore standing and prior completion of BUSO 176; ENGL 099 or 101; and prior completion or concurrent enrollment in ACCT 110 or 201; BUSA 185; BUSO 115, 174, or CAPS 180; BUSO 205, 295

BUSO 292 Legal Administrative Assistant Internship II
3 Credits Offered Each Semester
BUSO 292 is a continuation of BUSO 291. It is a required course in the Legal Administrative Assistant program and is graded on a satisfactory/unsatisfactory basis. Instructor permission is required.
In-Office Work: 9 hours per week
Prerequisites: BUSO 291

BUSO 295 Office Procedures
3 Credits Offered Each Semester
This course is designed to provide students with the information necessary to be successful in today’s rapidly changing office environment. In addition to providing students with opportunities to practice and use previously learned skills and abilities, topics include office technology; the global economy; increased diversity in the workplace; career planning and preparation; the importance of interpersonal, oral, and written communication skills; teamwork; critical thinking skills; ethical issues in the work environment; learning and applying effective telephone techniques; handling office callers; scheduling appointments, meetings and conferences; making travel arrangements; handling the office mail; and stress and time management. This is a required course in the Administrative Assistant, Legal Administrative Assistant, Medical Administrative Assistant, Medical Receptionist, Medical Transcriptionist, and Office Receptionist programs.
Lecture/Lab: 3 hours per week
Corequisites: BUSO 186, 281, 283, 284, 287, 288, 289 or 291

Carpentry

NOTE: Course enrollment requires prior acceptance into the Carpentry Program. Successful completion of each semester and/ or permission of the instructor is required for enrollment in the next semester.

CARP 151 Carpentry Theory I
4 Credits Offered Summer Session
This course covers the carpentry trade and its applications as a career. All aspects of construction safety, hand and power tools, and most types of building materials are discussed. In preparation for building a house as a class project, much emphasis is placed on construction-related math, blueprint reading, building codes, site preparation and foundation layout.

CARP 151L Carpentry Laboratory I
2 Credits Offered Summer Session
Students will spend time in a shop/lab setting working on projects that require the use of a variety of layout skills as well as hand and power tools (portable and stationary). In order to be successful in the field, students must learn to be proficient in the operation of such tools and fully understand the safety aspects. Students will also spend time on the job site laying out the project house that will be constructed during the Fall and Spring semesters.

CARP 152 Carpentry Theory II
8 Credits Offered Fall Semester
Students will spend time in the classroom and on-site learn-
ing techniques and methods of carpentry and building construction. The classroom curriculum will closely correspond with progress on the house project. Topics to be included are foundations, floor, wall, and roof framing. Emphasis will also be placed on teamwork, work ethics/habits, and job site safety.

CARP 152L  Carpentry Laboratory II
8 Credits  Offered Fall Semester

The primary focus of this course is on the house project. Emphasis will be on practicing and refining previously learned skills as the house construction progresses. The project allows students to experience a “real life” job situation. Special attention will be paid to safety, accuracy, speed, and production. Most work will be performed in small groups with all students having the opportunity to both lead and follow within their groups.

CARP 153  Carpentry Theory III
8 Credits  Offered Spring Semester

Topics covered in this course will coincide with the house project. Such areas as stair layout, roofing, drywall and interior/exterior finish will be the primary focus. As time permits, new materials and techniques, commercial construction applications and related construction areas may be examined. Safety aspects will be covered throughout.

CARP 153L  Carpentry Laboratory III
8 Credits  Offered Spring Semester

As the project house nears completion, students will focus on sharpening and refining those skills taught in previous courses as well as applying new concepts such as drywall, siding, and exterior/interior finish. As students prepare to find jobs in the carpentry field, much of the emphasis will be placed on work ethics, habits, and teamwork. Depending on the progress of the project house, other carpentry projects that benefit the NIC campus or the local community may be introduced.

CARP 251  Carpentry Management I
4 Credits  Offered Fall Semester

This course consists of weekly theory and field study. Students will obtain experience in planning and management of various construction projects that are part of the program's laboratory curriculum. Cost and materials estimating, advanced math concepts applied to construction projects, worksite issues/ethics, advanced communication skills, and construction scheduling and estimating are applied under supervision. In addition, advanced specialty construction skills will be addressed according to student's individual preferences. Weekly seminars will provide opportunities for students to share experiences, debrief, and obtain faculty assistance in applying theory concepts to field experience.

Prerequisite: Successful completion of the first year of the Carpentry program and instructor permission.

CARP 252  Carpentry Management II
4 Credits  Offered Spring Semester

This course provides students with opportunities to further their skills in advanced carpentry techniques and to advance their supervisory skills through on-site supervision of students in the first-year Carpentry program. Students will continue to meet weekly to share experiences, debrief, and obtain faculty assistance in applying theory concepts to field experience. During their supervised experience, students will be evaluated on their performance of program outcomes.

Prerequisite: Successful completion of the first year of the Carpentry program and instructor permission.

CHEM 100  Concepts of Chemistry I
4 Credits  Offered Each Semester

CHEM 100 is a non-mathematical course designed to acquaint students with the science of chemistry as it relates to modern technological society. It is designed for non-science majors who would like to learn about chemistry in the context of their everyday lives or find it useful in their intended careers. CHEM 100 fulfills a laboratory science course requirement for the A.S., and A.A. degrees.

Lecture: 3 hours per week
Corequisite Lab: CHEM 100L, 3 hours per week

Prerequisite: MATH 025 or COMPASS Algebra >40, ACT >18, or SAT >430

CHEM 101  Intro to Essentials of General Chemistry I
4 Credits  Offered Each Semester

CHEM 101 is a survey of the basic concepts of inorganic chemistry that includes quantitative concepts and development of problem-solving methods. It is designed for allied health majors. This course satisfies a laboratory science course requirement for the A.S., A.A., and A.A.S. degrees.

Lecture: 3 hours per week
Corequisite Lab: CHEM 101L (3 hours per week)

Prerequisite: MATH 025 or COMPASS Algebra >40, ACT >18, or SAT >430

CHEM 102  Intro to Essentials of General Chemistry II
4 Credits  Offered Each Semester

CHEM 102 is a continuation of CHEM 101 and surveys basic concepts of organic and biochemistry. It is designed for health science degrees and to satisfy general core requirements. CHEM 102 satisfies a laboratory science requirement for the A.S. and A.A. degrees.

Lecture: 3 hours per week
Corequisite Lab: CHEM 102L (3 hours per week)

Prerequisite: CHEM 101 or passing scores on an ACS examination held during the first week of the class meets and an assessment of laboratory skills equivalent to CHEM 101L.

CHEM 111  Principles of General College Chemistry I
4 Credits  Offered Each Semester

CHEM 111 is a study of matter and its interactions, including properties of matter, changes that it undergoes, and energy changes that accompany these processes. Emphasis is on concepts and problem solving; however many applications are examined. Students entering CHEM 111 are expected to have some chemistry background. This may be satisfied by completing at least one year of high school chemistry or CHEM 101. CHEM 111 satisfies a laboratory science requirement for the A.S., A.A., and A.A.S. degrees, and is a...
required course for many transfer degree programs in sciences and engineering.
Lecture: 4 hours per week
Corequisite Lab: CHEM 111L (3 hours per week)
Prerequisite: MATH 108 or COMPASS Algebra >45, ACT>19, or SAT>460.

CHEM 112  Principles of General College Chemistry II
4 Credits  Offered Each Semester
CHEM 112 is a continuation of a study of matter and its interactions, including properties of matter, changes that it undergoes, and energy changes that accompany these processes. Emphasis is on concepts and problem solving; however, many applications are examined. CHEM 112 satisfies a laboratory science course requirement for the A.S., A.A. and A.A.S. degrees and is a required course for many transfer degree programs in sciences and engineering.
Lecture: 4 hours per week
Corequisite Lab: CHEM 112L (3 hours per week)
Prerequisite: CHEM 111/111L.

CHEM 114  Qualitative Analysis
2 Credits  Offered Spring Semester
CHEM 114 investigates the chemistry of separation and identification of selected cations and anions and includes the theory of chemical equilibrium of acids, bases, buffers, complexes. CHEM 114 is designed to accompany CHEM 112 for students whose transfer programs require additional skills in chemistry.
Lecture: 1 hour per week
Corequisite Lab: CHEM 114L (3 hours per week)
Pre- or Corequisite: CHEM 112

CHEM 253  Quantitative Analysis
5 Credits  Offered On Demand
CHEM 253 is the first course in the study of analytical chemistry for scientists. Students who are majoring in the physical or life sciences may take this course as an introduction to the basic concepts of quantitative analysis.
Lecture: 3 hours per week
Corequisite Lab: CHEM 253L - Two 3-hour labs per week
Prerequisites: CHEM 112 with a grade of C or better

CHEM 277  Organic Chemistry I
3 Credits  Offered Fall Semester
CHEM 277 is the first course in a two-semester sequence of a comprehensive study of the principles and theories of organic chemistry emphasizing properties, synthesis structures, and reactions of organic compounds. CHEM 277 and 287 are required courses for transfer degree programs in chemistry, medicine, dentistry, pharmacy, some engineering programs, and related fields.
Lecture: 3 hours per week
Recommended: CHEM 278 (3 hours per week) is highly recommended, but not required.
Prerequisite: CHEM 112 with a grade of C- or better

CHEM 278  Organic Chemistry I Lab
1 Credit  Offered Fall Semester
CHEM 278 is the corresponding lab for CHEM 277. CHEM 278 is a study and development of organic chemistry laboratory techniques and their application to the preparation, isolation, characterization, and investigation of the properties or organic compounds. This course consists of three hours of lab per week.
Prerequisite: Prior completion or concurrent enrollment in CHEM 277

CHEM 287  Organic Chemistry II
3 Credits  Offered Spring Semester
CHEM 287 is a continuation of CHEM 277 and includes an introduction to biological molecules.
Lecture: 3 hours per week
Recommended: Concurrent enrollment in CHEM 288 (3 hours per week) is highly recommended, but not required.
Prerequisite: CHEM 277

CHEM 288  Organic Chemistry II Lab
1 Credits  Offered Spring Semester
CHEM 288 is the corresponding lab for CHEM 287. CHEM 288 presents further experience in the fundamental operations of organic chemistry laboratory work, and an introduction to chemistry literature. This course consists of three hours of lab per week.
Prerequisite: CHEM 278 and prior completion or concurrent enrollment in CHEM 278

CHD 110  Child Health and Safety
3 Credits  Offered Each Semester
This course introduces the student to essentials in creating a safe and healthy environment for young children, birth to age eight, both typically and atypically developing. Students will explore both the indoor and outdoor environment and learn how to promote health and nutrition in the classroom, prevent illnesses and reduce injuries, and create mentally healthy environments.
Lecture: 3 hours per week

CHD 115  Early Childhood Curriculum
3 Credits  Offered Each Semester
Students will examine the critical role of curriculum in meeting the physical, social, emotional, and cognitive needs of typically and atypically developing children from birth through age eight. Strategies for creating a child-centered approach to curriculum will be practiced including the use of space, materials, relationships, and routines. Students will gain experience in observing, assessing, and documenting children’s ideas and works. Self reflection and hands-on learning are vital components of this course. Some class sessions will be held at the NIC Children’s Center to facilitate this process. Prior completion or concurrent enrollment in CHD 134 is encouraged, but not required.
Lecture: 3 hours per week

CHD 134 provides an introductory overview of human development from conception through middle childhood. Physical, cognitive, and social-emotional development of typically and atypically developing children will be examined in the context of family and social issues. This is a required course for the Child Development program and is strongly recommended for Elementary Education majors.

Lecture: 3 hours per week

CHD 235 provides students with the skills necessary to observe, record, and interpret the behavior of young children.

Lecture: 2 hours lecture and 2 hours lab each week

Prerequisite: CHD 134

CHD 150 focuses on understanding and effectively guiding the behavior of young children, both typically and atypically developing. Included are skills for managing classroom situations, encouraging conflict resolution, effective use of praise, preventing problems, promoting self esteem, and setting individualized goals for young children in a classroom setting. It is a required course for the Child Development program and is strongly recommended for Elementary Education majors. Prior completion or concurrent enrollment in CHD 134 is encouraged, but not required.

Lecture: 3 hours per week

CHD 243 introduces students to the field of early childhood education. Developmentally appropriate practices for programs serving both typically and atypically developing children birth to age eight are examined. Topics include curriculum, play theory, literacy, behavior guidance, early care, education programs in the U.S. and internationally, primary grade education, and working with families.

Lecture: 3 hours per week

CHD 254 examines techniques for understanding and effectively guiding the behavior of young children, both typically and atypically developing. Included are skills for managing classroom situations, encouraging conflict resolution, effective use of praise, preventing problems, promoting self esteem, and setting individualized goals for young children in a classroom setting. It is a required course for the Child Development program and is strongly recommended for Elementary Education majors. Prior completion or concurrent enrollment in CHD 134 is encouraged, but not required.

Lecture: 3 hours per week

CHD 298A, B, C, D provide a supervised experience working with young children in the NIC Children’s Center and is the first of three practicum experiences for students in the associate of arts or associate of science Child Development program. Students gain practical experience planning, preparing, and implementing curriculum, practicing behavior guidance techniques, working with families, and discussing how to meet the individual needs of children with varying abilities. It is a required course for the Child Development program.

Lecture: 3 hours per week and 4 classroom hours per week

Prerequisite: CHD 134

CHD 298B offers continued experience working with young children in a supervised setting. Students may be placed in an approved off campus early childhood setting or continue practice at the NIC Children’s Center. Emphasis is on practicing skills in curriculum development, behavior guidance, and working with families of young children both typically and atypically developing.

Lecture/Lab: 6 hours per week

Prerequisite: CHD 134 and 298A

CHD 298C is the final experience working directly with young children in a supervised setting in the NIC Children’s Center or in an approved off campus setting. Students continue practicing skills in curriculum development, behavior guidance, assessment, and working with families of young children of varying abilities.

Lecture: 2 hours per week and lab 4 hours per week

Prerequisite: CHD 134 and 298B

CHD 298D is intended primarily for those students who have completed degree or certificate programs, but need ongoing college credit for professional development purposes. This may include those professionals seeking CDA Certificate renewal, Head Start staff, and community early childhood teachers who have already completed child development courses at NIC but need further skill and development in a particular domain. Topics of study and application will be individualized according to student and program need.

Lecture: 6 hours per week of supervised classroom time

CINA 126 Film and International Culture

This course presents films as artifacts of culture and history, examines foreign and North American films, and evaluates selected critical readings to promote meaningful comparative analysis. It focuses on becoming more critically aware of the rich and diverse forms of cinematic expression, developing an appreciation for our responses to visual imagery, and us-
gning basic concepts of film theory and cultural analysis to en-
rich our viewing experience. The concepts and methods in-
troduced have applications to careers in broadcasting, graphic
design, public relations, journalism, and corporate commu-
nications. This course is required for transfer into radio/televi-
sion programs. It satisfies an arts and humanities course
requirement for the A.S. and A.A. degrees.
Lecture: 3 hours per week

**COLLEGE SKILLS COURSES**

**CSC 010  Reading and Spelling Fundamentals**
3 Credits  Offered Each Semester

CSC 010 provides basic reading and spelling skills that in-
clude word attack, word structure, sentence sense, main idea
and spelling rules. This is an important skill-building course
that can influence college success, but does not fulfill degree
requirements. Enrollment is based on a COMPASS score be-
low 61.
Corequisite: ENGL 045 or ENGL 099

**CSC 013  Reading Comprehension and Vocabulary Development**
3 Credits  Offered Each Semester

CSC 013 is designed to enhance reading and vocabulary skills
with an emphasis on comprehension of expressed and im-
plied main ideas. The course also focuses on developing vo-
cabulary skills including contextual clues, synonyms, ant-
onyms, and affixes. Enrollment is based on a COMPASS score
of 61 – 80. This class does not fulfill degree requirements.

**CSC 043  Reading in Applied Technology**
1 Credit  Offered on Demand

This course is an open-entry, open-exit course designed to
improve reading skills for technical materials. This course em-
phasizes learning for critical and efficient reading, including
reading for information, following directions, critical read-
ing, checking information, drawing conclusions, vocabulary,
and understanding graphics in technical materials. Enrollment
is based on a COMPASS score between 61-80.

**CSC 100  College Transition**
1 Credit  Offered Each Semester

This course is designed to provide the student with a general
introduction and transition to the college experience. It will
assist students in developing a meaningful education plan in
accordance with their personal values, needs, and career goals.
Specifically, this class will orient students to the processes,
resources, and multiple services available at North Idaho
College.
Lecture: 1 hour per week

**CSC 104  College Reading**
2 Credits  Offered on Demand

CSC 104 is a college level reading class designed for the skilled
reader who would like to learn strategies for improving read-
ing comprehension, enhancing textbook reading skills, and
developing flexible reading rates. Reading techniques are ap-
plied to reading assignments in content areas such as sciences,
social sciences, and humanities. The course is taught using
lecture, computer aided instruction, and small group partici-
pation.
Lecture: 2 hours per week
Prerequisite: College level reading ability verified with appropriate
placement test scores

**CSC 105  College Study Skills**
2 Credits  Offered Each Semester

This course provides instruction and practical study tech-
niques essential for academic success. This course emphasizes
managing time, taking notes, reading textbooks efficiently,
and preparing for and taking exams.
Lecture: 2 hours per week

**CSC 106  College Internet Skills**
1 credit  Offered Each Semester

This course covers the basics of taking an interactive course
via the Internet. The student will learn how to use WebCt
Vista for Internet classes. This involves developing skills con-
erning the use of e-mail, online discussion boards, world
wide web access, equipment needs, and navigating an online
course. Additionally, the student will analyze the difference
between online and traditional courses to evaluate his or her
learning style in order to develop good academic skills to suc-
cceed in online classes. This class provides an excellent oppor-
tunity to learn how to navigate classes on WebCt before tak-
ing an Internet class.
Lecture: 16 hours

**CSC 107  College Educational Technology Skills**
1 credit  Offered Each Semester

This course is designed to introduce students to Dragon Natu-
rally Speaking Voice Recognition software and Kurzweil 3000
scan and read software. Following the introduction of both
programs, students will have the choice of focusing on the
one program that best meets their needs and interests.
Lecture: 16 hours

**COLLISION REPAIR TECHNOLOGY**

NOTE: Course enrollment requires prior acceptance into the
Collision Repair Technology Program. Successful completion
of each semester and/or permission of the instructor is required
for enrollment in the next semester.

**ACRR 151  Collision Repair Technology Theory I**
6 Credits  Offered Fall Semester

Collision Repair Technology Theory I offers classroom in-
struction in all phases of automobile refinishing. Course top-
ics include base coat and clear coat systems; cutting, heating
and gas metal arc welding; basic body panel repair; fiberglass;
and plastic parts repair. Health and safety rules are also taught.

**ACRR 151L  Collision Repair Technology Lab I**
5 Credits  Offered Fall Semester

This lab features hands-on shop experience in all phases of
auto refinishing, gas metal arc welding, basic body panel re-
pair techniques, fiberglass, and plastic parts repair. Mock-up
vehicles as well as actual customer work will be experienced.
Health and safety practices are promoted.

</thead>
<tbody>
<tr>
<td>COMM 101</td>
<td>Intro to Speech Communication</td>
<td>3</td>
<td>Each Semester</td>
</tr>
<tr>
<td></td>
<td>This course introduces students to what communication is and how it affects human interaction. Emphasis is on public speaking with attention to audience analysis and organizational and delivery skills. The controlled and supportive classroom environment is an ideal setting for students to practice and perfect those communication skills of effective speaking and critical listening valued in all professions, the community, and personal relations. It is, however, a complex discipline of reading, writing, research, and performance; therefore, course success relies strongly on college level reading and writing abilities. This course is a requirement for both the A.A. and A.S. degrees. Lecture: 3 hours per week</td>
<td></td>
<td></td>
</tr>
<tr>
<td>COMM 103</td>
<td>Oral Interpretation</td>
<td>3</td>
<td>Each Semester</td>
</tr>
<tr>
<td></td>
<td>Making literature come alive through effective reading and interpreting is the goal of this course. Students will learn to select, analyze, and perform literary pieces including stories, plays, poems, and famous orations. COMM 103 is a useful elective for elementary education, performing arts, literature, and communication majors, as well as for parents. Lecture: 3 hours per week</td>

</thead>
<tbody>
<tr>
<td>COMM 111</td>
<td>Interview Techniques</td>
<td>2</td>
<td>Each Semester</td>
</tr>
<tr>
<td></td>
<td>This course provides practical experience in the development of interviewing techniques for a variety of settings and career applications. The process is analyzed and practiced, including setting up, conducting, and assessing the interview. Students learn to design and carry out effective interviews through study and practice of the practical “do’s and don’ts” for several types of interviews. Skills gained are helpful to those pursuing careers in journalism, communications, law enforcement, psychology, oral history, and counseling. Use of an audio tape recorder is suggested. Lecture: 3 hours per week for 14 weeks</td>
<td></td>
<td></td>
</tr>
<tr>
<td>COMM 133</td>
<td>Improving Listening Skills</td>
<td>1</td>
<td>Either Semester</td>
</tr>
<tr>
<td></td>
<td>This course involves instruction in the skills necessary for effective listening. These skills apply to all aspects of life from the job to personal relationships. Listening is the most used (and least trained) of the four basic communication skills. Lecture: 3 hours per week for 5 weeks</td>
<td></td>
<td></td>
</tr>
<tr>
<td>COMM 134</td>
<td>Nonverbal Communication</td>
<td>2</td>
<td>Either Semester</td>
</tr>
<tr>
<td></td>
<td>This course is an introduction to the basic concepts in the study of body language, symbols, and various means of communicating without using spoken language. The study of nonverbal communication will help students better understand how people communicate in relationships at work and at home, and may create an awareness of the students’ own nonverbal communication style. Lecture: 2 hours per week Recommended: Strong college-level reading and writing skills</td>
<td></td>
<td></td>
</tr>
<tr>
<td>COMM 209</td>
<td>Argumentation</td>
<td>3</td>
<td>Either Semester</td>
</tr>
<tr>
<td></td>
<td>This course is an introduction to the principles and practices of argumentation as a form of communication. Analysis, reasoning, evidence, and refutation skills are stressed. It provides skills in reasoned argumentation and is useful for pre-law, business, and careers where logical analysis and structured reasoning is stressed. Lecture: 3 hours per week Recommended: COMM 101 and strong college-level reading and writing skills</td>
<td></td>
<td></td>
</tr>
<tr>
<td>COMM 220</td>
<td>Intro to Intercultural Communication</td>
<td>3</td>
<td>Each Semester</td>
</tr>
<tr>
<td></td>
<td>This course is concerned with cultural differences and their effects on communication. The course attempts to help students become more sensitive to the needs of people from other cultures with whom we interact. With more and more diversity in our country, and to create and maintain positive relationships with minimal hostility and friction, an understanding of how to communicate across cultures will prove to be a considerable asset. Communication competence with people of other cultures calls for a repertoire of communication skills rarely taught in any other college course. Lecture: 3 hours per week Prerequisites: COMM 101</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>
COMM 233  Interpersonal Communication
3 Credits  Offered Each Semester
This course is an introduction to the skills and concepts that impact how people deal on a one-to-one level within interpersonal relationships. Emphasis is on self-examination and understanding how “I communicate with others” and how that can be improved. This is an excellent course for developing skills necessary for everyday life and living where relationships must be developed and maintained.
Lecture: 3 hours per week

COMM 236  Small Group Communication
3 Credits  Offered Both Semester
This course is designed to present the fundamentals of small group communication in such a way that the student actually experiences the small group process and evaluates his/her own and other's behaviors for success. The course will combine theory and practical application.
Lecture: 3 hours per week

COMPUTER APPLICATIONS

CAPS 100  Introduction to Windows
1 Credit  Offered Each Semester
CAPS 100 provides an introduction to Windows fundamentals on IBM compatible computers. The course includes utilizing and controlling windows, Help, Write, Paintbrush, sharing data between applications with Clipboard, printing using Print Manager, and working with the Control Panel. This course is useful for anyone who wants to learn how to use Windows software. This is a required course in the Accounting Assistant program. The course is required for all Business and Office Technology programs.
Lecture/Lab: 3 hours per week for 8 weeks or 5 hours per week for 5 weeks
Recommended: Basic keyboarding

CAPS 103  Intermediate Windows
1 credit  Offered Upon Demand
This course will cover the Windows operating system utilizing MS Windows XP software on IBM compatible computers. It is a valuable resource for those who are looking to enhance their XP experience with tips and tricks included to add to the usefulness of their Windows XP knowledge. This course is intended to provide the student with the ability to become comfortable using the MS Windows operating system for personal and business reasons. A hands-on class using real-world personal and business functions, it is a valuable course for those who want to gain more extensive knowledge of the current Windows technology. Prior completion of other courses is not required.
Lecture: 8 hours
Lab: 16 hours

CAPS 108  Introduction to Computer Applications
2 Credits  Offered Fall Semester
CAPS 108 is a rich interactive learning experience designed to give students the basic tools and aptitudes they need to meet today’s technology challenges. This course explores how computers and their peripheral devices work and the capabilities of software to meet the needs of the user. Emphasis is placed on the use of computers to manage information for personal and professional uses. Software applications in word processing, spreadsheets, and databases are used during the semester. Lab assignments using software applications are a major portion of the course requirement. No prior computer experience is necessary.
Lecture/Lab: 3-4 hrs per week

CAPS 110  Computer Applications for Technical Programs
3 Credits  Offered Spring Semester
This course provides an introduction to DOS, Windows, and Microsoft Office application products. Basic to intermediate skills in operating systems, word processing, spreadsheet, database, presentation software and Internet browsers will be taught. Emphasis will be placed on current industry-recognized business applications. Students will become familiar with the basic operations and performance of personal computers. This is a required course for the HVAC Certificate, Drafting Technology, and Computer Information Technology A.A.S. degree programs.
Lecture/Lab: 3 hours per week for 8 weeks or 5 hours per week for 5 weeks

CAPS 120  Introduction to Word Processing
1 Credit  Offered Each Semester
CAPS 120 provides an introduction to word processing fundamentals using MS Word for Windows software on IBM compatible computers. A hands-on class with business-oriented examples, it includes creating, storing, retrieving, editing, and printing documents. This is a valuable course for those who want to learn how to use word processing software. This is a required course in the Accounting Assistant program. It does not fulfill the word processing requirement for the Business and Office Technology programs. However, this course does count as an elective for the other Business and Office Technology programs.
Lecture/Lab: 3 hours per week for 8 weeks or 5 hours per week for 5 weeks
Recommended: Some keyboarding proficiency.

CAPS 125  Intermediate Word Processing
1 Credit  Offered Each Semester
CAPS 125 is a continuation of CAPS 120. It utilizes Word for Windows software. The course provides additional word processing functions, including tables, charts, mail merge, and desktop publishing. This course does not fulfill the word processing requirement for Business and Office Technology programs, but does count as an elective for the Accounting Assistant program.
Lecture/Lab: 3 hours per week for 8 weeks or 5 hours per week for 5 weeks
Recommended: Previous word processing experience.

CAPS 130  Introduction to Spreadsheets
1 Credit  Offered Each Semester
This course is an introduction to spreadsheet fundamentals using MS Excel for Windows. It includes basic spreadsheet construction and layout, commands, files, graphics, and printing, and involves hands-on computer use. Some computer knowledge and basic math skills are recommended.
Lecture/Lab: 3-4 hrs per week
CAPS 135 Spreadsheets
3 Credits Offered Each Semester
CAPS 135 is a lecture/lab class that will meet four hours per week for a semester. Students will be expected to complete homework assignments and projects outside of class time. This course will cover spreadsheet capabilities from beginning through expert using MS Excel for Windows. It includes spreadsheet construction and layout, commands, graphics, printing, macros, database features, and analysis functions. This course is intended to provide students the ability to become certified as a Microsoft Office User Specialist in Excel at the expert level. Using real-world personal and professional projects, it is a valuable course for those who want to gain extensive spreadsheet software knowledge. This course is required for the Business and Office Technology and Accounting Assistant programs.
Lecture/Lab: 4 hrs per week
Pre-Requisite: MATH 025 or placement score for entry into MATH 108 and CAPS 100 or instructor permission.

CAPS 140 Introduction to Database Management
1 Credit Offered Upon Demand
CAPS 140 is an introduction to database management fundamentals. It involves hands-on computer experience using MS Access. The software version will be identified in the NIC class schedule. This course introduces students to computer management of database records and provides skills to design and manipulate a database; modify table structure; sort and edit records; design and modify queries, forms, and reports; and introduces database relationships. It is a required course for the Administrative Assistant, Medical Administrative Assistant, Medical Billing Specialist, Medical Receptionist, Medical Transcriptionist, Receptionist/Office Specialist, and Human Resources Assistant programs.
Lecture: 8 hours
Lab: 16 hours
Recommended prerequisite: CAPS 100.

CAPS 145 Intermediate Database Management
1 Credit Offered Upon Demand
CAPS 145 provides students with intermediate database management skills. It involves hands-on database management experience using MS-Access. Students will learn how to share Access database information with other MS-Office programs; import and export data; design advanced queries, reports, labels, charts, and forms; work with wizards and in-design view; and create Data Access Pages. This course may be taken as an elective by students in the Business and Office Technology programs or by others wanting to expand their database management skills.
Lecture: 8 hours
Lab: 16 hours
Prerequisite: CAPS 140 or permission of instructor.

CAPS 147 Advanced Database Management
1 Credit Offered Upon Demand
CAPS 147 provides students with advanced database management skills. It involves hands-on database management experience using MS-Access. Students will learn how to manage database objects, create macros, create modules and use Visual Basic for database management applications, work with wizards and in-design view, and create Data Access Pages. This course may be taken as an elective by students in the Business and Office Technology program or by others wishing to expand their database management skills.
Lecture: 8 hours
Lab: 16 hours
Recommended: CAPS 145 or instructor permission.

CAPS 150 Introduction to PowerPoint
1 Credit Offered Each Semester
CAPS 150 provides an introduction to presentation software fundamentals using PowerPoint on a Windows platform. A hands-on class that uses business-oriented examples, it includes planning, creating, storing, retrieving, editing, formatting, and viewing presentations. This is a valuable course for those that want to learn how to use presentation software. This course can be an elective for the Business and Office Technology programs.
Lecture/Lab: 3 hours per week for 8 weeks or 5 hours per week for 5 weeks
Recommended: Some keyboarding proficiency

CAPS 160 Introduction to Desktop Publishing
1 credit Offered Upon Demand
CAPS 160 provides an introduction to desktop publishing fundamentals using Microsoft Publisher for Windows software on IBM compatible computers. A hands-on class, it includes creating, storing, retrieving, editing, and printing business publications.
Lecture: 8 hours
Lab: 16 hours
Recommended: CAPS 100 and some keyboarding proficiency.

CAPS 165 Intermediate Desktop Publishing
1 credit Offered Upon Demand
CAPS 165 is a continuation of CAPS 160. This class will take an intermediate look at desktop publishing using Microsoft Publisher for IBM compatible computers. This course is hands-on and will further explore desktop publishing techniques and terminology. This is a valuable course for those who will create in-house publications.
Lecture: 8 hours
Lab: 16 hours
Prerequisite: CAPS 160 or permission of instructor.

CAPS 170 Introduction to the Internet
1 credit Offered Upon Demand
This course will cover the Internet utilizing MS Internet Explorer software on IBM compatible computers. It includes information about the Internet, the World Wide Web, connecting to and researching on the Internet, using e-mail, exploring blogs, exploring copyright issues concerning publishing to and using information from the Internet, privacy and security concerns, and creating a web page. This course is intended to provide the student with the ability to become comfortable with using the Internet for personal and business reasons. This is a hands-on class using real-world personal and business websites and is a valuable course for those who wish to gain a beginning and more extensive knowledge of current Internet technology. Prior completion of other courses is not required.
Lecture: 8 hours
Lab: 16 hours
CAPS 173  Introduction to the Internet for Seniors  
1 credit  
Offered Upon Demand  
This course will cover the Internet utilizing MS Internet Explorer software on IBM compatible computers. It includes information about the Internet, the World Wide Web, connecting to and researching on the Internet, using e-mail, exploring blogs, exploring copywrite issues concerning publishing to and using information from the Internet, and privacy and security concerns. This course is intended to provide the student with the ability to become comfortable with using the Internet for personal and business reasons. This is a hands-on class using real world personal and business websites and is a valuable course for those who want to gain a beginning and more extensive knowledge of current Internet technology. Prior completion of other courses is not required.  
Lecture: 8 hours  
Lab: 16 hours  

CAPS 175  Introduction to the Computer for Seniors  
1 credit  
Offered Upon Demand  
CAPS 175 will cover understanding and using the computer for word processing and spreadsheets. Using MS Windows operating system, this class will include an understanding of Windows and file management, using text and graphics in Word, and understanding and using basic formulas and functions in Excel. A hands-on class using real world applications and uses, it is a valuable course for those who want to gain a beginning knowledge of technology. Prior completion of other courses is not required.  
Lecture: 8 hours  
Lab: 16 hours  

CAPS 180  Microsoft Office Integration  
3 Credits  
Offered Spring Semester  
CAPS 180 is a lecture/lab class which meets four hours per week for a semester. Students will be expected to complete homework assignments and projects outside of class time. This course will cover the Microsoft Office products including Word, Excel, PowerPoint, Access, and Outlook. Using real-world personal and professional situations, CAPS 180 shows how various Microsoft Office software components work together. This course is intended to provide information for students to become certified through the Microsoft Office User Specialist Program. It is ideal for individuals who want to use the entire Microsoft Office suite effectively and efficiently. This course is required for Business and Office Technology programs.  
Lecture/Lab: 4 hrs per week  
Prerequisite: BUSO 173 and CAPS 135  

CAPS 190  Introduction to Quicken  
1 credit  
Offered Upon Demand  
CAPS 190 provides an introduction to personal finance using Quicken Basic software on IBM compatible computers. A hands-on class, it includes creating accounts to track cash, income and expenses, and creating and printing financial reports. This is a valuable course for those who want to learn a basic accounting software. No prior courses are required.  
Lecture: 8 hours  

CAPS 195  Personal Digital Assistant (PDA)/Handheld Computer Basics  
1 credit  
Offered Upon Demand  
This course provides instruction in the basic uses and applications of the handheld computer using a Palm operating system. The course will help students achieve the most from a Palm handheld device including recording and looking up contacts and appointments, discovering new software, and going online. Learn how to protect data with better security. No matter which Palm handheld model you eventually own or use, maximize its potential, including working on documents, updating databases, and managing schedules while on the go. Palm devices will be provided for classroom use.  
Lecture: 8 hours  
Lab: 16 hours  

CITE 110  Introduction to PC Operating Systems  
3 Credits  
Offered Fall Semester  
This is an introductory level class in personal computer operating systems and graphic user interfaces. The course discusses basic concepts of how operating systems work and how applications interact with operating systems. Emphasis will be placed on system functions and commands so that students will be able to effectively create and manage files, run programs, and use system devices. MS Windows and MS-DOS are utilized to illustrate these concepts. This is a required course in the Computer Information Technology certificate program.  
Lecture/Lab: 4 hours per week  

CITE 112  Introduction to PC Hardware  
3 Credits  
Offered Fall Semester  
This introductory course is about setting up and working with microcomputer hardware. The course includes hands-on experience in component installation and upgrading. Troubleshooting techniques will be emphasized including debugging system problems. Peripheral devices will be discussed from a compatibility and capability standpoint. Students will install and work with diagnostic software used for troubleshooting microcomputer hardware. This is a required course in the Computer Information Technology certificate program.  
Lecture/Lab: 4 hours per week  

CITE 130  Introduction to Internet Technologies  
3 Credits  
This course prepares students to take the CIW Foundations ID0-410 exam. This Prosoft curriculum teaches the fundamental knowledge and skills required to work in an Internet technology-enabled environment. Students learn how to use key Internet technologies, such as Web browsers, e-mail, newsgroups, File Transfer Protocol (FTP), Telnet, and search engines. Students gain experience developing Web pages in a text editor and a graphical user interface (GUI) editor. Students also learn how to use Cascading Style Sheets (CSS) and Extensible Hypertext Markup Language (XHTML),
deploy and support Windows® XP Professional in a variety of stand-alone and network operating system environments. It provides in-depth, hands-on training for Information Technology (IT) professionals responsible for the planning, implementation, management and support of Windows XP Professional.

Lecture/Lab: 8 hours per week for 8 weeks

**CITE 165 Linux System Administration**

3 Credits  
Offered Fall Semester

This course is for anyone interested in gaining a greater understanding of Linux. It contains essential information for anyone responsible for providing basic installation, operation, and troubleshooting services on Linux workstations and servers. This course will also appeal to Microsoft professionals seeking to gain Linux expertise.

Lecture/Lab: 8 hours per week for 8 weeks
Prerequisite: Proficiency in one or more non-Linux operating systems.

**CITE 166 New and Emerging Technologies**

1 credit  
Offered Each Semester

This course introduces new and emerging technologies in the Information Technology industry. These could include: desktop and network operating systems; network services; and hardware. The purpose of this course is to introduce the learning to these new and emerging technologies with an emphasis on design, installation and support.

Lecture/Lab: 16 hours

**CITE 167 Scripting for Network Administration**

1 credit  
Offered Each Semester

This course provides students with the knowledge and fundamental experience to develop their own administrative scripts with Microsoft Visual Basic Scripting Edition and Microsoft Visual Basic Scripting Edition and Microsoft Windows Script Host. This course focuses on writing scripts for commonly encountered administrative tasks.

Lecture/Lab: 16 hours

**CITE 170 Systems Analysis and Design Methods**

3 Credits

This course provides an overview of the field of systems analysis, basic systems design tools, and the procedures for conducting a systems analysis. It will cover the life cycle of systems development; project management tools and techniques; processes of interface with users, documentation, database interface; and productivity tools. Included is an overview of object-oriented design and CASE. Students will be expected to use a graphical-based high-level tool that supports the system development life cycle. This is a required course in the Computer Information Technology certificate program.

Lecture: 3 hours per week
Prerequisite: CITE 150 or equivalent knowledge and skills.

**CITE 171 Internetworking**

4 Credits  
Offered Spring Semester

This course teaches skills to prepare participants for configuration of networks using Cisco routers and switches. Participants learn network topologies, the OSI model, cabling (pulling, terminating, punching down, testing, standards), IP addressing, subnetting, ARP/RARP, routing protocols, network...
media, LAN design, network management, and electrical and safety considerations. Lab work is designed to simulate real-world internetworking. This is the first of four courses leading to the Cisco Certified Network Associate (CCNA certification). This course is part of the Cisco Network Academy Program and introduces students to the networking field.

Lecture/Lab: 8 hours per week for 8 weeks
Prerequisites: A+ certification or equivalent knowledge and skills. Network+ certification or equivalent knowledge and skills.

CITE 172 Internetworking 2
3 Credits
Offered Spring Semester

This course is titled “Internetworking 2: Introduction to Cisco Router Configuration” and begins with an overview of LAN’s covered in Internetworking 1 and continues to Wide Area Networks (WAN). Topics include Network layer, Cisco IOS (Internetwork Operating System), software user interface, display router configuration information, router startup and setup configuration, router configuration, sources for Cisco IOS software, TCP/IP, configuring router interfaces with IP addresses, router configuration and routing protocols (RIP and IGRP), and access lists. This is the second of four courses leading to the Cisco Certified Network Associate (CCNA certification). This course is part of the Cisco Network Academy Program.

Lecture/Lab: 8 hours per week for 8 weeks
Prerequisite: CITE 171

CITE 204A Managing and Maintaining a Microsoft Windows Server 2003
3 Credits
Offered Fall Semester

This course provides students with the knowledge and skills that are required to manage accounts and resources, maintain server resources, monitor server performance, and safeguard data in a Microsoft Windows Server TM 2003 environment. This is the first course in the Systems Administrator and Systems Engineer tracks for Windows Server 2003 and serves as the entry point for other courses in the Windows 2003 curriculum. (Microsoft course 2273).

Lecture/Lab: 8 hours per week for 8 weeks
Prerequisites: A+ certification or equivalent knowledge and skills. Network+ certification or equivalent knowledge and skills.

CITE 204B Fundamentals of Wireless LANs
3 Credits
Offered Spring Semester

This course is an introduction of Wireless LANs, focusing on the design, planning, implementation, operation and troubleshooting of Wireless LANs and bridging. It will cover a comprehensive overview of technologies, security and design best practices with particular emphasis on hands on skills in the following areas: Wireless LAN setup and troubleshooting, 802.11a and 802.11b technologies, products and solutions, Site Surveys, Resilient WLAN design, installation and configuration, WLAN Security, vendor interoperability strategies. The Fundamentals of Wireless LANs will map against the Cisco Wireless LAN Support Specialist designation.

Prerequisites: CITE 270 and CITE 272, or a valid CCNA certification, or equivalent knowledge and skills.

Lecture/Lab: 4 hours per week for 16 weeks

CITE 210 Advanced PC Operating Systems
4 Credits

This in-depth course covers the latest generation of operating systems for microcomputers. General operating system commands and utilities will be introduced as well as advanced concepts such as system configuration, formatting and partitioning the hard disk, directory structures, and system administration. MS Windows registry files and policy editor are utilized to illustrate these concepts. This is a required course for the PC/User Support option in the Computer Information Technology A.A.S. degree program.

Lecture/Lab: 5 hours per week

CITE 212 Advanced PC Hardware
4 Credits

This course is an advanced look at personal computer hardware covering various interface architectures and communication protocols. Concepts in logic, troubleshooting, and component replacement procedures are taught to prepare students for entry-level computer repair employment. Installation and preventive maintenance procedures for input and output devices. This is a required course in the PC/User Support Technician option of the Computer Information Technology A.A.S. degree program.

Lecture/Lab: 5 hours per week
Prerequisite: CITE 112

CITE 216 Fundamentals of Networking for PC/User Support
4 Credits

This course focuses on the installation of PC related network software and the prevention, diagnosis, and resolution of hardware and software related networking problems. It provides students with the knowledge and skills needed to install and configure servers on a local area network (LAN) and to provide quality network support. These skills include installation, configuration, customization, optimization, network integration, administration and security, troubleshooting, messaging, and other support issues. This course also emphasizes problem-solving and communication skills. Using creative hands-on exercises and case projects, students apply their knowledge and develop ideas and skills, both individually and in teams, to help prepare them for today's team-oriented work environment. This is a required course in the PC/User Support Technician option of the Computer Information Technology A.A.S. degree program.

Lecture/Lab: 5 hours per week
Prerequisite: CITE 210

CITE 218 Customer Support
3 Credits

This course is designed to demonstrate how customer support can provide guidance and assistance in consulting and troubleshooting roles. Training techniques are based on current hardware and software products. Understanding the customer’s business environment and troubleshooting and resolving PC/User problems are stressed. This is a required course in the PC/User Support Technician option of the CITE A.A.S. degree program.

Lecture/Lab: 4 hours per week
CITE 220  PC/User Support Project Lab  
4 Credits  
Students will be given a series of supervised projects that will enable them to demonstrate PC repair skills. The projects will progressively increase in difficulty to simulate real-work situations. Tasks will include PC peripherals, network connectivity and troubleshooting PC-related problems, and disaster recovery. The study of PC-related concepts from current literature and periodicals to keep up with the changes in this fast-paced field is included. The course will familiarize the student with research methods and sources for ongoing self-study. This is a required course in the PC/User Support Technician option of the Computer Information Technology A.A.S. degree program.  
Lecture/Lab: 5 hours per week

CITE 224 PC Software Installation/Configuration  
4 Credits  
This course offers an in-depth study of software use, and performance capabilities in relation to hardware, software design, and the operating system. Operating system add-ons and virus protection is also covered. Typical utility packages will be examined and demonstrated, including diagnostic utilities, desktop organizers, maintenance software, and backup and recovery software. Support techniques for word processing, spreadsheets, database, and presentation suites will also be examined. This is a required course in the PC/User Support Technician option of the Computer Information Technology A.A.S. degree program.  
Lecture/Lab: 5 hours per week

CITE 232  Introduction to Web Page Design  
3 Credits  
This hands-on course is designed to cover the basic concepts of designing for the World Wide Web and provides experience for students in organizing, linking, and implementing websites. Topics covered include text formatting, color control, images and image mapping, use of digital cameras and graphics scanner, hyperlinks, tables, and frames. This course covers the essential elements needed for fundamental web page production. This is a required course in the Internet Support Technician option of the CITE A.A.S. degree program.  
Lecture/Lab: 4 hours per week  
Prerequisite: CITE 130 and acceptance into the Internet Support Technician option  
Corequisites: CITE 234, 236, and 238

CITE 234  Web Design Methodology & Technology  
4 Credits  
This course prepares students to take the CIW Site Designer 1D0-420 exam. This Prosoft curriculum teaches how to design and publish Web sites. Students will work with popular production tools such as Microsoft FrontPage and Macromedia Dreamweaver, Flash, and Fireworks. Students study design technologies such as Java applets, plug-ins and multimedia while exploring the extensibility of design tools, incompatibility issues surrounding these tools, and the functionality of current Web browsers. Students will learn to manage the Web site production process through hands-on development and the perspective of Web site users. Students will take the role of Web designer and project manager, and work through the development process bringing mission-critical business information to the Internet and intranet environments. Information about technology certification is available at www.ciwcertified.com. This is a required course in the Internet Support Technician option of the Computer Information Technology A.A.S. degree program.  
Lecture/Lab: 4 hours per week  
Prerequisites: CITE 130

CITE 236  Web Based Applications  
3 Credits  
This course presents popular Internet application software including web page editors, converters, utilities, browsers, and search engines. Students will continually investigate the latest trends in the Internet industry, plus utilize and evaluate software applications. This is a required course in the Internet Support Technician option of the Computer Information Technology A.A.S. degree program.  
Lecture/Lab: 4 hours per week  
Prerequisite: CITE 130  
Corequisites: CITE 232, 234, and 238

CITE 238  Designing for Web Market I  
3 Credits  
This course introduces students to the principles of layout and design as it applies to visual communication. Students are introduced to computer graphics programs and are taught to utilize basic design elements to prepare comprehensive layouts. Through a variety of problem-solving approaches, students are instructed to create layouts that are polished in concept, execution, typography, and composition. This is a required course in the Internet Support Technician option of the Computer Information Technology A.A.S. degree program.  
Lecture/Lab: 4 hours per week  
Prerequisite: CITE 130  
Corequisites: CITE 232, 234, 236

CITE 242  Advanced Web Page Design  
3 Credits  
This course prepares students to take the CIW E-Commerce Designer 1D0-425 exam. This Prosoft curriculum teaches e-commerce strategies and practices. Students learn how to conduct business online and how to manage the technological issues associated with constructing an electronic-commerce Web site. Students will implement a genuine transaction-enabled business-to-consumer Web site, examine strategies and products for building electronic-commerce sites, examine how sites are managed, and explore how they complement an existing business infrastructure. Students get hands-on experience implementing the technology to engage various parties in electronic transactions. Information about technology certification is available at www.ciwcertified.com. This is a required course in the Internet Support Technician option of the Computer Information Technology A.A.S. degree program.  
Lecture/Lab: 4 hours per week  
Prerequisite: CITE 130

CITE 244  Visual Basic  
3 Credits  
This course focuses on the fundamental principles of programming, presenting the unique visual and object-oriented
features of Visual BASIC for Windows as a tool for learning to program. The course is designed for students to become proficient in Visual BASIC and the principles of good program design. Students write and demonstrate simple structured programs with well-developed user interfaces. Programming assignments will include procedural techniques and event-driven processing. This is a required course in the Internet Support Technician option of the CITE A.A.S. degree program.

Lecture/Lab: 4 hours per week

CITE 246 Web Languages
4 Credits
This course prepares students to take the CIW JavaScript Fundamentals ID0-435 exam and the CIW Perl Fundamentals ID0-437 exam. This Prosoft curriculum teaches the features of JavaScript language to design client-side, platform-independent solutions. Students learn how to write JavaScript programs and use its most popular applications. In addition, this course teaches students how to utilize the Perl programming language, the Perl syntax, the basics of using regular expression, how to use Perl data types, and how to access and manipulate files. Information about technology certification is available at www.ciwcertified.com. This is a required course in the Internet Support Technician option of the Computer Information Technology A.A.S. degree program.

Lecture/Lab: 5 hours per week
Prerequisite: CITE 130

CITE 248 Designing for Web Market II
3 Credits
This course is structured to give students additional hands-on experience in developing proficiency with graphic design tools used in the Web market. Emphasis is placed on design as it applies to the creation of Web pages. This course is valuable in building visual literacy, expanding conceptual and artistic-technical skills, plus improving creative problem solving. This is a course in the Internet Support Technician option of the CITE A.A.S. degree program and will be offered upon sufficient demand.

Lecture/Lab: 4 hours per week
Prerequisite: CITE 130, 232, 234, 236
Corequisites: CITE 242, 244

CITE 251 Managing a Microsoft Windows Server 2003 Environment
3 Credits
Offered Spring Semester
This course provides students with the knowledge and skills to manage accounts and resources in a Microsoft Windows Server™ 2003 environment. The course is intended for systems administrator and systems engineer candidates who are responsible for managing accounts and resources. These tasks include managing user, computer, and group accounts; managing access to network resources; managing printers; managing an organizational unit in a network based on Active Directory® director service; and implementing Group Policy to manage users and computers.

This is the first course in the Systems Administrator and Systems Engineer tracks for Windows Server 2003 and serves as the entry point for other courses in the Windows Server™ 2003 curriculum. (Microsoft course 2274).

Lecture/Lab: 8 hours per week for 8 weeks

Prerequisite: A+ certification, or equivalent knowledge and skills. Network+ certification, or equivalent knowledge and skills.

CITE 253 Maintaining a Microsoft Windows Server 2003 Environment
3 Credits
Offered Fall Semester
This course provides students with the knowledge and skills that are needed to effectively maintain server resources, monitor server performance, and safeguard data on a computer running one of the operating systems in the Microsoft Windows Server™ 2003 family. (Microsoft course 2275).

Lecture/Lab: 16 hours per week for approximately 3 weeks
Prerequisite: CITE 251 or equivalent knowledge and skills.

CITE 255 Implementing a Microsoft Windows Server 2003 Network Infrastructure
3 Credits
Offered Fall Semester
The goal of this course is to provide students with the skills and knowledge necessary to configure a Windows-based computer to operate in a Microsoft Windows Server 2003™ networking infrastructure. (Microsoft course 2276).

Lecture/Lab: 16 hours per week for 3 weeks
Prerequisite: A+ certification or equivalent knowledge and skills. Network+ certification or equivalent knowledge and skills. CITE 253 or equivalent knowledge and skills.

CITE 257 Implementing, Managing, and Maintaining a Microsoft Windows Server 2003 Network Infrastructure
3 Credits
Offered Fall Semester
This course prepares students with the knowledge and skills to implement, manage, and maintain a Microsoft Windows Server™ 2003 network infrastructure. The course is intended for systems administrator and systems engineer candidates who are responsible for implementing, managing, and maintaining server networking technologies. These tasks include implementing routing; implementing, managing, and maintaining Dynamic Host Configuration Protocol (DHCP), Domain Name System (DNS), and Windows Internet Name Service (WINS); securing Internet Protocol (IP) traffic with Internet Protocol security (IPSec) and certificates; implementing a network access infrastructure by configuring the connections for remote access clients; and managing and monitoring network access. (Microsoft course 2277).

Lecture/Lab: 8 hours per week for 8 weeks
Prerequisite: CITE 255 or equivalent knowledge and skills.

CITE 263 Deploying and Managing Microsoft ISA Server with Projects
4 Credits
Offered Spring Semester
The goal of this course is to provide students with the knowledge and skills to deploy and manage Microsoft Internet Security and Acceleration (ISA) Server 2004 as part of a larger security infrastructure. The course introduces security concepts unique to ISA Server 2004 and provides best practices for their implementation. This course includes information on both the Standard Edition and Enterprise Edition of ISA Server 2004. (Microsoft 2824 with supplemental projects.)

Lecture/Lab: 8 hours per week for 8 weeks
Prerequisites: CITE 255 and CITE 257, or equivalent knowledge and skills.
This course introduces advanced new and emerging technologies in the Information Technology industry. These could include advanced desktop and network operating systems, advanced network services, and advanced hardware. The purpose of this course is to introduce students to these advanced new and emerging technologies with an emphasis on design, installation, and support.

Prerequisite: CITE 153 or equivalent knowledge and experience

This course focuses on the basics of the UNIX operating system. The course prepares Internetworking Support Technician students to perform basic, entry-level UNIX operator skills. After completing this course, graduates will be able to use UNIX operating system commands, as well as basic Sun Microsystems Solaris operating environment commands, with an introduction to the Common Desktop Environment (CDE), including Standard Desktop Tools, Text Editor, printing, and mail. Students will also learn fundamental command-line features of the Solaris environment including file system navigation, file permissions, the vi text editor, command shells, and basic networking use. This is a required course in the Internetworking Support Technician option of the Computer Information Technology A.A.S. degree program.

Prerequisite: CITE 130, 150, 170
Corequisites: CITE 171, 272

This course "Advanced Cisco Routing and Switching" provides students with the knowledge and skills to configure advanced routing protocols, LAN switching, and internetwork access methods. Students will be able to troubleshoot configurations using Cisco bridges, routers, and switches. This is the third of four courses leading to the Cisco Certified Network Associate (CCNA) certification. This course is part of the Cisco Network Academy Program.

Prerequisite: CITE 171, 172
Corequisites: CITE 281, 282

This course gives an overview of the subject of voice over IP and IP telephony. Students will learn how voice and data communications merge in the voice over IP (VoIP) technology. It will cover basic operation, issues that need to be considered when deploying voice over IP, and how these may be dealt with. It provides a foundation for understanding the protocols in use in VoIP networks.

Prerequisites: CITE 281 and CITE 282 or CCNA certification

This course introduces advanced new and emerging technologies with particular emphasis on hands-on skills in the following areas: Wireless LAN setup and troubleshooting, 802.11a and 802.11b technologies, products and solutions, Site Surveys, Resilient WLAN design, installation and configuration, WLAN Security, and vendor interoperability strategies. The Fundamentals of Wireless LANs will map against the Cisco Wireless LAN Support Specialist designation.

Lecture/Lab: 4 hours per week for 16 weeks
Prerequisites: CITE 171 and CITE 172, or a valid CCNA certification, or equivalent knowledge and skills.

This course is an introduction of Wireless LANs, focusing on the design, planning, implementation, operation, and troubleshooting of Wireless LANs and bridging. It covers a comprehensive overview of technologies, security, and design best practices with particular emphasis on hands-on skills in the following areas: Wireless LAN setup and troubleshooting, 802.11a and 802.11b technologies, products and solutions, Site Surveys, Resilient WLAN design, installation and configuration, WLAN Security, and vendor interoperability strategies. The Fundamentals of Wireless LANs will map against the Cisco Wireless LAN Support Specialist designation.

Lecture/Lab: 16 hours per week for 16 weeks
Prerequisites: CITE 171 and CITE 172, or a valid CCNA certification, or equivalent knowledge and skills.

This course provides students with the knowledge and skills to perform routine administration tasks in a Novell or Microsoft based network. The course covers creating user accounts, printing services, and security issues.

Prerequisites: CITE 170, 172, 274
Corequisites: CITE 281, 282

The Fundamentals of Network Security course is designed for students interested in securing the network infrastructure. It focuses on the overall security process based on a security policy with the particular emphasis on hands-on skills in the area of secure perimeter, secure connectivity security management, identity services, and intrusion detection.

Lecture/Lab: 16 hours per week for 5 weeks
Prerequisites: CITE 281 and CITE 282 or CCNA certification

This course introduces advanced new and emerging technologies with particular emphasis on hands-on skills in the following areas: Wireless LAN setup and troubleshooting, 802.11a and 802.11b technologies, products and solutions, Site Surveys, Resilient WLAN design, installation and configuration, WLAN Security, and vendor interoperability strategies. The Fundamentals of Wireless LANs will map against the Cisco Wireless LAN Support Specialist designation.

Lecture/Lab: 4 hours per week for 16 weeks
Prerequisites: CITE 171 and CITE 172, or a valid CCNA certification, or equivalent knowledge and skills.

This course gives an overview of the subject of voice over IP and IP telephony. Students will learn how voice and data communications merge in the voice over IP (VoIP) technology. It will cover basic operation, issues that need to be considered when deploying voice over IP, and how these may be dealt with. It provides a foundation for understanding the protocols in use in VoIP networks.

Prerequisites: CITE 281 and CITE 282 or CCNA certification

This course introduces advanced new and emerging technologies with particular emphasis on hands-on skills in the following areas: Wireless LAN setup and troubleshooting, 802.11a and 802.11b technologies, products and solutions, Site Surveys, Resilient WLAN design, installation and configuration, WLAN Security, and vendor interoperability strategies. The Fundamentals of Wireless LANs will map against the Cisco Wireless LAN Support Specialist designation.

Lecture/Lab: 4 hours per week for 16 weeks
Prerequisites: CITE 171 and CITE 172, or a valid CCNA certification, or equivalent knowledge and skills.

This course is an introduction of Wireless LANs, focusing on the design, planning, implementation, operation, and troubleshooting of Wireless LANs and bridging. It covers a comprehensive overview of technologies, security, and design best practices with particular emphasis on hands-on skills in the following areas: Wireless LAN setup and troubleshooting, 802.11a and 802.11b technologies, products and solutions, Site Surveys, Resilient WLAN design, installation and configuration, WLAN Security, and vendor interoperability strategies. The Fundamentals of Wireless LANs will map against the Cisco Wireless LAN Support Specialist designation.

Lecture/Lab: 4 hours per week for 16 weeks
Prerequisites: CITE 171 and CITE 172, or a valid CCNA certification, or equivalent knowledge and skills.
job work experience doing projects that would normally be assigned to the employer's entry-level support staff. During this supervised experience, students will be evaluated on their performance of course competencies. Students are responsible for finding an appropriate internship site and permission of the instructor is required. This is an elective course in the Computer Information Technology A.A.S. degree option. This course includes 135 hours of on-site work experience and 15 hours of directed study/lecture in occupational relations for 4 credits. This course may be used to substitute for ATEC 120 (you must enroll for 3 credits and the 15 hours of directed study will be waived).

Prerequisite: Sophomore standing in the CITE program

CS 100  Intro to Computers & Computer Science  
3 Credits  
Offered Each Semester  

CS 100 is an introduction to computers and computer science for non-computer science majors. Prior experience with computers, such as using a graphical user interface and a word processor, is recommended. Students with no prior experience will be expected to attend out-of-class labs to learn the basics of a computer. Topics include an historical perspective, evolving hardware and software, using the Internet, creating web pages, social implications, and using a modern programming language. Problem solving and algorithm development are important themes of the class. The course involves substantial use of microcomputers outside of class and the possible use of minicomputers and alternative operating systems.

Lecture: 3 hours per week  
Prerequisites: MATH 025 or COMPASS Algebra > 40, ACT > 18, or SAT > 430  

CS 125  Intro to Programming Using Visual Basic  
3 Credits  
Offered Either Semester on Demand  

This course provides an introduction to programming using Visual Basic and Visual Basic Script. No prior programming experience is expected. The course is appropriate for any student interested in learning how to create applications for Windows or the World Wide Web. It provides an introduction to creating graphical user interfaces for Windows, Pocket PC, and WWW applications. The course focuses on algorithm design and implementation for event driven operating systems such as Windows. Object oriented programming and the syntax of Visual Basic are core topics. In addition, students will apply their knowledge to create interactive web pages and Visual Basic's database capabilities will be introduced.

Lecture: 3 hours per week  
Prerequisites: MATH 108 or COMPASS Algebra > 45, ACT > 19, or SAT > 460  

CS 150  Computer Science I  
4 Credits  
Offered Each Semester  

CS 150 offers an introduction to the field of computer science using a current programming language. Central themes of the class include an introduction to computer organization; algorithmic problem solving; structured and object oriented program design; and the societal and professional context in which computer science exists. Fundamental data types including arrays and structures will be explored and concepts such as complexity, invariants, abstract data types, pointers, and linked lists will be introduced.

Lecture: 3 hours per week  
Corequisite: CS 150L (2 hours per week)  
Recommended: CS 100 for students without computer experience  
Prerequisites: MATH 130 or MATH 147 or COMPASS Algebra > 51, ACT > 27, or SAT > 620  

CS 160  Computer Science II  
3 Credits  
Offered Either Semester On Demand  

CS 160 provides continuing experience in problemsolving and software design methods. The analysis of algorithms, use of non-text files, and dynamic data structures are introduced and the entire software-design cycle is considered in greater depth. Standard algorithms for numeric and text processing, searching, and sorting will be covered, as well as a large group project. The exploration of recursion is continued.

Lecture: 3 hours per week  
Prerequisites: CS 150 and 150L  
Corequisite: College level math such as MATH 160 or 170  

CS 204C  Sophomore Design Project  
3 Credits  
Offered Either Semester when appropriate projects are identified and on demand  

This course provides students the opportunity to develop their programming and communication skills on a real project for a real client. Students will perform requirements analysis, documentation, design, risk analysis, implementation, testing, and release of a software application for a local client. The design project is a group project and involves significant interaction with others as well as presentations and documentation at each stage of development. Projects may be stand alone programs, network based applications, or web based applications depending on the project(s) selected. This is primarily a collaborative class in which students are responsible for completion of each stage of the project. Students may be responsible for local travel to meet with the client.

Lecture: 3 hours per week  
Prerequisites: CS 160 or CS 211 or CS 213 and CS 212 or instructor permission.  

CS 211  Languages of Computer Science: C++  
3 Credits  
Offered Either Semester On Demand  

This course provides an introduction to object oriented programming using the language C++. Features of the UNIX operating system, programming for the Windows environment, and the Standard Template Library may be discussed. This course is suitable for students aspiring to major in computer science, but will also serve science and engineering majors as well as members of the community desiring to add object oriented programming to their repertoire of skills.

Lecture: 3 hours per week  
Recommended: Prior programming experience in a structured language. This requirement may be met with a course in Java, C, or other high level language.  

CS 212  Languages for the World Wide Web  
3 Credits  
Offered Either Semester  

This course is designed to teach programming and computational thinking skills to create rich, interactive documents for the World Wide Web. Focus is on using information resources, current markup and scripting languages, and creating appli-
Laboratory activities use basic lab equipment, logic analyzers, and digital oscilloscopes.
Lecture: 3 hours per week
Corequisite Lab: CS 240L (2 hours per week)
Prerequisites: MATH 170 or 187 or instructor permission

**CS 250 Data Structures**
3 Credits Offered Either Semester On Demand

Standard data structures are examined using a high level programming language such as C++, stacks, queues, linked lists, and trees. Graphs are presented and explored through manipulation methods specific to each. Other topics include a continued development of skills in the analysis of algorithms, abstract data types, dynamic memory use, and the use of external files.
Lecture: 3 hours per week
Corequisite Lab: CS 250L (2 hours per week)
Prerequisites: CS 160 and MATH 187

**CS 270 Computer Organization and Assembly Language**
3 Credits Offered Either Semester On Demand

Course topics include register and processor level design of computer systems covering the ALU, control unit, assembly language, interrupts, DMA, cache control, scheduling algorithms, addressing methods, linkers, and loaders.
Lecture: 3 hours per week
Prerequisites: CS 150 and CS 240

---

**CRIMINAL JUSTICE**

**CJ 103 Introduction to Criminal Justice**
(same as LAWE 103)
3 Credits Offered Each Semester

This course offers an introduction to the purpose, function, and brief history of the agencies dealing with criminal justice, while presenting a survey of requirements for entering criminal justice service. Students discuss crime, the criminal, traffic, and vice as social problems; the function of the courts; prosecution and defense attorneys; correctional and penal institutions; and probation and parole. This course will introduce the student to the various agencies and employment opportunities within the criminal justice system. This is a required course in the Law Enforcement program.

**CJ 202 Corrections in America**
(same as LAWE 202)
3 Credits Offered Fall Semester

This course includes a survey of the historical, philosophical, and legal bases of correctional procedures and institutions. It also includes an examination of current problems and innovations.
Prerequisites: LAWE or CJ 103 or permission of instructor.

**CJ 205 Criminal Procedure**
(same as LAWE 205)
3 Credits Offered Spring Semester

This course includes an examination of the procedural aspects of criminal law. It will include specific applications of procedures by actors in the criminal justice process including
police, prosecutors, defense attorneys, judges, and corrections officials. This examination will provide a basic understanding of state and local legal codes, as well as current applications of law in both arrest and search and seizure.

**CULINARY ARTS**

NOTE: Course enrollment requires prior acceptance into the Culinary Arts program.

**CULA 150**  
**Sanitation and Safety**  
1 Credit  
Offered Fall Semester

This course focuses on the basics of safety and sanitation as it applies to the food service industry. On completion of this course, students will be certified by the National Restaurant Association in Applied Food Safe Sanitation. Students will be instructed in the basics of first aid as it relates to food service.

**CULA 151**  
**Introduction to Food Service**  
3 Credits  
Offered Fall Semester

Through lecture and demonstration, this course includes an introduction to tools and equipment used in the food service industry. Students will also learn basic cooking principles and methods including the art of seasoning and flavoring. Recipe and menu development will also be taught, as well as forms and functions, measurements, conversions and food costs.

**CULA 152**  
**Breakfast Cookery and Food Presentation, Garnish, Quick Breads**  
1 Credit  
Offered Fall Semester

This course will focus on the preparation of breakfast foods including eggs, dairy products, and meats. Basic bakeshop principles as they relate to an assortment of foods and breads will also be explored. An introduction to food presentation and buffet service will also be included.

**CULA 155**  
**Preparation of Stocks, Soups, and Sauces**  
1 Credit  
Offered Fall Semester

This course will focus on the fundamental knife skills and basic food organization and preparation. Students will be introduced to techniques required for preparing stocks, soups, and sauces. A variety of sauces will be introduced including mother sauces, small sauces, clear soups, cream soups, chowders, purees, and specialties.

**CULA 156**  
**Preparation of Meats, Poultry, Fish, and Shellfish**  
1 Credit  
Offered Spring Semester

Students will gain an understanding of the composition and structure of meats, fish, poultry, and shellfish as they relate to the industry. Field trips to a production meat company and fishmonger will be included. Application of theories will be experienced in lab.

**CULA 157**  
**Preparation of Vegetables, Starches, Sandwiches, and Salads**  
2 Credits  
Offered Spring Semester

Students will gain an understanding of the different techniques and methods used to prepare vegetables and starches as these techniques relate to quality. In addition, students will learn about various types of salads and dressings, as well as hot and cold sandwich preparation.

**CULA 158**  
**Bakeshop**  
2 Credits  
Offered Spring Semester

Preparation techniques and procedures for a variety of baked goods will be explored. Breads, cakes, icings, cookies, pies, and pastries will be among specific items discussed.

**CULA 165**  
**Intro to Customer Service**  
3 Credits  
Offered Fall Semester

This course will focus on the basics of customer service. Quality customer service will be at the center of all discussions. Special attention will be placed on front-end restaurant and dining service procedures. Students will apply principles learned in class during the “on-the-job” lab in the College restaurant. A skills development log and completion of written assignments will be required. This course consists of approximately 30 hours of theory and 45 hours of lab.

**CULA 165L**  
**Intro to Customer Service Lab**  
0 Credits  
Offered Fall Semester

On-the-job training lab to be taken in conjunction with CULA 165. Principles taught in CULA 165 will be applied in this lab.

**CULA 166**  
**Restaurant Customer Service Operations**  
3 Credits  
Offered Spring Semester

This course will explore advanced customer service relations, dining room procedures, and internal customer service. Students will learn and experience a variety of front-end positions including service supervisor. Special service situations will be addressed as well as standards for industry communications. Students will apply principles learned in class during the “on-the-job” lab in the College restaurant. A skills development log and completion of written assignments will be required. This course consists of approximately 30 hours of theory and 45 hours of lab.

**CULA 166L**  
**Restaurant Customer Service Operations Lab**  
0 Credits  
Offered Spring Semester

This is an on-the-job training lab to be taken in conjunction with CULA 166. Principles taught in CULA 166 will be applied in this lab.

**CULA 170**  
**Culinary Arts Lab I**  
6 Credits  
Offered Fall Semester

Students apply skills taught in theory while operating “Emery’s,” the College restaurant located in the Hedlund Building. Throughout the semester students will rotate to a variety of “stations” that are similar to those in the food service industry. Emphasis is placed on “hands-on” application.

**CULA 171**  
**Culinary Arts Lab II**  
6 Credits  
Offered Spring Semester

Students will continue to apply the knowledge taught in theory classes by exploring more advanced complexities of menu offerings while operating Emery’s Restaurant.  
**Prerequisite:** Completion of CULA 170
DANCE

CULA 172  Specialty Food Design and Event Menu Planning
3 Credits  Offered Summer Session
Students will gain an appreciation for the complexities in planning a special function with emphasis on food preparation. In addition, they will learn the art of cake and pastry decorating as well as the fundamentals of vegetable/fruit art as it relates to aesthetics and taste.

CULA 175  Culinary Arts Internship
1 Credit  Offered Summer Session
This course provides supervised training in culinary arts through on-the-job experience in a restaurant or related facility. It provides a practical application of culinary skills as part of the learning process and involves 45 hours of hands-on production. This is a required course in the Culinary Arts program and is graded on a satisfactory/unsatisfactory basis. Onsite work: 45 hours

DANC 105  Aerobic Dance/Fitness
1 Credit  Offered Each Semester
This course combines cardiovascular conditioning, toning, flexibility exercises, and a fat burning intensity level. DANC 105 is offered in two levels: Nice and Easy, a low impact with moderate intensity for the beginner; and Intermediate, a muscle strengthening and higher level of intensity. It satisfies one of the P.E. requirements for the A.S. and A.A. degrees and may be repeated for a total of four credits.
Activity: 2 hours per week

DANC 111  Beginning Rhythm and Movement
1 Credit  Offered Each Semester
This class will explore the many different forms of dance, from the Charleston to the waltz to jazz. It also covers different periods of history, styles, and rhythms.
Activity: 2 hours per week

DANC 112  Social/Swing Dance I
1 Credit  Offered Each Semester
Students will learn East Coast Swing dance, a popular couple dance. Single, double, and triple rhythm will be covered, along with both 6-count and Lindy Hop 8-count step versions. Other related dances (West Coast Swing, Jive, Foxtrot) may be introduced depending on the students' interests and skill level. Students will get a moderate intensity workout that improves endurance, agility, coordination, balance, and posture. This course satisfies one of the P.E. requirements for the A.A. and A.S. degrees and may be repeated for a total of 4 credits.
No prior dance experience is required.
Activity: 2 hours per week

DANC 113  Jazz Dance I
1 Credit  Offered Each Semester
Dance 113 is an introduction to the movements and styles of today's jazz dancer. It emphasizes exercises and combinations of steps and explores theatrical, lyrical, and "funk" styles set to popular music. This course is a fun alternative to sports and helps develop an appreciation for the art form, music, rhythm awareness, and coordination. It also provides physical conditioning through strength and flexibility. This course satisfies one of the P.E. requirements for the A.S. and A.A. degrees. May be repeated for a total of four credits.
Activity: 2 hours per week

DANC 114  Jazz Dance II
1 Credit  Offered Spring Semester
This is a continuation of DANC 113, exploring movements and styles of today's jazz dancer. It emphasizes exercise, combination steps, and explores theatrical, lyrical, and "funk" styles to popular music. This course provides an alternative to sports and helps develop an appreciation for the art form, music, rhythm awareness, and coordination. It also provides physical conditioning through strength and flexibility. This course satisfies one of the P.E. requirements for the A.S. and A.A. degrees and may be repeated for a total of four credits.
Activity: 2 hours per week
Recommended: DANC 113 or some knowledge of jazz dance

DANC 115  Modern Dance: Beginning I
1 Credit  Offered Each Semester
DANC 115 is a discovery of dance movement through the physical and mental discipline techniques of Graham and Cunningham. It includes an insight into how dances are created through improvisation, and by analyzing these movements, students will explore choreography. This course provides a creative outlet and physical conditioning of strength and flexibility. It also develops coordination and an appreciation of the art form. This is an excellent course for theatre and performing arts students. This course satisfies one of the P.E. requirements for the A.S. and A.A. degrees. It may be repeated for a total of four credits.
Activity: 2 hours per week

DANC 117  Ballet: Beginning I
1 Credit  Offered Each Semester
This course focuses on basic technique, body alignment, and the development of step combinations. It includes related terminology and history of the art form. DANC 117 helps improve flexibility, muscle strength and control, and mental discipline over the body and promotes the aesthetic understanding and appreciation of classical ballet. This course satisfies one of the P.E. requirements for the A.S. and A.A. degrees and it may be repeated for a total of two credits.
Activity: 2 hours per week

DANC 118  Ballet: Beginning II
1 Credit  Offered Each Semester
This course is a continuation of DANC 117 for beginners and concentrates on technique, alignment, and progressions. The student is introduced to more complex steps through faster-paced instruction. The course increases flexibility, muscle strength and control, and mental discipline over the body and enhances an appreciation of the art form as technique improves. This course satisfies one of the P.E. requirements for the A.S. and A.A. degrees. It may be repeated for a total of two credits.
Activity: 2 hours per week
Prerequisite: DANC 117 or equivalent
Course Descriptions

DANC 119  Multicultural Dance
1 Credit  Offered Each Semester
Students will learn authentic ethnic group dances and steps from such countries as Ireland, Africa, Japan, Greece, Romania, Mexico, the United States, and others. Students will learn about safety equipment and procedures. Class B Commercial Drivers License training will also be covered.

DIESEL TECHNOLOGY

NOTE: Course enrollment requires prior acceptance into the Diesel Technology program. Successful completion of each semester and/or permission of the instructor is required for enrollment in the next semester.

DSLT 105  Orientation/Safety/Gen. Shop Practices
2 Credits  Offered Fall Semester
This course introduces students to on-campus services such as the library and College Skills Center. It includes instruction about the industry, including wages, job opportunities, and the nature of the work. This course also teaches students about safety equipment and procedures. Instruction is provided on general shop practices such as drilling and tapping holes, drilling out broken bolts, installing Heli-coils, double flares, soldering, and the care of equipment and floors.

DSLT 117L  Diesel Lab
2 Credits  Offered Summer Session
This course provides students with hands-on exposure in a shop setting on the subjects covered in the DSLT 195 theory class. Instruction utilizes a variety of mock-ups, training aids, components, and limited live customer work. Primary emphasis will be placed on suspension system and steering diagnostics and repair.

DSLT 118L  Diesel Engine Lab
2 Credits  Offered Fall Semester
This course will give students hands-on exposure in a shop setting to those subjects covered in the DSLT 120 theory classes. This instruction will utilize a variety of mock-ups, training aids, components, and limited live customer work.

DSLT 119L  Electrical Systems Lab
1 Credit  Offered Fall Semester
This course provides students with hands-on exposure in a shop setting on the subjects covered in the DSLT 122 theory class. This instruction will utilize a variety of mock-ups, training aids, components, and limited live customer work.

DSLT 120  Diesel Engines
5 Credits  Offered Fall Semester
This course will include instruction on the basics of how to identify, repair, rebuild, and/or replace diesel engines. Students will learn two-stroke and four-stroke combustion engine theory as well as engine performance criteria. Instruction will include the operation and basic principles of various diesel engine components and their respective systems.

DSLT 122  Electrical Systems
4 Credits  Offered Fall Semester
This course will include instruction on theory, operation, construction, and repair of heavy-duty electrical systems. Students will gain an understanding of starting systems, charging systems, batteries, wiring schematics, and lighting, along with associated testing and repair procedures for each system.

DSLT 128L  Powertrain Lab
2 Credits  Offered Spring Semester
This course provides students with hands-on exposure in a shop setting on the subjects covered in the DSLT 130 theory class. This instruction will utilize a variety of mock-ups, training aids, components, and limited live customer work.

DSLT 129L  Brake Systems Lab
1 Credit  Offered Spring Semester
This course provides students with hands-on exposure in a shop setting on the subjects covered in the DSLT 132 theory class. This instruction will utilize a variety of mock-ups, training aids, components, and limited live customer work.

DSLT 130  Powertrain
5 Credits  Offered Spring Semester
This course will teach students the operation, construction, service, and repair of heavy-duty clutch systems, manual transmissions, drivelines, universal joints, single and two-speed differentials, as well as axles and bearings.

DSLT 132  Brake Systems
4 Credits  Offered Spring Semester
This course will teach students the operation, construction, service, and repair of heavy truck and equipment air systems, foundation air brake systems, foundation hydraulic brake systems, as well as wheels and seals.

DSLT 195  Specialization Study
2 Credits  Offered Summer Session
This course teaches students the operation, construction, components, and repair of various truck and heavy equipment suspension systems including spring, pad, and air suspensions. Instruction also covers construction, components, and adjustments of truck steering systems as well as alignment procedures. Class B Commercial Drivers License training will also be covered.

DSLT 218L  Advanced Tune-Up Lab
2 Credits  Offered Fall Semester
This course will give students hands-on exposure in a shop setting to those subjects covered in DSLT 221 theory classes.
This instruction will utilize a variety of mock-ups, training aids, components, and limited live customer work.

**DSLT 219L Computerized Engine Lab**  
2 Credits Offered Fall Semester  
This course will give students hands-on exposure in a shop setting to those subjects covered in diesel theory classes. The instruction will utilize a variety of mock-ups, training aids, components, and limited live customer work.

**DSLT 220 Advanced Tune-Up**  
4 Credits Offered Fall Semester  
This course will teach students how to troubleshoot, adjust, repair, or replace components associated with computerized engines. Students will also learn the operation, construction, and theory of computerized engine controls.

**DSLT 222 Computerized Engines**  
4 Credits Offered Fall Semester  
This course teaches students how to test, troubleshoot, adjust, repair, or replace components associated with computerized engines. Students will also learn the operation, construction, and theory of computerized engine controls.

**DSLT 228L Undercarriage/Powershift Lab**  
2 Credits Offered Spring Semester  
This course gives students hands-on experience in a shop setting. It is designed to provide opportunities for application of subjects covered in the DSLT 230 theory class. Instruction will utilize a variety of mock-ups, training aids, components, and limited live customer work.

**DSLT 229L Hydraulics Lab**  
2 Credits Offered Spring Semester  
This course gives students hands-on exposure in a shop setting to those subjects covered in DSLT 232 theory classes. The instruction will utilize a variety of mock-ups, training aids, components, and limited live customer work.

**DSLT 230 Undercarriage/Powershift Transmissions**  
4 Credits Offered Spring Semester  
This course teaches students the operation, construction, and repair of heavy equipment undercarriages and heavy-duty power-shift transmissions. Instruction covers construction and repair of various power-train components used in the heavy equipment industry. Students will also gain an understanding of the operation, construction, and theory of torque converters and final drives.

**DSLT 232 Hydraulic Systems**  
4 Credits Offered Spring Semester  
This course will teach students the theory of operation, construction, adjustment, maintenance, and repair of heavy equipment hydraulic systems. Students will also learn how to design hydraulic systems and implement changes to existing hydraulic systems.

---

**DRAFTING AND DESIGN TECHNOLOGY**

NOTE: Course enrollment requires prior acceptance into the Drafting and Design Technology program. Successful completion of each semester and/or permission of the instructor is required for enrollment in the next semester.

**DRFT 102 Intro to Theory of Drafting**  
4 Credits Offered Spring Semester  
DRFT 102 will focus on basic theory of drafting using the traditional techniques of "board drafting." Emphasis will be placed on the use of drafting instruments, lettering, geometric constructions, orthographic projections, pictorial drawings, and basic dimensioning. Concepts will be reinforced through hands-on activities that focus on these skills.

**DRFT 104 Intro to Technical Sketching**  
2 Credits Offered Fall Semester  
DRFT 104 teaches skills to convey a thought or idea on paper. Students will develop an ability to visualize and sketch orthographically and pictorially. Concepts will be reinforced through hands-on activities that focus on these skills.

**DRFT 106 3-D Descriptive Geometry**  
2 Credits Offered Spring Semester  
DRFT 106 will focus on developing the knowledge and skills necessary for solving problems using descriptive geometry. Students will develop line projections, true size and shape of lines or planes, and piercing points of lines and planes in space. In addition, they will develop graphical solutions of force vectors. AutoCAD will be used as the instructional platform. Concepts will be reinforced through hands-on activities that focus on theories discussed.

**DRFT 107 Technical Graphics I**  
3 Credits Offered Fall Semester  
DRFT 107 is designed for the beginning AutoCAD user and provides an introduction to Computer Assisted Drafting (CAD) using Windows NT as the operating system. The latest version of AutoCAD will be used as the basic drafting platform. A major focus will be to develop the visualization skills necessary to develop working line drawings. Concentrated efforts will be made to stress the importance of accuracy and clarity of drawings, while at the same time developing confidence and drafting speed. After accomplishing visualization skills the student must be able to produce hard copies of the proper scale. In the lecture/lab environment students will be presented with hands-on activities to reinforce their learning.

**DRFT 108 Technical Graphics II**  
3 Credits Offered Fall Semester  
DRFT 108 is a continuation of concepts learned in DRFT 107. It is designed for the student who is knowledgeable in the basics of AutoCAD, but has not had the opportunity to use all the commands and procedures available in the latest versions. The latest version of AutoCAD will be used as the basic drawing platform. A major focus will be to develop skills to visualize and draw in the third dimension. Plotting to scale
through the use of Paper Space will be practiced. This course is designed to prepare students for entry into DRFT 112.

**DRFT 112 Industrial CAD Graphics**

*6 Credits*  
Offered Spring Semester

This course will focus on mechanical, architectural, electrical/electronic drafting, and civil/geographical information systems. The student will develop a thorough understanding of the User Coordinate System in order to draw and visualize in 3-D. Parametric design and solid modeling will also be introduced. Using CAD as a tool, the student will begin the process of designing a residential structure. Emphasis will be placed on design and the use and misuse of space.

**DRFT 130 Intro to Blueprint Reading**

*2 Credits*  
Offered Fall Semester

DRFT 130 is intended as an introduction to blueprint reading. The student will be introduced to architectural, civil and mechanical plans, blueprints, and working drawings. The student will develop a skill set that allows them to read and interpret basic documents.

**DRFT 214 Surveying**

*4 credits*  
Offered Fall Semester

DRFT 214 presents theory and field applications of elementary surveying. It includes the use of instruments, error and precision, level circuits, running traverses, field calculations, boundary surveys, route surveys, construction surveys, triangulation, state coordinate systems, engineering astronomy, and photogrammetry. This course provides basic surveying skills that may help engineering students gain summer employment, but it is not intended as a preparation for direct entry into surveying occupations.

Lecture: 3 hours per week  
Corequisite Lab: DRFT 214L, 3 hours per week  
Prerequisite: MATH 147 or COMPASS College Algebra > 51, ACT > 27, SAT > 620.

**DRFT 231 Architectural Design & Its History**

*5 Credits*  
Offered Fall Semester

This course introduces students to the concepts, practices, standards, and drafting techniques needed for architectural design. A major focus will be to develop a clear understanding of the evolutionary processes of architectural styles and how they relate to present day architectural design. Students will study the concepts of form follows function; including the factors that affect exterior and interior design, and the relationship between rooms and their sizes. Upon completion the student will be able to go from conceptual design, to design development, to the production of usable blueprints. Students will explore the fundamental concepts of 3D parametric modeling by designing several different types and styles of residential buildings. Successful completion of DRFT 112 and DRFT 130 and/or permission of instructor is required.

**DRFT 233 Architectural Design & Construction Practices**

*5 Credits*  
Offered Spring Semester

This course further emphasizes the architectural design process while relating these principles to general construction practices. Students will further enhance their drafting skills using selected 3D Parametric Manufacturing software. A major focus will be to develop complete sets of working blueprints, construction plans, and construction documentation. Utilizing architectural specific software, students will create a full set of residential and commercial plans including floor plans, elevation views, details, bill of materials, and cost estimates. Successful completion of DRFT 112, DRFT 130, and DRFT 231 and/or instructor permission is required.

**DRFT 234 Blueprint Reading, Estimating Architecture**

*5 credits*  
Offered Fall Semester

Building on the skills and knowledge learned in DRFT 130, this course will focus on advanced blueprint reading and building codes in the area of architectural design. Students will become familiar with industry standard symbols facilitating the reading and interpretation of architectural design plans, blueprints, and working drawings. A minor component of estimating and modeling will be added as appropriate. Successful completion of DRFT 130 and/or permission of the instructor is required.

**DRFT 235 Building Codes**

*2 Credits*  
Offered Fall Semester

DRFT 235 deals with issues of land use zoning, building codes, and electrical/plumbing codes as they relate to a drafts-person/designer of typical wood framed residential structures. Also included is a unit of Uniform Building Codes, including occupancy classifications, fire safety requirements, handicapped access requirements, energy conservation issues, and type of material available.

**DRFT 237 Structural Design and Modeling**

*4 Credits*  
Offered Spring Semester

This class uses a hands-on approach to learning. Students will develop modeling skills with special emphasis placed on the design and construction of roofs, walls, floors, and stair details. Consideration will be given to what is aesthetically pleasing and what is practical in terms of construction. This class will also focus on the structural aspects of architecture with emphasis on structural strength and acceptable building practices. The study of the five basic methods of spanning open spaces between columns using the lintel, corbel, arch cohesive construction, and truss is included. Successful completion of DRFT 130 and/or instructor permission is required.

**DRFT 241 Introduction to Civil Design**

*4 Credits*  
Offered Fall Semester

This course covers the basics of interpreting survey information and transforming the data into a digital terrain model. The focus is on horizontal layout of proposed roads, lots, utilities, and building pads incorporated with existing boundaries and features. Students will create Records of Survey, ALTA...
Land Title Survey Maps, parking lot layout proposals, and subdivision layout proposals. Students must be concurrently enrolled in ENGR 214 and/or have instructor permission.

**DRFT 243  Advanced Civil Design**

4 Credits  Offered Spring Semester

DRFT 243 is a continuation of DRFT 241. A natural progression will be made to vertical design. This course will cover road profiles, cross sections, and cut and fill design. Vertical design for piping sewer, irrigation, and water lines will also be covered. Students will make volume calculations and be able to discuss the effect vertical design has on horizontal layout. Successful completion of DRFT 241 and ENGR 214 and/or instructor permission is required.

**DRFT 245  GIS/Cartography**

3 Credits  Offered Spring Semester

DRFT 245 is an introduction to the creation and use of a geographic information system database. Industry standard software will be utilized. Facilities management and cartography, as well as the influence of global positioning systems and the Internet will be covered. Successful completion of ENGR 214 and/or instructor permission is required.

**DRFT 247  Adv Blueprint Reading-Civil**

2 Credits  Offered Fall Semester

Building on knowledge learned in DRFT 130 and Blueprint Reading, this course will focus on advanced blueprint reading in the area of civil design. Students will become familiar with industry standard symbols facilitating the reading and interpretation of civil design plans. Successful completion of DRFT 130 and/or instructor permission is required.

**DRFT 249  Land Planning**

2 Credits  Offered Fall Semester

DRFT 249 will address artistic issues of land development with discussion and evaluation of competing theories in feature placement. The artistic license of the designer will be explored within the limitations of state and local ordinances and requirements, such as road type and location, lot size and shape, and building site orientation and layout. Historical models will be compared with contemporary models. Students must be enrolled in or have taken DRFT 241 and/or have instructor permission.

**DRFT 251  Introduction to Mechanical Design**

4 Credits  Offered Fall Semester

This course presents the elements and principles involved in conventional design and analysis of mechanical components, assemblies, and drawings. Mechanical design will be emphasized through parametric design of parts and assemblies. The focus of this course will be a combination of learning feature-based parametric software and the fundamentals of mechanical design. Students will produce actual parts through cooperation with the Machine Technology program as well as producing rapid prototype parts. The design portion of this course is intended to dovetail with the design portion of DRFT 253. Successful completion of DRFT 251 and/or instructor permission is required. Successful completion of DRFT 251 and/or instructor permission is required. Successful completion of MATH 143 and/or instructor permission is required. Successful completion of MATH 143 and MATH 143D are required for the A.A.S. degree. Successful completion of MATH 024 is required for the technical or advanced two-year certificate.

**DRFT 253  Advanced Mechanical Design**

4 Credits  Offered Spring Semester

This course places further emphasis on learning feature-based parametric software for the creation of parts, assemblies, and drawings while gaining further knowledge in drafting and design practices of contemporary production methods. The focus of this course will be in combination of the use of parametric software and design intent. Students will continue to produce actual parts through cooperation with the Machine Technology program. Successful completion of MATH 143 and MATH 143D are required for the A.A.S. degree. Successful completion of MATH 024 is required for the technical or advanced two-year certificate.

**DRFT 254  Power Transmission**

2 Credits  Offered Spring Semester

DRFT 254 is an introduction to kinematic, static, and dynamic analysis of mechanical application and the transmission of power. Using selected CAD programs, students gain an understanding of cams, gears, linkages, pulleys, belts, sprockets, and chains. Successful completion of or current enrollment in DRFT 251 or 253 and/or instructor permission is required. Successful completion of MATH 143 and MATH 143D are required for the A.A.S. degree. Successful completion of MATH 024 is required for the technical or advanced two-year certificate.

**DRFT 255  Machine Control Processes**

3 Credits  Offered Fall Semester

DRFT 255 teaches the product cycle theory and contemporary machine control processes via CAD/CAM/CAE methodology. Students will learn 3-D geometry/database exchange theory by creating 3-D parts and 2-D drawings in accordance with ASME Y 14.5 Standards for CNC applications. Students will produce parts through the cooperation of the Machine Technology program. Successful completion or current enrollment in DRFT 251 or 253 and/or instructor permission is required.

**DRFT 257  Geometric Dimensioning & Tolerancing**

3 Credits  Offered Fall Semester

Building on knowledge learned in DRFT 130, this course will focus on Geometric Dimensioning and Tolerancing (GD&T) principles as they relate to mechanical design. Topics include symbols, annotation, theory, and applications. Students will read, interpret, and apply industry-standard symbols to drawings. Successful completion of or current enrollment in DRFT 130 and/or instructor permission is required.

**DRFT 258  Statics and Strength of Materials**

3 Credits  Offered Spring Semester

This course introduces the basics of statics and strength of materials without calculus. Students will study stress and strength factors of rigid bodies toward practical mechanical design problems. A good understanding of trigonometry and knowledge of Microsoft Excel and CAD systems are recommended to solve a variety of problems. Minimum competency levels in reading, writing, and mathematics and/or instructor permission is required.
ECON 201  Principles of Economics (Macro)  
3 Credits  Offered Each Semester  
This course is an introductory study of our national economy. This includes the tools of supply and demand, the measurement of inflation and employment, and discussion of the definition, role, and importance of national income and money and the banking system. The course also analyzes the role of government and the effects of international trade on the U.S. economy. Economic vocabulary and analysis of economic situations are emphasized. ECON 201 is a required course in the Business Administration, Business Education, and the Accounting Assistant programs. It satisfies a social science requirement for the A.S., A.A. and A.A.S. degrees. 
Lecture: 3 hours per week  
Recommended: MATH 108 or two years of high school algebra

ECON 202  Principles of Economics (Micro)  
3 Credits  Offered Each Semester  
ECON 202 is an introductory study of the economic behavior of individual consumers and suppliers. It examines consumer response to price and income changes and levels of satisfaction, supplier response to costs, and business response to degree of competition. Economic vocabulary and analysis of economic situations are emphasized. This is a required course in the Business Administration and Business Education programs. It satisfies a social science requirement for the A.S., A.A. and A.A.S. degrees. Prior completion of other courses is not required. 
Lecture: 3 hours per week  
Recommended: Sophomore standing, MATH 108 or two years of high school algebra; ECON 201 also helps to provide familiarity with vocabulary and methodology

ECON 225  International Economics  
3 credits  Offered Upon Demand  
ECON 225 investigates aspects of international economics such as international trade, exchange rates, and related monetary matters. Emphasis is placed on understanding why nations trade, the impact of tariffs and non-tariff barriers, and measures taken to liberalize international trade. The course also includes a historic look at the United States’ commercial policy, international and regional trade organizations, trade problems of developing countries as well as international financial relations, exchange rates, and international currency systems. Focus is placed on critical factors essential to understanding the interdependence among different facets of international economics. This course is useful for those who are considering a career in business or who want an overview of what the study of international economics encompasses. 
Lecture: 3 hours per week  
Prerequisites: ECON 201 and ECON 202

EDUC 190  Special Education Lab  
1 Credit  Offered Alternate Spring Semesters  
This course involves observation of and involvement with exceptional individuals in a variety of educational settings. It includes interaction with practicing special educators and the exceptional individuals they are serving. This course provides valuable insights by observing the teaching techniques used by special educators as they teach. 
Corequisite: EDUC 275

EDUC 201  Introduction to Teaching  
3 Credits  Offered Each Semester  
EDUC 201 provides an introduction to the world of teaching by focusing on teachers, learners, curriculum, and the social context in which teaching occurs. Insight and understanding will be facilitated through reflection and analysis of the student’s observations and participation in 30 hours of field experience in public schools. This course is required for some education transfer degrees. Its goals are to assist students in making an educated decision about teaching as a career choice, develop communication and interpersonal skills, encourage creativity and critical thinking, and provide opportunities to examine personal values and beliefs about teaching. Prior completion of other courses is not required. 
Lecture: 2 hours per week  
Field Experience: 30 hours per semester  
Prerequisite: Sophomore standing or permission of instructor  
Recommended: College-level reading, oral and written English language, and computer skills

EDUC 275  Education of the Exceptional Individual  
3 Credits  Offered Alternate Spring Semesters  
This course offers a general overview of special education. It emphasizes an introduction to the different handicapping categories, teaching methods, and unique legal requirements associated with educating exceptional individuals. It provides knowledge about exceptional individuals throughout the educational system (not just special education classrooms). This course is appropriate for all education degrees. 
Lecture: 3 hours per week  
Field Experience: 30 hours per semester  
Corequisites: EDUC 190

ENGR 105  Engineering Graphics  
2 Credits  Offered Each Semester  
This course provides instruction in computer-aided engineering drafting with emphasis on visualization of points, lines, planes, and solids in space; freehand sketching; orthographic projection; isometric and oblique drawing; sectioning; dimensioning; descriptive geometry; and 3D modeling. It provides engineering students with beginning skills in computer-aided engineering drawing, but is not intended to train AutoCAD technicians. 
Lecture/Lab: 4 hours per week  
Prerequisites: MATH 025 or COMPASS Algebra > 40, ACT > 18, or SAT > 430

ENGR 210  Statics  
3 Credits  Offered Fall Semester  
ENGR 210 is a study of vector analysis, resolution of forces, freebody diagrams, equilibrium, friction, centroids, moments of inertia, statics of rigid bodies, trusses, frames, machines, and cables. The course provides basic engineering skills in

Course Descriptions
mechanics necessary for analysis of structures and dynamics of rigid bodies.
Lecture: 3 hours per week
Prerequisite: MATH 170 and PHYS 211

ENGR 214 Surveying
4 Credits Offered Fall Semester on Demand
ENGR 214 presents theory and field applications of elementary surveying. It includes the use of instruments, error and precision, level circuits, running traverses, field calculations, boundary surveys, route surveys, construction surveys, triangulation, state coordinate systems, engineering astronomy, and photogrammetry. This course provides basic surveying skills that may help engineering students gain summer employment, but it is not intended as a preparation for direct entry into surveying occupations.
Lecture: 3 hours per week
Corequisite Lab: ENGR 214L, 3 hours per week
Prerequisite: MATH 147 or COMPASS College Algebra > 51, ACT > 27, or SAT > 620

ENGR 220 Dynamics of Rigid Bodies
3 Credits Offered Spring Semester on Demand
ENGR 220 is the study of kinematics and kinetics of particles and rigid bodies. Topics include position, velocity, acceleration, relative velocity and acceleration, translation and rotation by Newton’s 2nd Law, energy, momentum methods, collisions, and vibrations. It provides basic engineering skills that apply to all machines and other engineering bodies in motion.
Lecture: 3 hours per week
Prerequisite: MATH 175 and ENGR 210

ENGR 223 Engineering Analysis
3 Credits Offered Fall Semester
ENGR 223 introduces a combination of numerical analysis skills, problem solving and design techniques, and various computer software as they are utilized in basic engineering applications. Students will utilize oral and written communication skills in presenting their solutions.
Lecture: 2 hours per week and 2 hours of lab
Corequisite: MATH 175

ENGR 240 Circuits I
4 Credits Offered Fall Semester
ENGR 240 presents a study of Ohm’s Law, analysis methods, network theorems, Ideal Operational Amplifiers, and energy storage elements. It includes the exploration of electrical circuits using hands-on lab activities and computers.
Lecture/Lab: 3 hours of lecture per week, 2 hours of lab per week
Prerequisite: MATH 175 or permission of instructor
Corequisite Lab: ENGR 240L

ENGR 241 Circuits II
4 Credits Offered Spring Semester
Circuits II presents a study of power, three phase, transformers, filters, Fourier transforms, and Laplace transforms. It includes the exploration of electrical circuits using hands-on lab activities and computers.
Lecture: 3 hours per week
Corequisite Lab: ENGR 241L (2 hours per week )
Prerequisite: ENGR 240

ENGR 295 Strength of Materials
3 Credits Offered Spring Semester on Demand
ENGR 295 is the study of material strength, including elasticity, stress, strain, beam analysis, analysis of structural forms, torsion, deformation, modes of failure, and column analysis. The course provides a basic understanding of how structures and machines should be designed to prevent failure.
Lecture: 3 hours per week
Prerequisite: ENGR 210, MATH 175
Note: This course is equivalent to U of I Engineering 350

ENGL 045 Writer’s Workshop
3 Credits Offered Each Semester
English 045 offers introductory instruction in grammar, sentence construction, and paragraph development. This class includes instruction in constructing simple, compound, and complex sentences; writing thesis and topic statements; and developing a paragraph with primary and secondary support. Writer’s Workshop is helpful to those who need to improve skills before taking a college composition course. It is an important skill-building course that can influence college success, but will not fulfill degree requirements. A grade of C- or above allows the student to enroll in ENGL 099.
Lecture: 3 hours per week
Prerequisite: Entry is based on an appropriate score on the placement test—either between 0-30 on the COMPASS Writing, or 0-14 on the ACT English, or 0-370 on the SAT Verbal.

ENGL 099 Fundamentals for Writing
3 credits Offered Each Semester
Fundamentals for Writing is a course focusing on building sentence, paragraph, and basic essay skills. This class teaches some related language skills, such as dictionary use and spelling development. ENGL 099 positively influences college success by providing entry-level skills necessary to tackle required English composition courses. It will not fulfill A.A. or A.S. degree requirements, but applies toward a Certificate of Completion in the Professional/Technical programs. A grade of C- or above allows the student to enroll in ENGL 101.
Lecture: 3 hours per week
Prerequisite: Entry is based on an appropriate score on the placement test—either between 31-67 on the COMPASS Writing, or between 15-17 on the ACT English, or between 380-440 on the SAT Verbal. OR a grade of C- or above in ENGL 045.
ENGL 101  English Composition  
3 Credits  
Offered Each Semester

English 101 provides students the opportunity to deal with any writing challenges which may be encountered in the future—in their job, personal life, or recreational activities. Students will learn to write strong, clear prose, and will learn to use words accurately and precisely; to write clear and direct sentences that follow conventional structure, grammar, and punctuation; to use paragraphs that show unity and coherence while developing one primary idea that relates directly to preceding and succeeding paragraphs; and to develop essays that focus on a central idea, develop the idea adequately, and show organization and unification. This course is required for all degree programs. A grade of C- or above allows the student to enroll in ENGL 102.

Lecture: 3 hours per week

Prerequisite: Entry is based on a satisfactory writing sample (written during the first week of class) and an appropriate score on the placement test—either 68-94 on the COMPASS Writing, OR 18-24 on the ACT English, OR 450-560 on the SAT Verbal, OR a grade of C- or above in ENGL 099.

ENGL 102  English Composition  
3 Credits  
Offered Each Semester

English 102 provides instruction in the research process, which includes the gathering, the critical evaluation, and the presentation of evidence. Critical thinking is emphasized as vital to drawing conclusions from evidence. This class helps provide techniques for conducting research in all areas of study. It is required for all transfer degree programs.

Lecture: 3 hours per week

Prerequisite: ENGL 101 with a grade of C- or above. A score of 95-98 on the COMPASS Writing, OR 25-30 on the ACT English, OR 570-690 on the SAT Verbal, OR a grade of C- or above in ENGL 101.

ENGL 175  Introduction to Literature  
3 Credits  
Offered Each Semester

This is a survey of literature’s many forms including essay, short story, poetry, and drama. This course focuses on literature as a primary vehicle for ideas and values and helps students to recognize and appreciate the humanistic and artistic elements of literature. It satisfies an arts and humanities core requirement for the A.S., A.A., and most transfer degrees.

Lecture: 3 hours per week

Prerequisite: ENGL 101

ENGL 202  Technical Writing  
3 Credits  
Offered Each Semester

Technical Writing offers instruction in the writing skills applicable to business and industry. This class emphasizes factual information in the form of writing instructions and describing mechanisms and processes. It includes the fundamentals of composing memos, letters, and reports. Technical Writing is designed for those interested in practical applications of technical writing principles. This class is required for some occupational programs and is a useful general elective for all programs in science and technology. Prior completion of ENGL 099 and sophomore standing or permission of instructor are required.

Lecture: 3 hours per week

Recommended: ENGL 101

ENGL 203A  Trestle Creek Review  
1 Credit  
Offered Spring Semester

This workshop offers students interested in poetry and short fiction an introduction to the world of small-press publishing in which most writers get their start. Students read manuscripts submitted from all over North America and beyond and collaboratively determine the content of this year’s edition of Trestle Creek Review, an annual literary magazine published in May and mailed to contributors, subscribers, regional libraries, and bookstores. Students become conversant with contemporary literature written by “real” people, gain skills in literary criticism, learn how to submit their own work, and receive acknowledgment on the title page as members of the editorial staff.

ENGL 204A  Researching and Writing (Same as HIST 204A)  
3 Credits  
Offered on Demand

This course builds on writing skills gained from ENGL 101 and ENGL 102. In addition, the course enables students to make connections among many disciplines, including art, mythology, poetry, architecture, music, culture, and travel. Emphasis is placed on the student’s own writing of essays and explications based on the five-step critical thinking method. This course encourages students to practice and learn the steps in the writing process.

Lecture: 3 hours per week

Recommended: ENGL 101

ENGL 205  Interdisciplinary Writing  
3 Credits  
Offered Each Semester

This course builds on writing skills gained from ENGL 101 and ENGL 102. In addition, the course enables students to make connections among many disciplines, including art, mythology, poetry, architecture, music, culture, and travel. Emphasis is placed on the student’s own writing of essays and explications based on the five-step critical thinking method. This course encourages students to practice and learn the steps in the writing process.

Lecture: 3 hours per week

Prerequisite: ENGL 101, 102

ENGL 216  Mythology  
3 Credits  
Offered Spring Semester

Mythology surveys both Greek myths and themes common to all Western mythologies, particularly those of the hero quest. This course includes the study of a variety of stories, poems, plays, and films, and focuses on learning to identify the mythological elements at work within them. Mythology creates an awareness and appreciation of mythological stories and themes.
as a base for much of our literature and art; therefore, it enhances literary and artistic experiences.

Lecture: 3 hours per week
Prerequisite: ENGL 101

ENGL 257  Literature of Western Civilization
3 Credits  Offered Fall Semester

English 257 examines significant literary works of Western Civilization from about 800 B.C. through Shakespeare. This course focuses on the values, traditions, themes, and ideas that have shaped Western culture and have influenced other disciplines such as art, psychology, and philosophy. This course helps link the basic concepts of early literature to the contemporary world. It satisfies an arts and humanities course requirement for the A.S., A.A., and most transfer degrees.

Lecture: 3 hours per week
Prerequisite: ENGL 101

ENGL 258  Literature of Western Civilization
3 Credits  Offered Spring Semester

English 258 is the study of Western (European and North American) classics from the mid-1600s to the present. This course includes internationally acclaimed writers who are representative of the major literary movements (Enlightenment, Romantic, Realist, and Modernist traditions) and who are significant in shaping Western civilization. ENGL 258 serves as a foundation to the humanities through an exploration of writers and works that comprise the core of our literary and philosophical tradition. It satisfies an arts and humanities course requirement for the A.S., A.A., and most transfer degrees.

Lecture: 3 hours per week
Prerequisite: ENGL 101

ENGL 267  Survey of English Literature
3 Credits  Offered Fall Semester

English 267 is a study of historical documents, poetry, fiction, drama, and essays illustrating the development of English literature from the Anglo-Saxon period through the Eighteenth Century. This course enhances cultural literacy and awareness of pertinent issues in the humanities. It satisfies an arts and humanities course requirement for the A.A., A.S., and most transfer degrees.

Lecture: 3 hours per week
Prerequisite: ENGL 101

ENGL 268  Survey of English Literature
3 Credits  Offered Spring Semester

English 268 is a study of historical documents, poetry, fiction, drama, and essays illustrating the development of English literature from the Romantic period to the present. This course enhances cultural literacy and awareness of pertinent issues in the humanities. It satisfies an arts and humanities course requirement for the A.A., A.S., and most transfer degrees.

Lecture: 3 hours per week
Prerequisite: ENGL 101

ENGL 272  Business Writing
3 Credits  Offered Each Semester

Business Writing offers instruction in the practical application of business writing principles. It includes business writing strategies for memos, letters, and reports, and emphasizes audience analysis, content planning, language effectiveness, and message layout. ENGL 272 helps develop writing skills necessary for effective business communication. It is required for some business and business-related programs.

Lecture: 3 hours per week
Prerequisite: Entry is based on an assessment score of 68-94 on the COMPASS Writing or 18-24 on the ACT English or 450-560 on the SAT Verbal, OR a grade of C- or above in ENGL 099.
Recommended: ENGL 101

ENGL 277  Survey of American Literature
3 Credits  Offered Fall Semester

English 277 is a study of selected historical documents, journals, essays, poetry, and fiction illustrating the development of American literary ideas, values, and philosophy from the Colonial Period (1620) to the end of the Civil War (1865). This course satisfies an arts and humanities course requirement for the A.A., A.S., and most transfer degrees.

Lecture: 3 hours per week
Prerequisite: ENGL 101

ENGL 278  Survey of American Literature
3 Credits  Offered Spring Semester

English 278 is a study of selected historical documents, journals, essays, poetry, fiction, and drama illustrating the development of American literary ideas, values, and philosophy from the Civil War (1865) to the present. This course satisfies an arts and humanities course requirement for the A.A., A.S., and most transfer degrees.

Lecture: 3 hours per week
Prerequisite: ENGL 101

ENGL 285  American Indian Literature
3 Credits  Offered Spring Semester

English 285 explores traditional American Indian world views and belief systems as reflected in myths and legends, as well as contemporary poetry, short stories, and novels by Native Americans. The differences between American Indian and Eurocentric world views and the implications of these differences will be considered, as illustrated in literature. The course will also explore political, sociological, and psychological effects on American Indians of U.S. governmental policies and actions taken in regard to various tribes.

Lecture: 3 hours per week
Prerequisite: ENGL 101

Recommendation: Prior completion of ENGL 175

ENGL 291  Creative Writing I
3 Credits  Offered Fall Semester

English 291 introduces the principles and techniques of poetry writing, examined through exercises and discussions of student and professional writing. Exact content will depend on student preference. This course helps develop a personal, advanced writing style and an appreciation of literary forms. An average writing ability and some familiarity with literature are necessary.

Lecture: 3 hours per week
Prerequisite: ENGL 175
ENGL 292

Creative Writing II
3 Credits
Offered Spring Semester

English 292 introduces the principles and techniques of fiction and nonfiction writing, examined through exercises and discussions of student and professional writing. The exact content of the course will depend on student preference. This course helps develop a personal, advanced writing style and an appreciation of literary forms. Above average writing ability and some familiarity with literature are necessary.
Lecture: 3 hours per week
Prerequisite: ENGL 175

ENGL 295

Contemporary U.S. Multicultural Literature
3 Credits
Offered Each Semester

English 295 provides a study of fiction, nonfiction, poetry, and film across a diverse range of cultures in the United States. Selections each semester will include works from the 1960s to the present, including the perspective of women and men who may represent diverse races, ethnicities, social classes, religions, sexual orientations, ages and abilities. Since the Civil Rights movement, writers once marginalized are now published in the mainstream, expressing diverse themes in challenging, experimental styles. This course fulfills a Cultural Diversity requirement for the A.A. degree or an Arts and Humanities requirement for the A.S. degree.
Lecture: 3 hours per week
Prerequisite: ENGL 101 with a grade of C- or above

ENTP 110

Starting and Managing the Business Enterprise
3 credits
Offered Upon Demand

This course will introduce students to processes for starting a new venture. Topics include the characteristics of an entrepreneur, aspects of starting a business, evaluation of entrepreneurial opportunities and risks, and legal structures for new ventures. Students will focus on developing a new venture concept, identifying and solving problems, planning for survival and growth, and enhancing profitability. Personnel and human resource needs and services for an entrepreneurship will also be covered.
Lecture: 3 hours per week

ENTP 120

Marketing the Business Enterprise
3 credits
Offered Upon Demand

This course will help students learn about conducting market research, making strategic marketing decisions, wisely allocating budget funds to implement marketing goals, selecting the proper tools for advertising/sales and public relations to capture business markets, building customer loyalty, and measuring business promotional efforts to effectively enhance their marketing strategies. Emphasis will be on developing a marketing plan using marketing research techniques.
Lecture: 3 hours per week

ENTP 130

Finances and Taxes for Entrepreneurs
3 credits
Offered Upon Demand

As a small business owner, you will have unique needs for acquiring and managing money. This course emphasizes consideration and selection of financing vehicles, financial forecasting, and various accounting and legal issues considered in strategic decision-making. Participants will review various types of financial statements in order to analyze business operations. In addition, tax responsibilities, tax forms, and how to access resources to ensure effective financial management for small business opportunities and growth potential will be covered.
Lecture: 3 hours per week

ESL 101

ESL Composition
3 Credits
Offered Each Semester

ESL 101 helps non-native speakers of English to understand and produce the kind of academic writing required in college. Emphasis is on the most common and effective formats of academic writing and on editing for accuracy of expression, grammar, and sentence structure. This course is valuable for building fluency in written expression. It prepares students for success in competing with native English speakers in college writing courses. A working knowledge of English grammar and basic sentence strategies is required. Students must have earned a minimum score of 500 on the Test of English as a Foreign Language (TOEFL). The course may be repeated for a total of eight credits. Placement is determined by instructor.
Lecture: 3 hours per week
Prerequisite: Minimum score of 500 on the TOEFL (Test of English as a Foreign Language)
ENTP 140 Writing a Business Plan
3 credits Offered Upon Demand

ENTP 140 offers students the opportunity to write a high-impact business plan. This course integrates all the components of a business plan including the business description and focus, location selection, marketing strategies, financial planning, personnel and management needs, and strategic planning for business growth. Participants will explore and develop a practical business plan for success by establishing realistic goals and objectives, developing strategies for a secure business, preparing for contingencies, and writing a plan.
Lecture: 3 hours per week

ENVIRONMENTAL SCIENCE

ENSI 119 Introduction to Environmental Science
4 Credits Offered Each Semester

ENSI 119 reviews basic concepts of chemistry, biology, the growth of human population, man’s use of energy and other resources, species extinction, and pollution of the environment. This course satisfies a laboratory science course requirement for the A.S. and A.A. degrees.
Lecture: 3 hours per week
Corequisite Lab: ENSI 119L (2 hours per week)
Prerequisite: MATH 025 or COMPASS College Algebra > 40, ACT > 19, or SAT > 430

FOOD AND BEVERAGE MANAGEMENT

FDBV 210 Food & Beverage Purchasing Controls
3 Credits Offered Fall Semester

This course is an introduction to the principles and procedures used in the purchase of foods in quantity and the use of standards to calculate costs. Selection and procurement methods used in the hospitality business and methods for maintaining an effective system of food, labor, and sales income will be addressed.
Lecture: 3 hours per week

FDBV 220 Food & Beverage Operations Management
3 credits Offered Spring Semester

This course will focus on profit/cost margins, daily balance sheets, banking procedures, charting and forecasting products and services, personnel development and management, documentation systems, target marketing, and regulations governing the food and beverage industry.
Lecture: 3 hours per week

GEOGRAPHY

GEOG 100 Physical Geography
4 Credits Offered Each Semester

Physical Geography is an introduction to the earth’s physical systems and the interaction among the atmosphere, hydrosphere, biosphere, and lithosphere. It emphasizes the atmospheric sciences (weather and climate), landforms, water resources,
and soils. Concurrent enrollment in GEOG 100L is required.
This course satisfies a laboratory science course requirement for the A.S. and A.A. degrees, and a general education requirement for the A.A.S. degree.
Lecture: 3 hours per week
Corequisite Lab: GEOG 100L (2 hours per week)

GEOLOGY

GEOL 101 Physical Geology
4 Credits Offered Each Semester

Physical Geology is the study of the origin and development of the earth. It includes the detailed study of the development of the earth’s crust, its minerals, rocks, volcanoes, glaciers, mountains, and continents. This course provides an understanding of the natural and physical processes of the planet earth and an appreciation for the impact geology has on everyday life. Concurrent enrollment in GEOL 101L is required. In combination with GEOL 101L, this course satisfies a laboratory science course requirement for the A.S., A.A., and A.A.S. degrees.
Lecture: 3 hours per week
Corequisite Lab: GEOL 101L (2 hours per week)

GEOL 102 Historical Geology
4 Credits Offered Each Semester

Historical Geology is an introduction to the principles and interpretation of geologic history. It emphasizes the evolution of the earth’s lithosphere (crust), atmosphere, and biosphere through geologic time. This course includes consideration of the historical aspects of plate tectonics, the geologic development of North America, and important events in biologic evolution and the resulting assembly of fossils. Geology 102 provides an appreciation for the vast extent of geologic time, the natural processes affecting change on the earth, and the identification of common fossil types. This course satisfies a laboratory science requirement for the A.S., A.A., and A.A.S. degrees.
Lecture: 3 hours per week
Corequisite Lab: GEOL 101L (2 hours per week)
Recommended: Prior or concurrent enrollment in GEOL 101

GEOL 123 Geology of Idaho and the Pacific Northwest
4 Credits Offered on Demand

Geology 123 is the study of the geologic history of Idaho and the Pacific Northwest. It examines the development of existing geologic structures and rock types, focusing on the development and distribution of major topographic and scenic features. Included are field trips to areas of important mineral and gem occurrences. This course provides an appreciation for the development and distribution of geologic natural resources in the region. This course satisfies a laboratory science requirement for the A.S., A.A., and A.A.S. degrees.
Lecture: 3 hours per week
Corequisite Lab: GEOL 123L (2 hours per week)
Recommended: Prior or concurrent enrollment in GEOL 101
GEOL 255  Systematic Mineralogy
4 Credits  Offered Spring Semester on Demand

This is a study of the classification and determination of minerals by physical, chemical, and crystallographic and optical properties. It emphasizes occurrences, identification, and uses of the silicate minerals and the non-silicate ore and rock-forming minerals. The weekly three-hour laboratory includes hands-on testing and identification of mineral samples including utilizing their optical properties in oil mounts and thin section, and field trips to significant mineral locations. Students learn to recognize and identify important ore and industrial minerals, while gaining an appreciation for the application of mineral resources to everyday life. A background in chemistry is helpful. This course satisfies a laboratory science requirement for the A.S., A.A., and A.A.S. degrees.

Lecture: 3 hours per week
Corequisite Lab: GEOL 255L (3 hours per week)
Prerequisite: GEOL 101, 101L

ARTG 211  Illustration II
2 Credits  Offered Spring Semester

This course is a continuation of ARTG 210, emphasizing the skills necessary to creatively solve visual problems and meet deadlines. Included will be newspaper illustration, technical illustration, literary illustration, and statistical illustration. This is a required course in the Graphic Design program.

Lecture/Lab: 4 hours per week
Prerequisite: ARTG 210

ARTG 212  Illustration III
2 Credits  Offered Fall Semester

This course offers advanced instruction in the creation of strong and effective visual concepts using both electronic and traditional illustration media. This course provides important skills for potential illustrators, artists, and designers. It is a required course in the Graphic Design program.

Lecture/Lab: 4 hours per week
Prerequisites: ARTG 210 and ARTG 211

ARTG 210  Illustration I
2 Credits  Offered Fall Semester

ARTG 210 offers an introduction to illustration for the graphic designer with emphasis on developing an ability to rapidly visualize and illustrate objects, environment, and people. Skill instruction will include using 1-2-3 point perspective, creating objects out of simple forms, and using shading, shadows, and textures. This is a required course in the Graphic Design program.

Lecture/Lab: 4 hours per week
Prerequisite: Graphic Design major

ARTG 223  Graphic Design III
3 Credits  Offered Spring Semester

Graphic Design III offers instruction in the use of computer technology for the graphic designer. Students gain hands-on exposure to a variety of computer hardware, including a review of hardware options for creating an electronic design station. This course introduces the student to various computer and software applications (word processing, painting, drawing, and page design programs) to design ads, illustrations, and other print communications. ARTG 223 develops the creative use of computer technology for graphic design.
ARTG 255 Design Concepts for the Web
2 Credits Offered Fall Semester
One of the primary demands of the graphic designer is that of web page development and marketing. In this class, students will learn to design web pages using search engine optimization, target market development strategies, and attract visitors to a web page. Students will learn the procedures required to produce a secure site for credit card transactions. Students will understand how to register a domain name and maintain and update websites.
Lecture/Lab: 3 hours per week
Prerequisite: ARTG 221, ARTG 222

ARTG 283 Capstone I
3 Credits Offered Spring Semester
ARTG 283 offers the graphic design student the opportunity to complete a working portfolio and learn the business strategies necessary to compete in the world of graphic design. This is a required course in the Graphic Design program. It is restricted to sophomores.
Lecture/Lab: 4 hours per week
Prerequisite: ARTG 131, ARTG 132, ARTG 221, and ARTG 222

ARTG 284 Capstone II
3 Credits Offered Each Semester
The purpose of Capstone II is twofold. First, it is designed to give potential graphic artists information on how to design a necessary marketing strategy toward employment either in the freelance or studio market to be able to compete in the world of graphic design. To that end, approximately one hour of each class will be devoted to the business strategies and the remainder will focus on the building of a portfolio. Students will look into best business practices, customer/designer interaction, and billing and presentation strategies: how to sell designs. Second, the portfolio (traditional and electronic versions) will be developed. A review of the current and latest technology applicable to graphic design will be presented to ease transition before entering the field.
Lecture/Lab: 5 hours per week
Prerequisite: ARTG 222, ARTG 223, ARTG 255, and ARTG 283.

ARTG 290 Internship
3 Credits Offered Each Semester
This course is designed to provide students with practical, on-the-job experience in preparation for a successful career in the graphic design field. The internship is paired with in-class learning and weekly meetings with the sponsoring instructor and designated business or agency. An internship is an excellent job market pathway. This is a required course in the Graphic Design program.
Lecture/Lab: 3 hours per week
Prerequisite: Sophomore level and instructor permission.

HVAC 161 HVAC/R Principles
3 Credits Offered Fall Semester
This course is designed to explore the common aspects of HVAC/R technology. Discussion will focus on such topics as psychometrics, air distribution and balance, as well as system installation and controls. This is a required class in the HVAC/R program. Current industry professionals who want to update skills are invited to take this class as a stand alone course.

HVAC 161L HVAC Lab I
5 Credits Offered Fall Semester
Students enrolled in the HVAC/R program are required to take this class concurrently with theory classes. Of the required 5 credits, a maximum of 2 credits can be substituted in an approved internship/co-op with instructor permission.

HVAC 165 HVAC/R Electrical
4 Credits Offered Fall Semester
Basic electrical safety and electrical theory such as Ohms Law, circuit schematics and circuit characteristics/symbols will be discussed as it applies to DC and AC circuits in the HVAC/R industry. Basic control circuits, sequence of operation for basic HVAC/R applications and electric motor theory, as well as specific information on HVAC/R electrical component devices will also be covered. Both electrical testing and troubleshooting methods are taught and practiced. HVAC/R professionals are invited to take this class as a refresher to update skills. Students enrolled in the HVAC/R program are required to take this class as part of their program.

HVAC 167 HVAC Heating
4 Credits Offered Fall Semester
This course will focus on basic heat transfer theory and concepts. Specific areas of study include the different mediums used for heat transfer, electric heat systems, and fossil fuel systems (natural gas, propane and fuel oil). Residential and light commercial system applications will be made throughout the program. Industry professionals who want to update skills are encouraged to take this class as a stand alone course. Students enrolled in the HVAC/R program are required to take this class as part of their program.

HVAC 171L HVAC/R Lab II
5 Credits Offered Spring Semester
This lab provides students an opportunity to apply and prac-
HIST 102 History of Civilization Since 1500
3 Credits  Offered Each Semester
History 102 explores human society’s development and variety from the Renaissance to today, focusing on Western culture. It examines such world-changing events and ideas as the Reformation and the age of discovery, the scientific revolution and enlightenment, the rise of nationalism and world war, technological change, and “future shock.” Students will consider how the past affects the present and future. This course is recommended for any liberal arts program and is required for many degrees and majors. It provides an excellent opportunity for students to discover how all fields of knowledge fit together into a big picture. It meets a social science requirement for A.A. and A.S. degrees.
Lecture: 3 hours per week
Recommended: ENGL 101 and good reading skills

HIST 103 The 20th Century World
3 Credits  Offered Each Semester
This course is a survey of the history of the 20th century, beginning in 1871 with the formation of the modern German state and continuing to the present. Emphasis will be placed on the causes and effects of the two World Wars, the dynamics of the Cold War, the rise of technology, and the role of the nation-state. Students are expected to read and write at college level and are required to participate in discussions.
Lecture: 3 hours per week

HIST 111 U.S. History: Discovery-Reconstruction
3 Credits  Offered Each Semester
History 111 offers a broad chronological overview of U.S. History which deals with political, economic, social, and cultural development from the Pre-Columbian period through post-Civil War Reconstruction (c. 1876). Attention is focused on differing historical interpretations and on themes which illuminate current events. This course serves as partial fulfillment of the social science requirement for A.A. and A.S. degrees and is transferable to regional four-year institutions.
Lecture: 3 hours per week
Prerequisite: Good writing and communication skills

HIST 112 U.S. History: Gilded Age-The Present
3 Credits  Offered Each Semester
History 112 offers a broad chronological overview of U.S. History which deals with political, economic, social, and cultural development from the Gilded Age (c. 1876) through the present. Attention is focused on differing historical interpretations and on themes which illuminate current events. This course serves as partial fulfillment of the social science requirement for A.A. and A.S. degrees and is transferable to regional four-year institutions.
Lecture: 3 hours per week
Prerequisite: Good writing and communication skills

HIST 204A Researching and Writing
(Same as ENGL 204A) a Personal Family History
Offered on Demand 3 Credits
HIST 204A introduces students to research and writing skills to enable them to record their family's history. Students will learn to use oral history interviews, private and public genealogical and historical records, family folklore, and computer tools that are revolutionizing family history research. Students

Course Descriptions
will work with writing techniques that can transform dull data into a lively family saga. The course follows an informal workshop format, including several research field trips to regional archives. This course is an excellent opportunity to develop research and writing skills and pursue a project of personal value. It is recommended for history and English majors as a way to put theory into practice. It is designed for genealogy beginners with good command of basic English writing skills and some computer experience with Windows.
Lecture: 3 hours per week

HIST 204B Oral History Research
3 Credits
Offered on Demand

Oral History Research uses audio or videotape to record the firsthand experiences and knowledge of men and women who have helped shape North Idaho history. Each student will choose a topic of special interest and prepare a series of interviews to be preserved for the future in the regional oral history archive, housed in the NIC library. History 204B provides guided practice in one of today’s historians most indispensable research techniques, as well as a chance to make a significant contribution to the community. This transferable elective is recommended for history majors, future teachers, and those with an interest in preserving local history. Students should own or borrow an audio cassette tape recorder or video camcorder with a microphone and furnish their own blank tapes.
Lecture: 3 hours per week
Prerequisite: Good writing and communication skills

HIST 210 Introduction to Modern Latin American History
3 Credits
Offered Spring Semester

This course provides a survey of economic, political, social, and cultural developments in selected Latin American countries each of which represents a larger region, from independence to the present. Students are expected to read and write at college level and will be required to participate in discussions. It meets a cultural diversity requirement for the A.A. degree or a social science requirement for the A.A., A.S., and A.A.S. degrees.
Lecture: 3 hours per week
Prerequisite: Good writing and communication skills

HIST 240 American Indian History
3 Credits
Offered Spring Semester

HIST 240 provides a historical overview of post-contact Indian and non-Indian relations and their effect on Indian culture, including reactions, adaptations, and conflicts in social, political, and economic systems. Some emphasis will be placed on prominent Indian personalities and geographical groups, their migrations and intertribal and U.S. government relationships, including federal Indian policy. Students will gain a deeper sense of "nations" and an understanding of the importance of tribal heritage and identify from a historical perspective. It meets a cultural diversity requirement for the A.A. degree or a social science requirement for the A.A., A.S., and A.A.S. degrees.
Lecture: 3 hours per week
Prerequisite: AIST 101, ANTH 225 or HIST 101, or HIST 111 or 112.

HIST 290 The Historian’s Craft
3 Credits
Offered Spring Semester

HIST 290 provides an introduction to the discipline of history, to basic skills for coursework and research, and to major schools of historical writing. This course fulfills a major requirement for transfer institutions in Idaho.
Lecture: 3 hours per week
Prerequisite: ENGL 101
Prerequisite or Corequisite: ENGL 102

HOSPITALITY

HOSP 100 Introduction to Hospitality Management
3 credits
Offered Upon Demand

This course provides a general overview of hospitality management. It covers the growth and development, organization and structure, and the functional areas of the lodging and food service industry. Included are an explanation of both the management and operational functions of hospitality operations, a discussion of the personal and professional demands of hospitality management, an examination of managing human resources, and an exploration of the future of the industry.
Lecture: 3 hours per week

HOSP 105 Food and Beverage Service Sanitation
3 credits
Offered Upon Demand

This course provides practical skills and knowledge for effective management of food and beverage service in outlets ranging from cafeterias and coffee shops to room service, banquet areas, and high-check average dining rooms. HOSP 105 presents basic service principles while emphasizing the special needs of guests. The course also emphasizes how to effectively manage sanitation to achieve high standards that will keep customers coming back.
Lecture: 3 hours per week

HOSP 110 Front Office Procedures
3 credits
Offered Upon Demand

Front Office Procedures details the flow of business through a hotel beginning with the reservation process and ending with check-out settlement. Included are examinations of how front desk activities and functions influence other departments and impacts management. The course also addresses ethics and general strategies when dealing with the public.
Lecture: 3 hours per week

HOSP 115 Hospitality Field Experience
3 credits
Offered Upon Demand

This is an introduction to actual on-the-job work experience. Exposure to the demands and practices of the hospitality industry is intended to help the student discover whether the hospitality field is an appropriate career choice. This course is waived for students with one full year of appropriate employment experience in the industry. The course includes student, employer, and coordinator evaluations; on-site work visits; written assignments; and oral presentations.
Lecture: 3 hours per week
**HOSP 120 Supervisory Housekeeping**  
3 credits  
*Offered Upon Demand*

This course describes the management functions, tools, and practices required in the lodging housekeeping department.  
Lecture: 3 hours per week  
Prerequisites: HOSP 100, HOSP 105, HOSP 110, and HOSP 115

**HOSP 125 Hospitality Maintenance and Engineering**  
3 credits  
*Offered Upon Demand*

This course is an introduction to the technical knowledge required to establish preventative maintenance procedures.  
Lecture/Lab: 3 hours per week  
Prerequisites: HOSP 100, HOSP 105, HOSP 110, and HOSP 115

**HOSP 130 Hotel Security Management**  
3 credits  
*Offered Upon Demand*

This course examines the issues surrounding the need for individualized security programs. It also explores how to make a difference in the safety and security of guests, hotel property, and fellow employees.  
Lecture: 3 hours per week  
Prerequisites: HOSP 100, HOSP 105, HOSP 110, and HOSP 115

**HOSP 210 Food and Beverage Controls**  
3 credits  
*Offered Upon Demand*

This course covers the principles involved in an effective system of food, beverage, labor, and sales income controls in the hospitality industry.  
Lecture: 3 hours per week  
Prerequisites: HOSP 100, HOSP 105, HOSP 110, and HOSP 115

**HOSP 215 Food and Beverage Controls**  
3 credits  
*Offered Upon Demand*

This course explores how to balance marketing and control objectives, plan the business, select and train employees, and establish and maintain control systems. In-depth material on responsible alcohol service and range of beverage products is included.  
Lecture: 3 hours per week  
Prerequisite: HOSP 210

**HOSP 220 Hotel/Restaurant Management Principles**  
3 credits  
*Offered Upon Demand*

This course is an introduction to the principles of hotel and restaurant management and their relationship to the overall management of facilities and personnel. The development of supervisory skills and coaching techniques needed to improve the performance of employees emphasized.  
Lecture: 3 hours per week  
Prerequisite: HOSP 210

**HOSP 225 Meeting and Convention Management**  
3 credits  
*Offered Upon Demand*

This course identifies the elements and techniques used in obtaining convention business. The course describes the different types of corporate meetings, the personnel who control these meetings, and the management skills and methods required to communicate with meeting planners.  
Lecture: 3 hours per week  
Prerequisite: HOSP 210

**HUMANITIES**

**HUMS 101 Montage: Introduction to the Humanities**  
3 Credits  
*Offered Each Semester*

This course explores how the humanities, through many varied types of creative works, comment on human experiences and raise questions of value and meaning. Students will learn an approach to understanding a wide variety of works in art, music, literature, and philosophy, based on questions applicable to all genres. The course is highly interactive, with frequent class discussion and informal written responses to works being explored. This course provides a good foundation for further humanities study in courses focusing on one particular field such as literature, philosophy, or the arts. It is an ideal course for students who intend to focus on areas other than the humanities, but wish to broaden their education. It fulfills an arts and humanities requirement for the A.A. and the A.S. degrees.  
Lecture: 3 hours per week  
Prerequisite or Corequisite: ENGL 101

**HUMAN RESOURCES ASSISTANT**

**HRA 110 Diversity and Human Relations**  
3 Credits  
*Offered Fall Semester*

This course is designed to help human resources professionals recognize the need to incorporate diversity into all phases of the organization. Topics include understanding and valuing diversity, diversity in the workforce, managing diversity, cultural elements, and communication issues.  
Lecture: 3 hours per week

**HRA 125 Overview of Employment Laws**  
3 Credits  
*Offered Spring Semester*

This course introduces the principle laws and regulations affecting public and private organizations and their employees or prospective employees. Topics include fair employment practice, EEO, affirmative action, and employee rights and protections.  
Lecture: 3 hours per week

**HRA 210 Recruiting, Selection, and Retention**  
3 Credits  
*Offered Fall Semester*

This course introduces the basic principles involved in assisting in the employment process. Topics include personnel planning, recruiting, interviewing and screening techniques; maintaining employee records; and employee retention.  
Lecture: 3 hours per week

**HRA 220 Health, Safety, and Security**  
1 Credit  
*Offered Fall Semester*

This course includes the study of issues related to occupational health, safety, and security. Students will study OSHA
goals and the impact of safety related problems; employee occupational health programs/policies and employer liabilities; safety practices; reducing/eliminating risk of loss of organization assets; and other organizational security techniques.

Lecture: 1 hour per week

**HRA 230**  
**Human Resource Development**  
3 Credits  
Offered Fall Semester

This course covers developing, conducting, and evaluating employee training. Emphasis is placed on conducting a needs assessment, using various instructional approaches, designing the learning environment, and locating learning resources.

Lecture: 3 hours per week

**HRA 240**  
**HR Compensation & Benefit Administration**  
3 Credits  
Offered Spring Semester

This course is designed to study the basic concepts of compensation and benefits administration and its role in rewarding performance. Topics include compensation theory, legal issues, job documentation processes, conducting wage and salary surveys and uses of the results, job analysis, job evaluation techniques, benefits, and pay-for-performance programs.

Lecture: 3 hours per week

**HRA 250**  
**Employee Relations**  
3 Credits  
Offered Spring Semester

This course covers how to assist in developing a strong employee relations program. Topics include effective feedback, performance appraisals, individual employment rights, employee attitudes, behavior problems, and implementing discipline strategies.

Lecture: 3 hours per week

**HRA 260**  
**HR Management Practices**  
3 Credits  
Offered Spring Semester

This course is an overview of human resources management practices. The course covers organizational change and how human resources fits in the organization. The course also covers human resource planning, information systems, quality and performance management, leadership, employee involvement, and international human resources management.

Lecture: 3 hours per week

**HRA 290**  
**Human Resource Assistant Internship**  
3 Credits  
Offered Spring Semester

Human Resources Assistant Internship provides supervised training in administrative skills through on-the-job experience in a human resources office. This course provides practical application of human resources assistant skills as part of the learning process. It involves approximately nine hours per week of in-office work. It is a required course in the Human Resources Assistant program and is graded on a satisfactory/unsatisfactory basis.

In-Office Work: 135 hours

Prerequisite: BUSO 101A, CAPS 135, ENGL 272, HRA 110, 125, 210

Corequisite: HRA 220, 230, 240, 250, 260

**NOTE:** There is no formal application process for the Human Services Program. Students must proceed through the coursework in sequence and with instructor approval.

**HSS 101**  
**Introduction to Human Services**  
3 Credits  
Offered Fall Semester

This course provides an overview of human service agencies, institutions, and programs that help meet human services needs. Students explore human service roles, career opportunities, and communication skills required to be successful in the field.

**HSS 102**  
**Introduction to Human Services Lab**  
1 Credit  
Offered Fall Semester

This weekly three-hour course provides students an opportunity to explore human service careers that may be of interest. It assists with developing beginning observation, recording, and reporting skills based on selected field exploration areas. Students will conduct interviews and participate in on-the-job shadowing experiences. This is a required course for all human service students. All students who have a sincere interest in exploring health and human service career options are welcome.

Corequisite: HSS 101

**HSS 110**  
**Human Services I: Direct Care Assessment and Intervention**  
4 Credits  
Offered Spring Semester

This course focuses on assessment and intervention principles and the skills required for working with individuals and groups that need assistance in leading self-directed and meaningful lives. Emphasis will be given to individuals who are mentally, emotionally, and/or developmentally disabled in institutional and community-based settings.

Prerequisite: PSYC 101 or SOC 101, 102; HSS 101, 102

**HSS 111**  
**HSS Field Experience I**  
3 Credits  
Offered Spring Semester

HSS 111 provides students the opportunity to develop skills in providing psychosocial, community, and educational services that assist individuals to lead self-directed and meaningful lives. The field experience may be in institutional or community-based agencies, depending on the student's interest.

Corequisite: HSS 110 and permission of the instructor

**HSS 121**  
**HSS Field Experience II**  
4 Credits  
Offered Summer Session

This eight-week field experience totaling 180 hours provides students opportunities to further develop skills in providing psychosocial, community, and educational services that assist individuals to lead self-directed and meaningful lives. The field experience may be in institutional or community-based agencies depending on the student's interest. This course includes field trips and seminar participation.

Prerequisite: HSS 111 and permission of the instructor
**Course Descriptions**

### JOURNALISM

**COMJ 100**  
**Sentinel (NIC Newspaper) Staff**  
1 or 2 Credits  
Offered Each Semester  
This course provides technical training and application of journalism theory and techniques. Students are staff members of The Sentinel, the NIC student newspaper, and work positions that reflect a professional journalism organization. Sentinel students learn the practical workings of a newspaper, including reporting, editing, design, photo journalism, computer technologies, and advertising. Projects contribute to a student's portfolio and provide the basis for refining journalistic skills supporting career development. The course may be repeated for a total of 10 credits. Previous or concurrent news writing, photo, art and/or web page experience is advised.  
Lab Class Coordinating: Varies according to credits  
Prerequisite or Corequisite: COMJ 121

**COMJ 121**  
**News Writing**  
3 Credits  
Offered Fall Semester  
This course provides an introduction to the principles of news writing, focusing on organization and writing methods for media. Students develop news stories in lab and outside of class. Sentence structure competence is necessary. Mastering the basics of news writing, students will improve their abilities to participate as members of communications professions in print, broadcast, and corporate areas.  
Lecture: 4 hours a week combined with lab time  
Prerequisite or Corequisite: ENGL 101

**COMJ 140**  
**Mass Media in a Free Society**  
3 Credits  
Offered Fall Semester  
This course examines today's American media - their development, successes, and failures. Career options are explored through tours and guest presentations by working professionals. After completion of COMJ 140, students will know if a media career is an option to pursue. Students will gain a clear view of themselves as media consumers. Topics that will be covered in upper division coursework will be introduced.  
Lecture: 3 hours per week

**COMJ 222**  
**Crisis Intervention**  
3 Credits  
Offered Fall Semester  
This course provides an introduction and overview of crisis theory and management. It will assist Human Services students in developing the necessary skills and attitudes appropriate for working with individuals and families in crisis.

**COMJ 224**  
**Human Services Internship & Seminar**  
4 Credits  
Offered Spring Semester  
Students in the second year of the Human Services program will complete a supervised internship of 180 hours in a community public or private human services agency. Students, preceptors, and the instructor will develop specific learning objectives. The internship is accompanied by a weekly seminar that will address issues, problems, and agency experiences with the goal of assisting students to apply classroom concepts to the field.  
Prerequisite: Completion of the Human Services certificate  
Pre-corequisite: HSS 220

**COMJ 254**  
**Editing**  
2 Credits  
Offered Spring Semester  
This course studies the elementary principles of newspaper makeup and fundamentals of editing copy and photographs. It includes practice in news selection and evaluation, writing headlines and photo captions, and newspaper design and composition. The course uses Macintosh computers for desktop publishing. Students learn and practice the responsibilities of an editor, including copy reading and measuring, article evaluation, headlines, page design, and photo editing. Skills gained contribute to portfolio development and career preparation.  
Lecture/Lab: 3 hours per week  
Prerequisite: COMJ 121

**COMJ 298**  
**Journalism Practicum**  
2 Credits  
Offered Each Semester  
Journalism Practicum provides on-the-job training and experience through averaging a four-hour weekly internship in a media-related workplace. Developed as a “contract” agreement between the student intern and a “host” organization with permission of the instructor, this practicum offers practical work experience supporting preparation for upper division college studies or career entry. Students seeking clarification of career direction or “real-world” experience will benefit. This course may be repeated for a total of 8 credits.  
Time: Varies according to project

### LANDSCAPE TECHNOLOGY

**LAND 110**  
**Landscape Plants and Materials**  
3 Credits  
Offered Fall Semester  
Students will study the identification, landscape features and growing conditions of trees, shrubs, herbaceous flowering plants such as annuals, perennials, bulbs, and herbs in the Northwest. Techniques for the correct plant selection, soil needs, and garden layout will be emphasized.

**LAND 105L**  
**Landscape Practices Lab I**  
5 Credits  
Offered Fall Semester  
Students will study the components of landscape technology and related installation procedures and will apply landscape principles learned in the theory classes to construction sites, commercial sites, gardens, and golf courses in a lab setting.

**LAND 241**  
**Human Services Internship & Seminar**  
4 Credits  
Offered Spring Semester  
Students in the second year of the Human Services program will complete a supervised internship of 180 hours in a community public or private human services agency. Students, preceptors, and the instructor will develop specific learning objectives. The internship is accompanied by a weekly seminar that will address issues, problems, and agency experiences with the goal of assisting students to apply classroom concepts to the field.  
Prerequisite: Completion of the Human Services certificate  
Pre-corequisite: HSS 220

NOTE: Course enrollment requires prior acceptance into the Landscape Technology program. Successful completion of each semester and/or permission of the instructor is required for enrollment in the next semester.
LAND 115 Landscape Horticulture
2 Credits Offered Spring Semester
This course is an introduction to the biological aspects of plant life, including cell structure, anatomy and taxonomy, and the environmental factors which affect plant growth. This course is designed for students who are not majoring in the sciences and emphasis is on the practical application of horticultural principles.

LAND 120 Pest Management
2 Credits Offered Summer Session
Students will study basic control methods as they apply to insects, fungi, bacteria, biotic, and other pests in the landscape. Identification of pests as well as mechanical, cultural, biological, and chemical controls will be discussed.

LAND 125L Landscape Practices Lab II
5 Credits Offered Spring Semester
This course will further address the components of landscape and hardscape applications. Students will receive an overview of the technical operations of a landscape firm. Students will work on group and individual class projects that will continue to expose them to the practices and application of landscape construction.

LAND 130 Soils and Plant Nutrition
2 Credits Offered Summer Session
This course will expose students to soil and plant interrelationships and soil development and terms. Emphasis will be placed on the use of organic and inorganic means to provide optimum environment for plant growth. Soil testing and judging will be extensions of basic topics.

LAND 135 Landscape History and Design
2 Credits Offered Fall Semester
Students will study the application of landscape design principles to construction situations. Emphasis will be placed on graphic representations of plant materials and landscape structures.

LAND 140 Turf Management
2 Credits Offered Summer Session
This course is an in-depth study of commercial lawn maintenance and installation including fertilization, spraying, mowing, irrigation, soil preparation, selection and establishment, weed and pest identification, and diagnosis of disorders. Emphasis will be placed on cultural practices required in the care of commercial, residential, parks, and golf courses.

LAND 145 Equipment Operations and Maintenance
1 Credit Offered Spring Semester
This course covers operating principles related to landscape tools which include hand, power, and large equipment. Maintenance and repair techniques will be discussed as well as safety standards and practices.

LAND 145L Equipment Operations and Maintenance Lab
2 Credits Offered Spring Semester
Students will receive hands-on experience operating common landscape hand tools, power tools, and large equipment.

LAND 150 Landscape Irrigation
1 Credit Offered Fall Semester
Students will be introduced to the materials used, installation procedures, and maintenance for residential and small commercial spray and drip irrigation systems. Applied math calculations will be used in system layout.

LAND 150L Landscape Irrigation Lab
2 Credits Offered Fall Semester
Students will use the knowledge gained in theory to design residential, commercial, and drip irrigation systems.

LAND 195 Landscape Seminar and Internship
3 Credits Offered Spring Semester
The Landscape Technology internship is a structured experience with local firms designed to match the student's abilities and career goals. Students will function in a position under the direct supervision of a selected employer.

LAND 195L Landscape Seminar and Internship Lab
3 Credits Offered Spring Semester
Students will have an opportunity to work on group and individual class projects that will continue to expose them to the practices and application of landscape construction.

NOTE: LAWE 103, 202, and 205 may be taken without being accepted into the Law Enforcement program. All other LAWE courses require application and acceptance into the program before enrolling.

LAWE 103 Introduction to Criminal Justice
3 Credits Offered Each Semester
This course offers an introduction to the purpose, function, and brief history of the agencies dealing with criminal justice, while presenting a survey of requirements for entering criminal justice service. Students discuss crime, the criminal, traffic, and vice as social problems; the function of the courts; prosecution and defense attorneys; correctional and penal institutions; and probation and parole. This course will introduce the student to the various agencies and employment opportunities within the criminal justice system. This is a required course in the Law Enforcement program.

LAWE 202 Corrections in America
3 Credits Offered Fall Semester
This course includes a survey of the historical, philosophical, and legal bases of correctional procedures and institutions and an examination of current problems and innovations. Prerequisites: LAWE or CJ 103 or permission of instructor.

LAWE 205 Criminal Procedure
3 Credits Offered Spring Semester
This course includes an examination of the procedural aspects of criminal law. It will include specific applications of procedures by actors in the criminal justice process including police, prosecutors, defense attorneys, judges, and corrections officials. This examination will provide a basic understand-
This course covers the use of force, baton training, pepper spray training, handcuffing techniques, people searches, firearms liability, safety, inspection and maintenance, basic marksmanship, day and night range practice, and handgun and shotgun qualifications. Classroom and hands-on training in above areas are integral to this course. Students must demonstrate skills taught and pass the Idaho POST firearms qualification courses for handgun and shotgun. This is a required course in the Law Enforcement program.

**LAWE 220 Basic Police Law**

*2 Credits*

Offered Fall Semester

This course is the study of basic police law as it relates to the U.S. Constitution, Idaho Codes, liquor laws, rules of evidence, criminal law, arrest, search and seizure, traffic code, and Idaho Fish and Game Laws. After completing the course, students will be able to determine traffic offenses, criminal offenses, probable cause for arrest, and how to process cases. This is a required course in the Law Enforcement program.

**LAWE 221 Professional Orientation**

*1 Credit*

Offered Fall Semester

This course studies the human dimensions of the police profession including standards for police ethics and professionalism, media relations, crime prevention, and human relations. This is a required course in the Law Enforcement program.

**LAWE 222 Police Procedures**

*2 Credits*

Offered Fall Semester

This course teaches fundamental patrol skills such as searching buildings, operating emergency vehicles, and writing reports. It also includes jail procedures, communication methods, officer survival, and courtroom demeanor and testifying. This is a required course in the Law Enforcement program.

**LAWE 223 Patrol Procedures**

*1 Credit*

Offered Fall Semester

This course teaches patrol procedures and techniques for crimes in progress, including responding to armed robberies; low-risk, high-risk, and felony traffic stops; prowler calls, hostage situations; and domestic disputes. This is a required course in the Law Enforcement program.

**LAWE 224 Practical Problems**

*1 Credit*

Offered Fall Semester

This course provides an opportunity for the student to demonstrate and utilize classroom skills in simulations and exercises in crime scene investigation, search warrant application, traffic stops, arrest situations, and domestic disputes. This is a required course in the Law Enforcement program.

**LAWE 225 Investigation**

*3 Credits*

Offered Fall Semester

This course provides theory, techniques, and procedures for the investigation of traffic accidents, auto theft, juvenile crimes, allegations of child abuse, DUI situations, and suspicious deaths. It includes techniques and procedures for drug identification, protection of crime scenes, collecting evidence, fingerprinting, interviewing, notification, and interrogation. This is a required course in the Law Enforcement program.

**LAWE 226 Enforcement Skills**

*1 Credit*

Offered Fall Semester

This course provides hands-on training in handgun retention, arrest and control techniques, and handling hazardous materials. This is a required course in the Law Enforcement program.

**LAWE 228 Police Physical Fitness**

*1 Credit*

Offered Fall Semester

This course provides physical health and conditioning methods and includes work on agility, flexibility, and conditioning. Students must pass the Idaho POST Physical Fitness Test. This is a required course in the Law Enforcement program.

**LAWE 230 Law Enforcement Professionalism**

*2 Credits*

Offered on Demand

This course introduces principles and concepts of law enforcement professionalism. Emphasis is placed on preparing for courtroom testimony, cultural diversity, community policing, and preventing misconduct. Topics include understanding the role in the courtroom, stereotyping, prejudice and discrimination, cultural conflicts, the problem-solving process, ethical dilemmas, and developing integrity as a leader.

**Entry-Level Skills:** Minimum competency levels in reading, writing, and mathematics.

**LAWE 231 Officer Survival**

*3 Credits*

Offered on Demand

This course is designed to increase officer safety, enhance professionalism, decrease citizen complaints, decrease vicarious liability, and lessen personal stress on the job and at home. The course covers laws regarding the use of force, civil and criminal liability, mental conditioning, post-shooting trauma, and the dynamics of lethal force. Also included are dealing with gangs, suicide, crisis negotiating, and off-duty officer survival. The principles discussed in this course have applications for a variety of law enforcement operations.

**Entry-Level Skills:** Minimum competency levels in reading, writing, and mathematics.

**LAWE 232 Career Enhancement**

*3 Credits*

Offered on Demand

This course provides analyses of cutting-edge contemporary criminal justice issues. Topics may include terrorism, public perceptions of crime, legal issues, and school violence. Focus will be on high-impact police leadership and the fundamentals of interpersonal relations, supervising techniques, and professional ethics. Report-writing skills to prepare a legally sound report will also be covered. This course is designed to enhance skills of the already practicing police officer.

**Entry-Level Skills:** Minimum competency levels in reading, writing, and mathematics.

**LAWE 233 Initial Investigations**

*3 Credits*

Offered on Demand

This course provides an examination of the fundamentals of criminal investigation from the crime site to the courtroom preparation experience. Topics include an analysis of tech-
This course is designed to provide in-depth instruction in Idaho law enforcement procedures such as laws of arrest, legal liability, use of force, officer's rights, and the court systems for adult detention, juvenile detention, and juvenile probation. Students will also examine and practice appropriate responses in domestic violence, sexual assault, and child abuse situations. In addition, agro-terrorism awareness will be addressed.

Entry-Level Skills: Minimum competency levels in reading, writing, and mathematics.

**LAWE 234**  
Drug Investigations  
3 Credits  
Offered on Demand

This course provides instruction in the multifaceted aspects of drugs and alcohol within the criminal justice system. The course will teach students theories of addiction, substance abuse identification, seizure procedures and requirements, informant development, investigative techniques, surveillance methods, and risk factors of undercover investigations.

Entry-Level Skills: Minimum competency levels in reading, writing, and mathematics.

**LAWE 235**  
Enhanced Patrol  
2 Credits  
Offered on Demand

This course is designed to increase officer safety through enhanced patrol procedures and techniques. Students will examine and practice appropriate responses to active shooters, commercial trucking violations, outlaw bikers, emotionally disturbed persons, robbery, homicide, in-progress crimes, drug interdiction, stolen vehicles, and document forgery. The elements of a successful field training officer program will be introduced. In addition, National Incident Management System (NIMS) and Incident Command Systems (ICS) awareness will be addressed.

Entry-Level Skills: Minimum competency levels in reading, writing, and mathematics.

**LAWE 236**  
Terrorism  
2 Credits  
Offered on Demand

This course introduces officers to terrorism, specifically those terrorist acts that present the greatest threat to the United States today. A thorough examination of the causes of terrorism, prevailing terrorist networks including domestic terrorists, operations, common characteristics of terrorists, surveillance detection, hostage survival, and protective measures will be presented. Special emphasis will be placed on basic medical techniques for officers in a critical incident.

Entry-Level Skills: Minimum competency levels in reading, writing, and mathematics.

**LAWE 237**  
Use of Force  
1 Credit  
Offered on Demand

This course will introduce students to an overall understanding of techniques and strategies for employing the appropriate level of force in a given situation. Students will learn about the requirements for the application of less-than-lethal force, tactics used in gun retention, and respiratory compliance techniques.

Entry-Level Skills: Minimum competency levels in reading, writing, and mathematics.

**LAWE 238**  
Idaho Law Enforcement  
3 Credits  
Offered on Demand

This course is designed to provide in-depth instruction in

**LIBRARY SKILLS**

**LIBS 120**  
Introduction to Library Research Strategies  
1 Credit  
Offered on Demand

Introduction to Library Research Strategies is intended to enhance the research skills of students. This course provides instruction in the use of the public catalog, periodical indexes, reference works, library classification systems, computer information systems, and basic research techniques. Students are introduced to a variety of services and resources offered by libraries that are essential to most college programs.

Lecture: 1 hour per week

**MACHINE TECHNOLOGY**

**MACH 151**  
Machining Technology Theory I  
4 Credits  
Offered Fall Semester

This basic course consists of learning terminology, measuring systems, and using measuring tools. Some of the instruments used are hand tools, mechanical instruments, lathes, and mills. Students will use shop math for problem solving. Machining Technology Theory is necessary for the safe, efficient operation of industrial machinery.
MACH 151L Machining Technology Laboratory I  
6 Credits  
Offered Fall Semester  
Machining Technology Lab consists of machining projects designed to promote machining skills on all shop machinery and hand tools. Projects are graded to assure that blueprint tolerances are met. Skills learned in theory sessions are transferred to the lab through projects. Students must acquire their own tools, but may use shop tools temporarily. A tool list is supplied to students at the beginning of the course.

MACH 152L Machining Technology Laboratory II  
5 Credits  
Offered Spring Semester  
This lab is a continuation of MACH 151L. Students continue to progressively attempt more difficult projects. The main project for the class is the manufacture of a model Stirling Engine utilizing an assortment of materials and machining strategies. The nature of tolerance build-up in assemblies and effective time management are emphasized.

MACH 160 Manufacturing Processes  
4 Credits  
Offered Spring Semester  
This course covers manufacturing strategies from interchangeability of common parts to third wave production techniques and “design for assembly.” Basic Computer Assisted Machining (CAM) will be emphasized.

MACH 171 Blueprint Reading I  
2 Credits  
Offered Fall Semester  
Blueprint reading consists of a series of exercises involving visualization skills. This series takes students from basic knowledge to a point where they can interpret simple orthographic blueprints. Blueprint reading is essential to produce required work pieces on machines.

MACH 172 Blueprint Reading II  
2 Credits  
Offered Spring Semester  
This course is a continuation of MACH 171 with an emphasis on more complex prints, geometric dimensioning, and tolerancing.

MACH 185 Statistical Process Control and Mechanical Measurements  
1 Credit  
Offered Spring Semester  
This class is geared to real life application in the machine trades and concentrates on the statistical concepts of mode, median, mean, and standard deviation for samples and populations. Success is dependent on being able to read precision measuring instruments and applying it to real manufactured parts for data gathering. The lab addresses the application of methods of inspection and measurement of mechanical parts. Activities include measuring instruments, gauging equipment, work holding methods, and surface finishes. The lab utilizes tools found in machine shops and inspection departments.

MACH 231 Computers in Machining  
3 Credits  
Offered Fall Semester  
This course is designed to provide students with extensive experience with CAD/CAM systems. Students will use PCs to prepare for employment in the computerized manufacturing workplace with the opportunity to become certified in Master CAM Mill. Students will also explore other software applications commonly used in the workplace.

MACH 234 Advanced Machining Processes & Techniques  
5 Credits  
Offered Spring Semester  
This course offers hands-on experience under work-like conditions and in-depth CNC and manual projects that build on skills acquired in MACH 253L. Upon successful completion of this course, students should have the necessary skills to be employed as an entry-level machinist.  
Prerequisite: MACH 253L

MACH 253L Advanced Machining Laboratory I  
5 Credits  
Offered Fall Semester  
This course is a hands-on learning experience using tools and techniques discussed in the first year machining program and MACH 253. Students will gain experience on such machines as CNC lathes, CNC mills, precision grinders, as well as practice on advanced techniques on other manual machines.  
Prerequisite: MACH 152L or instructor permission

MACH 273 Intermediate Blueprint Reading  
3 Credits  
Offered Fall Semester  
Students will learn to interpret advanced drawings and blueprints as well as make sketches with dimensions and additional information necessary to complete projects. Study of all types of section views, complex drawings, and unusual methods of drawing parts to better show features will also be completed. Students will receive hands-on experience sketching and interpreting sketches.  
Prerequisite: MACH 172

MACH 274 Geometric Dimensioning & Tolerancing  
3 Credits  
Offered Spring Semester  
This course introduces students to the concepts used in the machine trades known as geometric dimensioning and tolerancing. It builds on prior knowledge of blueprints and machined parts and applies that knowledge to “geometric toleranced” drawings. Students will learn the terminology and definitions of geometric dimensioning and tolerancing and how to apply its concepts.

MACH 283 Computer Numerical Control Theory I  
5 Credits  
Offered Fall Semester  
This course introduces students to the standard practices and methods used in CNC machining for the CNC lathe and CNC milling machine. Students will be familiarized with the different types of controls and machines. Students will also learn basic programming, setup, and part production.  
Corequisite: MACH 253L

MACH 284 Advanced Machining Laboratory II  
5 Credits  
Offered Spring Semester  
Students will learn more complex methods and setups as well as be exposed to other types of CNC machines. They will also learn precision grinding and finishing skills, tool and cutter grinding, fixtureing, and production planning.  
Prerequisite: MACH 283
NOTE: Enrollment requires prior acceptance into the program. Successful completion of each semester and/or permission of the instructor is required for enrollment in the next semester.

**MM 151**  
**Maintenance Mechanic Theory I**  
10 Credits  
Offered Fall Semester

Maintenance Mechanics Theory is an introduction to the principles of oxyacetylene and arc welding; hand, power, precision measuring tools; thread systems and fasteners; industrial materials; safe rigging practices; mechanical drive systems; and equipment installation and alignment.

**MM 151L**  
**Maintenance Mechanic Laboratory I**  
5 Credits  
Offered Fall Semester

Maintenance Mechanic Lab applies the skills learned in MM 151, including oxyacetylene and arc welding, precision measuring, tool usage, material usage, rigging, equipment installation, and alignment. Students will work on assigned tasks, projects, and performance tests.

**MM 152**  
**Maintenance Mechanic Theory II**  
7 Credits  
Offered Spring Semester

This course provides instruction in the technical skills required in the safe use of GMAW & GTAW welding, industrial electricity, pipe fitting, coupling maintenance and alignment, bearings, packings, seals, and pumps. Prior completion of MM 151 with a grade of C- or better is required.

**MM 152L**  
**Maintenance Mechanic Laboratory II**  
5 Credits  
Offered Spring Semester

This laboratory applies the skills learned in MM 152 including exercises in GMAW (wirefeed) welding, coupling alignment and maintenance, bearing maintenance, pipe fitting, electric motor and control maintenance, and pump maintenance. Exercises in hydraulics components and troubleshooting areas are also included. Prior completion of MM 151 and MM 151L with a grade of C- or better is required.

**MM 153**  
**Maintenance Mechanic Theory III**  
2 Credits  
Offered Summer Session

This course continues instruction in safety, GTAW (TIG) welding, and industrial mechanic skills including flat pattern layout, sheet metal, and continued electrical practices. Prior completion of MM 152 with a grade of C- or better is required.

**MM 153L**  
**Maintenance Mechanic Laboratory III**  
4 Credits  
Offered Summer Session

This laboratory applies skills learned in MM 153. Students will work on assigned tasks, projects, and performance tests. Prior completion of MM 151 and MM 152L with a grade of C- or better is required.

**MM 155**  
**Blueprint Reading**  
2 Credits  
Offered Fall Semester

This course provides the maintenance mechanic/millwright with necessary skills to understand industrial blueprints. Students will learn how to effectively troubleshoot industrial hydraulic systems with emphasis on reservoirs, pumps, filters, directional flow and pressure control valves, cylinders, and motors. Hands-on applications are addressed in MM 152L.

### MATHEMATICS

**NOTE:** A student initially placed in a developmental mathematics course, (MATH 015, 025, 108), must earn a grade of C- or better in that course and in all subsequent courses in the developmental sequence in order to proceed to a college level mathematics course.

**MATH 015**  
**Basic Mathematics**  
3 Credits  
Offered Each Semester

MATH 015 is an introduction to operations of whole numbers, fractions, ratios and proportions, decimals, percents, positive and negative integers, and geometry. The course format includes informal lecture with instructor assistance. Students are assisted in developing mathematical proficiency in basic computational skill areas required for pre-college level math courses.

Lecture: 3 hours per week

Prerequisite: Entry is based on an appropriate score on the placement test, COMPASS Pre-Algebra > 32 or a grade of C- or better in that course and in all subsequent courses in the developmental sequence in order to proceed to a college level mathematics course.

**MATH 024**  
**Technical Mathematics**  
3 Credits  
Offered Each Semester

MATH 024 is designed as a basic math course for students in technical programs. Each section of the course will be specific to one technical program and appropriate applications for that program will be stressed throughout. All sections will review operations of fractions and decimals, percents, ratios and proportions, calculator usage, signed numbers, evaluating formulas, equation solving, geometry, and the metric system. Trigonometry will be introduced when appropriate.

Lecture: 3 hours per week

Prerequisite: Entry is based on an appropriate score on the placement test, either COMPASS Pre-Algebra > 32 or a grade of C- or above in MATH 015. These scores are under review—refer to the online catalog for up-to-date information.

**MATH 025**  
**Elementary Algebra**  
3 Credits  
Offered Each Semester

Math 025 is an introduction to mathematical concepts dealing with signed numbers, variables, polynomials, exponents, factoring, solving and graphing first-degree equations and inequalities. The course also introduces solving factorable second-degree equations. It emphasizes the practical applications of these concepts. The course provides important skill-building for those who have not taken or have had difficulty with high school algebra.

Lecture: 3 hours per week
Prerequisite: Entry is based on an appropriate score on the placement test, either COMPASS Pre-Algebra > 44 or a grade of C- or above in MATH 015. These scores are under review—refer to the online catalog for up-to-date information.

MATH 102 Computational Skills for Allied Health
3 Credits
Offered Each Semester

MATH 102 includes instruction in systems of measurement (including metric and apothecary); conversions; reductions; dimension analysis; interpreting drug orders and labels; calculating oral, parenteral, and pediatric dosages; intravenous (IV) and advanced IV calculations; ratios and proportions; solving linear equations, formulas, and solution; and mixture problems. MATH 102 does not satisfy the core math requirement for the A.A. or A.S. degrees.

Lecture: 3 hours per week

Prerequisite: Entry is based on an appropriate score on the placement test, either COMPASS Algebra > 40, ACT Math > 18, SAT Math > 430, or a grade of C- or above in MATH 025; enrollment limited to Practical Nursing and Pharmacy Technician students.

MATH 108 Intermediate Algebra
4 Credits
Offered Each Semester

MATH 108 continues development of mathematical concepts beyond MATH 025 or first year high school algebra. It includes linear and quadratic equations, algebraic fractions, radicals, circles and parabolas, complex numbers, functions and logarithms. There is an emphasis on the application of these skills. The course provides important skill building for entry into college-level math courses. Enrollment is based on placement test results. This course does not fulfill the math requirement for the A.A., A.S., or A.A.S. degrees.

Note: MATH 108 carries no credit if taken after successful completion of a higher numbered math course.

Lecture: 4 hours per week

Prerequisite: Entry is based on an appropriate score on the placement test, either COMPASS Algebra > 40, ACT Math > 18, SAT Math > 430, or a grade of C- or above in MATH 025. These scores are under review—refer to the online catalog for up-to-date info.

MATH 123 Contemporary Mathematics
3 Credits
Offered Each Semester

In MATH 123, mathematical methods and concepts are applied to modern day situations. Intended primarily for liberal arts majors, this course offers many useful techniques and insights for our increasingly technical world. It is assumed that students coming into the course have a working knowledge of algebra at an intermediate level. Topics may vary as textbooks change, but typically include a variety from the following: voting theory, apportionment, probability, statistics, consumer finance, paths and networks, scheduling, fair division, right-angle trigonometry, similarity and scaling, exponential and logistic growth, renewable resources, linear programming, and game theory. MATH 123 satisfies the math requirement for the A.A., A.S., and A.A.S. degrees.

Lecture: 3 hours per week

Prerequisite: Entry is based on an appropriate score on the placement test, either COMPASS Algebra > 45, ACT Math > 19, SAT Math > 460 or a grade of C- or above in MATH 108.

MATH 130 Finite Mathematics
4 Credits
Offered Each Semester

MATH 130 is the study of solutions and practical applications to systems of linear equations and inequalities, linear programming, sets, counting techniques, probability, and elementary concepts of statistics. This course provides useful skills to aid decision making in many diverse fields, but focuses primarily on business applications. It satisfies the mathematics requirement for the A.S., A.A., and A.A.S. degrees and is often required for transfer business degrees.

Note: MATH 130 carries no credit if taken after successful completion of a higher numbered math course.

Lecture: 4 hours per week

Prerequisite: Entry is based on an appropriate score on the placement test, either COMPASS Algebra > 45, ACT Math > 19, SAT Math > 460 or a grade of C- or above in MATH 108.

MATH 143 College Algebra
3 Credits
Offered Each Semester

MATH 143 begins by taking a deeper look at the definition of functions, their properties and notation in both an algebraic and graphical context. The course then focuses on the study of equations and graphs of polynomial, rational, exponential, and logarithmic functions. Additional topics include conic sections and sequences. This course prepares students for MATH 160. The combination of MATH 143 followed by MATH 144 may be used in place of MATH 147 as the prerequisite for MATH 170. MATH 143 satisfies the math requirement for the A.A., A.S., and A.A.S. degrees.

Note: MATH 143 carries no credit if taken after successful completion of MATH 147.

Lecture: 3 hours per week

Prerequisite: Entry is based on an appropriate score on the placement test, either COMPASS Algebra > 61, ACT Math > 23, SAT Math > 540 or a grade of C- or above in MATH 108.

MATH 143D College Algebra-Drafting Applications
1 Credit
Offered Each Semester

MATH 143D is a lab/recitation course for students in the Drafting Technology and Design program. This course includes radian measure, applications of right triangle trigonometry, areas of triangles, Laws of Sines and Cosines, and vectors. Mathematical modeling with drafting emphasis is stressed.

Lecture/Recitation: 1 hour per week

Prerequisite: MATH 108 or successful completion of two years of high school algebra and an appropriate score on the placement test.
Corequisite: MATH 143

MATH 143E College Algebra-Electronics Applications
1 Credit
Offered Each Semester

MATH 143E is a lab/recitation course for students in the Electronic Technology program. This course includes radian measure, applications of right triangle trigonometry, graphs of trigonometric functions, complex numbers, polar coordinates, and vectors. Mathematical modeling with electronics emphasis is stressed.

Lecture/Recitation: 1 hour per week
Prerequisite: MATH 108 or successful completion of two years of high school algebra and an appropriate score on the placement test. Corequisite: MATH 143

MATH 144 Analytic Trigonometry
2 Credits Offered Each Semester
Math 144 includes angles, trigonometric functions, their graphs and the application thereof, right-triangle trigonometry, trigonometric identity verification, trigonometric formulas, inverse trigonometric functions, and the law of sines and cosines. It satisfies 2 credits towards the mathematics requirement for the A.A., A.S., and A.A.S. degrees.

Note: MATH 144 carries no credit if taken after successful completion of MATH 147.

Lecture: 2 hours per week
Prerequisite: Entry is based on an appropriate score on the placement test, either COMPASS Algebra > 61, ACT Math > 23, SAT Math > 620 or a grade of C- or above in MATH 143.

MATH 147 Pre-Calculus
5 Credits Offered Each Semester
MATH 147 is designed for the well-prepared mathematics student who wishes to condense the one-year sequence of MATH 143 and 144 into one semester. It is the study of polynomial and rational equations, functions and their inverses, graphs, systems of equations, complex numbers, exponential and logarithmic functions, trigonometric functions, identities and graphs, applications of triangles, and polar coordinates. This course prepares students for calculus courses which are required for degrees in mathematics, engineering, computer science, physics, chemistry, and others. It satisfies the mathematics requirement for the A.A., A.S., and A.A.S. degrees.

Note: MATH 147 carries no credit if taken after successful completion of MATH 160 or MATH 170. MATH 147 carries two credits if taken after MATH 143.

Lecture: 5 hours per week
Prerequisite: Entry is based on an appropriate score on the placement test, either COMPASS Algebra > 61, ACT Math > 23, SAT Math > 540 or a grade of C- or above in MATH 108.
Prerequisite/Corequisite: MATH 148

MATH 148 Mathematics Technology
1 credit Offered Each Semester
This course explores the use of technological tools, such as graphing calculators and mathematical software to solve problems in mathematics. Opportunities to perform basic operations including computation, graphing, and manipulation of statistical data are presented. Students are encouraged to compare the different techniques and develop strategies to determine how to effectively utilize the available tools. This course counts as an elective towards the A.A. or A.S. degrees.

Lecture: 1 hour per week
Prerequisite: MATH 108 with a grade of C- or higher
Corequisite: MATH 147 or higher

MATH 149 Discrete Mathematics
4 Credits Offered Each Semester
MATH 149 is intended for computer science majors, mathematics majors, and for other students wishing to pursue in-depth study in computer science. Topics covered will include basic set theory, propositional and predicate logic, number systems, Boolean algebra, combinators, and graph theory. Little or no programming will be done.
MATH 253 Principles of Applied Statistics
3 Credits Offered Each Semester
MATH 253 is an introduction to statistical methods covering both descriptive statistics and inferential statistics, which includes hypothesis testing, correlations and regression, chi-square, and analysis of variance. Probability is included as needed. This course is suitable for a broad range of majors.
Lecture: 3 hours per week
Prerequisite: Entry is based on an appropriate score on the placement test, either COMPASS Algebra > 61, ACT Math > 23, SAT Math > 540 or a grade of C- or above in MATH 130, MATH 143, or MATH 147.

MATH 257 Math for Elementary School Teachers II
3 Credits Offered Each Semester
This course is a lecture/lab course that is a continuation of MATH 157 and is required for elementary teacher certification by the State of Idaho. It does NOT satisfy the math requirement for the A.A., A.S., or A.A.S. degree. This course has a topical emphasis on statistics, probability, geometry, and measurement. It demonstrates the usefulness of math in ordinary life, the aesthetic side of math, and the overall richness of the study of geometry.
Lecture: 3 hours per week
Lab: 1 hour per week
Prerequisite: MATH 157 with a grade of C- or higher.

MATH 275 Analytic Geometry & Calculus III
4 Credits Offered Each Semester
MATH 275 is a continuation of the calculus sequence. It includes the study of vectors and vector valued functions, and the ideas of the calculus of a single variable are extended to functions of several variables. Partial differentiation and multiple integration are used to examine Green's Theorem, Stokes' Theorem, and the Divergence Theorem from vector analysis. This course provides an understanding of the mathematics necessary for mathematics degrees and the study of multivariable physical phenomena in the physical science, chemistry, and engineering areas.
Lecture: 4 hours per week
Prerequisite: MATH 175 with a grade of C- or higher

MATH 335 Linear Algebra
3 Credits Offered Fall Semester
This course includes the study of linear systems, matrices, determinants, vector spaces, linear transformations, eigenvalues, and diagonalization of matrices with applications.
Lecture: 3 hrs per week
Prerequisite: MATH 170 with a grade of C- or higher

MATH 370 Intro to Ordinary Differential Equations
3 Credits Offered Spring Semester
MATH 370 studies classification, initial value problems, exact equations, second order equations with constant coefficients, variation of parameters, Laplace transforms, series methods, and linear and non-linear systems of equations amid various applications.
Lecture: 3 hours per week
Prerequisite: MATH 275 with a grade of C- or higher

MODERN LANGUAGES

Formerly listed in catalog as “Foreign Languages.”
One full year of high school study in a modern language is generally considered equivalent to one semester’s work in college. To receive college credit for high school or independent work, a student must take an advanced placement examination in the target language and complete the next semester advanced level with a grade of “C” or better. Placement in, and completion of the second elementary level or first intermediate level, will give a student credit for the first elementary level; placement in, and completion of the second semester intermediate level, will give a student credit for the first three semesters of the target language.
NIC will not offer to students modern language credit (FREN 101, 102, 201, 202; GERM 101, 102, 201, 202; SPAN 101, 102, 201, 202) in their native language. Native language is defined as the official language(s) of the country where a student is a citizen or the language of primary instruction during the student’s secondary school education.

ASL 101 Beginning Sign Language I
5 Credits Offered Fall Semester
This course is designed for students with no previous language study. It creates a visual-gestural environment to introduce to ASL grammar and vocabulary without presenting English equivalents. This course includes interactive activities, cultural awareness education, and individual feedback. Emphasis is on appropriate language use in common communication settings. ASL 101 will prepare students for ASL 102.
Lecture: 6 hours per week

ASL 102 Beginning Sign Language II
5 Credits Offered Spring Semester
American Sign Language II is designed for students continuing from ASL 101. It creates a visual-gestural environment to introduce to ASL grammar and vocabulary without presenting English equivalents. This course includes interactive activities, cultural awareness education, and individual feedback. Emphasis is on appropriate language use in common communication settings. ASL 102 will prepare students for intermediate ASL classes at other colleges/universities to satisfy cultural diversity and/or foreign language requirements (depending on the institution).
Lecture: 6 hours per week
Prerequisite: ASL 101

CDA 101 Elementary Coeur d’Alene Language I
5 Credits Offered Fall Semester
CA 101 is an introduction to an American Indian language designed for students with no previous foreign language study. The course will include specialized methods of working with an unwritten language and emphasize pronunciation, beginning grammar, vocabulary-building, and an introduction to Coeur d’Alene Tribal culture. Successful completion of CA
101 and 102 allows entry into the intermediate level course that satisfies the cultural diversity requirement for the A.A. degree or one of the arts and humanities requirement for the A.S. degree.
Lecture: 5 hours per week (includes lab)

**CDA 102 Elementary Coeur d'Alene Language II**
5 Credits  Offered Spring Semester
CA 102 is the second semester of an introduction to the native language of the Coeur d'Alene Tribe. It completes the outline of the major grammatical systems of the language. The skills acquired in CA 101 and CA 102 will prepare students for the intermediate level course that satisfies the cultural diversity requirement for the A.A. degree or one of the arts and humanities requirement for the A.S. degree.
Lecture: 5 hours per week (includes lab)
Prerequisite: CA 101

**FREN 101 Elementary French I**
5 Credits  Offered Fall Semester
This course provides training in the acquisition and application of basic language skills and culture.
Lecture: 3 hours per week
Prerequisite: FREN 101 or appropriate language placement test score

**CDA 201 Intermediate Coeur d'Alene Language**
4 Credits  Offered Fall Semester
CA 201 provides training in conversational proficiency in an American Indian language. It features detailed discussion of grammar knowledge gained in CA 101 and CA 102 and insights into Coeur d'Alene culture revealed in the traditional oral literature. This course satisfies four credits of the cultural diversity requirement for the A.A. degree or one of the arts and humanities requirement for the A.S. degree.
Lecture: 4 hours per week
Prerequisite: CA 102

**FLAN 106 Collaborative Cultural Exchange Program**
1-2 Credits  Offered Either Semester
This course is designed to match non-native speakers of English with American, or other native English students, to the mutual benefit of both. They will study and converse with one another in a structured and monitored situation, working on projects in established courses and in short-term EFL programs. The course may be repeated for a total of three credits.
Interactive Conversation Class: 2-4 hours per week, depending on credits

**FLAN 207 Contemporary World Cultures**
3 Credits  Offered Each Semester
Foreign Language 207 examines a single national culture in terms of its historical background and expression in contemporary life, language, institutions, literature, art, music, and lifestyles. This course provides a basis for comparative cultural studies for students interested in multicultural or international scholarship. It meets the cultural diversity requirement for the A.A. degree and satisfies an arts and humanities requirement for the A.S. degree. The national culture selected for study may change each semester, allowing students to repeat the course for elective credit.
Lecture: 3 hours per week

**FREN 102 Elementary French II**
4 Credits  Offered Fall Semester
This course is the second semester of Elementary French and continues the acquisition and application of basic language skills and culture. A laboratory is included in the course. Successful completion of this course gives students the required skills to take the intermediate level courses which satisfy the cultural diversity requirement of the A.A. degree or one of the arts and humanities requirements for the A.S. degree.
Lecture: 5 hours per week and lab TBA
Prerequisite: FREN 101 or appropriate language placement test score

**FREN 103 Self-Guided Language Study in French**
1 Credit  Offered Each Semester
This course provides individualized, self-paced practice in French and is intended to provide students with additional language study and skills development though the use of the Language Lab. It is for students who plan to enter a more advanced language course or who have taken all available language courses. It may be repeated for a total of two credits and is graded on a satisfactory/unsatisfactory basis. This course is an elective supplement to classroom studies.
Lecture: Time based on student/instructor agreement

**FREN 104 Open Door to French I**
2 credits  Offered Each Semester
This course emphasizes conversation skills, contemporary language, and culture. The content is designed to meet the professional or leisure linguistic needs of the community.
Lecture: 2 hours per week

**FREN 105 Open Door to French II**
2 credits  Offered Each Semester
FREN 105 is a continuation of FREN 104. This course is designed to meet the linguistic needs of the community.
Lecture: 2 hours per week
Prerequisite: FREN 104

**FREN 201 Intermediate French I**
4 Credits  Offered Fall Semester
Intermediate French provides training in the acquisition and application of basic language skills and culture. A laboratory is included in the course. It satisfies four credits of the cultural diversity requirement for the A.A. degree or one of the arts and humanities requirements for the A.S. degree.
Lecture: 4 hours per week and lab TBA
Prerequisite: FREN 102 or appropriate language placement test score

**FREN 202 Intermediate French II**
4 Credits  Offered Spring Semester
The second semester of Intermediate French provides additional training in the acquisition and application of basic language skills and culture. A laboratory is included in the course.
Intermediate French II satisfies four credits of the cultural diversity requirement for the A.A. degree or one of the arts and humanities requirements for the A.S. degree.

**Course Descriptions**

**GERM 101**  
**Elementary German I**  
5 Credits  
Offered Fall Semester  
This course concentrates on the study and application of vocabulary and pronunciation at an introductory level. Students will develop proficiencies in speaking, reading, listening, and writing while enhancing their understanding of the language, culture, and geography of German-speaking countries. A laboratory is included in the credits for this course.

**Lecture:** 5 hours per week and lab TBA  
**Prerequisite:** GERM 101 or appropriate language placement test score

**GERM 124**  
**Open Door to German I**  
2 credits  
Offered Each Semester  
This course emphasizes conversation skills, contemporary language, and culture. Its content is designed to meet the professional or leisure linguistic needs of the community.

**Lecture:** 2 hours per week

**GERM 125**  
**Open Door to German II**  
2 credits  
Offered Each Semester  
GERM 125 is a continuation of GERM 124. This course is designed to meet the linguistic needs of the community.

**Lecture:** 2 hours per week  
**Prerequisite:** GERM 124

**GERM 201**  
**Intermediate German I**  
4 Credits  
Offered Fall Semester  
Intermediate German provides additional development in the language with an emphasis on conversation, reading, grammar, and composition. Varied aspects of the current cultural climate of Germany are woven into the course, so students increase proficiency of their language skills. This course meets the cultural diversity requirement for the A.A. degree or one of the arts and humanities requirements for the A.S. degree.

**Lecture:** 4 hours per week and lab TBA  
**Prerequisite:** GERM 102 or appropriate language placement test score

**GERM 202**  
**Intermediate German II**  
4 Credits  
Offered Spring Semester  
This course is a continuation of GERM 201 and meets the cultural diversity requirement for the A.A. degree or one of the arts and humanities requirements for the A.S. degree. A laboratory is included in the credits for this course.

**Lecture:** 4 hours per week and lab TBA  
**Prerequisite:** GERM 201 or appropriate language placement test score

**JAPA 123**  
**Conversation Course: Open Door to Japanese Level I**  
2 Credits  
Offered Upon Demand  
This introductory course is designed for students who wish to learn elementary communication skills. Subjects discussed include traveling, food, lodging, shopping, and customs. Students will gain practical conversation skills and become familiar with Japanese culture.

**Time requirement:** TBA

**JAPA 124**  
**Conversation Course: Open Door to Japanese Level I**  
2 Credits  
Offered Upon Demand  
This course is a continuation of Japanese 123.

**Time requirement:** TBA  
**Prerequisite:** JAPA 123

**SPAN 101**  
**Elementary Spanish I**  
5 Credits  
Offered Each Semester  
This course includes the study of vocabulary, grammar, and pronunciation. It emphasizes the development of proficiencies in speaking, reading, listening, and writing. Students will enhance their understanding of the language, culture, and geography of the Hispanic world. A laboratory is included.

**Lecture:** 5 hours per week and lab TBA

**SPAN 102**  
**Elementary Spanish II**  
5 Credits  
Offered Each Semester  
This course is a continuation of SPAN 101, emphasizing further development of basic language fluency. A laboratory is included in the course.

**Lecture:** 5 hours per week and lab TBA  
**Prerequisite:** SPAN 101 or appropriate language placement test score

**SPAN 103**  
**Self-Guided Language Study in Spanish**  
1 Credit  
Offered Each Semester  
This course provides individualized, self-paced practice in Spanish and is intended to provide students with additional language study and skills development through the use of the Language Lab. It is for students who plan to enter a more advanced language course or who have taken all available language courses. It may be repeated for a total of two credits and is graded on a satisfactory/unsatisfactory basis. This course is an elective supplement to classroom studies.

**Lecture:** Time based on student/instructor agreement

**SPAN 104**  
**Open Door to Spanish**  
2 credits  
Offered Each Semester  
This introductory course is designed for students who wish to learn elementary communication skills. Subjects discussed include traveling, food, lodging, shopping, and customs. Students will gain practical conversation skills and become familiar with Spanish culture.

**Time requirement:** TBA
SPAN 104  Spanish for the Professions  3 credits     Offered Each Semester
This course is a three semester-hour class focused on the needs of those who are, or will be, working in the community in occupations where a basic knowledge of the Spanish language and culture is needed. The course is not designed as an alternative to the traditional Spanish 101, 102, 201, 202 sequences, but will focus on the special vocabulary, basic grammatical structures, and cultural insights needed to effectively serve the Spanish-speaking community. Special emphasis is placed on oral proficiency as it relates to various real-world applications corresponding to the profession selected for the particular course. Each semester a specific profession is chosen for emphasis on a rotational basis. The one-semester courses include Spanish for Medical Personnel, Spanish for Law Enforcement, and Spanish for Social Services. This course counts as a non-core elective for students working toward their degrees at NIC. No prior knowledge of Spanish is necessary.
Lecture: 3 hours per week

SPAN 184  Open Door to Spanish I  2 credits     Offered Each Semester
This introductory course is designed for students who wish to learn elementary communication skills in Spanish. Subjects discussed include traveling, food, lodging, and shopping. Students will gain practical conversation skills and become familiar with cultural differences likely to be encountered in the Hispanic world.
Lecture: 2 hours per week

SPAN 185  Open Door to Spanish II  2 credits     Offered Each Semester
SPAN 185 is a continuation of SPAN 184. Prior completion of SPAN 184 with a grade of C- or better is required.
Lecture: 2 hours per week
Prerequisite: SPAN 184

SPAN 201  Intermediate Spanish I  4 Credits     Offered Each Semester
Intermediate Spanish further develops Spanish fluency with emphasis on conversation, reading, grammar, and composition. The culture and literature of Spain and Latin America are also examined. This course provides a continuation and refinement of language skills and greater depth in the study of cultural aspects. It meets the cultural diversity requirement for the A.A. degree or one of the arts and humanities requirements for the A.S. degree. Laboratory work is included.
Lecture: 4 hours per week and lab TBA
Prerequisite: SPAN 102 or appropriate language placement test score

SPAN 202  Intermediate Spanish II  4 Credits     Offered Each Semester
Spanish 202 is a continuation of SPAN 201. This course has the same degree applications as SPAN 201. Laboratory work is included.
Lecture: 4 hours per week and lab TBA
Prerequisite: SPAN 201 or appropriate language placement test score

SPAN 204A  ST: Spanish Grammar Review  3 Credits     Offered Summer Session
This is a review of the grammatical concepts and communication skills necessary to succeed in Intermediate Spanish. Reading, writing, listening, and speaking capabilities will be reinforced and expanded through individual and small group activities and daily out-of-class assignments. Enrollment requires the equivalent of one year of college-level Spanish.
Lecture: 6 hours per week
Prerequisite: SPAN 101 and SPAN 201

SPAN 205  Intermediate Spanish Conversation  3 Credits     Offered Each Semester
This course is for students who wish to further their conversational skills in Spanish at the intermediate level. The emphasis is on the development of oral and written discourse skills, and on the acquisition of cultural and linguistic knowledge related to specific Spanish-speaking countries. This course is conducted entirely in Spanish.
Lecture: 3 hours per week
Prerequisite or Corequisite: SPAN 202
### MUS 101 Survey of Music
1 Credit  
Offered Each Semester
Survey of Music is an introduction for students (majors and non-majors) to musical styles of our civilization. The study will include music of different periods and its cultural context, including a study of the American culture and the present musical scene. This course provides an arts and humanities requirement for either the A.A. or A.S. degree.

Lecture: 3 hours per week

### MUS 103 North Idaho College Concert Choir
1 Credit  
Offered Each Semester
Concert Choir is North Idaho College’s large vocal ensemble organized to perform standard and mixed choir arrangements. This course may be taken as an ensemble elective for music majors and may be repeated for credit. Credit may be transferable. Choir membership is open to college students and area residents.

### MUS 104 Vocal Jazz Ensemble
1 Credit  
Offered Each Semester
The North Idaho College Vocal Jazz Ensemble is a small group that performs studio quality popular and swing jazz music. It provides a choral learning atmosphere with an emphasis on small group dynamics, solo performance, and an aggressive singing style. This course is for students interested in an intense study of the vocal jazz form. It may be repeated for credit.

Prerequisite: Audition and permission of instructor

### MUS 106 North Idaho College Wind Symphony
1 Credit  
Offered Each Semester
The North Idaho College Wind Symphony is an instrumental ensemble designed to perform traditional and contemporary concert band literature. Band membership is open to college students and area residents. This course provides students and area residents a chance to enhance their music appreciation through musical performance. It may be repeated for credit.

### MUS 107 Cardinal Pep Band
1 Credit  
Offered Each Semester
The Cardinal Pep Band is an instrumental ensemble designed to perform at athletic events and other school events. It may be repeated for a maximum of four credits.

Prerequisite: Audition and permission of instructor

### MUS 109 Coeur d’Alene Symphony Orchestra
1 Credit  
Offered Each Semester
The Coeur d’Alene Symphony Orchestra is an ensemble organized to perform a standard orchestral repertoire. Credit may be transferable. The course may be used as an ensemble elective for music majors and can be repeated for credit. Orchestra membership is open to college students and area residents.

### MUS 110 Vocal Ensemble
1 Credit  
Offered Each Semester
This course introduces students to literature for the particular type of ensemble and includes involvement in regular public performances with other small ensembles. It is designed to provide a variety of vocal experiences for the student: male quartet, mixed quartet, female trio, duets, musical theater, etc. Ensemble membership is open to college students and area residents. This course may be repeated for credit.

Prerequisite: Audition and permission of instructor

### MUS 111 Instrumental Ensemble
1 Credit  
Offered Each Semester
Instrumental ensembles are small groups of brass, woodwind, string, percussion, pit orchestra, or mixed instruments organized to perform standard chamber music repertoire. Credit may be transferable and can be repeated for credit. Ensemble membership is open to college students and area residents.

Prerequisite: Audition and permission of instructor

### MUS 112 Introduction to Voice
1 Credit  
Offered Each Semester
This introductory level course is designed to provide group instruction in the basic techniques of vocal performance. This course will emphasize reading musical notation and vocal production. Students enrolling need no prior musical background. This course may be repeated for credit.

### MUS 113 North Idaho Jazz Ensemble
1 Credit  
Offered Each Semester
North Idaho Jazz Ensemble is an instrumental ensemble designed to perform jazz literature in all 20th century styles. Ensemble membership is open to college students and area residents. This course provides students and area residents a vehicle for jazz appreciation through performance. It may be repeated for credit.

Prerequisite: Audition and permission of instructor

### MUS 114 Individual Instruction
2 Credits  
Offered Each Semester
MUS 114 provides individual instruction for non-majors in voice and on piano, guitar, and all orchestra and band instruments. Individual instruction in an area of choice can assist students of all levels to improve their performance abilities. Special fees apply. Two credits requires one half-hour lesson per week. This course requires public performance and may be repeated for credit.

Lecture/Lab: One half-hour session per week

### MUS 117 Music Convocation
0 Credit  
Offered Each Semester
Concert attendance is required for all music majors. Attendance at six concerts is required each semester.

### MUS 120 Fundamentals of Music
3 Credits  
Offered Each Semester
MUS 120 is an introduction to the basic materials of music. Areas explored are acoustics, rhythmic and melodic notation of music, scales, keys, and basic harmony. Fundamentals of Music is for the novice or experienced musician who wants to develop or refresh music reading skills.

Lecture: 3 hours per week
MUS 124  Individual Instruction  2 or 4 Credits  Offered Each Semester
MUS 124 provides individual instruction in voice and on piano, guitar, and all band and orchestra instruments. This course is designed for music majors and requires prior musical experience. Individual instruction in an area of choice can assist students of all levels to improve their performance skills. A jury examination is required. Special fees apply. It may be repeated for credit. The number of credits must be approved by the instructor.
Lecture/Lab: One half-hour lesson per week for 2 credits; one one-hour lesson per week for 4 credits.
Prerequisite: MUS 114 or permission of instructor

MUS 127  Survey of American Popular Music Since 1900  3 Credits  Offered Each Semester
MUS 127 is an introduction for students (majors and non-majors) to the various styles of American popular music—its roots and development. Music will be presented with regard to its historical and social implications. Study includes Dixieland, swing, bebop, fusion, musical theatre, country western, and all types of rock ‘n’ roll. This course is designed to enhance musical appreciation through an increase in musical knowledge. It fulfills an arts and humanities requirement for the A.S. degree.
Lecture: 3 hours per week

MUS 130  Introduction to Piano  1 Credit  Offered Each Semester
This introductory level course is designed to provide group instruction at the piano keyboard. The emphasis of this course is on reading music and playing melody with simple chord accompaniment. Students enrolling need no prior musical background. This course may be repeated for credit.

MUS 140  Introduction to Music Literature  3 Credits  Offered Fall Semester
MUS 140 is an introduction to the art and nature of music with an emphasis on aural skills, historical styles, musical forms, and the literature of music. It is designed for freshman music majors and other students interested in humanities-oriented subject matter. This course fulfills an arts and humanities requirement for the A.A. and A.S. degrees.
Lecture: 3 hours per week

MUS 141  Harmony and Theory I  3 Credits  Offered Fall Semester
MUS 141 is the study and application of the basic materials of music in four-part harmony. Emphasis is placed upon a thorough knowledge of the fundamentals of music, development of composition skills, and beginning analysis skills. It deals with harmonic practice from the year 1600 on. This course fulfills a theory requirement for music majors.
Lecture: 3 hours per week
Corequisite: MUS 141L

MUS 141L  Harmony and Theory I Laboratory  1 Credit  Offered Fall Semester
This laboratory assists students in the development of aural skills such as sight-singing, rhythmic, melodic, and simple harmonic music dictation, and recognition. Emphasis is on materials covered in MUS 141. This course fulfills a theory requirement for music majors and expands upon musical understanding developed in MUS 141.
Lecture: 2 hours per week
Corequisite: MUS 141

MUS 142  Harmony and Theory II  3 Credits  Offered Spring Semester
This course is a continuation of MUS 141, emphasizing expanded use of harmonies in writing and analysis. It fulfills a theory requirement for music majors.
Lecture: 3 hours per week
Corequisite: MUS 142
Prerequisite: MUS 141

MUS 142L  Harmony and Theory II Laboratory  1 Credit  Offered Spring Semester
This laboratory is a continuation of MUS 141L. It fulfills a theory requirement for music majors.
Lecture: 2 hours per week
Corequisite: MUS 142
Prerequisite: MUS 141L

MUS 145  Piano Class I  1 Credit  Offered Fall Semester
This is the first in a four-semester sequence designed for music majors and minors preparing for a keyboard competency exam. Emphasis is on developing basic piano technique, music-reading skills, and reinforcement of music theory fundamentals. Music selections range from classic to contemporary. A minimum grade of C- is required to advance to MUS 146. This class may be repeated for a maximum of 2 credits.
Lecture: 2 hours per week
Prerequisite or Corequisite: MUS 141 or permission of instructor

MUS 146  Piano Class II  1 Credit  Offered Spring Semester
This class is a continuation of MUS 145 and prepares music majors and minors preparing for a keyboard competency exam. Technique, sight reading, harmonization, transposition, improvisation, and piano literature are areas of emphasis. A minimum grade of C- is required to advance to MUS 245. This class may be repeated for a maximum of 2 credits.
Lecture: 2 hours per week
Prerequisite: MUS 145 or permission of instructor

MUS 163  Survey of World Music  3 Credits  Offered Each Semester
This course explores several musical cultures throughout the world, including but not limited to Africa, the Americas, Asia, Near East, Europe, and South Pacific. The course is designed to enhance the student’s appreciation for the diversity of music throughout the world as well as the people that perform it. Students gain an understanding of features in the music that distinguish one style from another and the cultural and social-historical factors that shape the development of music. Lectures, films, recordings, and live presentations assist students in their understanding of course topics. Though a knowledge of music is helpful, a music background is not required for this course. It fulfills an arts and humanities requirement.
MUS 215  Computer Music Notation
1 Credit  Offered Each Semester
This course is an introduction to the use of Finale software (on Macintosh computers) for use of music printing and playback. The course provides musicians training in current technological advances important to the field of music.

MUS 216  Advanced Computer Music Notation
1 Credit  Offered Each Semester
This is a continuation of MUS 215 with an emphasis on mastery of advanced computer editing skills using Finale software.
Prerequisite: MUS 215

MUS 241  Harmony and Theory III
3 Credits  Offered Fall Semester
This course is a continuation of MUS 142 with an emphasis on writing and analysis of music through the Romantic era. It fulfills a theory requirement for music majors.
Lecture: 3 hours per week
Corequisite: MUS 241L
Prerequisite: MUS 142

MUS 241L  Harmony and Theory III Laboratory
1 Credit  Offered Fall Semester
This laboratory is a continuation of MUS 142L. It fulfills a theory requirement for music majors.
Lecture: 2 hours per week
Corequisite: MUS 241
Prerequisite: MUS 142L

MUS 242  Harmony and Theory IV
3 Credits  Offered Spring Semester
This course is a continuation of MUS 241 with emphasis on writing and analysis of music in the 20th century. It fulfills a theory requirement for music majors.
Lecture: 3 hours per week
Corequisite: MUS 242L
Prerequisite: MUS 241

MUS 242L  Harmony and Theory IV Laboratory
1 Credit  Offered Spring Semester
This laboratory is a continuation of MUS 241L. It fulfills a theory requirement for music majors.
Lecture: 2 hours per week
Corequisite: MUS 242
Prerequisite: MUS 241L

MUS 245  Piano Class III
1 Credit  Offered Fall Semester
MUS 245 is a continuation of MUS 146 and prepares music majors and minors preparing for a keyboard competency exam. Further development of technique, sight reading, harmonization, improvisation, and repertoire with addition of score reading is emphasized. A minimum grade of C- is required to advance to MUS 246. This class may be repeated for a maximum of 2 credits.

Prerequisite: MUS 245 or permission of instructor

MUS 246  Piano Class IV
1 Credit  Offered Spring Semester
This course is a continuation of MUS 245 and prepares music majors and minors preparing for a keyboard competency exam. Emphasis will be on reviewing previously acquired phases in technique, sight reading, harmonization, transposition, improvisation, and score reading. More complex harmonies will be introduced. The piano repertoire is at an intermediate level. A minimum grade of C- is required to complete pretesting requirements. This class may be repeated for a maximum of 2 credits.
Lecture: 2 hours per week
Prerequisite: MUS 245 or permission of instructor

MUS 251  Introduction to Music History
3 Credits  Offered Spring Semester
MUS 251 is a general introductory course in music history designated for music majors. It fulfills an arts and humanities requirement for the A.A. and A.S. degrees. The course is designed for students desiring core humanities credit and for sophomore music majors.
Lecture: 3 hours per week

NURSING: PRACTICAL NURSING

NOTE: Course enrollment requires prior acceptance into the Practical Nursing program.

PN 106  Practical Nursing Theory I
6 Credits  Offered Fall Semester
This course includes an introduction to the fundamentals of nursing and therapeutic skills. A lifespan approach will be used to assist students in the theory of oxygenation, circulation, nutritional, fluid, elimination, activity, and safety needs of patients of all ages. Growth and development and an introduction to pediatric and geriatric care will be included.
Prerequisite: Acceptance into the Practical Nursing program

PN 106L  Practical Nursing Laboratory I
6 Credits  Offered Fall Semester
This course involves supervised practice in providing patient care utilizing the campus laboratory for skills practice and clinical settings such as nursing homes, the hospital, and day care centers for actual practice. It comprises a progression of nursing skills.
Prerequisite: Acceptance into the Practical Nursing program

PN 107  Practical Nursing Theory II
8 Credits  Offered Spring Semester
PN 107 explores nursing responsibilities in more complex diseases of major body systems. Medical-surgical nursing, pediatrics, maternity nursing, and psychiatric nursing are included.
Prerequisite: ALTH 107; BIOL 175; PN 106, and 106L

PN 107L  Practical Nursing Laboratory II
6 Credits  Offered Spring Semester
PN 107L correlates PN 107 theory with practice in clinical
settings. Students rotate through medical-surgical, maternity and pediatric units, operating room, recovery room, short stay unit, minor care, EKG, respiratory therapy, and Central Services. Clinical experience in physicians’ offices is included.

Prerequisite: ALTH 107; BIOL 175; PN 106, and 106L.

PN 108 Practical Nursing Theory III
3 Credits
Offered Summer Session

PN 108 covers oncology, death and dying, emergency nursing and will introduce advanced concepts of geriatric care. An opportunity for review of all previous nursing theory will be provided.

Prerequisite: PN 107 and 107L.

PN 108L Practical Nursing Laboratory III
5 Credits
Offered Summer Session

Supervised clinical experience takes place in various health care settings including acute care hospitals, nursing homes, and physicians’ offices. Students complete a clinical preceptorship in a chosen field of interest.

Prerequisite: PN 107 and 107L.

PN 205 Intravenous Therapy for LPNs - Part I
1 Credit
Offered On Demand

This course provides theory and hands-on instruction in skills relating to the LPN’s role in IV therapy. It will include the essential responsibilities in IV therapy and the initiation and maintenance of IV infusion. The course meets the requirements for Part I of the Rules and Regulations of the Board of Nursing for LPNs who wish to perform functions related to IV therapy.

Prerequisite: PN 107 and 107L.

PN 210 Intravenous Therapy for LPNs - Part II
2 Credits
Offered On Demand

This course provides theory and hands-on instruction in all skills relating to the LPN’s role in IV therapy. It will include the essential responsibilities in IV therapy, initiation, and maintenance of IV infusions, and monitoring and maintenance of central venous lines. The course meets the requirements of the Rules and Regulations of the Board of Nursing for LPNs who wish to perform functions related to IV therapy.

Prerequisite: PN 107 and 107L.

PN 215 Nursing Management for LPNs
3 Credits
Offered On Demand

This course provides theory and hands-on instruction in all skills relating to the LPN’s role in nursing management. The course is designed to prepare the LPN to function in the role of charge nurse in long-term care facilities according to federal and state regulations. It gives the LPN the means to perfect management skills and assess them on a continuing basis.

NURSING: REGISTERED NURSING

NOTE: Enrollment requires prior acceptance into the program.

NURS 190 Nursing Practice I
8 Credits
Offered Fall Semester

NURS 190 provides the foundation for nursing practice and caring relationships. The course focuses on the whole person from birth through the lifespan. The course is directed toward the student’s acquiring knowledge, increasing personal and professional understanding, and developing intellectual, interpersonal, and psychomotor nursing skills to assist the person in optimizing health. Learning experiences in health care agencies and community settings provide opportunities for students to apply course content utilizing therapeutic nursing interventions to assist individuals and families in meeting their needs as they adapt to lifespan stressors and environmental stressors.

Lecture: 4 hours per week

Lab: 12 hours per week

Prerequisite: BIOL 227, 228; and ENGL 101

NURS 195 Nursing Practice II
8 Credits
Offered Spring Semester

NURS 195 focuses on the medical-surgical management of pathological processes common through the lifespan, effects on person/family, and implications for nursing care. The course emphasizes the application of the nursing process, caring relationships, and other therapeutic nursing interventions to assist the person in adaptation. Learning experiences in health care settings provide students with opportunities to develop skills in implementation of the nursing process, application of communication abilities, caring behaviors, and utilization of therapeutic nursing interventions.

Lecture: 4 hours per week

Lab: 12 hours per week

Prerequisite: NURS 190; BIOL 250; PSYC 101; COMM 101

NURS 198 Nursing Practice Clinical Practicum
1 Credit
Summer Session (Two-week block)

This course is an elective for students enrolled in the Associate Degree Nursing program. It provides students with opportunities to apply the theory and skills from preceding nursing courses in clinical nursing practice. Patient care experience in an acute care health setting allows students to further develop skills in critical thinking and application of the nursing process, effective communication with patients, family and other health care providers, and implementing therapeutic nursing interventions.

Lab: 3 hours per week

Prerequisite: NURS 190 and 195

NURS 290 Nursing Practice III
8 Credits
Offered Fall Semester

NURS 290 focuses on providing nursing care for persons/families experiencing pregnancy, childbirth, or acute chronic illness. Emphasis is on utilizing knowledge of the altered physiology/pathology, treatment modalities, critical thinking, and therapeutic nursing interventions to optimize health. Learning experiences in health care settings provide students with opportunities to further develop nursing competencies while collaborating with others in caring for multiple clients.

Lecture: 4 hours per week

Lab: 12 hours per week

Prerequisite: NURS 195; ENGL 102; SOC 101; and a Math course that meets the A.S. degree requirements.

NURS 295 Nursing Practice IV
9 Credits
Offered Spring Semester

Nursing Practice IV focuses on providing nursing care at any of the six levels of health care: preventative, primary, secondary, tertiary, restorative and continuing care. The course also focuses on providing care for persons/families with mental
health disorders. The course emphasizes the development of critical thinking and the development of competencies required to provide care for individuals, families, and groups of patients in a variety of health care settings. Learning experiences take place in mental health facilities, acute care and long-term care facilities, and community health care settings. These experiences provide the student opportunities to develop competencies in providing care, clinical decision making, collaborating with other health care providers, and professional development.

Lecture: 4 hours per week
Lab: 15 hours per week
Prerequisite: NURS 290

---

**OUTDOOR POWER/ RECREATIONAL VEHICLE TECHNOLOGY**

**OPRV 105 Orientation/Safety/Shop Practices**

2 Credits  
Offered Fall Semester

This course introduces students to on-campus services including the library and College Skills Center. It includes instruction about the industry including wages, job opportunities, and the nature of the work. This course also teaches students about shop safety and proper equipment usage. Instruction will be provided on a variety of general shop practices and procedures.

**OPRV 110 2- and 4-Cycle Gas Engines**

5 Credits  
Offered Fall Semester

This course teaches students how to identify, repair, rebuild, and/or replace small engines used in outdoor power equipment. Students will learn two-stroke and four-stroke combustion engine theory as well as engine performance criteria. They will gain understanding in the operation and basic principles of the various components and their respective systems related to small engines.

**OPRV 110L 2 and 4 Cycle Gas Engines Lab**

2 Credits  
Offered Fall Semester

Students will receive hands-on experience using hand and power tools in performing repairs and maintenance on a variety of 2- and 4-cycle gas engines and related components common to outdoor power equipment. Emphasis will be placed on industry accepted practices and techniques as well as shop safety.

**OPRV 120 Power Equipment Service & Repair**

5 Credits  
Offered Fall Semester

This course includes the study of hydraulic system principles and operation, transmission and final drive theory of operation, and advanced electrical system concepts. Students will learn proper disassembly, measuring, reassembly and troubleshooting procedures. They will gain an understanding of the operation and basic principles of the various components and their respective systems related to outdoor power equipment.

**OPRV 120L Power Equipment Service and Repair Lab**

2 Credits  
Offered Fall Semester

Students will receive hands-on experience using hand and power tools in performing repairs and maintenance on outdoor power equipment. Instruction will utilize group and individual class projects including a variety of mock-ups, training aids, components, and limited live customer work.

**OPRV 130 ATV and Snowmobile Systems**

5 Credits  
Offered Spring Semester

This course will teach students fundamental principles of operation, troubleshooting techniques, and repair procedures for all-terrain vehicles and snowmobile equipment. Students will learn the basics of how to identify, repair, rebuild, and/or replace components and systems.

**OPRV 130L ATV and Snowmobile Systems Lab**

2 Credits  
Offered Spring Semester

Students will receive hands-on experience using hand and power tools in performing repairs and maintenance on various types of ATVs and snowmobiles. Instruction will utilize group and individual class projects including a variety of mock-ups, training aids, components, and limited live customer work.

**OPRV 140 Motorcycle Systems**

5 Credits  
Offered Spring Semester

This course will teach students the theory and principles of operation for various motorcycle systems. Students will be introduced to concepts related to engines, powertrains, chassis, suspension, electrical, warranty, pre-delivery, service and repair procedures, and performance characteristics.

**OPRV 140L Motorcycle Systems Lab**

2 Credits  
Offered Spring Semester

Students will receive hands-on experience using hand tools, power tools, and related shop equipment in performing troubleshooting, repairs and maintenance on various types of motorcycles. Instruction will utilize group and individual class projects including a variety of mock-ups, training aids, components, and limited live customer work.

**OPRV 150 Advanced Service Procedures**

2 Credits  
Offered Summer Session

This course introduces students to advanced principles and concepts related to motorcycles, ATVs, and snowmobiles. Students will learn performance tuning and set-up procedures for various vehicle systems as well as racing and aftermarket applications.

**OPRV 150L Advanced Service Procedures Lab**

2 Credits  
Offered Summer Session

This course introduces students to advanced performance applications as related to motorcycles, ATVs, and snowmobiles. In addition, students will have the opportunity to specialize in particular areas of interest related to occupational opportunities and learn various procedures related to those areas.
PARALEGAL

PLEG 101  Introduction to Law & Legal Practice
2 Credits  Offered Fall Semester
This course is an introduction to the American and Idaho legal institutions and processes. It examines the sources of law, the relationships between the federal and state court systems, legal reasoning, ethical standards, and the role of the paralegal. This course is a required course in the Paralegal and Legal Administrative Assistant programs.
Lecture: 2 hours per week

PLEG 103  Criminal Procedures
2 Credits  Offered Fall Semester
This course will introduce students to the process by which the criminally accused is dealt with by the State. The fundamental rights of citizens will be examined in detail, including freedom from unreasonable search and seizures, the right to counsel, and due process. This course is a required course in the Paralegal program.
Lecture: 2 hours per week

PLEG 104  Civil Litigation
2 Credits  Offered Fall Semester
Civil Litigation is a course designed to teach the student the steps necessary to institute and advance a civil lawsuit from the initial client interview through trial. This is a required course in the Paralegal program.
Lecture: 2 hours per week

PLEG 125  Contracts
3 Credits  Offered Spring Semester
This course is a study of contract law as found in the Common Law and Article Two of the Uniform Commercial Code. This is a required course in the Paralegal program.
Lecture: 3 hours per week
Prerequisite: PLEG 101

PLEG 135  Torts
3 Credits  Offered Spring Semester
This course examines the principles of civil wrongs and liabilities (torts) including causes of action from negligence, industrial injuries, and professional malpractice. The course addresses fault and without-fault actions, strict liability, and intentional torts. Defenses and damages are also explored. This is a required course in the Paralegal program.
Lecture: 3 hours per week
Prerequisites: PLEG 101

PLEG 201  Legal Ethics
1 Credit  Offered on Demand
This course is a survey of ethics as applied to the legal profession. The Code of Professional Responsibility and the Code of Judicial Ethics are used to examine the boundaries of authorized practice, confidentiality, and delegation of authority. This is a required course in the Paralegal program.
Lecture: 1 hour per week

PLEG 205  Law Office Management
1 Credit  Offered on Demand
This course is an overview of procedures for managing a law office. Emphasis is placed on various structures and their organization, legal fees, timekeeping, billing, and docket control systems. Specific management topics include financial, records, file, and library management. This is a required course in the Paralegal program.
Lecture: 1 hour per week

PLEG 210  Legal Research and Writing
4 Credits  Offered Fall Semester
This course is an introduction to legal resource materials and methodology. Research skills are developed through law library research and drafting assignments. Emphasis is placed on the use of the legal database and on effective communication of research results through the drafting and preparation of legal documents and instruments. This is a required course in the Paralegal program.
Lecture: 3 hours per week
Lab: 2 hours per week
Prerequisites: PLEG 101 and ENGL 101

PLEG 210

PLEG 220  Legal Research and Writing II
4 Credits  Offered on Demand
This course is a continuation of PLEG 210 with emphasis on the further development of research techniques. Discussion topics include administrative and executive agency research, legislative research, non-legal reference materials, and loose-leaf services. Advanced processes in drafting and preparation of legal documents and instruments are emphasized. This is a required course in the Paralegal program.
Lecture: 3 hours per week
Lab: 2 hours per week
Prerequisite: PLEG 210

PLEG 230  Evidence
3 Credits  Offered Fall Semester
This course includes an examination of the statutory and case law regarding judicial methods of proof, the hearsay rule, materiality, presumptions, and relevancy. This is a required course in the Paralegal program.
Lecture: 3 hours per week
Prerequisite: PLEG 101 and PLEG 104

PLEG 240  Real Estate and Property Law
3 Credits  Offered on Demand
This course explores the law of real property including types of real estate transactions and conveyances, forms and procedures, document recording, and title searches. Topics include deeds, contracts, deeds of trust, joint ventures, lease and rental agreements, mortgages, legal descriptions, liens and encumbrances, zoning and covenants, appraisals, titles, and foreclosure. This is an elective course in the Paralegal program.
Lecture: 3 hours per week

PLEG 245  Estate and Probate Practices and Procedures
3 Credits  Offered on Demand
This course is an introduction to the laws, practices, and procedures involving trusts, wills, guardianships, property trans-
PHARMACY TECHNOLOGY

**PHAR 110** Pharmacy Law and Ethics  
2 Credits  
Offered Spring Semester  
This course provides the student with an introduction to federal and state laws regulating the practice of pharmacy. Special emphasis is given to the areas of state law for Idaho and Washington regulating the activities of the technician. This course includes a focus on recordkeeping and medical ethics to better fulfill the technical needs of the students and bring the program in line with national standards.

**PHAR 151** Introduction to Pharmacology  
2 Credits  
Offered Fall Semester  
This course is designed to provide an overview of pharmacologic principles with an emphasis on therapeutic drug classifications. For each therapeutic drug classification, basic mechanism of drug actions, side effects, routes of administration, and common indications will be reviewed. Students will become familiar with common abbreviations and vocabulary terms related to drug therapy. Additionally, the course will prepare students to recognize the top 200 drugs (generic and brand name).

**PHAR 152** Advanced Pharmacology  
3 Credits  
Offered Spring Semester  
PHAR 152 is designed to teach students how to categorize commonly prescribed/dispensed oral and injectable drugs into their therapeutic drug classifications. Emphasis will be on the top 200 prescription drugs prescribed in the U.S. For each top 200 drug, the student will distinguish between generic and brand name, recognize common indications and identify available dosage forms, strengths, routes of administration, common dosing regimens, contraindications, side effect profiles, and significant drug interactions. As the therapeutic drug classifications are studied, human medical conditions (related to anatomy and physiology) will be reviewed.

**PHAR 171** Applied Pharmacy Tech I  
3 Credits  
Offered Fall Semester  
This course is designed to provide students with the background information and knowledge about pharmacy practice in a variety of settings including ambulatory, home care, and institutional pharmacy. Overviews of prescription processing and filling in both ambulatory and institutional settings will be covered. Students will develop entry skills for prescription interpretation and processing by completing both paper and electronic assignments. In addition to prescription interpretation, other factors such as the importance of safety and accuracy will be stressed.
PHIL 101  Introduction to Philosophy  
3 Credits  
Offered Each Semester  
This course is the discovery and exploration of major intellectual problems of humankind through methods of questioning, analysis, synthesis, and critique. It emphasizes developing a world view and higher-order reasoning skills through consideration of such issues as the nature of time and physical reality, mind and consciousness, free will, evil, truth, ethics, and the nature and existence of God. This course is for students interested in the meaning of life and the implications of modern science for understanding our world. It fulfills an arts and humanities requirement for the A.S. degree.  
Lecture: 3 hours each week  
Recommended: ENGL 101

PHIL 103  Ethics  
3 Credits  
Offered Each Semester  
Ethics is the investigation and discussion of personal, social, and professional moral issues and the principles and thinking skills used for their resolution. Emphasis is on the development and application of reasoning skills for decision making in the moral domain. This course provides awareness, sensitivity, insights, and skills essential to the success and moral integrity of the person in today's morally complex world. It fulfills an arts and humanities requirement for the A.S. and A.A. degrees.  
Lecture: 3 hours each week  
Recommended: ENGL 101

PHIL 111  World Religions  
3 Credits  
Offered Each Semester  
World Religion presents an overview of the historical and cultural settings, main beliefs, and practices of the great Eastern and Western religions-Hinduism, Buddhism, Taoism, Confucianism, Judaism, Islam, and Christianity. Attention is given to similarities and differences in concepts of humanity and our relationships to society, nature, and the divine. This course is for students interested in humankind's religious heritage and cultures of other parts of the world. It fulfills an arts and humanities requirement for the A.S. degree.  
Lecture: 3 hours each week  
Recommended: ENGL 101 strongly recommended

PHIL 131  Introduction to Religion  
3 Credits  
Offered Either Semester  
This course introduces the study of religion as a cultural institution. It focuses on the nature, history, functions, structure, and features of religion in society. Emphasis will be given to exploring the psychology of religious experience and behavior, the influence of religion on social structures and community, and the patterns and issues of belief, ritual, and symbolism associated with the sacred. The course does not focus on any one or group of religions, but draws on a wide variety of religious contexts to exemplify and illustrate the elements of religion identified above. It is not an introduction to Christianity or a course in Bible study. The course features a strong emphasis on cultural diversity.  
This course satisfies Group IV of the Social Science requirement for the Associate of Arts degree and partially satisfies the Arts, Humanities, and Social Science requirement for the Associate of Science degree. Independent of an NIC Associate's degree, the course will transfer as an elective to most colleges and universities in the United States.  
Lecture: 3 hours each week

PHIL 201  Logic and Critical Thinking  
3 Credits  
Offered Each Semester  
PHIL 201 is a general introduction to reasoning skills and psychological approaches used for effective decision-making, problem-solving, and to argument analysis and evaluation. This course provides instruction in skills essential to success in everyday life, citizenship, and as a professional in any career. It fulfills the critical thinking requirement for the A.A. degree, but does not fulfill an arts and humanities requirement for either the A.A. or A.S. degrees.  
Lecture: 3 hours each week  
Recommended: ENGL 101 and/or COMM 101
PHIL 292  Ethics in Health Care
3 Credits  Offered Either Semester On Demand
This course provides an introduction to ethical theories and their practical application to the real issues and bioethical dilemmas encountered by health care professionals. Typical issues include euthanasia, assisted suicide, personhood, human society and disease, costs and access to health care, moral value and responsibility conflicts, patient rights and the professional relationship.
Lecture: 3 hours each week

COMP 181  Introduction to Film Photography
3 credits  Offered Each Semester
This introductory course uses the 35mm S.L.R. film camera to build basic skills in students who have an interest in photography, but no prior experience. Using a combination of lecture, demonstration, and hands-on exercises this course will explore the basic photographic techniques and artistic concerns involved in making photographs. These include camera handling, composition, effective use of light, shooting color and black and white film, basic darkroom techniques, and developing a photographic vision. Students must have a 35mm camera with adjustable f-stops, shutter speeds, and focus. Students are also responsible for all photographic film and paper.
Lecture: 3 hours per week

COMP 183  Introduction to Digital Photography
3 credits  Offered Each Semester
This introductory course uses the advanced digital camera to build basic skills in students who have an interest in photography, but no prior experience. Using a combination of lecture, demonstration, and hands-on exercises this course will explore the basic photographic techniques and artistic concerns involved in making photographs. These include camera handling, composition, effective use of light, file management, digital image manipulation, and developing a photographic vision. Students entering the course must have (at minimum) a 5 megapixel digital camera with aperture priority, shutter priority, and exposure compensation. Students are also responsible for all digital storage media.
Lecture: 3 hours per week

COMP 283  Intermediate Film Photography
3 Credits  Offered Each Semester
This course is designed to expand the photographic knowledge of motivated students who have completed COMP 181. Basic skills in shooting, printing, and processing black and white film will be refined, and students will work to develop a personal photographic vision. Further photographic experience will enhance students’ abilities through exposure to more challenging concepts including the zone system of exposure control, and printing and presenting the fine print. Students entering this course must have a 35mm camera with adjustable f-stop, shutter speeds, and focus. Students are responsible for all photographic film and paper.
Lecture: 3 hours each week
Prerequisite: COMP 181

COMP 285  Nature Photography
3 Credits  Offered Spring Semester
This course is an introduction to outdoor and nature photography with a specific focus on understanding common wildlife species, basic photographic skills, marketing opportunities, magazine analysis, and other subjects related to nature photography. It provides basic skills and knowledge for students interested in photographing nature and marketing photographs.
Lecture: 3 hours each week
Prerequisite: COMP 281 or background in basic photography

PHYSICAL EDUCATION

NOTE: Some physical education activity courses have an extra fee which is payable at registration. These fees are for such courses as golf, kayaking, equitation, racquetball, and whitewater rafting.

ACTIVITY COURSES:
The following courses fulfill physical education activity course requirements for the A.A. and A.S. degrees. Courses may be repeated for a total of 4 credits. In special situations, subject to approval by the division chair, students may be allowed to exceed the maximum number of credits.

PE 105  Varsity Sports
1 Credit  Offered Each Semester
This course is restricted to varsity athletes who compete in soccer, volleyball, wrestling, basketball, and softball. Student athletes practice daily during the season. This course offers development of skills and personal potential for student athletes interested in improving their performance or preparing for further competition at upper collegiate level. This course fulfills a physical education requirement for the A.A. and A.S. degrees and may be repeated for credit.

PE 105Z  Cheerleading
1 Credit  Offered Each Semester
This course involves instruction and practice in cheerleading for members of the NIC cheerleading squad. Areas developed include gymnastics, dance, communication, group leadership, and social skills. It provides experience for improving self-confidence, public performance, and gymnastic abilities.
Students must participate in team tryouts to earn a place on the squad. This course fulfills a physical education requirement for the A.A. and A.S. degrees and may be repeated for credit. Prior completion of other courses is not necessary.

**PE 110/111**  
Rock Climbing  
Kayaking  
Multiple Sports  
Tone and Trim  
Step Aerobics  
Water Aerobics  
Beginning Swimming  
Intermediate Swimming  
Swim Conditioning  
Individual and Team Sports  

1 Credit  
Offered Each Semester

Fundamental instruction in a variety of courses that offer instruction in many different activities including golf, strength training, water aerobics, jogging, tennis, racquetball, skiing, bowling, basketball, softball, volleyball, yoga, and more. These courses fulfill a physical education requirement for the A.A. and A.S. degrees and may be repeated for a total of four credits. Special activity fees may be required.

Activity: 2 to 4 hours each week

**PROFESSIONAL/ACADEMIC COURSES**

The following courses are professional and/or academic courses and will not fulfill physical education activity requirements for A.A. and A.S. degrees.

**PE 160**  
**Foundations of Physical Education**  
3 Credits  
Offered Each Semester

This course presents an overview of the history and development of professional physical education and related fields including principles and objectives of program development and management. It is beneficial for students considering a career in physical education or recreation services.

Lecture: 3 hours each week

**PE 204**  
**Clinical Athletic Training**  
3 Credits  
Offered Fall Semester

PE 204 offers a traditional work experience for students interested in the field of athletic training. Students will provide care for varsity athletes while being under the direct supervision of a Certified Athletic Trainer. Students will gain knowledge of the daily duties in a traditional athletic training setting, prevention, recognition and rehabilitation of athletic injuries, event set-up, coverage and tear-down, medical terminology, and recordkeeping.

Lab: 10 hours per week in athletic training room

Prerequisites: PE 248, 288

**PE 220**  
**Sports Ethics**  
2 Credits  
Offered Each Semester

The interrelationship of sports with other aspects of culture, economics, drugs, gambling, and media will be among the topics studied in this course. The role of sports in American society will also be discussed.

Lecture: 2 hours each week

**PE 221**  
**Fitness Activities and Concepts**  
2 Credits  
Offered Fall Semester

This course includes individual fitness development with focus on developing personal skills in presenting and teaching fitness activities for public and private sector programs. This is a combined lecture/lab course.

Lab/Lecture: 2 hours each week

**PE 222**  
**Wellness Lifestyles**  
3 Credits  
Offered Either Semester

Wellness Lifestyles examines contemporary health/wellness with emphasis on personal decision making and behavioral changes to create a personal lifestyle which promotes high level wellness.

Lecture: 3 hours each week

**PE 237A**  
**Wilderness Backpacking**  
3 Credits  
Offered Fall Semester

This course teaches skills and knowledge needed for camping and traveling in a wilderness environment with special attention given to trip leadership. The course focuses on trip leadership, minimum-impact techniques, wilderness navigation, equipment selection, and safety issues.

**PE 237B**  
**Wilderness Survival**  
3 Credits  
Offered Spring Semester

This course provides students with basic life-support skills and knowledge to predict and prepare for emergencies encountered in a wilderness environment. Focus is on emergency procedures, life-support skills, signaling, equipment selection, and safety issues.

**PE 237C**  
**Whitewater Guiding**  
3 Credits  
Offered Spring Semester

This course develops whitewater guiding skills and competencies through hands-on experience with attention given to the safety concerns of whitewater rafting. The skill and competencies include trip leadership, risk management, reading whitewater, maneuvering rafts, swiftwater rescue, and outfitting.

**PE 237D**  
**Mountaineering**  
3 Credits  
Offered Spring Semester

This course provides a foundation of mountaineering skills with special attention given to trip leadership. Focus is also on snow and glacier travel, avalanche awareness, winter camping, backcountry travel, rock climbing, minimum-impact techniques, equipment selection, and safety issues.

**PE 237E**  
**Outdoor Programming and Leadership**  
3 Credits  
Offered Fall Semester

This course develops the skills and knowledge needed for leading and programming outdoor adventure sports with special attention given to leadership and teaching methods. This course will focus on trip leadership, risk management, teaching methods, group dynamics, communication, activity selection, and methods of programming.

**PE 241**  
**Coaching Methods**  
2 Credits  
Offered Fall Semester

This course offers instruction in methods of coaching a variety of sports with emphasis on fundamentals, strategy, condi-
Lifeguarding Certificate.
Prerequisite: A current ARC Emergency Water Safety or Aquatic Fitness T raining certification. It is designed for students interested in teaching aquatic skills and safety. Students will have the opportunity to qualify for American Red Cross certification. It is designed for students interested in teaching aquatic skills and safety.

PE 242 Sports Officiating
2 Credits
Offered Fall Semester
This course is designed to provide students opportunities to acquire knowledge, skill, and experience to function effectively as a sports official. This course stresses philosophy of officiating, officiating tips, code of ethics for officials, dealing with aggressive behavior, and preventative officiating. Other topics covered include personal equipment, pre-game and game duties, post-game duties, rules and regulations, and proper field or floor mechanics. The goal is to develop confidence as an official in order to feel comfortable refereeing intramural, AAU, city recreation, and high school games. If one sport is covered, one credit will be awarded. If two or more sports are covered, two credits will be awarded.

PE 243 Play and Game Theory
2 Credits
Offered on Demand
This course offers instruction in the principles of play and game strategy for high- and low-organization activities. It is beneficial for students considering a career in physical education or recreation.

Lecture: 2 hours each week

PE 248 Care and Prevention of Athletic Injuries
3 Credits
Offered Each Semester
This course offers instruction and practice in the care, prevention, and evaluation of injuries common to athletics. It is designed for PE majors, coaches, and individuals considering a career in athletic training or physical therapy.

Lecture: 3 hours each week

PE 259 Lifeguard Training
2 Credits
Offered on Demand
This course offers instruction and skill development for non-surf lifeguarding, including hazard management, rescue procedures, and interaction with the public. Students may elect to qualify for American Red Cross (ARC) certification. This course is designed for students interested in aquatic safety and advanced training. To enroll, students must pass a lifeguarding skills test requiring strong swimming ability. Completion of First Aid and CPR training is necessary to qualify for Lifeguard Training Certification.

PE 266 Water Safety Instructor
2 Credits
Offered on Demand
This course involves training in water safety for the aquatics instructor and meets requirements for the American Red Cross Water Safety Instructor course. Emphasis is on theory and application of aquatic skills, teaching methods, and practice in instruction. It is designed for students interested in teaching aquatic skills and safety. Students will have the opportunity to qualify for American Red Cross (ARC) certification.
Prerequisite: A current ARC Emergency Water Safety or Lifeguarding Certificate.

PE 277 Lifeguard Instructor
1 Credit
Offered on Demand
This course offers training for those wishing to teach American Red Cross (ARC) Basic Water Safety, Emergency Water Safety, and Lifeguard Training courses. Emphasis is on the practice of teaching ARC methods. Students will have the opportunity to qualify for ARC certification. It is designed for students interested in teaching aquatic skills and safety.
Prerequisite: Current lifeguard training certification is required.

PE 288 First Aid
3 Credits
Offered Each Semester
This course offers instruction and practice in the emergency care for victims of injury or sudden illness. Students will have an opportunity to qualify for American Red Cross certification in First Aid and CPR. It is designed for students interested in safety, prevention, and first aid treatment.

PHYS 101 Fundamentals of Physical Science
4 Credits
Offered Each Semester
This course is designed for the non-science major interested in an overview of the physical sciences and in developing an appreciation for the nature of the physical universe. It includes physics, chemistry, astronomy, and geology and their relation to the world and universe in which we live. It fulfills one of the laboratory science requirements for the A.A., A.S., and A.A.S. degrees.

Lecture: 3 hours per week
Corequisite Lab: PHYS 101L (2 hours per week)
Prerequisite: MATH 025 or COMPASS Algebra > 40, ACT > 17, or SAT > 430

PHYS 103 Elementary Astronomy
4 Credits
Offered Each Semester
PHYS 103 is an introductory study of astronomy. Topics include the history of astronomy; the motions and physical properties of the sun, moon, and earth; the electromagnetic spectrum; solar system planets, satellites, and minor bodies; stars; galaxies; evolution of the solar system; the universe; and cosmology. It fulfills a laboratory science requirement for the A.A., A.S. and A.A.S. degrees.

Lecture: 3 hours per week
Corequisite Lab: PHYS 103L (2 hours per week)

PHYS 111 General Physics I
4 Credits
Offered Each Semester
This course is the study of mechanics, sound, linear and rotational motion, momentum, energy, vectors, elasticity, vibration, and mechanical wave motion. It fulfills a laboratory science requirement for the A.A. and A.S. degrees.

Lecture: 3 hours per week
Corequisite Lab: PHYS 111L (2 hours per week)
Prerequisite: MATH 147 or MATH 143 and 144 or COMPASS Trig > 21
**Prerequisites:**

- Governments, and the powers and limits of these governments.
- Metropolitan politics, relationships between state and local governments.
- Three branches of state governments, county governments, those states. Emphasis is placed upon state constitutions, the state governments and the local governments operating within those states. 

**POLITICAL SCIENCE**

**POLS 101  American National Government**

*3 Credits*  
Offered Each Semester

Political Science 101 is the study of the foundation of the United States Government and the evolution of constitutional principles. Special attention is given to the Declaration of Independence, the United States Constitution, the three branches of national government, powers and limits of national government, public ethics, political parties, voters, pressure groups, and public opinion. The topic “Morality and Ethics in American Politics” has a close link to PHIL 201. This is an essential course for students majoring in political science, pre-law, or law enforcement. It fulfills a social science requirement for A.A. and A.S. degrees. 

Lecture: 3 hours per week  
Corequisite: ENGL 102 is recommended

**Recommended:** POLS 105

**POLS 105  Introduction to Political Science**

*3 Credits*  
Offered Spring Semester

This is the introductory course in political science. It is a study of the basis, scope, nature, content, alternative theories, and comparative aspects of politics and political science. Students will study the nature of politics, government, and international politics; trace the development and changes in political cultures; and deal with political science mythology. This course addresses cultural diversity in addressing the various political systems of the world. It is strongly recommended that the course be taken at the same time as ENGL 102 so that the Political Science 105 research design can be coordinated with the ENGL 102 research paper. This is an essential course for students majoring in political science or pre-law and should be taken in the freshman year. It fulfills a social science requirement for A.A. and A.S. degrees. 

Lecture: 3 hours per week  
Corequisite: ENGL 102 is recommended

**Recommended:** POLS 105

**POLS 298  Political Involvement Practicum**

*1-6 Credits*  
Offered Each Semester

In this practicum, students are participants and observers within local, state, or national government. They will be supervised by a government employee and an NIC political science instructor. A maximum of two credits per semester is offered to students serving as student government officers/board members. This course is useful for students wishing to obtain practical experience in government operations. Permission of the instructor, who will find a practicum assignment for the student, is required.

**PROFESSIONAL-TECHNICAL**

**ATEC 109  Occupational Relations**

*1 Credit*  
Offered Each Semester

This course includes instruction on the practical application of on-the-job interpersonal relations as it applies to students as an employee, supervisor, or consumer. 

Lecture: 1 hour per week

**ATEC 110  Successful Job Search**

*1 Credit*  
Offered Each Semester

This course serves as an introduction to the fundamental techniques necessary to gain entry-level employment. Its under-
ATEC 117  Occupational Relations & Job Search  
2 Credits  
Offered Each Semester

ATEC 117 is designed to expose students to a variety of skills for workplace success. Topics to be discussed include learning styles, change, communications, conflict, work teams, leadership, and attitude. Students will also explore the fundamental techniques necessary to get a job, such as matching skills to job requirements, writing resumes and cover letters, and learning strategies for successful interviewing.

Lecture: 2 hours per week

ATEC 119  Occupational Relations/Work Ethics  
2 Credits  
Offered Fall Semester

This course includes instruction in the practical application of on-the-job interpersonal relations as it applies to employees, supervisors, or consumers. A variety of work ethic topics will be covered that will help employers define you as a “good” employee such as punctuality, staying on task, being a team player, cleanliness/neatness in the work area, thoroughness, pride in workmanship, and flexibility.

Lecture: 2 hours per week

ATEC 120  Occupational Relations  
3 Credits  
Offered Each Semester

This course provides instruction in practical application of on-the-job interpersonal relations, including work habits, attitudes and fundamental job search and preparation techniques. A variety of topics will be covered including learning strategies for work, adapting to change, taking responsibility, work habits, sexual harassment, teamwork, communications, and problem solving. Emphasis will be placed on identifying skills, resumes, cover letters, and interviewing.

Note: ATEC 120 is 2 credits if ATEC 110 has been completed and 1 credit if ATEC 119 has been completed.

Lecture: 3 hours per week

ATEC 125  Career Relations and Technology  
3 Credits  
Offered Each Semester

This course provides instruction in the application of career-related interpersonal relations and the use of technology to improve employability skills. It is structured to provide hands-on experience in developing proficiency with technology used in the workplace. Topics include workplace communications, team problem solving, change in the workplace, labor laws, resume writing, interview techniques, and the use of a computer as a job search tool. Basic computer skills will be taught and industry-specific software will be introduced.

Lecture/Lab: 3 hours per week

ATEC 194  Cooperative Workbased Learning I  
1-3 Credits  
Offered Fall Semester

This course is designed to provide students with career-related experience and an opportunity to reflect on those experiences. The experiences in the field (the job) give students the chance to apply the skills and knowledge gained in theory/lab, while the classroom component gives students a chance to complete the necessary paperwork as well as discuss their experiences with other students and receive guidance from the instructor.

Prerequisite: Enrollment as a freshman in a Professional-Technology program.

ATEC 195  Cooperative Workbased Learning II  
1-3 Credits  
Offered Spring Semester

This course is designed to provide students with career-related experience and an opportunity to reflect on those experiences. The experiences in the field (the job) give students the chance to apply the skills and knowledge gained in theory/lab, while the classroom component gives students a chance to complete the necessary paperwork as well as discuss their experiences with other students and receive guidance from the instructor.

Prerequisite: Enrollment as a freshman in a Professional-Technology program.

ATEC 294  Cooperative Workbased Learning III  
1-3 Credits  
Offered Fall Semester

This course is designed to provide students with career-related experience and an opportunity to reflect on those experiences. The experiences in the field (the job) give students the chance to apply the skills and knowledge gained in theory/lab with other students and receive guidance from the instructor.

Prerequisite: Enrollment as a sophomore in a Professional-Technology program.

ATEC 295  Cooperative Workbased Learning IV  
1-3 Credits  
Offered Spring Semester

This course is designed to provide students with career-related experience and an opportunity to reflect on those experiences. The experiences in the field (the job) give students the chance to apply the skills and knowledge gained in theory/lab with other students and receive guidance from the instructor.

Prerequisite: Enrollment as a sophomore in a Professional-Technology program.

PSYC 101  Introduction to Psychology  
3 Credits  
Offered Each Semester

This course provides students with a general overview of the science which seeks to understand and explain behavior and mental processing. Variations in psychology faculty training and research interest influence topic emphasis. However, students will be introduced to many of the major contemporary theories and concepts in psychology. This course will prove interesting and useful to those students wishing to better understand human behavior and thinking. It should prove helpful to students preparing for a career that will bring them into contact with other people. This course fulfills a social science elective for both the A.A. and A.S. degrees.

Lecture: 3 hours per week

Recommended: Strong reading and writing skills
PSYC 204A  Multiple Intelligences
3 Credits  Offered Each Semester
Special Topic Course: Many of our limits as individuals are self-imposed, either through internal or external cues. Most of us, however, are not consciously aware of this and how our experiences and traditional notions of education condition and limit our abilities. This course helps students to develop an expansive view of human potential based on Dr. Howard Gardner's concept of multiple intelligences, which challenges us to apply what we know in such a way that our actions are a benefit to ourselves and society. This course will be useful for students wishing to get a better grasp on understanding their own potential and for anyone going into a field dealing with people such as teaching, counseling, social work, or other such fields.
Lecture: 3 hours per week

PSYC 205  Developmental Psychology
3 Credits  Offered Each Semester
This course covers the full spectrum of human development from conception through death. Students examine the biological, cognitive, and social aspects of an individual's development. Individual faculty preparation will determine areas of emphasis. This course is valuable to students pursuing a career that will necessitate working with and being sensitive to people of various ages (teachers, social workers, nurses, law enforcement officers, etc.). This course fulfills a social science1 requirement for both the A.A. and A.S. degrees.
Lecture: 3 hours per week
Prerequisite: PSYC 101
Recommended: Strong reading and writing skills

PSYC 211  Abnormal Psychology
3 Credits  Offered Spring Semester
This course provides a study of the nature, cause, treatment, and prevention of patterns of emotional disturbance and personality disorganization. It introduces the major categories of mental disorders as defined in the DSMIVR. This course will not fulfill a requirement for the A.A. or A.S. degree and may not be transferable.
Lecture: 3 hours per week

PSYC 218  Intro to Research in the Behavioral Sciences
4 Credits  Offered Alternate Spring Semesters
Psychology 218 is primarily designed for behavioral and social science majors. In this course, students will be introduced to the basic methods of behavioral research. This will be accomplished through active participation in the design, implementation, and analysis of class research projects. This class involves three one-hour lectures and a two-hour lab per week. This course is applicable for those students who plan to pursue an undergraduate and graduate degree in one of the behavioral or social sciences.
Lecture: 3 hours per week
Lab: PSYC 218L (2 hours per week)
Prerequisite: PSYC 101
Recommended: Strong reading and writing skills

PSYC 223  Stress Management
3 Credits  Offered Each Semester
This course explores the concepts of stress from a holistic approach, emphasizing identification of sources of stress, understanding physical and emotional consequences, and developing techniques for dealing with stress. Students will gain improved personal stress management skills through discussion and practice in communication techniques, nutrition, exercise, relaxation, values clarification, and will learn strategies for dealing with change, loss, and enhancing self-esteem.
Lecture: 3 hours per week

REAL ESTATE

RE 101  Real Estate Module I
3 Credits  Offered Each Semester
The goal of this course is to provide students with the minimum competency to practice in the field of real estate. Topics include seeking employment with a brokerage firm, real estate licensing law, agency law, real property law, legal descriptions, forms of ownership, transfer of title, and limits on rights of ownership. This lecture/discussion course meets 45 hours of the 90 hour requirement for salesperson licensing in Idaho. No previous knowledge in the field of real estate is required. Module I and II can be used to meet the 60 hour prelicensing requirement in Washington.

RE 102  Real Estate Module I
3 Credits  Offered Each Semester
This course is the second 45-hour required course for real estate salesperson licensing in Idaho. Course topics include real estate contract law, listing and selling property, working with buyers and sellers, closing transactions, and ethical duties owed to the public. Practical case studies require students to understand and fill out various real estate forms such as seller and buyer agency agreements, purchasing agreements, and counter offers. Module I and II can be used to meet the 60 hour prelicensing requirement in Washington.
Prerequisite: Real Estate Module I

RESORT/RECREATION MANAGEMENT

RRM 150  Conflict Resolution
1 credit  Offered Each Semester
Conflict resolution is an inquiry into the theories and skills relating to the evolution of conflict in the community and workplace. This course focuses on developing mediation skills including negotiation exercises and simulated mediations.
Lecture: 15 hours

RRM 250  Risk Management in the Resort Industry
3 credits  Offered Each Semester
This course helps students appreciate and understand both the needs and techniques for identifying and managing risks to employees, guests, and property in the resort industry. This course focuses on identification and control of risk, incident investigation, and increasing employee and public awareness of potential risk.
Lecture: 3 hours per week
SOCIAL SCIENCE

SOC 101 Introduction to Sociology
3 Credits Offered Each Semester
This introductory course presents the fundamental principles affecting human social systems. The concepts of traditional as well as contemporary theorists will be discussed. Emphasis will be placed on the forces governing groups and the conditions that transform social life. This course fulfills a social science requirement for the A.A. and A.S. degrees.
Lecture: 3 hours per week

SOC 102 Social Problems
3 Credits Offered Each Semester
This course investigates the persistent problems of American society as they relate to values, attitudes, and social change. Application of sociological principles to the identification and analysis of selected problems will be consistently developed.
SOC 102 fulfills a social science requirement for the A.A. and A.S. degrees.
Lecture: 3 hours per week

SOC 103 Cultural Diversity
3 Credits Offered Spring Semester
This course is designed to increase the awareness and appreciation of diversity within the contemporary U.S. population. It will examine historical and contemporary experiences from perspectives of both women and men of diverse races, ethnicities, social class, religions, sexual orientation, ages, and abilities. Students will explore their particular inherited and constructed traditions, identify communities and significant life experiences while learning from the varied experiences and perspectives of those who are different. Students will become more aware of the nature of personal, institutional, and societal inequalities and the processes leading to a more equitable society. Students will be encouraged to develop a critical consciousness and to explore ways of empowering to help eliminate ideologies of unequal treatment. This course will develop an extended and collaborative dialogue about past, present, and future U.S. democratic aspirations and foster a respect for people’s life experiences while teaching skills needed to function in today’s diverse and increasingly interconnected global society. This course fulfills a social science requirement for the A.A. and A.S. degrees or the cultural diversity requirement for the A.A. degree.
Lecture: 3 hours per week
Recommended: College level reading and writing

SOC 155 Drug Abuse: Fact, Fiction, and the Future
3 Credits Offered Each Semester
This course is designed to provide information about drugs, their effects, and the laws and social implications relative to them. Students will learn about the causes of drug abuse, treatment modalities, community resources, alternatives, and problem-solving skills.
Lecture: 3 hours per week

SOC 220 Marriage and Family
3 Credits Offered Each Semester
Sociology 220 is designed to help students understand more
about marriage and family life processes. Students will examine values, needs, and responsibilities as they relate to intimacy, the selection of partners, cohabitation and marriage, family planning choices, parenting, family economics, and interpersonal communication. Students will also address the issues of family violence, divorce, and the restructuring of new families. This course will be helpful to those who wish to have more knowledge about relationship, marriage, and family issues or those who are entering such fields as counseling and social work. This course fulfills a social science requirement for the A.A. and A.S. degrees.

Lecture: 3 hours per week
Recommended: College level reading and writing skills

**SOC 251 Race and Ethnic Relations**
3 Credits  
Offered Each Semester

This course explores the influence of race and ethnic membership in structuring social interaction and behavior amongst people in the United States. Although the primary focus is in the ethnic experience in the U.S., comparative models will also be explored to provide a framework for the American situation. A major element of the course will be an investigation of the five major ethnic groups: Native Americans, Hispanics (Latinos), African-Americans, Asian-Americans, and white Americans; with a special emphasis on the condition of Native Americans. Principal topics will include historical aspects of race and ethnicity, theoretical viewpoints, causes of ethnic conflict, racism and prejudice, psychopathology and ethnicity, focal topics (e.g., affirmative action, “reverse” discrimination, bilingual education, immigration issues) and future trends and directions. This course will be helpful for individuals seeking to work in professions or environments where they will be in contact with members of diverse ethnic and racial groups. This course fulfills a social science requirement for the A.A. and A.S. degrees or the cultural diversity requirement for the A.A. degree.

Lecture: 3 hours per week
Recommended: PSYC 101

**SOC 283 Death and Dying**
3 Credits  
Offered Once Each Year

This course introduces the concepts, attitudes and social dynamics of death and dying, including various cultural perspectives. Topics include demographics, who dies and why, suicide, treatment of the dying and dead, religious and legal perspectives, stages of dying, caregiving, grief, and bereavement.

Lecture: 3 hours per week

**THEATRE**

**THEA 101 Introduction to the Theatre**
3 Credits  
Offered Each Semester

Theatre 101 examines the contributions of individual artists to the art of theatre. Through discussion and attendance at plays, students will become familiar with elements of dramatic structure and the roles and responsibilities of the director, lighting designer, costumer, playwright, sound technician, actors, and scene designer. This is a nonperformance course open to non-majors. It is designed to enhance students’ understanding of dramatic art and the appreciation and enjoyment of live performance. Skills in observation, writing, critical thinking, and verbal expression are emphasized and developed. Students are required to attend five plays during the semester. This course fulfills an arts and humanities requirement for the A.A. and A.S. degrees.

Lecture: 3 hours per week

**THEA 102 Stage Makeup**
3 Credits  
Offered Spring Semester

THEA 102 offers instruction in the basic principles and techniques of theatre makeup. Students will explore, through the eye of the makeup artist, concepts of facial structure, aging, style and modeling with paint and will observe demonstrations of basic techniques. Weekly labs offer the opportunity to translate knowledge into design and practical application of theatrical makeup. This course will benefit students seeking careers or further education in the theatre arts as well as community members who participate in the theatre. Students must purchase a theatrical makeup kit which is approximately $40.

Lecture/Lab: 5.5 hours per week

**THEA 103 Introduction to Stagecraft**
3 Credits  
Offered Fall Semester

Theatre 103 offers practical lab experience in applying theories and methods of scenery and prop design and construction. It focuses on the creative use of production tools and stage equipment. This course provides an opportunity to develop technical skills for theatre and media production for students exploring those career areas or who are interested in community theatre participation. Prior completion of other courses is not necessary.

**THEA 104 Stagecraft II**
3 Credits  
Offered Spring Semester

Theatre 104 offers the continuing theater student an important step toward a major in Theater Arts. It is practical, hands-on experience in construction of major set components (from the preliminary illustration phase through on-stage production). This class emphasizes application of techniques, skills, and attitude established in THEA 103. The class is also valuable for non-theatre majors who need to develop physical skills in building and construction with an emphasis on a creative approach to problem solving and various media use.

Lecture: 3 hours per week
Prerequisite: THEA 103

**THEA 105 Basics of Performance I**
2 Credits  
Offered Fall Semester

This course is an introduction to the art of stage performance, emphasizing the development of acting skills. It includes basic verbal skills of articulation, projection and inflection as well as the study of script formats, actor language, voice, movement, and imagination. Emphasis is on developing an understanding and appreciation for the total performance of the actor, combining creative imagination and discipline. Students will do solo and duo acting, requiring script memorization and performance before an audience. Tickets to area theatrical shows may have to be purchased at a total cost under $12. Prior completion of other courses is not required.
THEA 106  Basics of Performance II  
2 Credits  
Offered Spring Semester  
This course is a continuation of THEA 105, focusing on enhanced voice and movement and the development of characters from scripts. Students will study and practice techniques actors use in working with ensembles, memorizing parts, and developing stage presence. The skills introduced in THEA 105 are improved upon and include verbal and nonverbal communication techniques, memorization, script analysis, and the interpretation of character.  
Prerequisite: THEA 105  

THEA 163  Basics of Scene Design and Graphics  
2 Credits  
Offered Fall Semester  
This course offers an introduction to visual interpretation, research, and rendering techniques used in scenery design. Emphasis is on creation of authentic and appropriate stage environments for theatrical scripts. It provides the opportunity to develop design skills for theatre and media production for students exploring those career areas or who are interested in community theatre participation. Previous participation in theatre productions is recommended.  
Prerequisite: THEA 103  
Recommended: THEA 263  

THEA 190  Theatre Practice  
1 Credit  
Offered Each Semester  
Students participate in the development and production of an NIC play, gaining experience in one or more areas, including lighting, properties, costuming, set construction, audio and sound support, and stage managing. Practical experience in theatrical production may include basic carpentry, electrical, makeup, sewing, painting—skills applied to theatre but useful in other fields.  
Students will refine these skills as they develop an appreciation for the total process of theatre art involving organization, creativity, discipline, and ensemble teamwork. The course is open to non-majors and may be repeated for a total of four credits. Some evening and weekend work will be included. Prior completion of other courses is not required.  

THEA 263  Technical Production  
2 Credits  
Offered Spring Semester  
Theatre 263 provides instruction and practice in the techniques of stage management and production roles and responsibilities. Students will participate in the design, development, and execution of NIC Theatre Department productions. This course offers an opportunity to develop stage management skills for theatre and media production for students exploring those career areas or who are interested in community theatre participation.  
Prerequisite: THEA 103 or permission of instructor  

THEA 271  Play Analysis  
3 Credits  
Offered Spring Semester  
Focusing on the role of the playwright, students will explore the structure of dramatic works and the process of script creation. The course includes exposure to live and recorded plays of Ibsen, Shakespeare, Chekov, Arthur Miller, and other great playwrights. Different styles of drama including tragedy, comedy, melodrama, and farce are emphasized. Students will strengthen skills in reading, listening, writing, script, and character interpretation as they develop an appreciation of dramatic literature and the playwright’s art and craft. Weekend attendance at plays is anticipated.  
Recommended: THEA 101 and strong writing skills  

THEA 272  Intermediate Acting  
3 Credits  
Offered Fall Semester  
Theatre 272 introduces the student actor to aspects of the Stanislavski system of acting and realistic acting techniques for the modern theatre. Emphasis is on character analysis, ensemble acting for an audience with exercises in concentration, observation, and use of inner truth and emotional recall. Skills learned include interpretive and internal techniques for character identification and “bringing a character to life.” Attention is given to improving verbal and nonverbal acting qualities. Some evening and weekend participation may be necessary.  
Prerequisite: THEA 105, 106 or permission of instructor  

THEA 273  Stage Lighting  
3 Credits  
Offered Fall Semester  
Theatre 273 provides an introduction to the theory and practice of lighting, with attention to visual interpretation and design of the performance environment for theatre, dance, and rock n’ roll. This course offers an opportunity to develop technical lighting skills for theatre and media production for students exploring those career areas or who are interested in lighting support for community theatre, dance, and rock bands.  
Recommended: Previous participation in theatrical productions and/or completion of THEA 103, 163, and 263.  

WELD 100A  Welding Theory  
2 Credits  
Offered Fall Semester  
This course introduces students to the problems associated with heating and cooling metals and the properties of various metals used in the welding process. Students will gain a working knowledge of fabrication techniques and manufacturing processes used in welding. Characteristics of the traditional welding, and bonding agents used in welding, will be provided to give students a background on metal identification, metallurgical behaviors, and the determination of weldability of ferrous and nonferrous metals. This is part one of a three-part class totaling 6 credits.  

WELD 100B  Welding Theory  
2 Credits  
Offered Spring Semester  
This course is a continuation of WELD 100A. This is part two of a three-part class totaling 6 credits.  

WELD 109L  Diesel Welding Lab  
1 Credit  
Offered Spring Semester  
This course is part of the Diesel Technology program only. It
is designed to provide students with welding skills required by the diesel mechanic industry. Prior completion of WELD 108L is required.

**WELD 111 Safety Applications and Practice**  
1 Credit  
Offered Fall Semester  
This course provides students with required safety practices, operation, and maintenance of welding tools and equipment including OSHA practices and laboratory procedures.

**WELD 120 Blueprint Reading**  
3 Credits  
Offered Fall Semester  
This course covers basic blueprint reading techniques including drawing and layout work with emphasis on welding terminology and symbols. Students will learn methods of dimensioning drawings and will use AWS adopted standards for welding symbols.

**WELD 130 Advanced Blueprint Reading**  
2 Credits  
Offered Spring Semester  
Students will interpret drawings and develop material lists, sketch or draw components for layout, and calculate material costs from blueprints. Specific applications for steel, pipe, or other welding projects will be directed to meet student and community needs. AWS adopted standards for welding symbols will be the primary reference for blueprint interpretation.

**WELD 140 Auto Collision Repair Welding**  
2 Credits  
Offered Fall Semester  
This course is part of the Auto Collision Repair Technology program. It prepares repair technicians to perform basic welding processes and techniques required by industry. Students will gain skills in several welding processes including oxy-acetylene cutting and welding, plasma arc cutting of steel and aluminum, gas tungsten arc welding, and gas metal welding. Students will learn proper safety in operating welding and cutting equipment. Students may obtain the I-CAR Welder Certificate.

**WELD 160L Oxyfuel Gas Principles and Practices**  
5 Credits  
Offered Fall Semester  
This is a basic course that provides theory and techniques for all aspects of welding, but concentrates on oxyacetylene fuel applications. Instruction and practice are given in welding ferrous and nonferrous metals, light-gauge metal, brazing, hardsurfacing, and pipe using the four positions. It includes instruction and practice in both welding and cutting.

**WELD 165L Shielded Metal Arc Welding**  
5 Credits  
Offered Fall Semester  
This course provides instruction and practice on the basic skills needed to weld with mild steel electrodes. Students will weld using common joints found in related industries. Arc welding theory, equipment setup, polarities, and the metallurgy associated with SMAW are covered. Students will weld on plate, stainless steel, cast, aluminum, and other common materials using open root techniques in all four positions.

**WELD 170L Flux Cored Arc Welding**  
3 Credits  
Offered Spring Semester  
Students will be expected to gain competency in FCAW applications on stainless steel and pipe. AWS and ASME standards will apply for welds on tee, lap, corner, and lap joints.

**WELD 175L Gas Metal Arc Welding**  
3 Credits  
Offered Spring Semester  
This course will introduce students to the methods and theory of wire feed welding. Instruction and practice on use of metallic inert gas welding with solid, stainless steel and aluminum wire will be the major components of this course.

**WELD 180L Shielded Metal Arc Welding**  
5 Credits  
Offered Spring Semester  
Students will become proficient in advanced welding techniques of open root welding on plate, cast, stainless, and other common metals and materials. AWS certification testing conditions will prevail on completion of this course.

**WELD 195L Carbon Arc Cutting/Plasma Arc Cutting**  
1 Credit  
Offered Fall Semester  
This course includes instruction in the techniques of cutting using manual and machine processes and equipment. Students will practice using manual and machine methods on ferrous and nonferrous metals for both carbon and plasma arc cutting assignments.
Board of Trustees

Start Date:  □ Fall, 20...  □ Spring, 20...  □ Summer, 20...  □ Summer & Fall, 20...

APPLICANT INFORMATION

Name:  ___________________________  ___________________________  ___________________________
(as on Soc. Sec. Card) last first middle Name You Prefer: ___________________________

Other Names Appearing on Records: ______________________________________________________

U.S. Social Security Number: __________-________-________
Date of Birth (mo/day/year): __________/________/________

Permanent Home Address: ______________________________________________________________
number & street/PO box city county state zip area code phone

Current Mailing Address: ______________________________________________________________
number & street/PO box city county state zip area code phone

E-mail Address: ___________________________

GENERAL INFORMATION

Citizenship:  □ USA  □ Other  Native Language:  □ English  □ Other: ___________________________

If citizenship is “other,” answer the following questions: Country of citizenship: ___________________________
Resident alien of U.S.:  □ Yes, Resident alien number: A-____________  □ No, Current visa type:

Gender: (optional)  □ Female  □ Male  Are you a U.S. Veteran:  □ No  □ Yes  Branch____________
Dates of Service __________ to __________

Ethnicity: (optional)  □ African American/Black  □ American Indian/Native American/Alaska Native
□ Caucasian/White  □ Native Hawaiian or other Pacific Islander  □ Asian American
□ Hispanic/Latino/Latina  □ Other: ___________________________

Highest level of education or degree attained by either parent:  □ Bachelor  Other Degree ___________

Emergency Contact:
(For ALL to complete. If under 18, list parents or guardians here.)
name ___________________________ relationship ___________________________

number & street/PO box city county state zip area code phone

ENROLLMENT INFORMATION

Intended Degree Type:  □ Certificate  □ Associate  □ Bachelor  □ Second Bachelor  □ Not Seeking Degree or Certificate
(NIC only, no application fee)

Program Type:  □ Academic Program  □ Professional Technical Program

Intended Major (Refer to each institution’s publication for a list of majors offered):

first major ___________________________ second (optional) ___________________________

Enrollment Status:  □ New  □ Transfer  □ Returning (readmission)  □ High School Student Seeking Dual Enrollment

Do you plan to apply for federal financial aid?  □ Yes  □ No

Campus Location: If planning to take courses primarily at outreach locations, list these locations:

• Complete Reverse Side •
Name:

ACADEMIC INFORMATION

Have you taken the: □ ACT: Date ____________________ □ SAT: Date ____________________ □ COMPASS: Date ____________________

List the last high school you attended and any schools since, including colleges, trade schools, correspondence, etc. Do not omit any schools. Attach a separate sheet if more space is needed. Failure to list all schools attended, or submission of inaccurate information, is considered fraud and is cause for refusal of admission or dismissal from the institution. Students seeking certificates or degrees must have official transcripts submitted from each school listed. To be considered official, transcripts must be mailed in a sealed envelope directly from the school to the institution’s admissions office.

DID/WILL YOU GRADUATE FROM HIGH SCHOOL? □ Yes (month/year________/________) □ No

High School __________________________ City __________ State __________

DO YOU HAVE A GED OR HIGH SCHOOL EQUIVALENCY CERTIFICATE? □ Yes (month/year________/________) □ No

If yes, degree-seeking applicants are required to submit official GED test scores.

Are/were you a Tech Prep Student? □ Yes □ No If yes, in which program area did you enroll? ________________________________

Name of College, Trade School, etc. City & State Dates Attended Grad. Date Degree/# Credits Earned

RESIDENCY

Idaho residency status MAY be determined by one or more of the following. Please check all statements that are applicable if claiming Idaho residency for tuition purposes. Residency for community colleges is determined by county of residence.

State of Residence: ___________ From____/____/_____ to____/____/______ If less than 12 months, previous state: _______

County of Residence: ___________ From____/____/_____ to____/____/______ If less than 12 months, previous county: _______

□ One or more of my parents/legal guardians or spouse’s parents is a resident of Idaho and has maintained a bona fide domicile in Idaho for at least one year prior to the opening day of the school term during which I plan to enroll. If I am a community college applicant, I receive at least 51% of my financial support from my parents/legal guardians.

Parent’s name and address ___________________________________ From____/____/____ to____/____/______

□ I receive less than fifty percent of my financial support from parents or legal guardians who are not residents of Idaho for voting purposes. I have continuously resided in Idaho for at least 12 months before the opening day of the school term at this institution. I have been employed full-time in Idaho for the past 12 months.

□ I am a graduate of an accredited Idaho high school and I will attend this institution during the term immediately following graduation. If I am a community college applicant, this item may not be applicable to determine residency.

□ I am married to an Idaho resident. My spouse is a resident of _______ County.

□ I or my spouse is a member of the Armed Forces stationed in Idaho on military orders, or Idaho is my or my spouses designated military home of record. I or my spouse is stationed in_____________ County. Records may be requested.

□ One or more of my parents or legal guardians, from whom I receive fifty percent or more of my support, is a member of the Armed Forces stationed in Idaho. They are stationed in_____________ County. Records may be requested.

□ I have been separated under honorable conditions from the Armed Forces after at least two years of service. At the time of separation, I designated the State of Idaho as my intended domicile or indicated Idaho as my home of record, and I am entering this institution within one year of the date of separation. Records may be requested.

□ I have been away from the State of Idaho for a period of less than one calendar year. I have not established legal residence elsewhere. I was a resident of the State of Idaho for a continuous twelve month period immediately prior to departure.

□ I am a member of one of the following Idaho American Indian tribes: Coeur d’Alene, Kootenai, Nez Perce, Shoshone-Bannock, Shoshone-Paiute (including Colville Confederated, Flathead, Kalispel, Pend Oreille, and Spokane if applying to NIC). NIC applicants: Submit the NIC Tribal Verification Form to the Minority Student Advisor before registering for classes.

SIGNATURE

In signing this form, I acknowledge that failure to disclose and submit accurate information may result in denial of admission or dismissal from the institution. I certify that all information provided is complete and true. By signing this application, I certify that I am in compliance with the Federal Military Selective Service Act, 50 U.S.C. sec. 453, or that I am exempt from the same. Men between the ages of 18 and 25 must be registered with Selective Service to be eligible for enrollment at a state college, to receive state and federal financial aid, and to be employed in a state or federal job. You may register with Selective Services on-line at http://www.sss.gov.

Acceptance or receipt of financial aid and scholarship awards certifies that the funds will be used for educational purposes.

Signature of Applicant: ___________________________ Date: ___________________________

Idaho public colleges subscribe to the principles and laws of the State of Idaho and the Federal Government, including applicable executive orders pertaining to civil rights. These institutions are committed to the policy that all persons shall have equal access to programs and facilities without regard to age, color, creed, marital status, national or ethnic origin, physical handicap, race, religion, or sex.
